1. EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment has been conducted for the Subject Property. The objective of this Phase I ESA is to identify, to the extent feasible pursuant to the process described in ASTM International Standard E1527-21, recognized environmental conditions (RECs). A summary of the Findings, Opinion, Conclusions and Recommendations are provided below:

FINDINGS:	COMMENTS
Site Description	The Subject Property consists of one parcel located at 10621 Madera Drive, Cupertino, CA 95014. The Subject Property is identified as APN: 32635061.
Subject Property History	The Subject Property has been used as residential since the existing building was constructed circa 1958. Prior to 1958, the Subject Property appears to have been in use as orchard land.
Site Observations	The Subject Property is currently used as a single-family residence. No significant staining was observed throughout the indoor and outdoor grounds of the Subject Property.
Database Findings for the Subject Property	The Subject Property was not listed in the Environmental Records Sources searched.
Database Findings for Adjoining Properties	No Adjoining Properties were listed in the Environmental Records Sources searched.
Database Findings for Surrounding Properties	Surrounding and Unplottable Sites identified as a potential concern are discussed in Sections 5.6 and 5.7.
Local Records	Records found for the Subject Property are discussed in Section 6.2.

OPINIONS:	IDENTIFIED		COMMENTS
	?		
	Yes	No	
Significant Data Gaps		X	No significant data gaps were identified for the Subject Property.
Business Environmental Risk	X		Due to the age of the residence, asbestos containing material and lead based paint maybe contained within the residence, these are considered Business Environmental Risks.
Recognized Environmental	X		The previous usage of the Subject Property as an

Condition (REC)			orchard and the likely usage of organochlorine pesticides in this time period represent a likely risk of release and is considered a REC. In addition, organochlorine pesticides associated with termiticides has likely been applied to the ground around the single-family dwelling, this is also considered a REC.
Historical Recognized Environmental Condition (HREC)		X	No HRECs were identified.
Controlled Recognized Environmental Condition (CREC)		X	No CRECs were identified.
Vapor Intrusion Risk		X	No vapor intrusion risks were identified for the Subject Property.
De Minimis Condition		X	No De Minimis Conditions were identified.

1.1. CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property at 10621 Madera Drive, Cupertino, CA 95014. The Subject Property is identified by its APN(s) as 32635061. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed the following recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

- The previous usage of the Subject Property as an orchard and the likely past usage of organochlorine pesticides in this time period represent a likely risk of release and is considered a REC.
- Organochlorine pesticides associated with termiticides has likely been applied to the ground around the single-family dwelling, this is also considered a REC.

1.2. RECOMMENDATIONS

ASTM International Standard E1527-21 and AAI represent the minimum level of inquiry necessary to support the LLPs. It is important, however, to understand that additional inquiry ultimately may be necessary or desirable for legal—as well as business—reasons, depending upon the outcome of this Phase I assessment and the particular risk tolerances of a user. For example, such additional inquiry may assist the user in determining whether he would have continuing obligations in the event he acquires the Property and may also assist the user in defining the scope of future steps to be taken to satisfy the obligation to take reasonable steps. Additionally, a user may be concerned about Business Environmental Risks that do not fall within the definition of a REC. If a Phase I assessment performed to the requirements of the ASTM International Standard E1527-21 identifies the presence of RECs, the user may desire to conduct additional subsurface investigation (commonly referred to as a “Phase II” environmental investigation).

Based on this Phase I Environmental Site Assessment (ESA), further environmental investigation is recommended for the Subject Property at this time. Enviro Assessment, PC (Enviro Assessment) recommends a Phase II ESA to confirm or deny the presence of organochlorine pesticides based on the past usage of the Subject Property as an orchard and testing around the foundation of the residence.

The statements and recommendations in this report are based upon the findings, opinions, conclusions, and site reconnaissance performed in accordance with ASTM International Standard E1527-21. This recommendation is a non-scope consideration which Enviro Assessment has performed as a courtesy to the client. Enviro Assessment’s work and recommendation have been performed using a degree of skill consistent with that of competent environmental consulting firms performing similar work. Enviro Assessment has considered all reasonably ascertainable data obtained during the Phase I ESA process in the production of this recommendation. Additional research or receipt of information regarding the Subject Property that was not disclosed or available to Enviro Assessment during the assessment may result in revision of the recommendation.

