Subject: RE: 10268 Bandley Drive Phase 1 and 2 ESA Peer Review

Follow Up Flag: Follow up
Flag Status: Flagged

Rachel,
The reports by Roux were very thorough and well written. They addressed all of my comments, but I have one outstanding comment, similar to the one for the previous Phase I ESA (COCU-36).

Phase I ESA: The Phase I ESA has addressed all of PlaceWorks comments and meets the City's planning requirements. However, if the Phase I ESA is to be used in a property transfer (it doesn't appear from accessing the Santa Clara County assessor's office that a property transfer has yet occurred), then the Phase I ESA would need to be updated with new interviews, record searches, and a new site inspection of the subject property. Revised record searches, interviews, and a site reconnaissance were not included in the revised Phase I ESA.

Limited Phase II Investigation: All of PlaceWorks comments were addressed. No further changes are needed.

Cathy

Executive Summary

Roux Associates, Inc. (Roux) performed a Phase I Environmental Site Assessment (Phase I ESA) for the property located at 10268 Bandley Drive, Cupertino, California (Subject Property). This Phase I ESA was performed on behalf of SummerHill Homes LLC ("User"). The Subject Property occupies approximately 1.55 acres of land and is associated with the Assessor's Parcel Number (APN) 326-33-97 in Santa Clara County. The Subject Property is currently improved with a single-story office building and associated parking. The proposed redevelopment plan for the Subject Property is residential and includes the construction of 32 townhomes.

This Phase I ESA was performed to identify Recognized Environmental Conditions (RECs), controlled RECs (CRECs), and/or historical RECs (HRECs) at the Subject Property, indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Subject Property's soil, groundwater, soil vapor, or surface water. This Phase I ESA was conducted by investigating past Subject Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a reconnaissance of the Subject Property and surrounding area.

No REC, CRECs, or HRECs, were identified for the Subject Property during the Phase I ESA. In addition, No *de minimis* concerns[1] were identified.

A business environmental risk (BER) is a condition that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. One BER was identified for the Subject Property:

- The Subject Property was historically used for agricultural purposes from at least 1939 through at least 1980. Roux's document review and site reconnaissance found no evidence that agricultural chemicals were applied in noncompliance to labeling requirements, or stored in large quantities, spilled, transported, or formulated on the Subject Property. In addition, there was no evidence that past usage of pesticides, herbicides, or other agricultural chemicals were mixed, formulated, or disposed of at the Subject Property. Therefore, this is not considered a REC based on Legal Appendix X1.1.4.3.4 of ASTM E1527-21 but is considered a BER due to potential impacts to soil from pesticides, herbicides, and metals to shallow soils across the Subject Property.

One data gap[2] was identified:

- Enjoy Dance Studio (Suite 107) was not accessible at the time of the site reconnaissance. Photographs were taken from the windows, looking into the dance studio space and the suite appeared to be mostly open space. A co-owner of the Subject Property explained that the dance studio consists of two dance rooms, an open office area, and a small storage room. Given the use of this suite, it is not expected that this data gap would significantly alter the findings of the Phase I ESA.

Based on the findings of this Phase I ESA and the planned use of the Subject Property, Roux recommends a Limited Phase II Environmental Subsurface Investigation to assess the impacts of historical pesticide use at the Subject Property.

---

[1] A *de minimis* concern is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs, CRECs, or HRECs.

[2] A data gap is a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.

1. Introduction

Roux Associates, Inc. (Roux) performed a Phase I Environmental Site Assessment (Phase I ESA) for the property located at 10268 Bandley Drive in Cupertino, California (Subject Property). The location of the Subject Property is shown on Figure 1. This Phase I ESA was performed on behalf of SummerHill Homes LLC ("User")[1]. The Subject Property occupies approximately 1.55 acres of land, associated with the Assessor's Parcel Number (APN) 326-33-97 in Santa Clara County. The Subject Property is currently improved with one single-story office building and associated parking. The proposed redevelopment plan is residential and includes the construction of 32 townhomes.

The Phase I ESA was conducted in general accordance with the ASTM International Standard Practice E1527-21 (referred to hereinafter as "ASTM E1527-21")) based on Roux's understanding that User desires to complete "all appropriate inquiries into the previous ownership and uses of the Property" in order to qualify for liability protection under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).[2] Use of ASTM E1527-21 is consistent with the United States Environmental Protection Agency (EPA) Standards and Practices for All Appropriate Inquiries (AAI) Rule (40 CFR Part 312, Amendment to Standards and Practices for All Appropriate Inquiries Under CERCLA; Final Rule[3]), as amended effective February 13, 2023[4].

In accordance with ASTM E1527-21, the goal of the Phase I ESA is to identify any "recognized environmental conditions" that may exist at the Subject Property.

1.1 ASTM Definitions

This Phase I ESA will identify Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), Historical Recognized Environmental Conditions (HRECs), and/or de minimis conditions that may exist at the Subject Property in accordance with the following definitions contained within ASTM E1527-21.

RECs are defined by ASTM E1527-21 as:

> *(1) the presence of hazardous substances or petroleum products, in, on, or at the subject property due a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, or at the subject property due to a release of likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

CRECs are defined by ASTM E1527-21 as:

> *Recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)*

---

[1] In accordance with ASTM Standard Practice E1527-21, "'User' is defined as…the party seeking to use [ASTM Standard] Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager."

[2] Due to the User's ASTM E1527-21 responsibilities, Roux makes no guaranties or warranties, expressed or implied, that this Phase I ESA will in fact qualify User for a defense to CERCLA liability.

[3] Federal Register: December 30, 2013 (Volume 78, Number 250) page 79319.

[4] Federal Register: December 30, 2013 (Volume 78, Number 250) page 79319.

HRECs are defined by ASTM E1527-21 as:

> *A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historically recognized environmental condition is not a recognized environmental condition.*

De minimis conditions are defined by ASTM E1527-21 as:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

1.2 Phase I ESA Elements and User Responsibilities

In order to identify RECs/HRECs/CRECs that may exist at the Subject Property in accordance with ASTM E1527-21, the Phase I ESA conducted by Roux's Environmental Professional[5] will include the following four elements:

- Records review;
- Visual Inspection of Subject Property and adjoining properties;
- Interviews; and
- Preparation of a Phase I ESA Report.

In addition, Roux will evaluate any information provided by the User pursuant to the User's responsibilities under ASTM E1527-21. Several Phase I ESA tasks are the specific responsibility of the User of the Phase I ESA and should be reported to the Environmental Professional performing the Phase I ESA[6]. A partial list of these requirements is included herein by way of illustration only. ASTM E1527-21 should be referenced for the complete list of User's responsibilities.

- Communicate any information, based on the User's specialized knowledge or experience that is material to RECs in connection with the Property, to the Roux Environmental Professional performing the Phase I ESA ("Roux" is substituted hereinafter in this section for the "environmental professional" as used in ASTM E1527-21) prior to the performance of the site reconnaissance.
- Communicate to Roux prior to the performance of the site reconnaissance such actual knowledge User has of any environmental liens or activity and use limitations (AULs) encumbering the Property or in connection with the Property.
- Inform Roux if the User believes that the purchase price of the Property is lower than the fair market value due to contamination.
- Communicate to Roux prior to the performance of the site reconnaissance any commonly known or reasonably ascertainable information within the local community about the Property that is material to RECs in connection with the Property of which User is aware.
- Communicate to Roux the reason User wants to have the Phase I ESA performed.

---

[5] Environmental Professional is defined as a person meeting the education, training, and experience requirements as set forth in 40 CFR 312.10(b).

[6] ASTM E1527-21 provides an optional questionnaire to assist the User in conducting the necessary inquiries required by 40 C.F.R. 312.25, 312.28, 312.28, 312.29, 312.30, and 312.31.

- Completion of searches for recorded environmental liens is a User responsibility and should be provided to Roux.

Roux's Vice President and Principal Engineer, Angela Liang Cutting, Ph.D., P.E.-CA, Senior Geologist I, Emily Siegel, P.G.-CA, and Staff Geologist II, Jessica Aguayo, served as the Environmental Professionals who conducted the Phase I ESA. Ms. Cutting, Ms. Siegel, and Ms. Aguayo possess sufficient specific education, training, and experience to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases, as defined in 40 CFR §312.1I on, at, in, or to a Subject Property, sufficient to meet the objectives and performance factors in 40 CFR §312.20I and (f).

2. Methods of Investigation

The methods of investigation used to conduct this Phase I ESA are outlined in the following sections.

2.1 General

The activities performed in conjunction with the Phase I ESA of the Property include:

- Review of federal, state, and local environmental regulatory agency databases provided by Environmental Data Resources, Inc. of Milford, Connecticut (EDR), indicating locations of environmental concern within specified radii from the Subject Property and adjoining properties;
- Review of historical information for the Subject Property, adjoining properties, and surrounding area, including aerial photographs, topographic maps, City Directory data, and other relevant historical information sources;
- Submission of FOIA requests/public requests and inquiries to federal, state, and local regulatory agencies;
- Reconnaissance of the Subject Property and surrounding areas and interview with key Subject Property representative; and,
- Submission of a User Questionnaire.

2.2 Review of Readily Available Information

The resources compiled and reviewed by Roux to-date include the following:

- EDR Radius Report with GeoCheck®, dated January 27, 2025 (Appendix A);
- EDR United States Geological Survey Historical Topographic Maps: Palo Alto 15-minute dated 1897, 1899, 1943, 1947, and 1948; Santa Cruz 30-minute dated 1902; Cupertino 7.5-minute dated 1953, 1961, 1968, 1973, 1980, 1995, 2012, 2015, 2018, and 2021 (Appendix B);
- EDR aerial photographs dated 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1998, 2006, 2009, 2012, 2016, and 2020 (Appendix C);
- EDR City Directory Image Report, dated January 29, 2025 (Appendix D);
- EDR Certified Sanborn® Map Report dated January 27, 2025 (Appendix E);
- Public records from the public agencies listed in Table E in Section 4.3. and relevant documents obtained from public records review (Appendix F); and
- User questionnaire and User-provided documents (Appendix G).

2.3 Property and Surrounding Area Reconnaissance

Pursuant to ASTM Standard Practice E1527-21, Roux conducted a reconnaissance of the Subject Property and surrounding area on February 6, 2025, to identify, investigate, and assess potential RECs and other potential environmental concerns. The reconnaissance included observation of the Subject Property, including all structures and buildings, and surrounding area to determine the current use and condition of the Subject Property, indications of past uses of the Subject Property, and current uses of adjoining properties and the surrounding area.

Roux placed particular emphasis on identifying the following features listed in ASTM E1527-21, if present and viewable from the public right of ways:

- Hazardous substances and petroleum products in connection with identified uses;
- Storage tanks;

- Odors;
- Pools of liquid;
- Drums;
- Hazardous substances and petroleum products containers;
- Unidentified substance containers;
- Polychlorinated biphenyls (PCBs);
- Heating and cooling systems;
- Stains or corrosion;
- Drains and sumps;
- Pits, ponds, or lagoons;
- Stained soil or pavement;
- Stressed vegetation;
- Solid waste;
- Wastewater;
- Wells; and,
- Septic systems.

In addition, observation of the general topographic setting of the Subject Property was made, and inquiry was made into the source of potable water for the Subject Property and other utilities, as presented in Section 5.0. Photographs from the reconnaissance are presented in Appendix H.

2.4 Out of Scope Services

Roux did not conduct a visual inspection for asbestos-containing materials (ACM) or lead-based paints (LBP) in structures at the Subject Property because this environmental area is considered “out of scope” under ASTM E1527-21. No out-of-scope services were provided.

3. Property Description

Descriptions of the Subject Property and surrounding facilities are included in the following sections. Figure 1 presents the location of the Subject Property in the general context of the City of Cupertino. Figure 2 presents an aerial view of the Subject Property and the surrounding area.

3.1 Property Location and Description

The Subject Property is located in a mixed residential and commercial neighborhood in Cupertino, California. The Subject Property is currently developed with one commercial building and associated parking areas, and small strips of landscaped planters. The Subject Property is bordered by commercial buildings to the north and south, a parking lot to the east, and Bandley Drive to the west as shown on Figure 2.

3.2 Surrounding Area Uses

The Subject Property is located in a mixed residential and commercial area of Cupertino, California. Table A below lists the surrounding area uses.

Table A. Surrounding Property Uses

Direction	Use
North	North of the Subject Property are commercial office buildings and associated parking lots. Interstate-280 (I-280) is located approximately 0.4 miles north of the Subject Property.
South	Immediately south of the Subject Property is a commercial office building, followed by Lazaneo Drive, beyond which are commercial buildings including a market, small restaurants, banks, office spaces, and associated parking lots. A four-lane major road, Stevens Creek Boulevard, is located approximately 0.3 miles south of the Subject Property.
East	Immediately east of the Subject Property is a parking lot, east of which is an 8-lane major road, N De Anza Boulevard, commercial buildings, and a residential neighborhood. Sam H Lawson Middle School is located approximately 0.25 miles to the east of the Subject Property.
West	Immediately west of the Subject Property is Bandley Drive, beyond which are various commercial buildings, including offices, a music school, a church, and associated parking lots. West of these commercial spaces is a residential neighborhood.

3.3 Topographic and Hydrogeologic Setting

According to the EDR Radius Map Report (Appendix A), the Subject Property is at an elevation of approximately 245 feet above mean sea level (amsl). The general topography in the vicinity of the Subject Property slopes gently to the east-northeast. The Subject Property falls within the Santa Clara Valley Water District's West Valley Watershed,[7] which flows north into the San Francisco Bay. According to the U.S. Fish and Wildlife Service National Wetlands Inventory (NWI)[8], the nearest surface water bodies include a freshwater pond located approximately 0.7 miles southwest (however, it should be noted that this pond does

[7] Santa Clara Valley Water District. Watersheds of Santa Clara Valley, West Valley Watershed Fast Facts. Accessed February 11, 2025. (https://www.valleywater.org/learning-center/watersheds-santa-clara-valley/west-valley-watershed-fast-facts).

[8] U.S. Fish and Wildlife Service. National Wetlands Inventory (NWI), Wetlands Mapper. Accessed February 6, 2024. (https://fwsprimary.wim.usgs.gov/wetlands/apps/wetlands-mapper/).

not appear in recent aerial photographs), Regnart Creek located approximately 0.8 miles south, Calabazas Creek located approximately 1.2 miles southeast, and Stevens Creek located approximately 1.4 miles east.

According to the U.S. Geological Survey (USGS), the geology in the vicinity of the Subject Property primarily consists of Holocene alluvial fan deposits and late Pleistocene alluvial terrace deposits.[9] Surface soils in the vicinity of the Subject Property are generally characterized as sandy loam. The clay loam extends to a depth of approximately 9 inches below ground surface (bgs), underlain by silty clay loam to 41 inches bgs, and sandy clay loam to 76 inches bgs.[10]

The Subject Property is situated within the Santa Clara Valley Groundwater Basin in the Santa Clara Valley subbasin.[11,12] Based on groundwater data from a nearby site in 2006, located at 20755 Stevens Creek Blvd (southwest of the Subject Property) and groundwater data from a nearby site in 2009, located at 10165 North De Anza Blvd (southwest of the Subject Property), depth to groundwater in the vicinity of the Subject Property can range from approximately 115 to 120 feet bgs. Groundwater generally flows to the north-northeast; however, some southeast orientations have also been documented. In some areas of the valley floor, the groundwater gradient is essentially flat, resulting in great variability and significant seasonal changes in site specific groundwater flow directions. [13,14]

4. Property History

The historical and current uses of the Subject Property and surrounding sites were researched by reviewing historical aerial photographs, historical topographic maps, city directories, the EDR Radius Map Report, information gathered from government agencies, and User provided documentation. The review summaries are presented in the following sections.

