## ECONOMIC UPDATE

---

- Energy prices and inflation remained the primary drivers of the macro backdrop as the U.S.-Israel-Iran conflict entered its third month, disrupting global oil supply. Headline CPI accelerated at the fastest pace in more than three years, reflecting volatility in the energy component. Crude oil, however, retraced roughly 20% from its May–early June peak as diplomatic progress between the United States and Iran pointed to a potential framework for de-escalation. The labor market remained resilient, with continued payroll growth and subdued jobless claims. Risk assets held firm, as equities hovered near record highs and credit spreads remained historically tight amid broadly better-than-expected corporate earnings. Taken together, the current market environment has further constrained the case for near-term monetary policy easing, leading the Chandler team to push out its expected timing for rate cuts beyond the six-month investment horizon.
- The Federal Reserve’s June FOMC meeting ended with policymakers unanimously holding the target range at 3.50%–3.75%, a notable shift from the 8–4 split at April’s meeting, which marked Jerome Powell’s final session as Chair. Under new Chair Kevin Warsh, sworn in on May 22, the Committee released an unusually concise statement that referenced Middle East tensions and energy supply disruptions while removing prior forward guidance that had suggested a bias toward rate cuts. Updated projections leaned more hawkish, with 9 of 18 officials expecting at least one rate hike this year and 6 anticipating multiple increases. The shift signals that restoring price stability has reemerged as the central focus of monetary policy deliberations.
- The Treasury yield curve flattened modestly in June as short-term yields responded to a more hawkish shift in Federal Reserve guidance. The 2-year yield rose to 4.15% from 3.98% the prior month, while the 10-year yield edged down slightly to 4.44% from 4.45%. As a result, the 2s/10s spread narrowed to 29 basis points, down from roughly 47 basis points a month earlier and significantly below the 69 basis point spread at the start of the year. Meanwhile, the 3-month/10-year spread remained positive at 64 basis points. Front-end rates absorbed the bulk of the Fed’s updated rate outlook, while longer maturities were partly anchored by a late-month decline in oil prices.

Nonfarm payrolls increased by just 57,000 in June, well below the 113,000 consensus and marking a sharp slowdown from May's pace. The unemployment rate edged down to 4.2%, though the decline was driven by a drop in labor force participation to 61.5%, its lowest level since March 2021. Revisions further weakened the report's signal. April payrolls were revised down by 31,000 to 148,000, while May was lowered by 43,000 to 129,000, resulting in a combined two-month downward revision of 74,000.

Job openings were essentially unchanged at 7.6 million in May, remaining elevated by historical standards even as hiring momentum moderates. Gains in wholesale trade and accommodation and food services were offset by declines in health care and social assistance, as well as finance and insurance. April openings were revised down by 33,000 to 7.6 million, while hires were revised up by 99,000, highlighting ongoing churn but a broadly stable labor market backdrop.

Oil Prices

Source: Bloomberg Indices

US Fuel Prices

Source: Bloomberg Indices

Crude oil prices declined sharply in June as supply disruptions tied to the Middle East conflict began to ease. Tanker traffic through the Strait of Hormuz normalized, and signs of progress in U.S.–Iran negotiations helped unwind the geopolitical risk premium that had driven prices higher earlier in the year. West Texas Intermediate settled near \$69.37 per barrel on June 30, while Brent crude closed around \$72.96, both well below their recent peaks. Brent’s 21% monthly decline marked its steepest drop since March 2020, while WTI fell more than 20%, its largest monthly loss since late 2021. Beyond crude, broader energy markets also softened. Refined product cracks narrowed as gasoline and diesel demand showed signs of seasonal moderation, while U.S. natural gas prices remained range-bound amid ample storage and steady production. Taken together, the retracement in oil and broader energy prices reflects a rapid compression in geopolitical risk premia and improved near-term supply visibility, even as underlying structural risks in the region remain unresolved.