The recommendation in this report should be re-evaluated if site conditions change. This

recommendation is not intended to assess the suitability of the Subject Property for any purpose. This recommendation does not preclude the possibility that materials currently, or in the future, defined as hazardous substances are present on the Subject Property. This recommendation is applicable only to the Subject Property investigated during the Phase I Environmental Site Assessment and should not be used for any other property. No expressed or implied warranties are given hereunder with regard to any non-scope considerations Enviro Assessment has provided.

2. INTRODUCTION

2.1. LOCATION AND LEGAL DESCRIPTION

Subject Property Address:	10621 Madera Drive, Cupertino, CA 95014
Assessor Parcel Number(s):	32635061

A Vicinity Map and a Topographic Map are located in the Appendix.

2.2. SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is located on the south side of Madera Drive, approximately 0.17 miles northwest from the intersection of Madera Drive and Phar Lap Drive, within the central portion of the city of Cupertino, CA. The city of Cupertino is located within the Santa Clara Valley, between the Santa Cruz Mountains to the west, San Francisco Bay to the northeast, and the Diablo Mountains further to the east.

2.3. DESCRIPTION OF IMPROVEMENTS

Property Type	Residential
Land Area (Acres)/Source:	0.87 acre / Google Parcel Estimate
Number Of Units:	1
Number Of Buildings:	1
Year Constructed:	1958
Building Area (SF)/Source	1,632 square feet / Assessor office
Potable Water Supply	City
Domestic Sewage	City Sewer

2.4. CURRENT USES OF ADJOINING PROPERTIES

DIRECTION	ADDRESS	TYPE OF USE
North	Railroad Easement	Railroad easement
South	10588 Creston Drive	Residential
	10554 Creston Drive	Residential
East	10601 Madera Drive	Residential
West	10641 Madera Drive	Residential
	Vacant land	Vacant land

2.5. PURPOSE

The purpose of this Phase I Environmental Site Assessment is to identify, to the extent feasible, Recognized Environmental Conditions (REC) in connection with the Subject Property. The report follows the processes prescribed by the USEPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and in ASTM International Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

As defined by ASTM International E1527-21, §1.1.1, the term "Recognized Environmental Conditions" refers to:

The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

As defined by ASTM International E1527-21, §3.2.17, the term "Controlled Recognized Environmental Condition" refers to:

"Recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

As defined by ASTM International E1527-21, §3.2.39, the term "Historical Recognized Environmental Condition" refers to:

"A previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established

by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations).

2.6. DETAILED SCOPE-OF-SERVICE

The scope of work performed for this Phase I Environmental Site Assessment report includes:

- Collecting and reviewing available environmental related information concerning the Property and other data pertinent to the specific site per the ASTM International Standard E1527-21;
- Conducting a site reconnaissance to observe current Subject Property uses, observe adjacent land use, and gather data on possible spills, or misuse of chemicals that could be considered a REC;
- Contacting appropriate regulatory personnel and reviewing regulatory files regarding the Subject Property in question.

Any additional non-scope considerations per Section 13 of the ASTM International Standard E1527-21 that may be included in this Phase I Environmental Assessment report per the contract would be presented in Section 12 of this report.

2.7. SIGNIFICANT ASSUMPTIONS

No significant assumptions were made in this assessment.

2.8. LIMITATIONS AND EXCEPTIONS

2.8.1. Limitations

This report is applicable only for the Subject Property and site studied. Report findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied. This report contains information and data provided by others; Enviro Assessment in no way warrants the accuracy or completeness of the information provided by those sources. Enviro Assessment's services are performed in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This report is prepared using the ASTM International Standard E1527-21 and includes several inherent limitations, including but not limited to: Section 4.5.1 - Uncertainty Not

Eliminated, Section 4.5.2 - Not Exhaustive, Section 7.4 - No Sampling, and Section 7.5.2.1 - Reliance. This report was requested to be produced within a specific time frame. Any information received after the completion of the report will not be included in this report. An addendum or update to this report may be required based on the type and quality of the information received. This could include RECs that were not previously defined.

2.8.2. Exceptions

No exceptions to or deviations from the ASTM International Standard E1527-21 was made during the course of work, with the exception of the following:

- No interviews were conducted with local agencies as part of this assessment. Relevant local agencies for the area have policies of referring requests for interviews to their file review departments.
- A complete list of previous occupants of the Subject Property was not located; therefore, no determination can be made based on every previous use of the Subject Property (property owners prior to 1963).
- A complete history in five-year intervals was not reasonably ascertainable.