4.1 Historical Sources Summary

The land use history of the Subject Property was developed by searching historical topographic maps, city directories, and aerial photographs. No Sanborn Maps were available for the Subject Property. Historical research documentation is provided in Appendices B through E. Based on the available sources, the following chronology of the Subject Property and surrounding vicinity was developed (Table B).

Table B. Subject Property and Vicinity History

Source	Year	Status
Topographic Map	1897, 1899, 1902	In the 1897, 1899 and 1902 topographic maps, the Subject Property appears to be undeveloped. The surrounding vicinity is developed with roads and various small buildings, assumed to be residential homes. Calabazas Creek is depicted approximately 1 mile east-southeast of the Subject Property.
Aerial Photograph	1939	The Subject Property and surrounding vicinity appear to be used primarily for agricultural purposes, specifically as orchards. Few small buildings, likely residences, are depicted in the vicinity and as close as 150 feet from the Subject Property.
Topographic Map	1943, 1947,	Additional development has occurred in the vicinity of the Subject Property. Some nearby roads have been reworked, the current-day streets N De Anza Boulevard and Stevens Creek Boulevard are shown. A single-track railroad trending generally northwest to southeast (Southern Pacific) is depicted approximately 1 mile southwest of the Subject Property. The 1943 and1947 topographic maps are otherwise consistent with previous topographic maps. Orchards are depicted to approximately 0.75 miles and beyond to the southwest and west of the Subject Property.
Topographic Map	1948	Orchards are depicted on the Subject Property and surrounding vicinity. Various small buildings are still shown near the Subject Property. The 1948 topographic maps are otherwise consistent with previous topographic maps.
Aerial Photograph	1948	The Subject Property and surrounding vicinity remain primarily agricultural with orchards. The 1948 aerial photograph is otherwise consistent with the 1939 aerial photograph.
Aerial Photograph	1950	Additional buildings have been built in the vicinity of the Subject Property. The 1950 aerial photograph is otherwise consistent with the 1948 aerial photograph.
Topographic Map	1953	Residential neighborhoods and commercial developments have been constructed within a mile of the Subject Property. The 1953 and 1961 topographic maps are otherwise consistent with previous topographic maps.
Topographic Map	1961	A small building appears on the northeast corner of the Subject Property. Additional buildings are depicted to the north of the Subject Property, within 0.25-mile. The 1961 topographic map is otherwise consistent with previous topographic maps

Source	Year	Status
Aerial Photograph	1956	The small building shown on the northeastern corner of the Subject Property in the 1961 topographic map is shown directly outside of the Subject Property boundary in the 1956 aerial photograph. Small buildings are shown east adjacent to the Subject Property. Orchards approximately 400 feet to the west of the Subject Property and 0.4-mile to the south of the Subject Property have been developed into residential neighborhoods. The 1956 aerial photograph is otherwise consistent with the 1950 aerial photograph.
Aerial Photograph	1963	Additional residential neighborhoods and commercial buildings have been developed within ½ of a mile to the southwest of the Subject Property. The 1963 aerial photograph is otherwise consistent to the 1956 aerial photograph.
Aerial Photograph	1968	A few additional buildings have been constructed with residences 150 feet southwest of the Subject Property and commercial buildings within 0.2 miles to the southeast and southwest of the Subject Property. I-280 is shown going in the west-east direction, approximately 0.5 mile north from the Subject Property. The 1968 aerial is otherwise consistent with the 1963 aerial photograph.
Topographic Map	1968	Additional development has occurred in the vicinity of the Subject Property. I-280 is shown going in the west-east direction, approximately 0.5 mile north of the Subject Property.
Topographic Map	1973	A portion of California State Route 85 (CA-85), going in the north-south direction, has been constructed off of I-280, approximately 1 mile northwest of the Subject Property.
Aerial Photograph	1974	Additional commercial buildings and associated parking lots have been developed within 0.5 mile to the south and east of the Subject Property. The 1974 aerial photograph is otherwise consistent with the 1968 aerial photograph.
City Directory	1976	There is no listing for the Subject Property. Nearby property occupants include the following: • "Egenhoff Frank C" and "Smart Clinic" at 10627 Bandley Drive
Topographic Map	1980	Orchards are no longer depicted on the Subject Property or surrounding vicinity. A building, appearing in the configuration of the current building, is now shown on the Subject Property. Additional development has occurred in the vicinity of the Subject Property, including a large building to the south of the Subject Property, and three large buildings across the street west of the Subject Property.
City Directory	1981	There is no listing for the Subject Property. Adjacent property occupants include the following: • "Apple Computer Inc" at 10260 Bandley Drive • "Intl Memories Inc" at 10381 Bandley Drive • "Zytron Data Systems" and "Zytron Graphics" at 10441 Bandley Drive Other listed properties in the vicinity are commercial retailers including restaurants, a grocery store, a medical clinic, and offices. Other listed properties include "Berg & Berg Indstrl" at 10375 Bandley Drive,
Aerial Photograph	1982	The Subject Property surrounding ½ of a mile vicinity has been fully developed, most buildings are consistent with their current configurations. There are no visible orchards, and the surrounding area is now primarily mixed residential and commercial.
City Directory	1985	There is no listing for the Subject Property. Adjacent property occupants include the following: • "Dorado Micro Systms" and "1 MI", Intl Memories Inc" at 10381 Bandley Drive

Source	Year	Status
		• "Acctex Corporation" and "Imedia Corporation" 10441 Bandley Drive Other listed properties in the vicinity are commercial retailers including restaurants, offices, hair salons, and a possible dry cleaner, "Delias Cleaners Inc" at 10118 Bandley Drive. "Berg & Berg Indstrl" is still listed at 10375 Bandley Drive.
Aerial Photograph	1998	Buildings adjacent to the Subject Property are consistent with their current configurations. There have been some additional building redevelopments within 0.5-mile from the Subject Property. The 1998 aerial photograph is otherwise consistent with the 1982 aerial photograph.
Topographic Map	1995	The 1995 topographic map appears consistent with the 1980 topographic map.
City Directory	2000	There is no listing for the Subject Property. Adjacent property occupants include: • "CKS Interactive" and "CKS Pictures" at 10443 Bandley Drive • "Automated Power Exchange", "Pluris Incorporated", "Sager, Glenn T" at 10455 Bandley Drive • "Extreme Networks" at 10460 Bandley Drive Other listed properties include a manufacturing company "Ewing Foley", at 10495 Bandley Drive.
City Directory	2005	There is no listing for the Subject Property. Adjacent property occupants include: • "4 Everfit Personal Training" at 10441 Bandley Drive • "Ducati North America Inc" at 10443 Bandley Drive, which appears to be the company's office headquarters • "Chinese Church in Christ Cupertino" and "JM & LMS" at 10455 Bandley Drive Other listed properties in the vicinity included a church.
Aerial Photograph	2006, 2009	The 2006 and 2009 aerial photographs appear consistent with the 1998 aerial photograph.
City Directory	2010	The Subject Property is listed under "De Anza Learning Ctr", "Jessie Ho Law Office", "Kung Fu Direct", "Mays Tax & Business Svc", "Mays Tech Accounting Svc", "Professional Design", "Sin Yee Co", and "United Systems Technology". Adjacent Property occupants include the following: • Chinese Church in Christ", "JMLMS", "Little Mustard Seed Campus Inc", and "Sutton Swim School" at 10455 Bandley Drive There were no other listings in the surrounding vicinity.
Topographic Map	2012	CA-85, approximately 1 mile west of the Subject Property, has been extended further to the south, going in the southeastern-northwest direction. The 2012 topographic map is otherwise consistent with previous topographic maps.
Topographic Map	2015	The 2015 topographic map appears consistent with previous topographic maps.
Aerial Photograph	2012, 2016	The 2012 and 2016 aerial photographs appear consistent with the previous aerial photographs.
City Directory	2014	The Subject Property is listed under "ADT Security Services", "Business Builders", "Cupertino Driving School", "De Anza Learning Center", "Ho Jessie Law Office of", "Mays Tax Service", "Professional Design", and "United Systems Technology". Adjacent property occupants include the following: • "Bandley Drive" at 10441 Bandley Drive • "Ducati North America" at 10443 Bandley Drive

Source	Year	Status
		• "Chinese Church in Christ Cupertino", "JM LMS", and "Sutton Swim School" at 10455 Bandley Drive There were no other listings in the surrounding vicinity.
Topographic Map	2018	The 2018 topographic map appears consistent with previous topographic maps.
City Directory	2017	The Subject Property is listed under "Business Builders", "Cupertino Driving School", "De Anza Learning Center", "Ho Jessie Law Office", "Mays Tax Service", "Professional Design", and "United Systems Technology". Adjacent property occupants include the following: • "Bandley Drive" at 10441 Bandley Drive • "Ducati North America" at 10443 Bandley Drive • "Chinese Church in Christ Cupertino" and "JM LMS" at 10455 Bandley Drive There were no other listings in the surrounding vicinity.
City Directory	2020	The Subject Property is listed under "Business Builders", "De Anza Learning Ctr", "Ho Jessie Law Office", "Mays Tax Svc", "Neo Assets Management Inc", "Neuronbasic Technology Inc", "Old Soul Scents Inc", "Passage 2 Prosperity Inc", "Professional Design", and "Z Kitchen & Bath Inc". Adjacent property occupants include the following: • "4 Ever-Fit Personal Training" and "County of Santa Clara" at 10441 Bandley Drive • "Bevel Heaven" at 10443 Bandley Drive • "Brilliant Biotech Corp", "Chinese Church in Christ-Cprtn", "JMLMS", and "Joyful Melodies Music School" at 10455 Bandley Drive There were no other listings in the surrounding vicinity.
Aerial Photograph	2020	The 2020 aerial photograph appears consistent with previous aerial photographs.
Topographic Map	2021	The 2021 topographic map appears consistent with previous topographic maps.

The Subject Property appears to have been used for agricultural purposes as orchards from at least 1939 through at least 1980. According to the City Directory, the Subject Property was occupied by commercial use tenants, primarily as offices and retail shops, from 2010 through 2020.

The surrounding vicinity appears to have been used primarily as orchards from at least 1939 through the mid-1950s. Beginning in the 1950s, the surrounding area began to be converted into mixed residential and commercial neighborhoods. Adjacent property occupants dating back to 1976 include commercial retailers, such as offices, a grocery store, a gym, and churches.

4.2 EDR Database Search

Roux used a computerized environmental database and radius map report prepared by EDR to conduct a government records database search of sites of potential environmental concern within a one-mile radius of the Subject Property. Appendix A contains a complete copy of the EDR Radius Map Report with GeoCheck. Table C shows the search results for all the pertinent databases that indicated potential environmental concerns at the Subject Property and sites within a one-mile radius of the Subject Property. A description of the databases can be found in the EDR Radius Report (Appendix A).

Table C. EDR Listings for Facilities Within 1-mile of the Subject Property

[15] Descriptions of the EDR databases can be found in the EDR Radius Map Report (Appendix A).

Based on the EDR listings provided in Table C, only the Subject Property and the offsite facilities that meet the criteria presented below are discussed further in Sections 4.2.1 and 4.2.2.

- Facilities located immediately adjacent to the Subject Property were examined due to their proximity to the Subject Property and the potential for surface water discharges (e.g., stormwater runoff, surface water effluent discharges) to enter the Subject Property or through the migration of groundwater or soil vapor.
- Facilities within 1/2-mile of the Subject Property located topographically or hydraulically upgradient of the Subject Property were examined due to their potential environmental impact to the Subject Property through the migration of contaminated surface water, groundwater, and/or soil vapor. As discussed in Section 3.3, groundwater flow direction in the vicinity of the Subject Property flows northeast according to data from GeoTracker.
- For upgradient or adjacent facilities, the review is focused on database listings at off-site facilities that may be indicative of a release that could impact the Subject Property. Facilities with records in databases where listings are only for regular site operations, with no evidence of release, are not by themselves considered to represent potential RECs for the Subject Property, (e.g., listings in a database of hazardous waste manifests, or of hazardous materials use.) The following databases contain such record: FINDS, ECHO, EMI, HAZNET, HWTS, RCRA NonGen / NLR, RCRA-SQG, RCRA-LQG, CERS, and CERS HAZ WASTE. If no release has specifically been reported in another database, then the presence of a facility with listings only in these following databases is assumed not to represent a potential REC for the Subject Property, and listings for those facilities are not included for further review in this Section.
- As such, facility listings located on the Subject Property, immediately adjacent to the Subject Property, or within 1/2-mile upgradient of the Subject Property are discussed as having a potential impact on subsurface conditions at the Subject Property.

Relevant EDR database listings for the Subject Property and off-Subject Property facilities are provided and discussed in Sections 4.2.1. and 4.2.2.

4.2.1 Subject Property Listings

The Subject Property is not listed under any database of Additional Environmental Records in the EDR Radius Map Report. The Subject Property was not identified in any of the databases of Standard Environmental Records, which are those required for review under the ASTM Standard for Phase I ESAs, or in any EDR Historical Records.

4.2.2 Off-Subject Property Listings Indicative of a Potential Release

Off-Subject Property listings indicative of a documented potential release are discussed below. There are no immediately adjacent sites with listings indicative of a release.

CVS Pharmacy #16114 at 20755 Stevens Creek Blvd – 1,240 ft southwest (upgradient)

This facility was listed under the California Hazardous Material Incident Report System (CHMIRS) database due to a hydrochloric acid spill at the Target Store dock (presumably with a CVS Pharmacy within the Target Store). Two gallons of the substance were released after a container fell and broke, Target arranged for the spill clean-up. No other information was available related to this listing.[17]

Given the small quantity of the spill and the immediate cleanup response, it is not expected that this facility represents an environmental concern for the Subject Property.

Unocal Station / ConocoPhillips / Union Oil at 20755 Stevens Creek Blvd – 1,600 ft southwest (upgradient)

This facility appears to have been a former gasoline service station, based on the EDR HIST AUTO listings from the 1990s through the early 2010s. The facility is associated with a closed leaking underground storage tank (LUST) case, opened in June 2003, regarding a 1985 release of gasoline during construction activities. According to GeoTracker, in February 1986, three 10,000-gallon underground storage tanks (USTs) were removed from the property, and soil samples were collected from beneath the removed USTs at 15 to 19 feet bgs. Concentrations of total petroleum hydrocarbons as gasoline (TPH-g) in the samples ranged from 5 to 73 milligrams per kilogram (mg/kg). In 1993, the product lines and fuel dispensers at the facility were replaced and additional soil samples were collected from the product line trenches and adjacent to dispenser islands and analyzed for TPH-g, benzene, toluene, ethylbenzene, and xylenes (BTEX). None of the analyzed compounds were detected above laboratory reporting limits.