Consumer Price Index (CPI)

Source: US Department of Labor

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

Inflation firmed in May, with the Personal Consumption Expenditures (PCE) price index rising 0.4% on the month and 4.1% year over year, up from 3.8% in April and marking the highest annual rate of the current cycle. Core PCE, which excludes food and energy, increased 0.3% in May and 3.4% over the year. Energy prices remained the primary driver of the headline acceleration, reflecting supply disruptions tied to the Iranian conflict. A similar pattern was evident in the headline Consumer Price Index (CPI), which rose 0.5% on the month and 4.2% year over year, the fastest annual pace since 2023. Energy prices climbed 3.9% in May and 23.5% from a year earlier, largely due to crude oil reaching a four-year high. In contrast, core CPI rose a more modest 0.2% on the month and 2.9% year over year, indicating that inflation pressures remain concentrated in energy rather than broad-based.

Retail Sales YOY % Change

Source: US Department of Commerce

Consumer Confidence

Source: The Conference Board

All time high is 144.70 (1/31/00); All time low is 25.30 (2/28/09)

Retail sales rose a robust 0.9% in May to \$763.7 billion, nearly double the pace economists had penciled in and an acceleration from April's downwardly revised 0.4% gain. The closely watched control group, which feeds directly into gross domestic product calculations, advanced 0.7%, pointing to durable underlying demand. Gasoline station receipts rose as energy prices stayed high, while auto sales rebounded after an April pullback. The Conference Board's Consumer Confidence Index ticked up 0.6 points to 91.2 in June, though the improvement masked a further deterioration in how households view the job market, with the share calling jobs 'hard-to-get' climbing to a five year high. Spending has proven more resilient than sentiment across recent months.

The Conference Board's Leading Economic Index (LEI) edged up 0.1% in May to 99.3, following a revised 0.2% increase in April. Despite the monthly gains, the LEI's six- and twelve-month growth rates remained negative at -0.6% and -1.5%, respectively. The advance was driven primarily by financial components, including equity prices and the interest rate spread, while consumer expectations continued to weigh on the index. The Chicago Fed National Activity Index fell to -0.10 in May from an upwardly revised 0.19 in April. Production-related and employment-related indicators each subtracted from the index, while the sales, orders, and inventories category made a small positive contribution.

Annualized Housing Starts

Source: US Department of Commerce

S&amp;P/Case-Shiller 20 City Composite Home Price Index

Source: S&amp;P

Housing starts declined sharply in May to a seasonally adjusted annual rate of 1,177,000, a 15.4% drop from a downwardly revised 1,392,000 in April. The pullback was driven primarily by multifamily construction, while single-family starts edged down a more modest 1.9% to 882,000; total multifamily starts came in at 295,000 units. The S&P CoreLogic Case-Shiller 20-City Composite rose 1.1% year over year in April, marking its first pickup since November 2025, following an upwardly revised 0.9% gain in March. Freddie Mac's average 30-year fixed mortgage rate increased to 6.44% in May from 6.33% in April, reinforcing ongoing affordability constraints for prospective buyers.

## Institute of Supply Management (ISM) Surveys

Manufacturing activity cooled slightly in June, with the Institute for Supply Management's Manufacturing Index easing to 53.3%, down 0.7 percentage point from May but still marking a sixth consecutive month of expansion. Services activity also moderated, as the ISM Services Index eased to 54.0% from 54.5%, a twenty-fourth consecutive month in expansion territory. Business activity and new orders both slowed, though the employment component jumped to 51.2% from 47.9%, its strongest reading since late 2021 and the first expansion in services hiring in four months.

Source: US Department of Commerce

Gross Domestic Product (GDP)

Source: US Department of Commerce

Real gross domestic product increased at an annualized rate of 2.1% in the first quarter of 2026, according to the Bureau of Economic Analysis' third estimate, up from 1.6% in the prior estimate and an acceleration from 0.5% in the fourth quarter of 2025. The 0.5 percentage point upward revision was driven primarily by a downward revision to imports—which subtract from GDP—partly offset by a downward revision to consumer spending.