These limitations are not anticipated to represent a significant data gap for the investigation.

2.9. SPECIAL TERMS AND CONDITIONS

Enviro Assessment has been authorized by Ben Engelman to perform a Phase I Environmental Site Assessment of the Subject Property. It is Enviro Assessment's understanding that Mr. Engelman will use the information contained in this report due to a local planning department requirement. Without prior written consent of the client, Enviro Assessment will keep confidential, and not disclose to any person or entity, any data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

2.10. USER RELIANCE

This report was prepared for the exclusive use of Mr. Engelman. No other person or entity is entitled to rely upon this report without the specific written authorization of Enviro Assessment. Such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. Enviro Assessment specifically disclaims any responsibility for any unauthorized use of this report. Based on the ASTM International Standard, this Phase I report expires 180 days from the date the work was conducted.

3. USER PROVIDED INFORMATION

The “All Appropriate Inquiries” Final Rule (40 C.F.R. Part 312) requires that certain tasks be performed by or on behalf of a party seeking to qualify for an LLP to CERCLA liability. The following items were requested of the client in our provided questionnaire and discussed below:

3.1. TITLE RECORDS

Neither chain of title reports, a Preliminary Title Report, nor a Commitment for Title Insurance were reviewed for pertinent title records and/or judicial records, as no such records were made available for review.

3.2. ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

No Environmental Liens or Activity and No Limitation search results were received from the user during this Assessment in regard to the Subject Property. No environmental liens placed by the federal environmental agency under CERCLA regulations for the Subject Property was/were found during a record search on available government records.

3.3. SPECIALIZED KNOWLEDGE

No information was provided identifying specialized knowledge or experience that is material to Recognized Environmental Conditions in connection with the Subject Property.

3.4. COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

No information was provided identifying knowledge of commonly known or reasonably ascertainable information related to the Subject Property.

3.5. VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No information was provided identifying knowledge of valuation reduction of the Subject Property.

3.6. OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Information provided by the owner of the Subject Property is discussed in Section 6 of this report.

3.7. REASON FOR PERFORMING PHASE I

The Phase I has been requested by Mr. Engelman due to a local planning department requirement.

3.8. OTHER

No other information related to the Subject Property was provided for review.

4. SITE RECONNAISSANCE

A site reconnaissance of the Subject Property was conducted on December 2, 2023 by Mr. Ashe, under the supervision of Mr. Robinson. A site map and photographs of the Subject Property are attached to this report in the Appendix.

4.1. METHODOLOGY AND LIMITING CONDITIONS

The periphery of the Subject Property was inspected. A detailed inspection was conducted of all major site features visible from the public portions of the Subject Property.

4.2. EXTERIOR AND INTERIOR OBSERVATIONS

Observations made during the site visit are summarized in the following table:

SITE VISIT OBSERVATIONS	
Current use(s)/tenants	At the time of the site inspection, the SP was occupied by a vacant 3 bedroom/2 bath single-family residential structure.
Past use(s)	According to Mr. Engleman, the SP was previously developed as orchard land. An internet search on HistoricAerials.com confirmed this.
Current use of adjoining properties	North: immediately by Madera Drive, then by the Vasona Industrial Lead railroad spur line, then Interstate 280 (aka the Junipero Serra Freeway), then by Caroline Drive, and further by residential development. South: immediately by, from west to east, a single-family residential structure (10562 Creston Drive), a single-family residential structure (10558 Creston Drive) and a single-family residential structure (10554 Creston Drive), then Creston Drive, and further by residential development. East: immediately by a single-family residential structure (10601 Madera Drive) and further by residential development. West: immediately by a single-family residential structure (10641 Madera Drive) and further by structurally undeveloped land.
Evidence of past use of adjoining properties	No past usage (visual indicators) of the adjoining properties were noted during the site inspection.
Topography	The topography of the center and northern portions of the SP slopes slightly to the south. The southern portion of the SP slopes sharply to the south down to Stevens Creek, the dam-controlled creek