Additional soil samples were collected in 2003, which indicated low levels of methyl tert-butyl ether (MTBE) and tert butyl alcohol (TBA) in soil between 95 and 100 feet bgs. Quarterly groundwater sampling was conducted at this facility between 2004 and 2006 from groundwater monitoring wells screened between 138 and 158 feet bgs, which indicated maximum concentrations of 58 micrograms per liter (µg/L) TPH-g, 0.65 µg/L MTBE, and 150 µg/L TBA in groundwater. The case was closed in December 2006, with the County of Santa Clara Department of Environmental Health (DEH) concluding that there is no significant threat to groundwater, human health, or the environment at this facility.[18]

Given the significant distance of this facility relative to the Subject Property, low concentrations of petroleum contaminants in groundwater, significant depth to groundwater, and the case closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

Anderson of Cupertino at 20955 Stevens Creek Blvd – 2,225 ft southwest (upgradient)

This facility formerly operated as an automobile service and dealership. In 1998, a leak was reported and a 550-gallon used oil UST was removed at the facility. The UST appeared to be in good condition with no holes. Soil samples were collected from the UST excavation. TPH as motor oil (TPH-mo) was detected at a

[17] Appendix A. EDR Radius Map Report.
[18] County of Santa Clara Department of Environmental Health (DEH), 2006. Fuel Leak Site Closure, ConocoPhillips, 20755 Stevens Creek Blvd., Cupertino, CA (T0608574700). December 1. https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/5188601434/CLOS_L_2006-12-01.pdf

concentration of 140 mg/kg. The Santa Clara Valley Water District determined the small amount of soil contamination did not pose a threat to groundwater and issued case closure that same year.[19]

A soil investigation was conducted in 2006 to provide confirmation sampling data following the removal of a hydraulic lift and clarifier. Soils with concentrations exceeding San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs) for TPH-mo were over excavated and removed. Confirmation soil samples were collected throughout the site and the sampling results were below the laboratory reporting limits. The consultant, EFI Global, recommended no further sampling.

Given the significant distance of this facility relative to the Subject Property and the case closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

Shell / De Anza Shell at 20999 Stevens Creek Blvd – 2,475 ft southwest (upgradient)

This facility operates as a Shell service station. In 1998, a dispenser release was discovered during station upgrades at the facility. Soil samples were collected. The reported maximum concentrations were15,000 mg/kg for TPH-d, 740 mg/kg for TPH-g, 0.0052 mg/kg for benzene, and 0.36 mg/kg for MTBE. Approximately 125 tons of soil was excavated from the product line and dispenser areas. In 1999, exploratory borings were advanced for soil samples and a groundwater monitoring well was installed. Concentrations in soil were reported at 59.9 mg/kg (TPH-d), and 3.81 mg/kg (MTBE), and below the laboratory reporting limits for TPH-g or benzene. MTBE was detected in groundwater at 6.02 µg/L.

The Santa Clara Valley Water District concluded that the residual petroleum hydrocarbons at this facility do not pose a threat to groundwater or human health, and the case was closed in 2000. However, Santa Clara Valley Water District recommended environmental monitoring to proactively monitor MTBE in groundwater and detect any new releases.[20] Reports available on GeoTracker suggest voluntary monitoring occurred from 2002 to 2008, with MTBE concentrations below the laboratory reporting limits during the last 2008 sampling.[21]

Given the significant distance of this facility relative to the Subject Property, the case closure status, and the last available groundwater monitoring results, it is not expected that this facility represents a significant environmental concern for the Subject Property.

Arco #5333 at Stevens Creek / Stelling Road – 2,630 ft southwest (upgradient)

This former gas station had a leak reported in 1989. The site had three USTs, product lines, and one waste oil tank removed. Soil in the vicinity of the USTs and piping was over excavated to non-detectable levels. Water samples collected at the site did not contain detectable concentrations of dissolved hydrocarbons. The Santa Clara Valley Water District closed the case in 1990, agreeing that groundwater beneath the site had not been contaminated.[22]

Given the significant distance of this facility relative to the Subject Property and the case closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

4.2.3 Additional Off-Subject Property Sites Indicative of a Potential Release

Additional Off-Subject Property sites were evaluated on databases not otherwise included above in EDR Database searches (i.e. GeoTracker and EnviroStor), for listings indicative of a documented potential release. The following sites were identified and discussed below.

Apple Computer at 10500 North De Anza Boulevard – 430 ft northeast (downgradient)

The Apple Computer site, which operated as Apple's networking and communications and systems engineering building housed a 1,000-gallon diesel UST for emergency generator use. In 1988, the UST was removed and there were over-excavations of the surrounding soil to remove identified staining of soil from a small hole in the bottom of the tank. Confirmation soil sampling showed there were no residual concentrations of petroleum hydrocarbons. Santa Clara Valley Water District determined there was no threat to groundwater and this LUST cleanup case was closed in 1991.[23]

Based on the soil confirmation sampling, the impacted soil was removed and there was no residual COCs remaining in the soil, the potential for petroleum vapors to migrate from this facility to the Subject Property is relatively low. Therefore, the vapor migration pathway is considered incomplete. It is not expected that this facility represents a significant environmental concern for the Subject Property.

Cupertino Nursery at 10431 North De Anza Boulevard – 510 ft north-northeast (downgradient)

Cupertino Nursery had a reported gasoline leak from a former 500-gallon UST. In 1991, the UST was removed and there was an over excavation of the surrounding soil. Soil samples collected confirmed that the contaminated soil has been removed. This LUST cleanup case was closed in 1992.[24]

Based on the soil confirmation sampling, the impacted soil was removed and there was no residual COCs remaining in the soil, the potential for petroleum vapors to migrate from this facility to the Subject Property is relatively low. Therefore, the vapor migration pathway is considered incomplete. It is not expected that this facility represents a significant environmental concern for the Subject Property.

Cupertino Clean Scene at 10165 North De Anza Boulevard – 600 ft southeast (cross-gradient)

Cupertino Clean Scene formerly operated as a car wash station and had a reported UST fuel release. Investigations at this site took place beginning in 1998 and included the removal of three 10,000-gallon diesel USTs and one 10,000-gallon gasoline UST, soil excavations, soil sampling, the installation and sampling of onsite and offsite groundwater monitoring wells, soil vapor well installation, and a soil vapor extraction system. Maximum initial concentrations in soil samples were detected at 2,100 mg/kg (TPH-g), 370 mg/kg (TPH-d), 1.3 mg/kg (benzene), 15 mg/kg (toluene), 160 mg/kg (xylene), 26 mg/kg (ethylbenzene), 14 mg/kg (lead), 0.17 mg/kg (MTBE), and 24 mg/kg (1,2-DCA). Maximum initial concentrations in groundwater samples were detected at 120,000 µg/L (TPH-g), 15,000 µg/L (TPH-d), 13,000 µg/L (benzene), 16,000 µg/L (toluene), 21,000 µg/L (xylene), 4,000 µg/L (ethylbenzene), 20 µg/L (MTBE) and 1200 µg/L (1,2-DCA).

---

[23] Santa Clara Valley Water District. 1992. Case Closure for Apple Computer, 10500 North DeAnza Boulevard, Cupertino -Site Code No. 56G. January 17. https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/4028584122/CLOS_L_1992-01-17.pdf

[24] Santa Clara Valley Water District. 1992. Case Closure for Cupertino Nursery, 10431 North DeAnza Boulevard, Cupertino -Site Code No. 16F. January 24. https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/6706501603/0004.pdf

A pulsed soil vapor extraction (SVE) system operated from 2008 through 2010 and removed approximately 7,721 pounds of TPH. Periodic groundwater monitoring occurred from 2001 through 2011. In 2011, the last round of groundwater samples collected at the facility had no chemicals of concern (COCs) detected.

In 2011, two 1,000-gallon gasoline USTs and piping were removed, and soil samples were collected within the removal explanation. The last soil samples collected had concentrations at 166 mg/kg (TPH-g), 370 mg/kg (TPH-d), 0.359 mg/kg (benzene), 12.1 mg/kg (toluene), 107 mg/kg (xylene), 27.9 mg/kg (ethylbenzene), and 14 mg/kg (lead). Soil samples showed significantly lower COC concentrations in soil samples compared to previously reported concentrations. Though residual COC concentrations were expected to remain in soil at depths greater than 30 feet bgs, where the soil contamination was primarily encountered, it was assumed that the levels of residual contamination and would reduce by natural attenuation. Santa Clara County Department of Environmental Health determined that the residual contamination at the facility did not pose a significant threat to groundwater resources, human health or the environment, and the LUST cleanup case was closed in 2011.[25]

Based on the soil confirmation sampling, the impacted soil was removed and there was no residual COCs remaining in the soil, the potential for petroleum vapors to migrate from this facility to the Subject Property is relatively low. Therefore, the vapor migration pathway is considered incomplete. It is not expected that this facility represents a significant environmental concern for the Subject Property.Missionwest Properties / Dade Behring at 20400 Mariani Avenue – 1,380 ft northeast (downgradient)

Missionwest Properties / Dade Behring manufactured clinical diagnostic instruments from 1977 to 2008. In 2007, trichloroethene (TCE) was identified in soil. Contaminated soil was removed, and a sub-grade passive ventilation system was installed during redevelopment of the property. TCE concentrations in sub-slab soil vapor and indoor air decreased with the installation of the ventilation system and in 2010, this cleanup program case was closed. [26]

Given the downgradient location of this facility relative to the Subject Property and the case closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

Four Phase Systems at 10700 North De Anza Boulevard – 1,730 ft northeast (downgradient)

Four Phase Systems was listed in Envirostor having operated from 1977 to 1984 as a semiconductor manufacturer. Four Phase used a number of hazardous materials and generated, stored, and treated hazardous waste. The California Department of Health Services certified closure in 1987[27] and the property is now currently owned by Apple and operates as Apple Computer headquarters. A soil investigation conducted by consultant Dames & Moore in 1992 confirmed that no significant levels of volatile organic

[27] ICF Technology Incorporated. 1991. RCRA Preliminary Assessment, Motorola Computer Systems, 10700 North De Anza Boulevard, Cupertino, California, Santa Clara County. August 27. https://www.envirostor.dtsc.ca.gov/getfile?filename=/public%2Fdeliverable_documents%2F6593340814%2FMotorola_PA_08.27.1991.pdf

compounds (VOCs) were present and TPH-g, semi-volatile organic compounds (SVOCs), and metals were detected in trace amounts, considered to be background contamination levels.[28]

Given the downgradient location of this facility relative to the Subject Property and the closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

Chevron #9-5954 at 10023 South De Anza Boulevard – 1,730 ft south-southeast (cross-gradient)

The Chevron #9-5954 site is associated with a LUST case which was closed as of August 2002. In 1988, three gasoline USTs and a waste oil tank were removed from the site. The tanks were found in good condition with no holes. Soil samples were collected at the time of the excavation and detected concentrations at 20 mg/kg in total oil and grease, and 8.6 mg/kg in TPH-g.[29] In 2000, a soil and groundwater investigation was conducted at the site for groundwater data and additional soil data. Soil analytical results indicated that MTBE and other petroleum hydrocarbons did not extend below 75 feet bgs. Groundwater was encountered at approximately 117 feet bgs and no petroleum hydrocarbons were detected. Reports available on GeoTracker suggest quarterly groundwater monitoring occurred at the Site from 2001 to 2002, with MTBE and other petroleum hydrocarbons at non-detectable levels during the final sampling in 2002.[30] According to GeoTracker, the case was closed in 2002 by the RWQCB.

Given the significant distance between this facility and the Subject Property, and the case closure status, it is not expected that this facility represents a significant environmental concern for the Subject Property.

4.3 Vapor Encroachment Screening

Additional Off-Subject Property sites located within a 1/3-mile screening radius were evaluated for potential vapor encroachment. The following sites were identified and discussed below. The Off-Subject Property sites located within a 1/10-mile screening radius were evaluated for petroleum hydrocarbons, which have been discussed in Section 4.2.3.

Delias Cleaners Inc. at 10118 Bandley Drive – 777 ft south (upgradient)

Delias Cleaners Inc. was listed in the City Directory in year of 1985. No other records are available for this facility.

DryClean-Pro at 20379 Stevens Creek Boulevard – 1,580 ft southeast (cross-gradient)

DryClean-Pro is listed as an active facility in the EDR Radius Map Report. No records indicate a release of this facility.

Given the lack of evidence of any historical or active release, the potential for COCs associated with the drycleaner operation to migrate from these facilities to the Subject Property is relatively low. Therefore, the vapor migration pathway is considered incomplete. It is not expected that these two facilities represent a significant environmental concern for the Subject Property.

4.4 FOIA/Public Records

FOIA/public records requests for the Subject Property were submitted to federal, state, and local regulatory agencies and are summarized in Table E.

Table E. Regulatory Agencies Contacted and Responses

Agency	Status
Bay Area Air District (BAAD)	Records requested on January 27, 2025. Response received February 2, 2025, stating no records were available for the Subject Property.
California Geologic Energy Management Division (CalGEM) GIS Well Finder	Database queried on February 11, 2025. No wells were identified on the Subject Property.
California State Water Resources Control Board GAMA Groundwater Information System	Database queried on February 11, 2025. No wells were identified on the Subject Property; however, seven wells were identified in the vicinity of the Subject Property. Additionally, we reviewed the RWQCB's GeoTracker per- and polyfluoroalkyl substances (PFAS) Map for existing PFAS data in the vicinity of the Subject Property. Based on our review, the nearest reported PFAS data was approximately 0.7 miles away to the north-northwest, generally downgradient to cross-gradient relative to the Subject Property. Other PFAS data near the vicinity of the Subject Property was approximately 0.9 miles away to the northeast, generally downgradient relative to the Subject Property. Relevant information from these databases is summarized in the following sections.
City of Cupertino Requests Center	Records requested on January 27, 2025. Response received February 6, 2025, releasing documents associated with the Subject Property.
City of Cupertino Building Department	Records requested on January 27, 2025. As of the date of this report, no response has been received.
City of Cupertino City Clerk	Records requested on February 11, 2025. As of the date of this report, no response has been received.
City of Cupertino Environmental Services Department	Records requested on January 27, 2025. As of the date of this report, no response has been received.
City of Cupertino Planning Department	Records requested on January 27, 2025. As of the date of this report, no response has been received.
Department of Toxic Substance Control (DTSC), including online Envirostor and Hazardous Waste Tracking System (HWTS) files	Records requested on January 27, 2025. Response received on January 28, 2025, stating no records were available for the Subject Property. Online Envirostor and HWTS databases queried on February 7, 2025. Relevant information from these databases is summarized in the following sections.
RWQCB, including online GeoTracker and SMARTS files	Records requested on January 27, 2025. Response received on February 4, 2025, stating no records were available for the Subject Property. Online GeoTracker and HWTS databases queried on February 3, 2025. Relevant information from these databases is summarized in the following sections.

Agency	Status
Santa Clara County Department of Environmental Health (DEH) Hazardous Materials Compliance Division	Records requested on January 27, 2025. Response received on January 30, 2025, stating no records were available.
Santa Clara County Fire Department	Records requested on January 27, 2025. Response was received on February 13, 2025, stating no records were available.
Santa Clara County Local Oversight Program (LOP)	Records requested on January 27, 2025. As of the date of this report, no response has been received.
Santa Clara Valley Water District (SCVWD) and online historic solvent case files	Records requested on February 11, 2025. Response received February 11, 2025, directing requesters to query online databases. Historic solvent case files database queried on February 11, 2025, and no records were identified for the Subject Property.
United States Environmental Protection Agency (USEPA) online Envirofacts, Enforcement and Compliance History Online (ECHO), and Facility Registry Service (FRS) files	Databases queried on February 11, 2025. No records were found for the Subject Property.

Information obtained from all agencies and correspondence is included in Appendix F and is summarized below.

4.4.1 BAAD

A response received February 2, 2025, stating no records were available for the Subject Property.

4.4.2 CalGEM GIS Well Finder

The CalGEM Well Finder database was queried February 11, 2025. No wells were found in the vicinity of the Subject Property.

