SECTION 1	Economic Update
-----------	-----------------

**Account Profile SECTION 2** 

**Portfolio Holdings SECTION 3** 

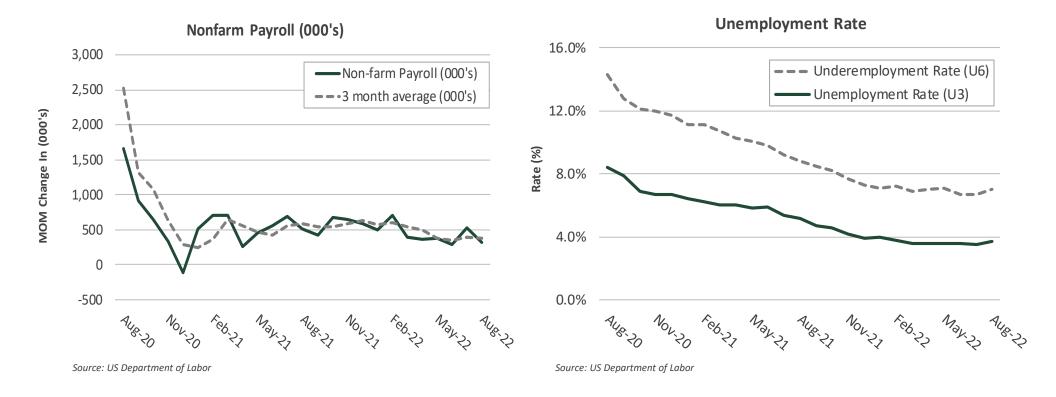

**Transactions SECTION 4** 

## **Economic Update**

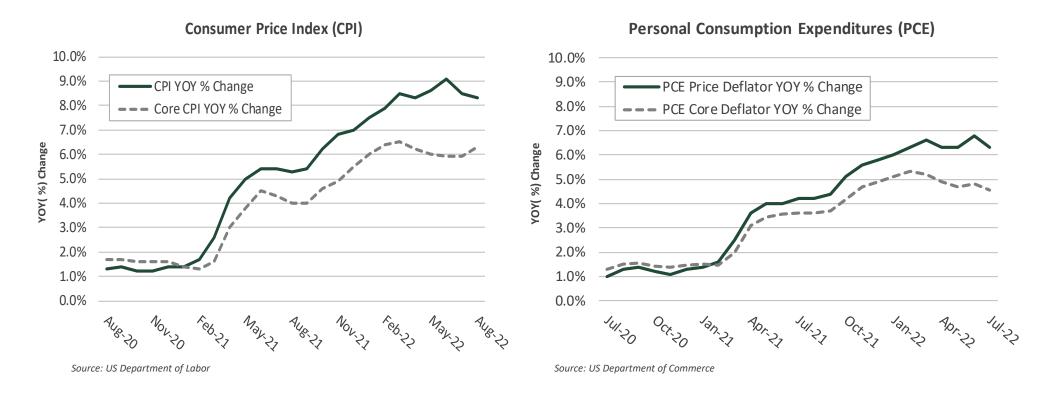

- Persistently high inflation and more restrictive monetary policies around the globe are setting the tone for financial markets. Labor markets and consumer balance sheets remain strong; however, inflation is weighing heavily on consumer sentiment and beginning to impact discretionary spending. Corporate earnings have generally performed better than expected. While evidence of slower economic conditions has begun to mount, we expect the Federal Reserve to continue to raise rates until a sustainable improvement in inflationary conditions has been achieved. Over the near-term, we expect financial market volatility to remain intensified and conditions to tighten with persistent inflation, geopolitical risk, supply chain bottlenecks, and the Fed's hawkish monetary policy.
- At the July meeting, the Federal Open Market Committee (FOMC) delivered another 75-basis point increase to the Fed Funds Rate, increasing the range to 2.25% to 2.50%. The FOMC acknowledged spending and production were trending lower, offset by a strong labor market and elevated inflation metrics. Although declining to provide "forward guidance", Fed Chair Powell acknowledged current policy settings are close to neutral but emphasized policy would need to move to a more restrictive stance to counterbalance the elevated inflation trends. We anticipate additional rates hikes as the Fed remains focused on lowering inflation.
- In August, yields rose, and the curve inverted further. The 2-year Treasury yield increased 61 basis points to 3.50%, the 5-year Treasury yield rose 68 basis points to 3.35%, and the 10-year Treasury yield gained 54 basis points to 3.20%. The spread between the 2-year Treasury yield and 10-year Treasury yield became more inverted at -30 basis points at August monthend versus -24 basis points at July month-end. The spread was a positive 110 basis points one year ago. The spread between 3-month and 10-year treasuries compressed to just 27 basis points in August. The shape of the curve does not necessarily indicate an imminent recession but bears watching as a better predictor of recession over the medium-term.