	located along the southern boundary of the SP.
Number of structures (include approximate size and # of stories)	The SP is developed with a 1,632 square foot, single-story single-family residential structure. This structure has exterior wood walls set on concrete footings. The conditioned portion of the structure (main house) has a raised wood floor with crawlspace. The garage portion has a poured concrete foundation. The interior consists of three bedrooms, two bathrooms, living room, family room, kitchen, laundry room, breakfast room and hallway.
Roads/driveways/parking	Madera Drive is located along the northern boundary of the SP and Interstate 280 (aka the Junipero Serra Freeway) is located further north. One concrete driveway apron off Madera Drive is located along the northern boundary of the SP and accesses the SP garage. A dirt roadway located at the northwest corner of the SP accesses the center terraced area located behind the SP building. No areas of suspect patch areas/disturbed soil were observed during the site inspection.
Potable water supply	Domestic water to the occupants of the SP is supplied by Cupertino Water Service (leased to San Jose Water). No water wells were observed on the SP.
Solid waste disposal	Four wheeled waste containers were observed along the western exterior wall of the SP building at the time of the site inspection. One container was labeled for recyclables, one container for green waste and two containers for household waste. All containers are serviced by the City of Cupertino. An inspection of these containers did not reveal any indication of improper waste disposal. No staining or evidence of a release was noted in the vicinity of these containers.
Sewer discharge and disposal	Sewage service for the SP is supplied by the Cupertino Sanitary District. No septic systems or leach fields were observed or are known on the SP.
Surface water drainage	Surface water runoff from the SP is expected to percolate into the SP soils, flow into stormwater drains along Madera Drive to the north, or into Stevens Creek along the southern boundary. No exterior surface drains were observed on the SP. No interior surface drains, other than for the two toilets and kitchen, were observed in the SP building.
Source of heating and cooling	The SP building utilizes a pad-mounted HVAC unit located east of the structure. A gas-fired furnace is located inside the SP building garage.

OBSERVATION CHECKLIST

Type	Observed?		Notes
	Yes	No	
Hazardous materials and petroleum products	√		At the time of the site inspection, no significant amounts of hazardous materials or petroleum products were observed on the SP. Three unlabeled cans (two 1-gallon and one quart) of presumed paint and two containers of motor oil were located along the fence south of the SP building. It appears these containers may be from a clandestine dumping. No staining or evidence of a release was noted in the area of these containers. No chemicals were observed inside the SP building.
Storage tanks		√	No aboveground storage tanks, former AST saddles or pads were observed on the SP. No underground storage tanks, fill pipes or vents pipes were observed on the SP.
Strong, pungent or noxious odors		√	No issues observed during the site inspection of the SP.
Standing surface water and pools, or sumps containing liquids likely to be hazardous substances or petroleum products.		√	None observed during the site inspection.
Drums, totes, and intermediate bulk containers		√	None observed during the site inspection.
Hazardous substance and petroleum product containers not in connection with identified uses		√	None observed during the site inspection.
Unidentified substance containers.	√		At the time of the site inspection, no significant amounts of hazardous materials or petroleum products were observed on the SP. Three unlabeled cans (two 1-gallon and one quart) of presumed paint and two containers of motor oil were located along the fence south of the SP building. It appears these containers may be from a clandestine dumping. No staining or

			evidence of a release was noted in the area of these containers. None other unidentified substance containers were observed during the site inspection.
Polychlorinated biphenyls (PCBs) (i.e., industrial lighting units, lifts, box crushers, heavy equip....)		√	None observed during the site inspection.
Pole- or pad-mounted transformers		√	None observed on the SP during the site inspection. A pole-mounted electrical transformer is located near the northeast corner of the SP. An inspection of this transformer identified no release issues. This transformer is labeled “No-PCB” and to contain “Natural Ester.”
Stains or corrosion on floors, walls, or ceilings (not from water)		√	None observed during the site inspection.
Area drains, floor drains	√		Surface drains associated with the SP building restrooms and kitchen were noted. No staining or evidence of a release was observed in the interior or perimeter of these areas. No exterior surface drains were observed on the SP.
Sumps, drywells, catch basins, clarifiers		√	No oil/water separators, sumps, clarifiers, dry wells or catch basins were located on the SP.
Pits, ponds, lagoons		√	None observed on the SP.
Stained soil or pavement		√	No significant surface staining observed on the SP at the time of the site inspection.
Stressed vegetation		√	No chemically induced stressed vegetation was observed on the SP.
Water/wastewater or other liquid discharged from or to the Subject Property.		√	None observed on the SP.
Wells (irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells).		√	None observed on the SP.
Septic system or cesspools.		√	None observed on the SP.