4.4.3 California GAMA Groundwater Information System

The GAMA Groundwater Information System database was queried on February 11, 2025. No wells were found on the Subject Property.

Seven wells were identified within 0.5 of a mile from the Subject Property. Two wells, located about 1,000 feet to the northwest of the Subject Property, were categorized as municipal wells. One well, located about 1,500 northwest of the Subject Property, was categorized as a water supply well. Three wells, located about 1,600 feet southwest of the Subject Property, were categorized as remediation/groundwater monitoring wells, associated with the Unocal Station / ConocoPhillips at 20755 Stevens Creek Blvd, further described in Section 4.2.2. One well, located about 1,800 feet south-southeast of the Subject Property, was categorized as a remediation/groundwater monitoring well, associated with the Chevron #9-5954 at 10023 S De Anza Blvd, located cross-gradient from the Subject Property, further discussed in Section 4.2.3.

Additionally, we reviewed the RWQCB's GeoTracker PFAS Map for existing PFAS data in the vicinity of the Subject Property. Based on our review, the nearest reported PFAS data is approximately 0.7-miles away to the north-northwest, generally downgradient to cross-gradient relative to the Subject Property, where PFAS data was collected from two public drinking water wells associated with the City of Cupertino and PFAS was not detected above laboratory reporting limits. Two other PFAS data points were located approximately 0.9-miles away to the northeast, generally downgradient relative to the Subject Property, where PFAS data was

collected from two public drinking water wells associated with Cal Water's Los Altos Suburban District and PFAS was not detected above laboratory reporting limits.

4.4.4 City of Cupertino

Requests Center

A response was received on February 6, 2025, releasing documents associated with the Subject Property. These redacted documents included proposed building plans for the Subject Property and south adjacent property, electric kiln installation plans for the current clay studio, and permits for building revisions including roofing work, door and wall improvements. Documents dated back to 1977 and up to 2022.

Building Department

As of the date of this report, no response has been received.

City Clerk

As of the date of this report, no response has been received.

Environmental Services Department

As of the date of this report, no response has been received.

Planning Department

As of the date of this report, no response has been received.

4.4.5 DTSC

A response was received on January 28, 2025, stating no records were available for the Subject Property. Online Envirostor and HWTS databases were queried on February 7, 2025. No records were identified for the Subject Property.

The HWTS database was queried on February 11, 2025. No records were identified for the Subject Property.

4.4.6 RWQCB

A response was received on February 4, 2025, stating that no records were available for the Subject Property.

The GeoTracker database was queried February 7, 2025. No records were identified for the Subject Property.

The SMARTS database was queried on February 11, 2025. No listings were found for the Subject Property.

4.4.7 Santa Clara County

Department of Environmental Health (DEH) Hazardous Materials Compliance Division

A response received on January 30, 2025, stating no records were available.

Fire Department

As of the date of this report, no response has been received.

Local Oversight Program (LOP)

As of the date of this report, no response has been received.

4.4.8 Santa Clara Valley Water District

A response was received on February 11, 2025, directing requesters to query online databases. The SCVWD historic solvent case files database was queried on February 11, 2025, and no records were identified for the Subject Property.

4.4.9 USEPA

The Envirofacts, ECHO, and FRS databases were queried on February 11, 2025. No records were identified for the Subject Property.

4.5 User-Provided Documents

The only document provided by the User is a completed User Questionnaire (Appendix G). The User indicated that no environmental liens or activity and AULs were identified for the Subject Property. The User is also not aware of any conditions indicative of releases or threatened releases on the Subject Property. No additional information was provided by the User.

4.6 Records Review Summary

4.6.1 Subject Property Review Summary

The Subject Property appears to have been used for agricultural purposes as orchards from at least 1939 through at least 1980 at which time a building was constructed in its current arrangement on the Subject Property. According to the City Directory, the Subject Property was occupied by commercial use tenants, primarily as offices and retail shops, from 2010 through 2020.

The Subject Property was not identified in any of the databases in the EDR Radius Map Report. According to records received by the City of Cupertino, the building was constructed in around 1977 and had minor renovations from 2005 to 2022 including reroofing, the installation of electrical kilns, and wall and window improvements.

4.6.2 Off-Subject Property Review Summary

There are several properties with documented releases in the vicinity of the Subject Property, summarized below:

- Cupertino Nursery located at 10431 North De Anza Blvd (510 ft north-northeast [downgradient]), had a gasoline leak from a UST that was later removed along with contaminated soil. The LUST cleanup case was closed in 1992. This facility is not expected to represent a significant environmental concern for the Subject Property based on the downgradient location of this facility relative to the Subject Property and the case closure status.

- Cupertino Clean Scene at 10165 De Anza Boulevard (600 ft southeast [cross-gradient]) had a UST fuel release that prompted investigations at the site. Investigations included the removal of gasoline and diesel USTs, soil excavations, soil sampling, the installation and sampling of onsite and offsite groundwater monitoring wells, soil vapor well installation, and a soil vapor extraction system. The latest analytical results indicated no COCs were present in groundwater, and decreased residual amounts of COCs in soil, which were assumed to continue to decrease with natural attenuation. The LUST cleanup case was closed in 2011. This facility is not expected to represent a significant environmental concern for the Subject Property based on the location of this facility relative to the Subject Property being cross-gradient and the case closure status.

- Apple Computer at 10500 North De Anza Blvd (430 ft northeast [downgradient]) had a diesel leak from a UST that was later removed with contaminated soil. The LUST cleanup case was closed in 1991. This facility not expected to represent a significant environmental concern for the Subject Property based on the downgradient location of this facility relative to the Subject Property and the case closure status.

- CVS Pharmacy #16114 located at 20755 Stevens Creek Blvd (1,240 ft southwest [upgradient]) had a small hydrochloric acid spill at the store's loading dock which was addressed and cleaned up. This facility is not expected to represent a significant environmental concern for the Subject Property based on the small quantity of the spill and the immediate cleanup response.

- Missionwest Properties / Dade Behring at 20400 Mariani Avenue (1,380 ft northeast [downgradient]) had TCE detected in soil, which was removed and treated with a sub-grade passive ventilation system. TCE concentrations decreased on site and the cleanup program case was closed in 2010. This facility is not expected to represent a significant environmental concern for the Subject Property based on the downgradient location of this facility relative to the Subject Property and the case closure status.

- Unocal Station / ConocoPhillips at 20755 Stevens Creek Blvd (1,600 ft southwest [upgradient]) had a gasoline leak from a UST. Multiple USTs were removed from the site and confirmation soil samples collected in the area showed no COC detections. Quarterly groundwater sampling took place at the site and data suggested there was no threat to groundwater, human heath, or the environment. The case was closed in 2006. This facility is not expected to represent a significant environmental concern for the Subject Property based on the distance between this facility and the Subject Property, and the case closure status.

- Four Phase Systems at 10700 North De Anza Boulevard (1,730 ft northeast [downgradient]), was listed in Envirostor. The facility operated from 1977 to 1984 as a semiconductor manufacturer. A soil investigation conducted in 1992 confirmed that no significant levels of VOCs were present and TPH-g, SVOCs, and metals were detected in trace amounts, considered to be background contamination levels. The facility obtained closure in 1987. This facility is not expected to represent a significant environmental concern for the Subject Property based on the downgradient location of this facility relative to the Subject Property and the closure status.

- Chevron #9-5954 at 10023 South De Anza Blvd (1,730 ft south-southeast [cross-gradient]) was associated with a LUST case. USTs holding gasoline and used oil onsite were removed and the latest soil samples collected indicated that MTBE and other petroleum hydrocarbons were not detected below 75 feet. Quarterly groundwater monitoring took place on site from 2001 to 2002 and concluded that no contamination remained in groundwater, thus the case was closed in 2002. This facility is not expected to represent a significant environmental concern for the Subject Property based on the distance between this facility relative to the Subject Property and the case closure status.

- Anderson of Cupertino at 20955 Stevens Creek Blvd (2,225 ft southwest [upgradient]) had a leak from a used oil UST, which was later removed. Soil samples collected at the site suggested the small amounts of soil contamination did not pose a threat to groundwater and the case was closed in 1998. Additional samples were taken following a hydraulic lift and clarifier removal and confirmed that impacted soils had been removed during the excavation. This facility is not expected to represent a significant environmental concern for the Subject Property based on the distance of this facility relative to the Subject Property and the case closure status.

- Shell / De Anza Shell at 20999 Stevens Creek Blvd (2,475 southwest [upgradient]) had a dispenser release discovered during facility upgrades that prompted further investigation onsite. Contaminated soil was excavated to residual amounts and the case was closed in 2000. Voluntary groundwater monitoring took place at the site from 2002 to 2008 and there appeared to be no contamination to groundwater. This facility is not expected to represent a significant environmental concern for the

Subject Property based on the significant distance of this facility relative to the Subject Property, case closure status, and the absence of petroleum hydrocarbons and MTBE in groundwater.

- Arco #5333 / Arco at 21000 Stevens Creek Boulevard (2,630 ft southwest [upgradient]) had a leak from a UST, which was later removed along with contaminated soils. Water samples collected at the site also showed no contamination in its analytical results. The case was closed in 1990. This facility is not expected to represent a significant environmental concern for the Subject Property based on the significant distance of this facility relative to the Subject Property and the case closure status.

5. Subject Property Reconnaissance

Roux conducted a reconnaissance of the Subject Property on February 6, 2025. The objective of the reconnaissance was to check for visual evidence of past/present use or storage of hazardous materials that could potentially affect the soil, groundwater, soil vapor, or surface water quality at the Subject Property.

Mr. David Yocke, the Subject Property User representative, and seven co-owners of the Subject Property were present to provide access to the Subject Property and answer questions. During the reconnaissance, all general areas, except for Suite 107 (occupied by Enjoy Dance Studio), were accessible, as described below in Section 5.10. Photographs taken during reconnaissance are provided in Appendix H and described below.

The Subject Property consists of approximately 1.55 acres of land and is currently developed with one single-story commercial building at the center, and associated parking and landscaped areas surrounding the building. (Appendix H, Photographs 1 through 4).

The building is divided into seven suites: 101, 102, 103, 105, 106, 107, and 108. Suite 101 is occupied by Law Office of Jessie Ho, is carpeted, and consists of three office rooms and one storage room (Appendix H, Photographs 7 and 8). Suite 102 is occupied by Lilly Studio Building Construction and Design, is carpeted, and consists of an open office space and smaller conference room (Appendix H, Photographs 9 and 10). Suite 103 is occupied by Capybara Clay Studio. This studio has both carpet and hardwood floors and consists of multiple rooms used for crafting and storage. Two of the craft rooms had mobile utility sinks, with an attached wastewater tank and freshwater tank. There were no drains observed below these sinks. Typical household cleaning supplies were observed in their storage space, as well as two electric kilns (Appendix H, Photographs 11 through 15). Suites 105 and 106 are occupied by De Anza Learning Center, have hardwood floors and multiple classrooms for children (Appendix H, Photographs 16- 20). Suite 107 is occupied by Enjoy Dance Studio and appeared to have tile and linoleum floors. This suite was inaccessible at the time of the Subject Property Reconnaissance and is further described in Section 5.10 (Appendix H, Photographs 21 and 22). Suite 108 is divided into two spaces, one occupied by May's Tax and Accounting Services, and the other by Mirai Gakuen Japanese Class. Both suites have carpet and hardwood floors. May's Tax and Accounting Services has office spaces and a small kitchen area, where various household cleaning supplies are stored (Appendix H, Photographs 23 through 27). Mirai Gakuen Japanese Class is mostly an open classroom space, with smaller rooms for storage (Appendix H, Photographs 29 and 30). All of the building suites share two restrooms, a janitor room and a mechanical room, located at the center of the building. Two covered dumpsters were observed in the parking area east of the building, next to a pad-mounted electrical transformer. This area appeared to be in good condition, no staining was observed here or throughout the Subject Property.

The Subject Property is bordered by a commercial building to the north and south, a parking lot to the east, and Bandley Drive to the west. The topographic gradient of the Subject Property was observed to be generally flat, sloping slightly to the northeast.

5.1 Utilities

Pacific Gas & Electric provides gas and electricity, and California Water Service (Cal Water) provides the water for the Subject Property.

5.2 Hazardous Substances

Most suites stored general household cleaning products such as hand soap, disinfecting/sanitizing sprays and wipes, muti-purpose cleaners, and rubbing alcohol (Photograph 26). The stored products were generally observed to be in good condition with no evident spills or odors.

Suite 103, Capybara Clay Studio, had a few interior, exterior, and craft paints stored within the studio. Craft studio rooms also had mobile utility sinks set up with wastewater and freshwater tanks. The owner of this suite was unsure of the disposal of the wastewater, however, presumed that it may be disposed of through the building's utility room drains. No leaks were observed from these utility sinks.

5.3 Polychlorinated Biphenyls

One pad-mounted transformer was observed to be present in the parking lot area east of the building. (Photographs 5 and 6). No non-PCB label was observed; however, the transformer was observed to be in good condition, pad-mounted, and with no evidence of a release.

5.4 Staining and Stressed Vegetation

It should be noted that the ground was wet due to rain at the time of Subject Property reconnaissance, however, no significant staining in the parking lot or stressed vegetation was observed.

5.5 Drains and Sumps

No active sumps were observed during the Subject Property reconnaissance. Floor drains were observed in the restrooms of the building. Multiple storm drains were identified along the perimeters of the Subject Property. The storm drains were observed to be in generally good condition with minor debris present.

5.6 Solid Waste

Covered dumpsters were observed in the parking lot area east of the building. Garbage and recycling for the Subject Property is managed by Recology.

5.7 Wastewater

No wastewater treatment processes were observed during Subject Property reconnaissance.

5.8 Wells

No wells were observed during Subject Property reconnaissance.

5.9 Other

No other features indicative of a release or a risk of a release were identified during Subject Property reconnaissance.

5.10 Inaccessible Area

Suite 107, Enjoy Dance Studio, was not accessible at the time of the Subject Property reconnaissance. Photographs were taken from the outside building windows, looking into the dance studio space. The suite appeared to be mostly open space, and one Subject Property co-owner explained that the dance studio consists of two dance rooms, an open office area, and a small storage room.

6. Phase I ESA Conclusions

Roux performed a Phase I ESA at the Subject Property on behalf of the User. The Phase I ESA was conducted by investigating past Subject Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a reconnaissance of the Subject Property and surrounding area. This Phase I ESA was performed in general accordance with ASTM International Standard Practice E1527-21 to identify RECs, CRECs, and/or HRECs at the Subject Property indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Subject Property's soil, groundwater, soil vapor, or surface water.

The Subject Property consists of approximately 1.55 acres of land and is currently developed with one single-story commercial building at the center, with associated parking and landscaped areas surrounding the building. (Appendix H, Photographs 1 through 4) The Subject Property appears to have been used for agricultural purposes as orchards from at least 1939 through at least 1980. According to the City Directory, the Subject Property was occupied by commercial use tenants, primarily as offices and retail shops, from 2010 through 2020.

The surrounding vicinity appears to have been used primarily as orchards from at least 1939 through the mid-1950s. Beginning in the 1950s, the surrounding area began to be converted into mixed residential and commercial neighborhoods. Adjacent property occupants dating back to 1976 include commercial retailers, such as offices, a gym, and churches.

No REC, CRECs, or HRECs, were identified for the Subject Property during the Phase I ESA.

A *de minimis* concern is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs, CRECs, or HRECs. No *de minimis* concerns were identified.