## **Employment**

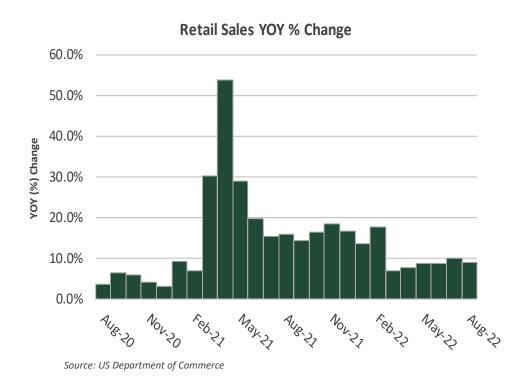

The U.S. economy added 315,000 jobs in August, surpassing market expectations of 298,000, while gains were revised downward by 107,000 for the prior two months. Trends in employment remain strong, with the three-month moving average payrolls at 378,000 and the six-month moving average at 381,000. Hiring was widespread, led by professional and business services, healthcare, and retail. The unemployment rate rose to 3.7% from 3.5%, as the labor participation rate increased to 62.4% from 62.1% in July. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons increased to 7.0% from 6.7% last month. Average hourly earnings rose 5.2% year-over-year in August, remaining consistent with July, adding to broader inflationary pressures in the economy. The strong August labor report bolsters the case for the Fed to continue raising the federal funds rate.

## Inflation

The Consumer Price Index (CPI) increased more than expected in August, with broad-based gains led by shelter and food. Headline CPI increased 8.3% year-over-year in August, versus expectations for an 8.0% increase, and down from an 8.5% year-over-year gain in July. Core CPI (CPI less food and energy) rose 6.2% year-over-year in August, up from a 5.9% year-over-year gain in July. The annual increase of rent and owner's equivalent rent of 6.3% and 6.6% respectively were the largest annual increases since 1986. The Personal Consumption Expenditures (PCE) index came in better than expected, up 6.3% year-over-year in July, versus a 6.8% year-over-year increase June. Core PCE was up 4.6% year-over-year in July, versus up 4.8% year-over-year in June. Persistently elevated inflation is likely to keep the Federal Reserve on the path of tightening monetary policy as long as it continues to run well above the Fed's longer-run target of around 2.0%.

## Consumer

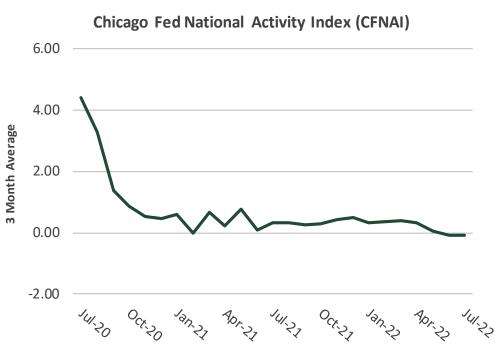

Source: The Conference Board

Retail sales unexpectedly rose in August by 9.1% year-over-year. Although the August data surprised to the upside, July was revised down to 10.1% growth year-over-year. Retail sales growth is at risk as consumers dip into savings and assume more debt. The Consumer Confidence index rose to 103.2 in August from a downwardly revised 95.3 in July. Both current conditions and future expectations improved from last month. Energy prices have eased; however, discretionary spending decisions remain pressured by broad-based inflation.

## **Economic Activity**

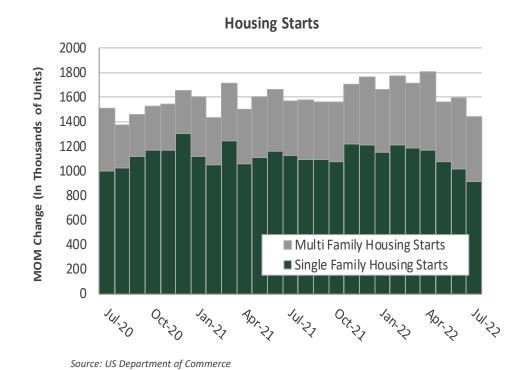

Source: Federal Reserve Bank of Chicago

The Conference Board's Leading Economic Index (LEI) decreased less than expected to -0.4% in July, following a decline to -0.7% in June. With the index now flat year-over-year versus +1.4% in June, the Conference Board stated that consumer pessimism, equity market volatility, and lower economic indicators suggest economic weakness will intensify and spread throughout the US economy. The Chicago Fed National Activity Index (CFNAI) rose to +0.27 in July with all four broad categories improving from a downwardly revised -0.25 in June. On a 3-month moving average basis, the CFNAI was unchanged at -0.09 in July.