5. RECORDS REVIEW

5.1. STANDARD AND ADDITIONAL ENVIRONMENTAL RECORDS

The Environmental Records used for this Phase I ESA were obtained through Environmental Data Resources, Inc. (ERIS®) of Austin, Texas. The search radius used for each of the records is listed below and is based on the ASTM International Standard E1527-21, Sections 8.2.2. The date of each of the government records searched and the date ERIS® obtained the records are listed in the ERIS® Report (attached). In addition to the search results, lists of sites which may be located within the search area but, due to lack of information, cannot be accurately located are provided (Unplottable Sites). This Unplottable Report list was reviewed and all sites which may be included within the search radius have been included in this report.

5.2. DATABASE RESULTS

For the full name, description, and the date each of the databases were last updated, please refer to the Government Records section of the ERIS® Report.

Tribal *No Tribal additional environmental record sources available for this State.*

County

Total: 0 4 15 8 4 31

* PO – Property Only

* 'Property and adjoining properties' database search radii are set at 0.25 miles.

5.3. METHODOLOGY OF RECORDS REVIEW

Enviro Assessment conducts *Regulatory Agency File and Records Reviews* in accordance with ASTM International Standard E1527-21, Sections 8.2.3. *The purpose of the regulatory file review is to obtain sufficient information to assist the environmental professional in determining if a recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a de minimis condition exists at the Subject Property.*

Standard Historical Information Sources (8.3.3) that are *practically reviewable* (3.2.65) and *publicly available* (3.2.69) have been examined by Enviro Assessment, PC personnel. Records that are not *practically reviewable* were not used to determine any professional opinion regarding potential impacts to the Subject Property. This review of the *Standard Historical Information Sources* includes case files that meet the definition requirements of a *recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a de minimis condition*. Please refer to the ERIS Report and appendices attached to this report for further details (Terms and definitions in italics denote direct references from ASTM International Standard E1527-21).

5.4. SUBJECT PROPERTY

The Subject Property was not listed in the ERIS records searched.

5.5. ADJOINING PROPERTIES

The ERIS Report was reviewed for any adjoining sites which may pose a risk of significant environmental concern to the Subject Property. No adjoining properties were listed within the ERIS records searched.

5.6. SURROUNDING PROPERTIES

The ERIS Report was reviewed for any surrounding sites which may pose a risk of significant environmental concern to the Subject Property. The following sites of potential environmental concern are discussed below:

- ACRIAN INCORPORATED at 10131 Bubb Road is located 0.92 miles to the east and was listed in the ENVIROSTOR, HWP, and RCRA CORRACTS database. This facility had hazardous waste materials used on site. This site is listed as having a cleanup status as closed. No effect is

anticipated on the Subject Property from this site listing based on the closed status and the distance to the Subject Property.

The remaining cases listed in the ERIS Report were for regulatory database listings, permitted facilities listings, closed/remediated cases, and historical database listings; including sites which, based on their distances, are not anticipated to impact the Subject Property. Please refer to the Appendix for further details on these sites.

5.7. UNPLOTTABLE SITES

The Unplottable Report was reviewed. No sites are listed that are within the search radius of the Subject Property.

5.8. PHYSICAL SETTING SOURCES

According to the most recent USGS Topographic maps covering the Subject Property and vicinity, the majority of the Subject Property is slightly sloped towards the northeast and lies between 260 and 300 feet above mean sea-level.

According to ERIS PSR, the Subject Property is mapped as either Urban Land-Flaskan complex, 0 to 2 percent slopes or Urbanland-Landelspark complex, 0 to 2 percent slopes. These soils are well drained. The soils are not flooded. These soils do not meet hydric criteria.

5.9. HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

5.9.1. Historical Topographic Maps

Topographic maps of the Subject Property were reviewed as part of this investigation. The results are discussed below:

DATE	MAP DESCRIPTION
1897	7.5 Minute USGS Topo Map. The area of the Subject Property is poorly mapped at this time with broad topo lines. There are sparse residential to the north. The area of the Subject Property is undeveloped at this time.