A business environmental risk (BER) is a condition that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. One BER was identified for the Subject Property:

- The Subject Property was historically used for agricultural purposes from at least 1939 through at least 1980. Roux's document review and site reconnaissance found no evidence that agricultural chemicals were applied in noncompliance to labeling requirements, or stored in large quantities, spilled, transported, or formulated on the Subject Property. In addition, there was no evidence that past usage of pesticides, herbicides, or other agricultural chemicals were mixed, formulated, or disposed of at the Subject Property. Therefore, this is not considered a REC based on Legal Appendix X1.1.4.3.4 of ASTM E1527-21 but is considered a BER due to potential impacts to soil from pesticides, herbicides, and metals to shallow soils across the Subject Property.

A data gap is a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. One data gap was identified:

- Suite 107, Enjoy Dance Studio, was not accessible at the time of the Subject Property reconnaissance. Photographs were taken from the outside building windows, looking into the dance studio space and the suite appeared to be mostly open space. A Subject Property co-owner explained that the dance studio consists of two dance rooms, an open office area, and a small storage room. Given the use of this suite, it is not expected that this data gap would significantly alter the findings of the Phase I ESA.

Based on the findings of this Phase I ESA and the planned use of the Subject Property, Roux recommends a Limited Phase II Environmental Subsurface Investigation to assess the impacts of historical pesticide use on the Subject Property.

7. Report Assumptions and Limitations

The Phase I ESA described herein was conducted by Roux in accordance with ASTM Standard Practice E1527-21, which is consistent with the regulatory requirements for conducting all appropriate inquiries (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule[33]), as amended effective February 13, 2023[34].

It is Roux's understanding that this Phase I ESA was requested by the User Representative so that the User may qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on liability under CERCLA. One of the requirements that a person acquiring real property must meet in order to qualify for one of these limitations on liability under CERCLA is to perform all appropriate inquiries in conformance with the AAI Rule (or the ASTM Standard Practice E1527-21) prior to acquisition of the property. User Representative has acknowledged that, under the AAI Rule, Roux's performance of the Phase I ESA described herein will not alone result in User Representative satisfying all of the requirements of the AAI Rule and provide a defense to CERCLA liability. Further, User Representative has acknowledged that the AAI Rule requires that certain additional inquiries be undertaken to satisfy the CERCLA AAI requirements. Accordingly, Roux makes no guarantees or warranties, expressed or implied, regarding this Phase I ESA, including without limitation, any warranty that this Phase I ESA will in fact qualify User Representative for a defense to CERCLA liability.

Roux has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux. This Phase I ESA does NOT include consideration of matters specifically excluded by ASTM E1527-21, including but not limited to, asbestos-containing building materials, radon, lead-based paint and/or lead in drinking water, wetlands, regulatory compliance, fluorescent lighting, and mold. Emerging contaminants that are not defined as hazardous substances under CERCLA are outside the scope of the Phase I ESA.

This Phase I ESA does NOT include the completion of searches for recorded environmental liens.

It should be noted that Roux has not conducted any intrusive activities on the Subject Property during the preparation of this Phase I ESA and is relying on information presented by others, often in preliminary, draft, or verbal form. By referencing this information, Roux does not accept responsibility for the accuracy of the underlying data, sampling methods, laboratory analysis, or documentation.

The AAI Rule requires, and the conclusions stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Subject Property. As such, these conclusions are based on subjective interpretations and the exercise of discretion. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions must be considered within this context.

User Representative has agreed that Roux shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the Phase I ESA was performed. To the extent practicable, Roux has identified data gaps and has evaluated the potential significance of such data gaps. Recommendations to address those data gaps are presented herein and are based on the data available at the time of the performance of the Phase I ESA. Implementation of the recommendations may not fully address the data gaps as the information obtained from execution of those

[33] Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and https://federalregister.gov/a/2013-31112.

[34] Federal Register: December 15, 2022 (Volume 87, Number 240) page 76578-76581.

recommendations may alter or modify the interpretation of the Subject Property conditions and conclusions regarding the data gaps.

This Phase I ESA Report should not be considered a legal interpretation of existing environmental laws and regulations. The Phase I ESA was conducted with a reasonable degree of inquiry to identify RECs, but uncertainty is not eliminated. No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The Phase I ESA process is intended to reduce, but not eliminate, the uncertainty involved with identifying RECs.

This Phase I ESA Report is not an appraisal or value judgment of the Subject Property. User Representative has agreed that Roux shall not be liable for any use of the Phase I ESA as an appraisal or value judgment of the Subject Property.

The Phase I ESA has been prepared for the exclusive use of User Representative for specific application to the Subject Property. User Representative has agreed that any third-party use of this Phase I ESA, with exception of the User, is User Representative's sole responsibility and sole liability.

In order to satisfy the requirements of AAI pursuant to CERCLA section 101(35)(B), the Phase I ESA must be conducted not more than one year prior to the date of the acquisition or transaction ("transaction date") with the following specific components updated within 180 days of and prior to the date of acquisition of the Subject Property:

- Interviews.
- Review of government records;
- Visual inspections; and,
- Declaration of the environmental professional.

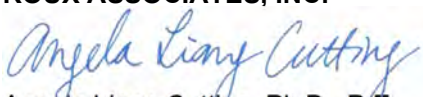

The report will be considered valid for 180 days from the earliest of the previously listed components.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

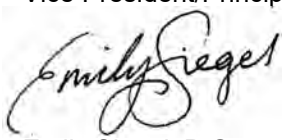

Roux developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Respectfully submitted,

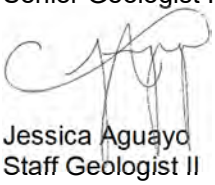

ROUX ASSOCIATES, INC.

Angela Liang Cutting, Ph.D., P.E.
Vice President/Principal Engineer

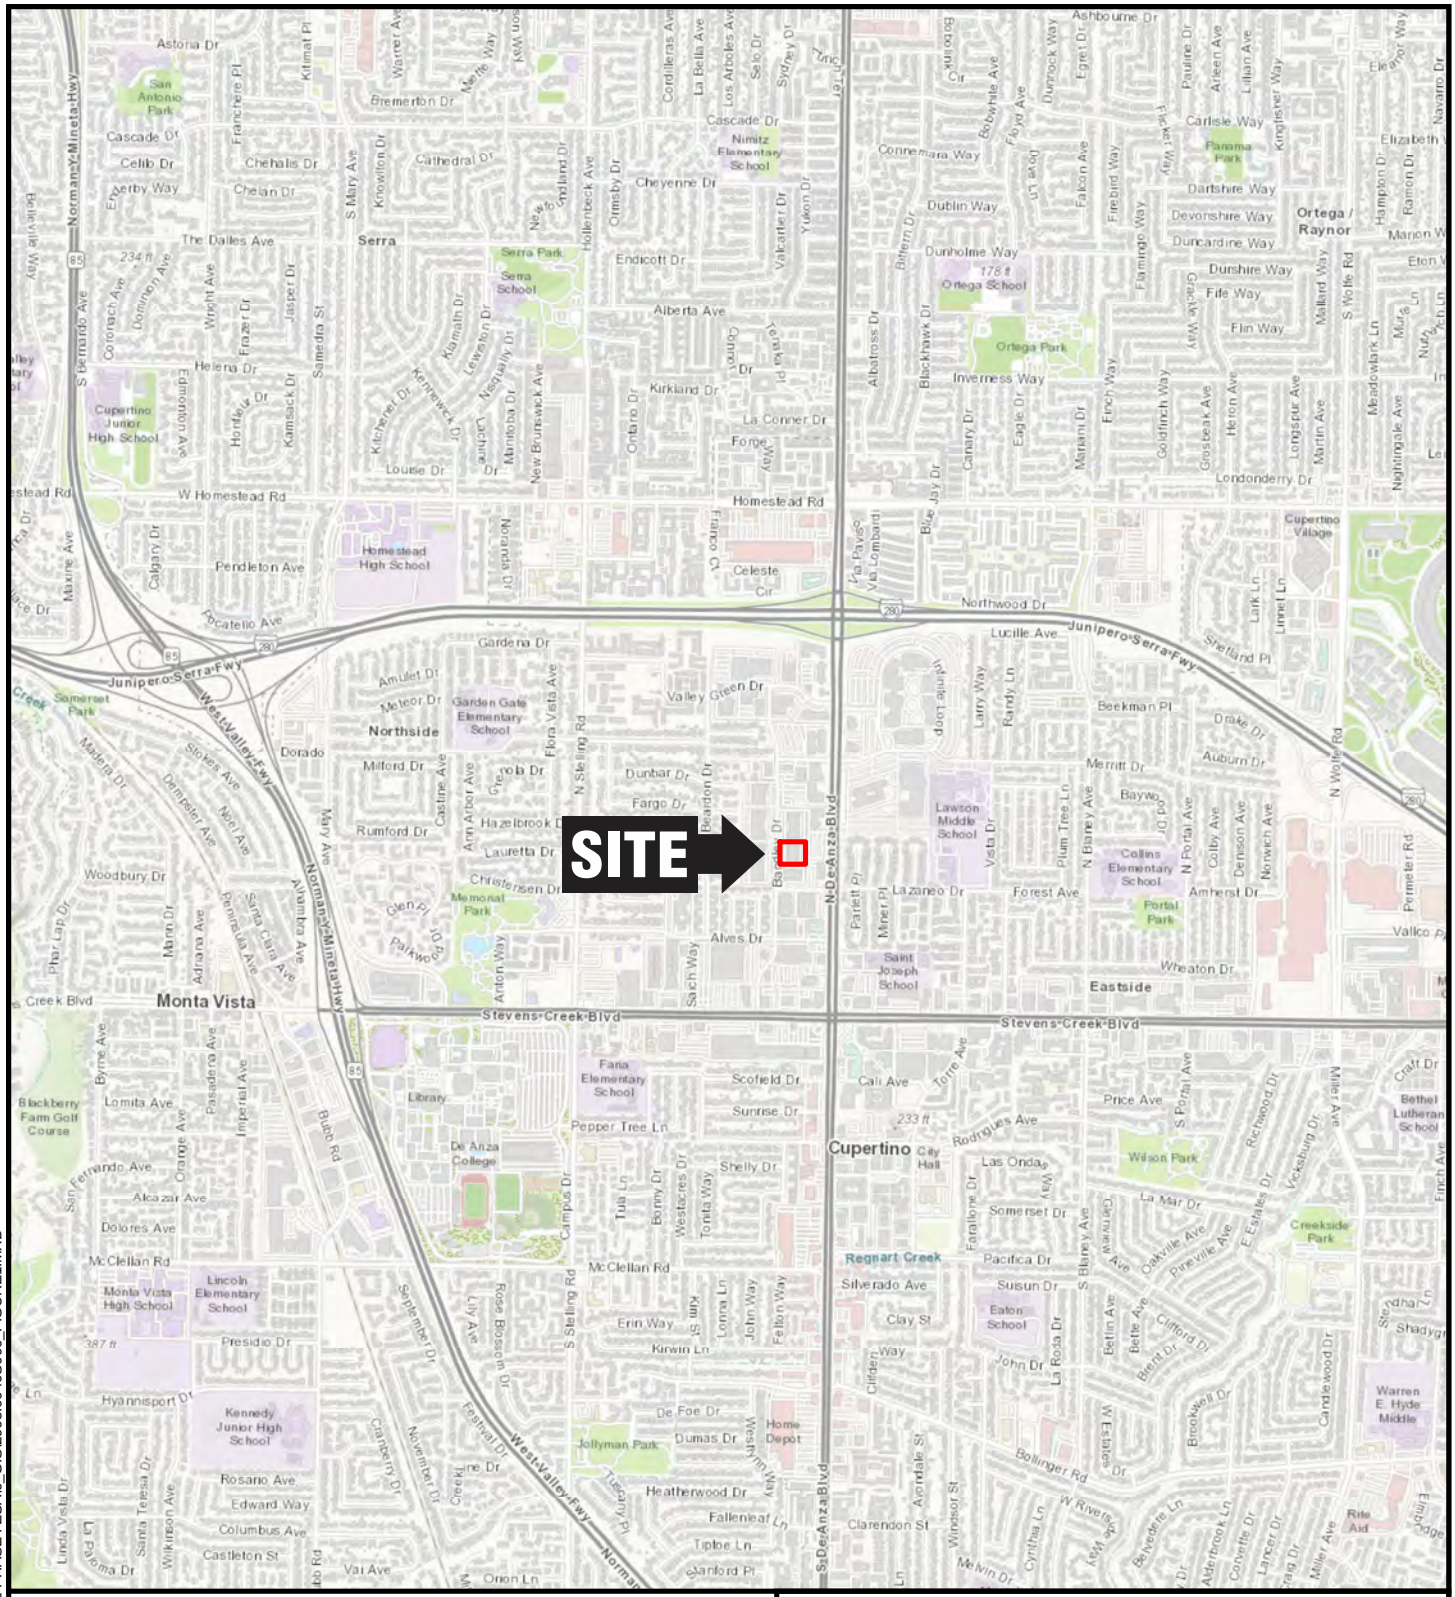

Emily Siegel, P.G.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ---------- State Response Sites

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ---------- Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

FEMA UST ---- Underground Storage Tank Listing
AST ---- Aboveground Petroleum Storage Tank Facilities
INDIAN UST ---- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing
VCP ---- Voluntary Cleanup Program Properties

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT ---- Waste Management Unit Database
SWRCY ---- Recycler Database
HAULERS ---- Registered Waste Tire Haulers Listing
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
ODI ---- Open Dump Inventory
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
HIST Cal-Sites ---- Historical Calsites Database
SCH ---- School Property Evaluation Program
CDL ---- Clandestine Drug Labs
Toxic Pits ---- Toxic Pits Cleanup Act Sites
US CDL ---- National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

CERS TANKS ---- California Environmental Reporting System (CERS) Tanks

Local Land Records

LIENS ---- Environmental Liens Listing
LIENS 2 ---- CERCLA Lien Information
DEED ---- Deed Restriction Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
CHMIRS ---- California Hazardous Material Incident Report System
LDS ---- Land Disposal Sites Listing
MCS ---- Military Cleanup Sites Listing
SPILLS 90 ---- SPILLS 90 data from FirstSearch

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CUPERTINO FIRE STATI Site ID: 0908415 EPA Id: CAN000908415	20215 STEVENS CREEK	SE 1/4 - 1/2 (0.415 mi.)	R92	471

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 4 CPS-SLIC sites

within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

A review of the BROWNFIELDS list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 10/15/2024 has revealed that there

are 6 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 34 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/13/2024 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 21 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 11 CUPA Listings sites within approximately 0.25 miles of the target property.