Source: Federal Reserve

Source: Bloomberg

The Federal Open Market Committee (FOMC) held the target range for the federal funds rate at 3.50% to 3.75% at its June 16–17 meeting, with a unanimous 12–0 vote. This marked a notable shift from the April meeting—Jerome Powell’s last as chair—which saw four dissents in an 8–4 decision. The return to consensus under Chair Kevin Warsh signals a clear change in tone. Minutes from the June meeting are scheduled for release in early July. The June Summary of Economic Projections reflected a more hawkish outlook. The median projection for the federal funds rate at year-end 2026 rose to 3.8%, up from 3.4% in March, before easing to 3.6% in 2027 and 3.4% in 2028. Officials also revised their inflation forecasts, with headline PCE projected at 3.6% in 2026 (from 2.7%) and core PCE at 3.3%. By contrast, median projections for real GDP growth and the unemployment rate—2.2% and 4.3%, respectively—were little changed.

Source: Bloomberg

Source: Bloomberg

Treasury yields ended June mixed, with a modest flattening across the curve as markets digested a more hawkish Federal Reserve signal. The 2-year yield rose to 4.15% from 3.98% at the end of May, while the 10-year yield edged down to 4.44% from 4.45%. The 2s/10s spread narrowed to 29 basis points, down from 47 basis points a month earlier. The 3-month/10-year spread remained positive at roughly 64 basis points at month-end. Relative to the 69 basis point spread at the start of 2026, the curve has flattened materially year to date, reflecting a repricing higher in front-end rates as expectations shift toward the possibility of further Fed tightening rather than easing.

## ACCOUNT PROFILE

---

### Investment Objectives

The City of Cupertino's investment objectives, in order of priority, are to provide safety to ensure the preservation of capital in the overall portfolio, provide sufficient liquidity for cash needs and a market rate of return consistent with the investment program.

### Chandler Asset Management Performance Objective

The performance objective for the portfolio is to earn a total rate of return through a market cycle that is equal to or above the return on the benchmark index.

### Strategy

In order to achieve these objectives, the portfolio invests in high quality fixed incomes securities consistent with the investment policy and California Government Code.

\*Periods over 1 year are annualized.

Total rate of return: A measure of a portfolio's performance over time. It is the internal rate of return, which equates the beginning value of the portfolio with the ending market value; it includes interest earnings, realized and unrealized gains and losses in the portfolio. Realized rate of return: A measure of a portfolio's return over time. It is the internal rate which equates the beginning book value of the portfolio with the ending book value; it includes interest earnings, realized gains and losses in the portfolio.

Benchmark: ICE BofA 1-5 Year Unsubordinated US Treasury & Agency Index

2026 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc (“IDS”), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client’s Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

ICE permits use of the ICE indices and related data on an “as is” basis; ICE, its affiliates and their respective third party suppliers disclaim any and all warranties and representations, express and/or implied, including any warranties of merchantability or fitness for a particular purpose or use, including the indices, index data and any data included in, related to, or derived therefrom. Neither ICE data, its affiliates or their respective third party providers guarantee the quality, adequacy, accuracy, timeliness or completeness of the indices or the index data or any component thereof, and the indices and index data and all components thereof are provided on an “as is” basis and licensee’s use it at licensee’s own risk. ICE data, its affiliates and their respective third party do not sponsor, endorse, or recommend chandler asset management, or any of its products or services.

This report is provided for informational purposes only and should not be construed as a specific investment or legal advice. The information contained herein was obtained from sources believed to be reliable as of the date of publication, but may become outdated or superseded at any time without notice. Any opinions or views expressed are based on current market conditions and are subject to change. This report may contain forecasts and forward-looking statements which are inherently limited and should not be relied upon as indicator of future results. Past performance is not indicative of future results. This report is not intended to constitute an offer, solicitation, recommendation or advice regarding any securities or investment strategy and should not be regarded by recipients as a substitute for the exercise of their own judgment.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody’s, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities (“MBS”) reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest.

**LGIP Yields:** Reported yields for local government investment pools may be presented as either the 30-day yield or the monthly distribution yield, as applicable. For certain funds, the 30-day yield is calculated using reported daily yield data. Yield calculations are subject to change and may not be directly comparable across funds.

**LAIF Yields:** Additional Disclosure for CA Clients - As a result of a reporting lag from the Local Agency Investment Fund (LAIF), reported LAIF yields represent the most recently available Daily Effective Yield and may reflect data from approximately 7–10 days prior to month-end.