## Housing

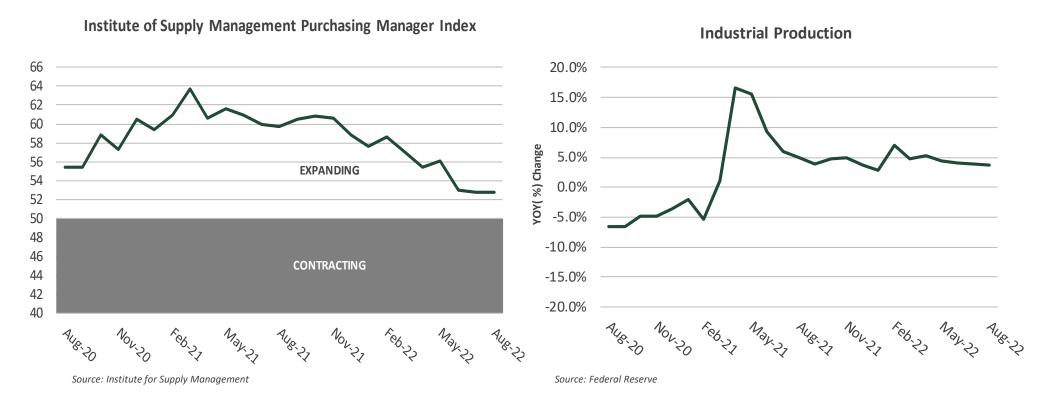

#### **S&P/Case-Shiller 20 City Composite Home Price Index**

Source: S&P

Total housing starts declined 9.6% to an annual rate of 1,446,000 in July, from a revised 1,599,000 in units in June. Single-family home starts fell by 10.1% and multi-family decreased 8.6% month-over-month. On a year-over-year basis, total housing starts decreased 8.1%, driven by a drop in all home types as homebuyers struggle with a combination of elevated prices and higher mortgage rates. According to the Case-Shiller 20-City home price index, home prices were up 18.6% year-over-year in June, easing from a 20.5% year-over-year increase in May. The rate of home price increases will likely continue to decelerate as the year progresses due to the substantial rise in mortgage rates and the negative performance of financial markets.

# Manufacturing

The Institute for Supply Management (ISM) manufacturing index was unchanged in August at 52.8, remaining stable from July. Readings above 50.0 are indicative of expansion in the manufacturing sector. Both new orders and employment improved, while price increases moderated. Total industrial production declined by -0.2% in August, following a downwardly revised increase of 0.5% in July. Capacity utilization fell to 80.0% in August from 80.2% in July, a rate that is 0.4 percentage points above its long-run (1972-2021) average.

## Gross Domestic Product (GDP)

According to the second estimate, U.S. GDP contracted less than originally reported, down -0.6% annualized in the second quarter, an improvement from the first estimate of -0.9%. The upturn reflected positive revisions for consumer spending and inventory investment. The largest negative contribution was from a drop in gross residential investment as the housing sector diminished sharply. The second quarter decline followed a first quarter contraction of -1.6%. Although many market participants link two quarters in a row of negative GDP growth with a recession, an official declaration by the National Bureau of Economic Research is unlikely given the mosaic of data and the strength of the labor market. The consensus estimate calls for 1.4% growth in the third quarter and 1.6% growth for the full year 2022.

## Federal Reserve

Source: Federal Reserve Source: Bloomberg

At the July meeting, the Federal Open Market Committee (FOMC) delivered another 75-basis point increase to the Fed Funds Rate, increasing the range to 2.25% to 2.50%. The FOMC acknowledged spending and production were trending lower, offset by a strong labor market and elevated inflation metrics. Although declining to provide "forward guidance", Fed Chair Powell acknowledged current policy settings are close to neutral but emphasized policy would need to move to a more restrictive stance to counterbalance the elevated inflation trends. The Fed will continue shrinking its \$9 trillion balance sheet by \$47.5 billion per month, increasing to \$95 billion in September. We anticipate additional rates hikes as the Fed remains focused on lowering inflation. As inflation metrics begin to moderate, we believe the Federal Reserve will decelerate their pace of tightening, but a material decline in inflation in the short-term is unlikely.

## **Bond Yields**

At the end of August, the 2-year Treasury yield was 329 basis points higher, and the 10-Year Treasury yield was about 189 basis points higher, year-over-year. The spread between the 2-year Treasury yield and 10-year Treasury yield became more inverted at -30 basis points at August month-end versus -24 basis points at July month-end. The average historical spread (since 2003) is about 130 basis points. The spread between 3-month and 10-year treasuries compressed to just 27 basis points. The shape of the yield curve does not indicate an imminent recession but bears watching as a better predictor of recession over the medium-term.

2022 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

## Benchmark Disclosures

#### ICE BofA 1-5 Yr US Treasury & Agency Index

The ICE BofA 1-5 Year US Treasury & Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for sovereigns and \$250 million for agencies.