Cleanup Status: CLOSED				

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
APPLE COMPUTER	***10260 BANDLEY DR***	***0 - 1/8 (0.000 mi.)***	***A2***	***12***

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
Registry ID: 110002689396

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The California Environmental Protection Agency (CalEPA) has recently

APPLE INC (Continued) **1000279119**

implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CERS HAZ WASTE:
Name: APPLE-LAZANEO
Address: 20605 LAZANEO DR
City,State,Zip: CUPERTINO, CA 95014
Site ID: 702783
CERS ID: 10349035
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 702783
Site Name: APPLE-LAZANEO
Violation Date: 06-06-2019
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities, evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: Returned to compliance on 06/20/2019. Contingency plan uploaded to CERS is a boiler plate plan that is not specific enough to be used as a contingency plan for this location. If facility continues to use this boiler plate, at a minimum, ensure that plan refers to the emergency response equipment located on-site. Current plan only refers to emergency response equipment located at the Infinite Loop buildings. Plan does not currently list an address for emergency coordinators.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-06-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection commenced on 6/3/19 and concluded today. Facility is a product realization lab that generates wastes related to 3D printing, machining, and painting. Facility used to generate more RCRA waste

APPLE-LAZANEO (Continued) **S121789288**

(coolant contaminated with lead from machining brass), but significantly reduced their waste by designating all brass and copper cutting to be done on one specific CNC. Currently, facility is generating and average of 130 kg of RCRA waste per month, and approximately 1753 kg per month of all wastes. Facility generates most of this waste from periodic (3-5x/year) clean-outs of coolant containing machines that exceed 1000 kgs per shipment. Facility is a California LQG and RCRA small quantity generator. Inspection included walk-through of the following areas: PR cleanup room and adjoining printing lab (rm 132): Generates wastes related to cleaning 3D printed parts, including waste resins from printers (Eden and connex), waste resins mixed with waste liquid IPA (SLA [Truncated]

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE

APPLE INC (Continued) **1000279127**

STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES

APPLE, INC (Continued) **1000279125**

AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Eval Date:	05-08-2019
Violations Found:	No
Eval Type:	Routine done by local agency

APPLE-BANDLEY 5 (Continued) **S108742381**

Eval Notes: Facility generates wastes related to the following activities: Stress-testing of components- including testing with household product exposure, heat, shock, etc. Universal waste aerosols Hand solder waste IPA wipes and solids contaminated with alcohols Facility occasionally has laboratory clean-outs of off-spec or expired chemicals. The nature of the chemicals changes based on the nature of the testing required. Most chemicals are stored and generated in one main laboratory. Solid lab debris, solder, and aerosol containers are located throughout the facility. The main lab room has a sink that is directly plumbed to an outdoor water tank. Previously, water was generated with products exposed to household products (or synthetic sweat) were rinsed off. The material was originally captured in containers, but now is directed to the waste water tank. This water is managed as non-hazardous in accordance with previous testing results conducted on first rinsate samples. [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine inspection with Apple EHS contacts, Samantha Chiu and John Shull. Inspection commenced on 6/03/19 and concluded today. Facility labs have been decommissioned and moved to another permitted location. First and second floor are currently under construction to remodel. A walk-through of the 3rd and 4th floor (including the old Marconi lab in room 4040 and the old MD lab in room 4309) was conducted. Soldering rooms in the Marconi lab were emptied and ventilation connections were capped. The 4 testing chambers in this lab were also empty, or redecorated for office activities. The outdoor courtyard where waste was previously accumulated was found to have no waste storage shed. Records show that the last waste from this site was shipped on 3/22/19. Facility contacts stated that no hazardous waste is currently stored on-site and that removal of all lab-related hazardous wastes has been completed. Apple intends to finish reconstruction and use the building [Truncated]

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Four 10,000-gallon fuel tanks were removed from the site on May 15, 1998, during a system upgrade. Tested soil samples from around the UST cluster and dispensers documented that some fuel release(s) had occurred, but the reported concentrations were relatively low. An initial deep boring (B-1) was advanced on the south side of the UST area (see Figure 2) in July 1998 and found detectable fuel impacts to soils (higher than the initial tests) to a depth of 75 feet. Construction of the site s first groundwater monitoring well (MW-1) in July 1999 involved sampling and testing of even deeper soil (to 100 feet below grade) along with the encountered groundwater. Over the next two years (2000-2001) another deep exploration boring (EB-1) was advanced, two additional groundwater monitoring were installed (MW-2 and MW-3), MW-1 was deepened/reconstructed as MW-1R, and three vadose-zone wells (VW-1 through VW-3) were installed. The soil analyses from these holes only documented noteworthy fuel impacts at MW-3. On-site groundwater monitoring wells MW-4 and MW-5 were installed in May 2004; neither location exhibits significant impacts. After repeated being denied access to the adjoining property to the north, the first off-site well, MW-6, was installed in July 2007 over 200 feet north of the site, at the corner of De Anza Blvd. and Lazaneo Drive. In February, 2008, two additional off-site wells were installed in North De Anza Boulevard on an apparent migration path from the fuel source area through MW-3. Soil and groundwater samples from all three off-site wells showed no apparent impact from fuel-related compounds. Since 2001, groundwater sounding and sample testing have occurred at least twice a year, and usually quarterly. The cumulative data on groundwater level measurements and analyses (through March 2008) are presented in tables in Appendices A and B, respectively. The impacts are a combination of traditional BTEX plus lesser concentrations of oxygenates, mostly TBA. Site remediation

CUPERTINO CLEAN SCENE (Continued) **S101594681**

activities to date have included removal of shallow soils around the old tanks and dispensers in 1998 and a five-day soil vapor extraction (SVE) test from MW-3 in 2003. Periodic soil vapor extraction began in July 2008. Groundwater elevation has fallen prior to June 2008 and the wells remain dry.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to keep records of any test results, waste analyses, or other determinations made in accordance with section 66262.11 for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.
Violation Notes:	Returned to compliance on 08/15/2019. Observed 1x1 gallon container of clear liquid in the Environmental Technology lab labeled as "waste". Employees were not sure what was inside this container. Determine if this waste stream is a hazardous waste and manage it accordingly.

APPLE-MARIANI 1 (Continued) **S113801928**

Chapter 12, Section(s) 66262.34(e)

Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 08/15/2019. Observed one container of sulfuric acid decap waste in the Failure Analysis lab that was accumulating waste since 8/23/17.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Violation Notes: Returned to compliance on 08/15/2019. Observed the following containers of hazardous waste with inadequate markings: Environmental Technology lab 3x3 gallon carboys of nitric acid waste did not have labels attached to the containers 2x5 gallon step cans were labeled as containing flammable and toxic solids including acetone, but the container actually held solids contaminated with acids Failure Analysis lab Containers are labeled with the date the materials were formulated, but the lab does not distinguish between formulation dates and the accumulation start date for wastes. Point of generation containers in the acids and bases cabinets are not labeled with the

APPLE-MARIANI 1 (Continued) **S113801928**

address of the generator. Point of generation containers must have the following markings, in addition to the requirements listed in the corrective text below: (1) the date upon which each period of accumulation begins shall be clearly marked and visible for inspection on each container and portable tank; (2) the date the applicable [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-12-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection walk-through was conducted with John Shull and Samantha Chiu, Apple EHS. Inspection included walk-through of all labs noted below, inspection of outdoor waste storage, and review of 3 years of hazardous waste manifests. Facility records show that they produced 3577 kg of RCRA regulated waste in 2018. Facility generates the following wastes: 1421 Product Safety lab- hand soldering wastes, aerosol cans, and waste batteries 1251 Failure Analysis lab- spent acid etchants (nitric, HF, HCl, oxalic and other various acid wastes), waste ammonium hydroxide and hydrogen peroxide, waste dyes, waste solvents (IPA and methylene chloride), waste solids contaminated with the liquid waste mentioned prior, toxic solids, waste batteries, and aerosols 1158 Materials Science lab- solvent wastes, solids contaminated with solvents, anion and cation waste streams from HPLC 1203 Environmental Technology lab- Waste acids (nitric, HCL, and others), waste flammable liquids, waste [Truncated]

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	No TSDF-signed copies of manifests were available for review. Anthony stated that he does have the generator's initial copy in storage containers but was unable to make them available. Additionally, staff were not able to access digital copies of the manifests via the Regulatory Document Archive in Target's computer system (no computer was observed in the receiving area).

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Occupancy ID: 13053
Eval Division: Santa Clara County Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-27-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility is a retail store. Hazardous waste is generated in the form of damaged, discarded, returned, or other non-saleable merchandise and is stored in an area of the warehouse designated ESIM (environmentally sensitive item management). At time of inspection the following hazardous waste was observed on-site: -State-regulated waste: 1 x small tote bin -Flammable Aerosol/Toxic: 1 x small tote bin -Corrosive Basic: 1 x small tote bin Non-saleable merchandise is collected from guest services and placed in a sort bin(s) in the ESIM area. Each day staff utilizes a "smart sort" system (scanner linked to an external database) to sort hazardous waste by hazard classification. Additionally, all waste items are placed in individual plastic bags to prevent spills. Ink cartridges are managed through a exchange program with Lexmark. A facilities manager performs minor changes-out of fluorescent tubes with all spent tubes [Truncated]

Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-13-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine Hazardous Waste Generator Inspection. Completed walk-through with Anthony Digeronimo in receiving. This facility operates as a retail store with various electronics, OTC drugs, and household chemicals. They manage the following hazardous waste streams in 10 gallon tote bins: -Oxidizer IGNITABLE Waste -Universal Waste Batteries -Corrosive Acidic Waste -Corrosive Basic

TARGET T0323 (Continued) **S121791337**

Waste -Aerosol/Toxic Ignitable Waste -Non-RCRA State Toxic waste -Pharmaceutical Toxic Waste (over-the-counter drugs) Waste is sorted through a scanning system whereby items are initially stored in an "ESIM" bin, scanned to determine if it can be donated or if it will be managed as hazardous waste, then sorted into the appropriate bin. Additionally, universal electronic waste is sent to Central Returns Center. Pharmaceutical waste is managed by CVS. Inspection included review of all available hazardous waste disposal receipts from last 3 years. Notes: Emergency spill [Truncated]

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated

APPLE INC (Continued) **1000142172**

Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U022
Waste Description: Benzo[A]Pyrene

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U075
Waste Description: Dichlorodifluoromethane (Or) Methane, Dichlorodifluoro-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

APPLE INC (Continued) **1000142172**

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U404
Waste Description: U404

Evaluation Action Summary:

Evaluation Date:	20031007
Evaluation Responsible Agency:	State Contractor/Grantee
Found Violation:	Yes
Evaluation Type Description:	COMPLIANCE EVALUATION INSPECTION
Evaluation Responsible Person Identifier:	Not reported
Evaluation Responsible Sub-Organization:	Not reported
Actual Return to Compliance Date:	20031202
Scheduled Compliance Date:	Not reported
Date of Request:	Not reported
Date Response Received:	Not reported
Request Agency:	Not reported
Former Citation:	Not reported

CPS-SLIC:

Name:	MISSIONWEST PROPERTIES (DADE BEHRING)
Address:	20400 MARIANI AVE
City,State,Zip:	CUPERTINO, CA 95014
Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	09/30/2010
Global Id:	SL0608533305
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.329152
Longitude:	-122.029699
Case Type:	Cleanup Program Site
Case Worker:	UUU
Local Agency:	Not reported
RB Case Number:	43S1117
File Location:	Regional Board
Potential Media Affected:	Soil, Soil Vapor
Potential Contaminants of Concern:	Trichloroethylene (TCE), Freon
EPA Region:	9
Coordinate Source:	Google Geocode
Cuf Case:	NO
Quantity Released Gallons:	Not reported
Begin Date:	05/01/2008
Leak Reported Date:	05/01/2008
How Discovered:	Not reported
How Discovered Description:	Not reported
Discharge Source:	Not reported
Discharge Cause:	Not reported
Stop Method:	Not reported
Stop Description:	Not reported
No Further Action Date:	09/30/2010
CA Water Watershed Name:	Santa Clara - Palo Alto (205.50)

APPLE INC (Continued) **1000142172**

Dwr Groundwater Subbasin Name:	Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	26-30%
CA Enviroscreen 4 Score:	15-20%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Not reported

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically

APPLE INC (Continued) **1000142172**

collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Registry ID: 110002411649

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Quarterly Update:	Four-Phase Systems, Inc., a manufacturer of semi-conductor components and printed circuit boards, was granted a hazardous waste permit in 1982. Motorola acquired Four-Phase that same year, but soon discontinued it's operations and submitted a closure plan on 10/30/1984. Their closure was certified by DHS on 2/2/1987. After the closure, DHS conducted an inspection of the site and found waste that was not completely removed from the site. Cleanup of the site was conducted and closure activities were finally completed. Motorola was certified closed again on 7/30/2001. The site is currently used by Apple Computer.

Violations:

Site ID: 109179
Site Name: Great Gas Cupertino Inc
Violation Date: 09-21-2023
Citation: 23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 09/21/2023. REPEAT VIOLATION: Annual monitoring system conducted on 7/30/2021, 10/4/2022, then 9/21/2023. Anniversary month is July and has been performed late for two years.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 109179
Site Name: Great Gas Cupertino Inc
Violation Date: 12-14-2021
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes: Returned to compliance on 09/26/2022. Multiple sensors have alarmed without proper response and/or failed annul testing on 7/30/2021 without repair or replacement. Prompt and proper alarm response is not occurring, thus ensuring a proper operating system to prevent leaks.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 109179
Site Name: Great Gas Cupertino Inc
Violation Date: 10-04-2022
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after

GREAT GAS CUPERTINO INC (Continued) **U001602453**

October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 09/21/2023. REPEAT VIOLATION: No record of triennial overfill prevention equipment inspection.

Violation Date:	01-23-2024
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	All three spill containers do not contain the minimum 5 gallon capacity. Additionally, the spill container for the Regular Main tank failed integrity testing.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Overfill prevention inspection is overdue. Last conducted on 1/21/2021. Attempt to inspect was made 1/23/2024 without success according to service technician.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility has 1 dry cleaning machine that uses petroleum distillates. Filters are changed and managed as hazardous waste and dry lint is disposed of to the garbage. This machine requires that the water in the still be replaced every time filters are cleaned and all contaminated water is managed as hazardous waste. Facility owner manually activates a program that triggers the machine to empty the internal waste container to an external bin and waste is immediately placed into a closed and labeled container. Spotting table has drain tubes that empty to an open container at the bottom and waste containers on the spotting table and machine were empty and dry at the time of inspection. Ms. Tsai trains her employees on hazardous waste management and maintains records of waste pickups every 6 months. Records were reviewed during the course of inspection. Facility has adequate spill response, annually serviced fire extinguishers, and waste containers are inspected weekly. covered [Truncated]

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Historical application of pesticides to the outside of the administration building has impacted shallow soil. The administration building is to be demolished to allow for the expansion of the Lawson Middle School's outdoor recreation area. A natural grass athletic field will be constructed with a track around the outside. Impacted soil was excavated and removed from the site.

