De Anza Blvd Buffered Bike Lanes

90% Design

Public Works - CIP

Contents

- Background
- Existing Layout
- 90% Design
- Construction Schedule

Background

2016 Bicycle Transportation Plan

- Tier 2 Bicycle Improvement Project

Recommends to “Study reconstruction of medians and/or lane reduction in both directions to accommodate buffered bike lanes”

FY 2022-2023 CIP Work Plan

- Amount allocated : \$525k

Design Constraints

- Budget
 - \$525k build
 - TDA3 Funds : \$166k
- Roadway width / geometrics
 - Lane removal necessary at:
 - NB - De Anza from SCB and Lazaneo Dr
 - SB - De Anza from SCB and Bollinger Rd
 - Preserve all left turn lanes at intersection
 - Preserve lane width for trucks and transit
 - Maintain 10.5' lanes next to medians and bike lanes

90% Design Elements

- Bike Buffers & Bike Lanes
 - 1.5' – 4' buffer zones
 - 5' – 7' bike lanes
- Some Additional Space for Bike Lane Buffers
 - 2' – 3' space btwn Bike lane and F.O.C.
 - Install White Edge Line to delineate space
- Approaches at Signalized Intersections
 - Right Turn Pockets at:
 - NB – Lazaneo Dr
 - SB - Rodrigues Ave
 - SB - McClellan Rd / Pacifica Dr
 - SB – Bollinger Rd