DE ANZA SHELL (Continued) **S101594612**

Name: DE ANZA SHELL
Address: 20999 STEVENS CREEK BLVD
City,State,Zip: CUPERTINO, CA 95014
Site ID: 24238
CERS ID: 10091371
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 01-08-2020
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 01/08/2020. Diesel STP sump sensor would not reset after testing. Sensor was replaced w/ like equipment and functioned properly after retest.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 01-17-2024
Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: Financial Responsibility reporting discrepancy (needs clarification in CERS).
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 09-21-2017
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: Returned to compliance on 10/30/2017. Per facility, spent hoses are taken off site by the service technician. Begin managing spent hoses are hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 09-21-2017
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 10/30/2017. Per facility, 2 x 30 gallon

DE ANZA SHELL (Continued) **S101594612**

containers of fuel filters had been accumulating since 2013. Your accumulation time limit for drained fuel filters is 1 year.
Violation Division: Santa Clara County Environmental Health

Citation: 23 CCR 16 2631(c), 2662(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2631(c), 2662(d)
Violation Description: Failure to have either a striker plate installed or to have a drop tube-mounted bottom protector.
Violation Notes: 91 product tank drop tube is missing the bottom protector; needs replacement.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 01-17-2023
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Stand alone sensor in UDC for dispenser 9/10 is not functional and needs replacement.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 07-08-2022
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility disclosed on the California Environmental Reporting System (CERS) on 1/20/22 that their EPA ID number is CAR000096818, but according to the hazardous waste tracking system, iit has been

DE ANZA SHELL (Continued) **S101594612**

inactive since 6/30/19. According to the facility owner Judy Hui, this EPA ID number may not be associated with the current business, and may instead be associated with the gas station during the time it was owned and operated by Shell. This could not be corroborated on the hazardous waste tracking system as the only other EPA ID numbers associated with this address expired in 1999 and 2000. If CAR000096818 is the correct EPA ID number, reactivate it within 30 days. If it is not the correct EPA ID number, and is in fact tied to a past owner and/or operator, apply for a new EPA ID number.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025
Date Made Active in Reports: 01/21/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

Next Scheduled EDR Contact: 04/07/2025
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

Next Scheduled EDR Contact: 04/14/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/05/2024
Date Data Arrived at EDR: 08/06/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

10268 BANDLEY DRIVE
10268 BANDLEY DRIVE
CUPERTINO, CA 95014

TARGET PROPERTY COORDINATES

Latitude (North):	37.327596 - 37° 19' 39.35''
Longitude (West):	122.033784 - 122° 2' 1.62''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	585603.1
UTM Y (Meters):	4131448.2
Elevation:	240 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005309 CUPERTINO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

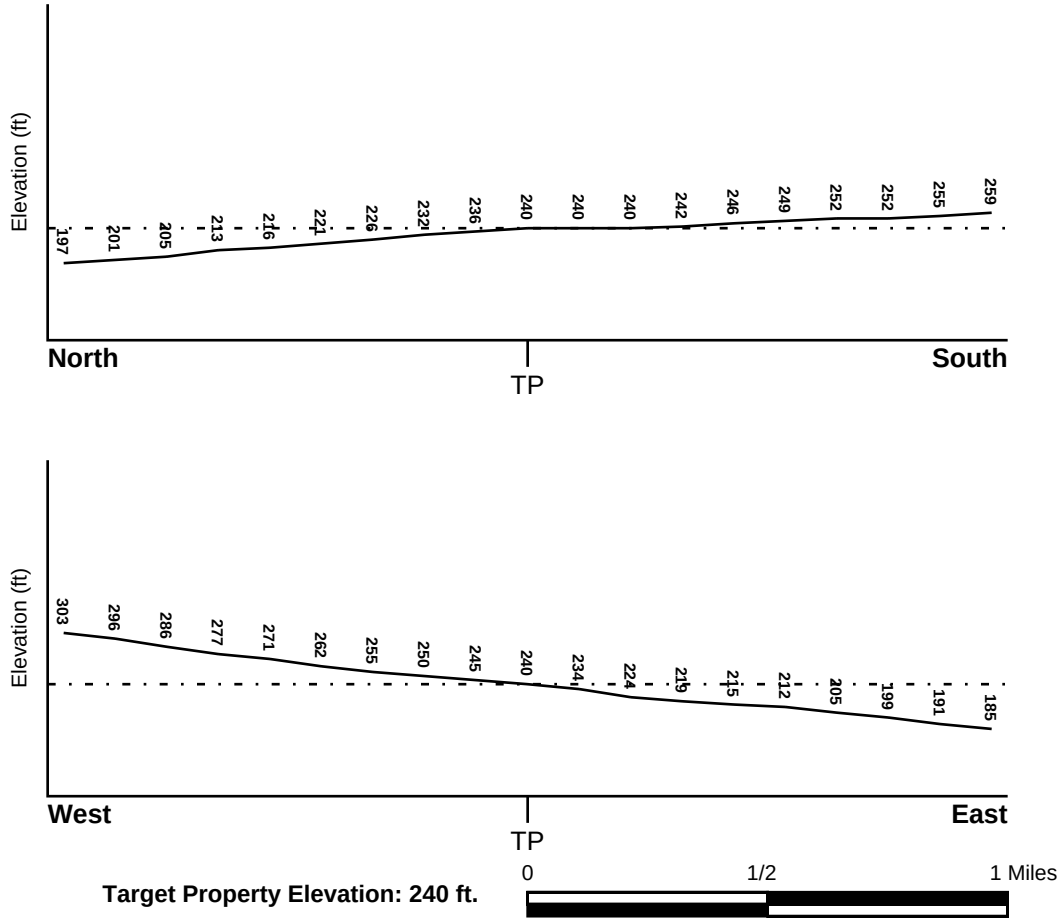

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0208H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0209H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles ENE
Site Name:	Hewlett Packard Cico Div
Site EPA ID Number:	CAD049227390
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	approximately 50 feet.
Hydraulic Connection:	A hydraulic connection exists between the surficial and lower aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

01/27/25

Site Name:

10268 Bandley Drive
10268 Bandley Drive
CUPERTINO, CA 95014
EDR Inquiry # 7880943.3

Client Name:

Roux Associates Inc
555 12th Street Suite 250
Oakland, CA 94607
Contact: Jessica Aguayo

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 559A-4985-AAD1

PO # NA

Project 10268 Bandley Drive, Cupertino

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 559A-4985-AAD1

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Roux Associates Inc (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The City of Cupertino responds to your request for records dated January 27, 2025 with responsive documents in accordance with the California Public Records Act, Government Code section 7920.000 et seq. Certain documents have been redacted by the City Clerk's Office to protect the privacy rights of individuals relative to their names and contact information. Gov. Code 6250; Cal Const., art I, Section 3(b)(3). Attached are the responsive documents to your request.

The City of Cupertino contracts its fire services with the Santa Clara County Fire Department (SCCFD). For those record types please contact SCCFD Administrative Headquarters at info@sccfd.org or 408-378-4010. Here is a direct link to the contact information webpage https://www.sccfd.org/about-sccfd/contact-information-administrative-headquarters.

Please contact the Santa Clara County Fire Department and/or County of Santa Clara for the hazmat records you requested as the City of Cupertino does not maintain those records.

https://www.sccfd.org/fire-prevention/hazardous-materials

https://hazmat.sccgov.org/contact-us

The information provided fulfills the requirements of your Public Records Act request.

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.
License Class B Lic. # 676896
Date _____ Contractor _____

ARCHITECT'S DECLARATION

I understand my plans shall be used as public records

Licensed Professional

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason. (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code:) The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.
☐ I am exempt under Sec. _____, B & P C for this reason

[redacted] Date _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:
Carrier: STATE FUND Policy No.: 1761650-2005

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California. Date _____
Applicant _____
NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

HAZARDOUS MATERIAL DISCLOSURE

Will the applicant or future building occupant store or handle hazardous material as defined by the Cupertino Municipal Code, Chapter 9.12, and the Health and Safety Code, Section 25532(a)?

☐ Yes ☑ No

Will the applicant or future building occupant use equipment or devices which emit hazardous air contaminants as defined by the Bay Area Air Quality Management District?

☐ Yes ☑ No

I have read the hazardous materials requirements under Chapter 6.95 of the California Health & Safety Code, Sections 25505, 25533 and 25534. I understand that if the building does not currently have a tenant, that it is my responsibility to notify the occupant of the requirements which must be met prior to issuance of a Certificate of Occupancy.

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason. (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code:) The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____, B & P C for this reason

Owner _____ Date _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Subject: Re-roofing policy for the City of Cupertino

1. Prior to permit issuance, you must agree to comply with 1997 UBC Standards and manufacturers specifications on re-roofing.
2. New roof coverings shall not be applied without first obtaining all inspection and written approval from the building inspector. A final inspection and approval shall be obtained from the building inspector when the re-roofing is completed.
3. All roofs shall be inspected prior to any roofing installation.
4. To receive a final sign off from the City, the following steps are required:
   1) Pre-inspection and/or tear off approval.
   2) In-progress inspection approval.
   3) Final inspection approval.
      a) Spark arrester installation.
5. If plywood is installed, a plywood nail inspection is required.
6. Any roofing which is applied without first obtaining an inspection, will require the removal of all new material down to the sheathing, so a proper City inspection can be performed.
7. **NOTE:** If you call for a plywood nail inspection and the job is **not** ready, you will be charged a re-inspection fee of $176.18. The re-inspection fee **must be paid before another inspection can be scheduled.**

IMPORTANT:

1. Flat roofs must have a minimum of ¼ " per foot slope and demonstrate that there is no ponding.
2. An I.C.B.O. report is required to be on the job site at the time on inspection.

I understand and will comply with the above stated policy on re-roofing.

Site History

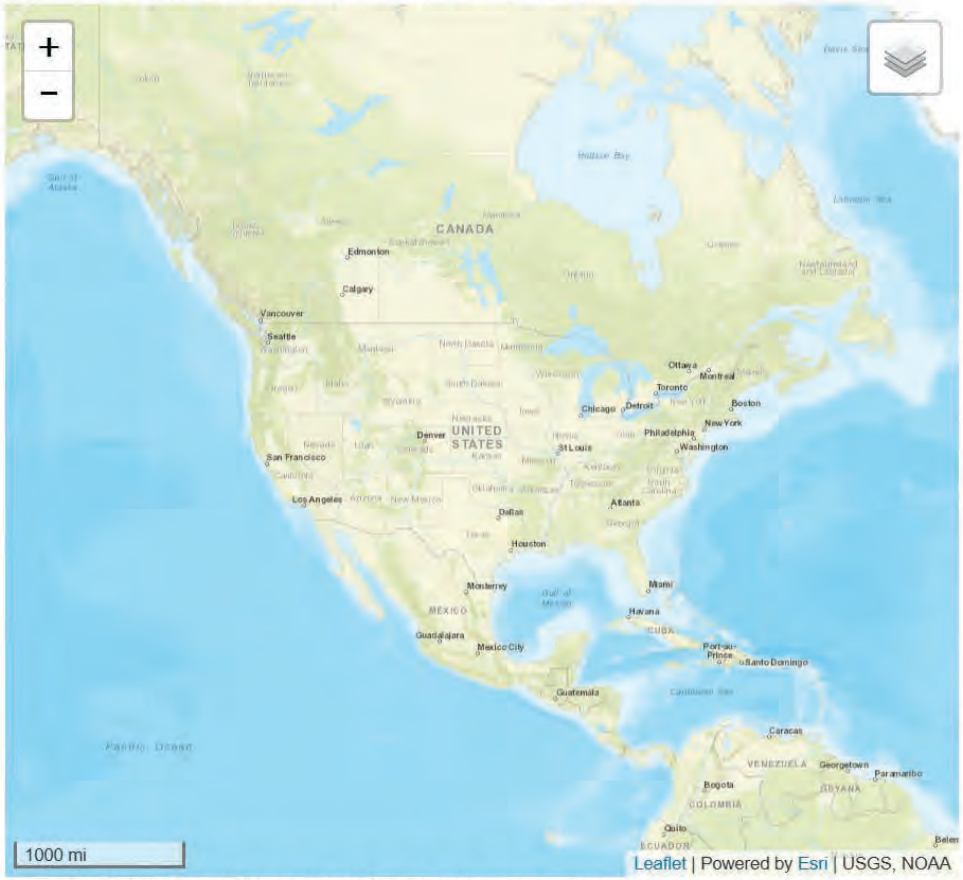

From 1977 to 1984, Four-Phase Systems, Inc. manufactured semiconductor components at the site. Four-Phase utilized a number of hazardous materials, and generated, stored and treated hazardous waste. The semiconductor manufacturing facility was closed in 1984 and DHS certified the closure in February 1987. The property is currently owned by Apple Computer and serves as Apple Computer headquarters.

Hello Jessica,

The San Francisco Bay Regional Water Board received your January 27, 2025 file review request, which seeks records related to the address as described below. Based on a thorough search, the San Francisco Bay Water Board does not possess any records responsive to your request.

I would recommend contacting the local agency, Santa Clara Valley Water District for any information they may have.

Thank you,

This message originated outside your organization. Please use caution!

The oversight responsibility for investigations and clean-up of releases from underground storage tanks was transferred from the Santa Clara Valley Water District to the Santa Clara County Department of Environmental Health as of July 1, 2004. DEH files on leaking underground storage tanks have been transferred to the State Water Resources Control Board's GeoTracker database. Case files are available online at https://geotracker.waterboards.ca.gov/.

For more information, see Santa Clara County's file review page (https://www.sccgov.org/sites/hazmat/programs/smp/Pages/review.aspx)
We also recommend that you visit the Department of Toxic Substances Control's EnviroStor website for additional information related to non-DEH cleanup cases within the County at http://www.envirostor.dtsc.ca.gov/public/.

Solvent and toxic release sites in Santa Clara County are primarily regulated by the following Agencies:

- San Francisco Bay Regional Water Quality Control Board (Case data available through GeoTracker)
- California Department of Toxic Substances Control (Case data available through EnviroStor)
- United States Environmental Protection Agency (Case data for Superfund sites available through EPA)
- Central Coast Regional Water Quality Control Board (Case data available through GeoTracker)
- Local Fire Departments may also maintain records.

We do provide some solvent case files at: https://www.valleywater.org/node/789; however, please note that these files may be incomplete and not up-to-date. These files are not maintained by the district. For complete case files, including the most recently submitted reports, contact the regulatory agency overseeing the case.

Valley Water's information regarding wells is available at https://gis.valleywater.org/wellinfo/. This tool works best using Google Chrome. Using this portal and zooming in on an area, you can get data on whether we have data concerning wells at a site, and if so the well's status, permit number, and construction specifics like depth, diameter, screen interval, if this data is in our database.

For well logs, please contact the State Department of Water Resources. Information on how to

request well logs can be found here: https://water.ca.gov/Programs/Groundwater-Management/Wells.

The location of Valley Water Fee Title and Easements can be viewed on our app at https://www.valleywater.org/contractors/doing-businesses-with-the-district/permits-working-valley-water-land-or-easement as well as information about how to obtain encroachment permits which are required for any work that takes place on or near Valley Water land, easement, or facility."

If these are not the types of files you are seeking, please provide us with more information about the types of records sought.

Public Records Request Number: 1-012725-05
Location(s): 10268 Bandley Drive, Cupertino, California

Dear Requestor:

On January 27, 2025, the Department of Toxic Substances Control (DTSC) received your email of January 27, 2025 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-3611 or via email at PubReqAct@dtsc.ca.gov.

Respectfully,

Nancy Fang

APPENDIX G

User-Provided Documents

ASTM E 1527-21 Optional User Questionnaire

To qualify for the protections offered under the EPA All Appropriate Inquiry (AAI) Standard, the **User** (entities seeking to use the ASTM E1527-21 Practice to complete an Phase I Environmental Assessment (ESA) of the property; i.e. Lenders and/or Borrowers) must conduct the following inquiries. The User should provide the following information to the environmental professional. Failure to conduct these inquires could result in a determination that AAI is not complete.

This information should be the collective knowledge of the entities relying on the Phase I ESA. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: 10268 Bandley Drive, Cupertino, CA

Person Interviewed/Title: Steven Bull / SummerHill Homes VP Development Date: 02/26/2025

If known, when was the property initially developed? unknown

If different, when were the current building(s) on the property constructed? unknown

1. Environmental liens that are filed or recorded against the subject property (40 CFR 312.25).

Did a search of *land title records* (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the *subject property* under federal, tribal, state or local law?

Yes ☐ No ☑ If you answer yes, please include an explanation in the space provided below:

_____
_____
_____
_____

2. Activity and land use limitations that are in place on the *subject property* or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of *land title records* (or judicial records where appropriate, see Note 1 below) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *subject property* and/or have been filed against the *subject property* under federal, tribal, state, or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on a property). *Institutional Controls* are defined as a legal or administrative mechanism on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Yes ☐ No ☑ If you answer yes, please include an explanation in the space provided below:

_____
_____
_____
_____

Note 1 - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
Do you have any specialized knowledge or experience related to the *subject property* or nearby properties?
For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☐ No ☑ If you answer yes, please include an explanation in the space provided below:

_____
_____
_____
_____

4. Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated (40 CFR 312.29).

a) Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *subject property*?

Yes ☑ No ☐ If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?

_____
_____
_____
_____

5. Commonly known or *reasonably ascertainable* information about the *subject property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *subject property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *User*:

a. Do you know the past uses of the *subject property*?

Yes ☐ No ☑

b. Do you know of specific chemicals that are present or once were present at the *subject property*?

Yes ☐ No ☑

c. Do you know of spills or other chemical releases that have taken place at the *subject property*?

Yes ☐ No ☑

d. Do you know of any environmental cleanups that have taken place at the *subject property*?

Yes ☐ No ☑

If you answered yes to any of the questions above, please include an explanation in the space provided below:

_____
_____
_____
_____

6. The degree of obviousness of the presence of likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *subject property,* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *subject property*?

Yes ☐ No ☑ If you answer yes, please include an explanation in the space provided below:

_____
_____
_____
_____

Please provide the following property contact information:

1. Introduction

Roux Associates, Inc. (Roux), on behalf of SummerHill Homes LLC (SummerHill), performed a Limited Phase II Investigation (Limited Phase II) for the property located at 10268 Bandley Drive, Cupertino, California (Site). The location of the Site is shown on Figure 1. The Site occupies approximately 1.55 acres of land, associated with the Assessor's Parcel Number (APN) 326-33-97 in Santa Clara County. The Site is currently developed with one commercial building and associated parking areas, and small strips of landscaped planters. The Site appears to have been used for agricultural purposes as orchards from at least 1939 through at least 1980, at which time a building was constructed on the Site in its current configuration. The Site was occupied by commercial-use tenants, primarily offices and retail shops, from 2010 through 2020. The proposed redevelopment plan includes the construction of 32 townhomes.

Roux conducted a Phase I Environmental Site Assessment (Phase I ESA) to identify past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Site's soil, groundwater, soil vapor, or surface water. The Phase I ESA was submitted to SummerHill on April 22, 2025 (Roux, 2025). The Phase I ESA did not identify any Recognized Environmental Conditions (RECs), controlled RECs (CRECs), historical RECs (HRECs) and/or de minimis conditions. Roux identified a business environmental risk (BER) of historical agricultural orchard use, which has the potential to impact soil with metals, herbicides and organochlorine pesticides (OCPs).

Per SummerHill's request, this Limited Phase II was performed to assess potential metals and OCP impacts to soil from past agricultural orchard use of the Site.

2. Background

This Section provides the background for the Site, including Site location and description, Site history, and proposed redevelopment plan.

2.1. Site Location and Description

The Site is located in a mixed residential and commercial neighborhood in Cupertino, California. The Site is currently developed with one commercial building, associated parking areas, and small strips of landscaped planters. The Site is bordered by commercial buildings to the north and south, a parking lot to the east, and Bandley Drive to the west.

2.2. Site Geology and Hydrogeographic Setting

The Site is located within the Santa Clara Valley groundwater basin and the Santa Clara subbasin,[1] which occupies a structural trough parallel to the northwest trending Coast Ranges. It extends from the northern border of Santa Clara County to the groundwater divide near the town of Morgan Hill. It is bounded by the Diablo Range to the east and the Santa Cruz Mountains to the west. Geologically, the water bearing formations of the subbasin include Pliocene to Holocene-age continental deposits of unconsolidated to semi-consolidated gravel, sand, silt, and clay. The combined thickness of the two major water bearing formations, the Santa Clara formation (a Plio-Pleistocene age formation) and a Pleistocene-Holocene alluvium formation, likely exceeds 1,500 feet.

According to the U.S. Geological Survey (USGS), the geology in the vicinity of the Site primarily consists of Holocene alluvial fan deposits and late Pleistocene alluvial terrace deposits.[2] Based on the Limited Phase II as described herein, the Site is underlain by approximately 0.5 to 1.0 feet of sand with loose gravel and minor amounts of silt that is suspected to be fill. Underlaying the sand with gravel and silt fill, is approximately 1.5 feet of a similar material but with more sand content and a noticeable color change to reddish brown that is suspected to be native soil. No other environmental investigations have been conducted onsite.

The Site is at an elevation of approximately 245 feet above mean sea level (amsl). The general topography in the vicinity of the Site slopes gently to the east-northeast. The Site falls within the West Valley Watershed,[3] which flows north into the San Francisco Bay. According to the U.S. Fish and Wildlife Service National Wetlands Inventory (NWI)[4], the nearest surface water bodies include a freshwater pond located approximately 0.7 miles southwest (however, should be noted that this pond does not appear in recent aerial photographs), Regnart Creek located approximately 0.8 miles south, Calabazas Creek located approximately 1.2 miles southeast, and Stevens Creek located approximately 1.4 miles east.

Based on groundwater data from a nearby site in 2006, located at 20755 Stevens Creek Blvd (southwest of the Site), and groundwater data from a nearby site in 2009, located at 10165 North De Anza Blvd (southwest

3 Santa Clara Valley Water District. Watersheds of Santa Clara Valley, West Valley Watershed Fast Facts. Accessed February 11, 2025. (https://www.valleywater.org/learning-center/watersheds-santa-clara-valley/west-valley-watershed-fast-facts).

4 U.S. Fish and Wildlife Service. National Wetlands Inventory (NWI), Wetlands Mapper. Accessed February 11, 2025. (https://fwsprimary.wim.usgs.gov/wetlands/apps/wetlands-mapper/).

of the Site), depth to groundwater in the vicinity of the Site can range from approximately 115 to 120 feet below ground surface (bgs). Groundwater generally flows to the north-northeast; however, some southeast orientations have also been documented. In some areas of the valley floor, the groundwater gradient is essentially flat, resulting in great variability and significant seasonal changes in site specific groundwater flow directions.[5,6]

2.3. Site History

According to information provided in the Phase I ESA (Roux, 2025), the Site was used for agricultural purposes as orchards from at least 1939 through at least 1980. According to the City Directory, the Site was occupied by commercial use tenants, primarily as offices and retail shops, from 2010 through 2020.

The Site was not identified in any environmental reporting databases. According to records received by the City of Cupertino, the building was constructed in around 1977 and had minor renovations from 2005 to 2022 including reroofing, the installation of electrical kilns, and wall and window improvements. No known environmental releases have been recorded at the Site.

3. Limited Phase II Investigation

Roux conducted a Limited Phase II environmental subsurface investigation on March 10, 2025, to assess previous agricultural usage at the Site. The details of this investigation are described below.

3.1. Pre-Field Activities

Prior to intrusive work at the Property, Roux prepared a Site-specific Health and Safety Plan. Roux marked the proposed boring locations with white paint and notified Underground Service Alert of intended subsurface work at least two business days prior to drilling. Roux also contracted with Ground Penetrating Radar Systems, LLC (GPRS) of Manteca, California to perform a private geophysical investigation at each soil boring location to locate potentially buried utility lines or other subsurface features. On March 10, 2025, GPRS cleared the proposed boring locations prior to intrusive work.

3.2. Boring Advancement

On March 10, 2025, under the direction of Roux, Penecore Drilling (Penecore) of Woodland, California (C-57 License # 906899) advanced four soil borings (RB-01 through RB-04) to up to 2.5 feet bgs) using a hand auger to collect soil samples. Boring locations are presented in Figure 2.

At each boring location during boring advancement, an experienced scientist, engineer, or geologist, under the supervision of a Professional Geologist or Engineer logged, and sampled the soil. Boring logs are included in Appendix A.

3.3. Soil Sampling

To assess if shallow soil has been impacted by historical agricultural use, soil samples were collected from borings RB-01 through RB-04. Samples were collected at varying depths ranging from 0.5 to 2.5 feet bgs from each boring location to collect samples at the first encountered depth of native soil, and 1-foot below this depth. Samples were placed into laboratory-provided soil jars, for a total of 8 soil samples collected. The four shallower samples were initially analyzed for the following:

- CAM 17 metals by U.S. Environmental Protection Agency (EPA) Method 6000/7000 series; and
- OCPs with low-level cleanup for residential Environmental Screening Levels (ESLs) by EPA Method 8081A.

The four deeper samples were held upon review of initial results. Based on review of initial results in comparison to Residential San Francisco Bay Regional Water Quality Control Board (RWQCB) ESLs as described in Section 3.6, the deeper samples were not analyzed for the analytes listed above.

All soil samples were appropriately sealed, labelled, stored on ice, and transported by courier under chain of custody to McCampbell Analytical, Inc. (McCampbell) of Pittsburg, California, a California-certified laboratory.

3.4. Boring Abandonment

Following sampling activities, all soil borings were backfilled with grout to just below the ground surface. Borings located in the asphalt parking lot were patched at the surface to match the surrounding ground surface with concrete with black dye.

3.5. Investigation Derived Waste

Soil cuttings were stored as investigated derived waste (IDW) in a Department of Transportation (DOT)-rated 55-gallon drum on Site. One four-point composite soil sample was collected and analyzed for the following constituents for waste characterization purposes:

- Total petroleum hydrocarbons (TPH) as gasoline (TPH-g) and volatile organic compounds (VOCs) by EPA Method 8260;
- TPH as diesel (TPH-d) and TPH as motor oil (TPH-mo) by EPA Method 8015; and
- CAM 17 Metals by EPA Method 6000/7000 series.

OCP data from borings were used for waste characterization purposes. It should be noted that soil is characterized as California-hazardous and will be disposed of offsite at a regulated landfill due to the dichlorodiphenyldichloroethylene (DDE) concentration detected in RB-02-1.0. Manifest documentation will be provided to SummerHill following acceptance and signature by the receiving waste facility.

3.6. Soil Sampling Results

Concentrations detected in soil were compared to RWQCB September 2025 Residential ESLs (RWQCB, 2025) as well as the San Francisco Bay Area natural background concentration in soil for arsenic (Duverge, 2011). No metals or OCPs were detected exceeding Residential ESLs.

Soil analytical results are summarized in Tables 1 and 2. Laboratory analytical reports are included in Appendix B.

3.7. Limited Phase II Summary

All detected concentrations in shallow soil were below applicable Residential ESLs. Therefore, metals and OCPs from past agricultural orchard use do not present an unacceptable human health risk to future residents.

Based on the Limited Phase II results, no further investigation is recommended for the Site.

APPENDIX B

Laboratory Analytical Report

McCampbell Analytical, Inc.

"When Quality Counts"

Analytical Report

WorkOrder: 2503614

Report Created for: Roux Associates, Inc.

555 12th Street, Suite 250
Oakland, CA 94607

Project Contact: Emily Siegel
Project P.O.: 2965.0029S000
Project: SummerHill Bandley

Project Location: 10268 Bandley Dr. Cupertino, CA
Project Received: 03/11/2025

Analytical Report reviewed & approved for release on 03/21/2025 by:

Jena Alfaro
Project Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current regulatory standards, where applicable, unless otherwise stated in a case narrative.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc. **WorkOrder:** 2503614

Project: SummerHill Bandley

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CCV	Continuing Calibration Verification.
CCV REC (%)	% recovery of Continuing Calibration Verification.
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LCS2	Second LCS for the batch. Spike level is lower than that for the first LCS; applicable to method 1633.
LQL	Lowest Quantitation Level
MB	Method Blank
MB IS/SS % Rec	% Recovery of Internal Standard or Surrogate in Method Blank, if applicable
MB SS % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit [1]
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
NA	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit [2]
RPD	Relative Percent Difference
RRT	Relative Retention Time
RSD	Relative Standard Deviation
SNR	Surrogate is diluted out of the calibration range

[1] MDL is the minimum measured concentration of a substance that can be reported with 99% confidence that the measured concentration is distinguishable from method blank results. Definition and Procedure for the Determination of the Method Detection Limit, Revision 2, 40CFR, Part 136, Appendix B, EPA 821-R-16-006, December 2016. Values are based upon our default extraction volume/amount and are subject to change.

[2] RL is the lowest level that can be reliably determined within specified limits of precision and accuracy during routine laboratory operating conditions. (The RL cannot be lower than the lowest calibration standard used in the initial calibration of the instrument and must be greater than the MDL.) Values are based upon our default extraction volume/amount and are subject to change.

Glossary of Terms & Qualifier Definitions

Client: Roux Associates, Inc. **WorkOrder:** 2503614

Project: SummerHill Bandley

SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TNTC	“Too Numerous to Count;” greater than 250 colonies observed on the plate.
TZA	TimeZone Net Adjustment for sample collected outside of MAI's Coordinated Universal Time (UTC). (Adjustment for Daylight Saving is not accounted.)
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
P	Agreement between the quantitative dual-column confirmation results exceed method recommended limits of 40% RPD. The lowest concentration is reported.
h2	Silica-gel (EPA 3630) cleanup
h8	Charcoal clean up (MAI)
h9	Size Exclusion Gravity Cleanup

NOTES: * STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- ISM prep requires 5 to 10 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 6 to 11 days from sample submission). Due date listed on WO summary will not accurately reflect the time needed for sample preparation.

- Organic extracts are held for 40 days before disposal; Inorganic extract are held for 30 days.

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

U = An unpreserved container was received for a method that suggests a preservation in order to extend hold time for analysis.**

Cont./Comp. = Containers /Composites

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Chain of Custody (COC) Information

Chain of custody present?	Yes ☑	No ☐	
Chain of custody signed when relinquished and received?	Yes ☑	No ☐	
Chain of custody agrees with sample labels?	Yes ☑	No ☐	
Sample IDs noted by Client on COC?	Yes ☑	No ☐	
Date and Time of collection noted by Client on COC?	Yes ☑	No ☐	
Sampler's name noted on COC?	Yes ☑	No ☐	
COC agrees with Quote?	Yes ☐	No ☐	NA ☑

Sample Receipt Information

Custody seals intact on shipping container/cooler?	Yes ☐	No ☐	NA ☑
Custody seals intact on sample bottles?	Yes ☐	No ☐	NA ☑
Shipping container/cooler in good condition?	Yes ☑	No ☐	
Samples in proper containers/bottles?	Yes ☑	No ☐	
Sample containers intact?	Yes ☑	No ☐	
Sufficient sample volume for indicated test?	Yes ☑	No ☐	

Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	Yes ☑	No ☐	NA ☐
Samples Received on Ice?	Yes ☑	No ☐	
(Ice Type: WET ICE)			
Sample/Temp Blank temperature	Temp: 3.1°C		NA ☐
ZHS conditional analyses: VOA meets zero headspace requirement (VOCs, TPHg/BTEX, RSK)?	Yes ☐	No ☐	NA ☑
Sample labels checked for correct preservation?	Yes ☑	No ☐	
pH acceptable upon receipt (Metal: <2)?	Yes ☐	No ☐	NA ☑

UCMR Samples:

pH tested and acceptable upon receipt (200.7: ≤2; 533: 6 - 8; 537.1: 6 - 8)?	Yes ☐	No ☐	NA ☑
Free Chlorine tested and acceptable upon receipt (<0.1mg/L) [not applicable to 200.7]?	Yes ☐	No ☐	NA ☑