DATE	MAP DESCRIPTION
1902	63K USGS Topo Map. The area of the Subject Property is poorly mapped at this time with broad topo lines. There are sparse residential to the north. The area of the Subject Property is undeveloped at this time.
1941	63K USGS Topo Map. The area of the Subject Property is poorly mapped at this time with broad topo lines. The railroad line is illustrated near the property. The area of the Subject Property is undeveloped at this time. A creek is illustrated at the southwest corner of the property.
1943	63K USGS Topo Map. The area of the Subject Property is poorly mapped at this time with broad topo lines. The railroad line is illustrated near the property. The area of the Subject Property is undeveloped at this time. A creek is illustrated at the southwest corner of the property.
1948	63K USGS Topo Map. The area of the Subject Property is poorly mapped at this time with broad topo lines. The railroad line is illustrated near the property. The area of the Subject Property is illustrated as part of an orchard at this time. A creek is illustrated at the southwest corner of the property.
1953	7.5 Minute USGS Topo Map. The Subject Property is in use as an orchard in this time period. The railroad tracks are mapped north of the Subject Property. The current area of the Subject Property has no paved roads.
1961	7.5 Minute USGS Topo Map. The Subject Property is in use as a residential house. The railroad tracks are mapped north of the Subject Property. Madera Drive is illustrated. Green area is illustrated along the southwestern portion of the property.
1991	7.5 Minute USGS Topo Map. This era map does not show structures with the exception of government and institutional; however, all present-day roads are shown.
2021	7.5 Minute USGS Topo Map. This era map does not show structures with the exception of government and institutional; however, all present-day roads are shown.

These maps are included in the Appendix.

5.9.2. Aerial Photographs

Aerial photographs of the Subject Property were reviewed as part of this investigation. The results are discussed below:

DATE	PHOTO DESCRIPTION
1948	Subject Property: Consists of orchard lands.

DATE	PHOTO DESCRIPTION
	• Adjoining Properties: Consist of orchard lands. • Surrounding Area: The area of the Subject Property is sparsely developed with the railroad tracks located north of the Subject Property.
1953	• Subject Property: Consists of orchard lands. • Adjoining Properties: Consists of orchard lands. • Surrounding Area: The area of the Subject Property is sparsely developed with the railroad tracks located north of the Subject Property. A housing development is visible further to the north.
1960	• Subject Property: The Subject Property has been developed as a single family residence. • Adjoining Properties: The housing development southwest and southeast of the Subject Property has been developed. • Surrounding Area: The area has begun rapid infilling as the city expands.
1970	• Subject Property: Relatively unchanged. • Adjoining Properties: The 280 Freeway has been developed north of the Subject Property. • Surrounding Area: Slow infilling of the area has been ongoing.
1980	• Subject Property: Relatively unchanged. • Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.
1991	• Subject Property: Relatively unchanged. • Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.
2002	• Subject Property: Relatively unchanged. • Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.
2010	• Subject Property: Relatively unchanged. • Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.
2015	• Subject Property: Relatively unchanged. • Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.
2023	• Subject Property: Relatively unchanged.

DATE	PHOTO DESCRIPTION
	• Adjoining Properties: Relatively unchanged. • Surrounding Area: Relatively unchanged.

These photos are included in the Appendix.

5.9.3. Fire Insurance Maps

An attempt was made by ERIS to obtain Fire Insurance Maps (FIM) for the period covering the years 1866 through the present in order to determine what types of activities were conducted on the Subject Property and on adjoining properties. FIM coverage was not available for the Subject Property or surrounding area.

5.9.4. City Directories

A search of local historical city directories was conducted by ERIS for the Subject Property. The review included directories in five-year intervals from 1957 to 2022 (as available). The results are discussed below:

10621 Madera DR. (SUBJECT PROPERTY)	
DATE	LISTING DESCRIPTION
2022	Delores Jennings...Residential
2020	Charles Jennings...Residential
2016	Charles Jennings...Residential Delores Jennings...Residential Lisa Jennings...Residential
2012	Charles Jennings...Residential
2008	Charles C Jennings...Residential
2003	Address not listed
1998-1999	Jennings Chas Clinton
1995	Jennings Chas C
1991	Jennings Chas C
1987	Jennings Chas C
1981	Jennings Chas C

10621 Madera DR. (SUBJECT PROPERTY)

DATE	LISTING DESCRIPTION
1976	Jennings Chas C
1971	Jennings Chas C
1965	White J R
1963	Peters D R
1957	Street Not Listed

No other listings were found for the Subject Property.

5.10. HISTORICAL REVIEW SUMMARY

Based on the aerial photos, topographic maps, and City Directory listings of the Subject Property, in addition to information obtained while conducting interviews, the Subject Property was developed with the present-day residential structure sometime around 1958. Prior to the development of the original structure, the Subject Property existed as an orchard, dating back to the first located aerial photograph from 1948. Historical use of the Subject Property includes, but is not limited to, an orchard and residential property.

6. INTERVIEWS

An attempt has been made to obtain historical as well as current information relative to the Subject Property from several individuals and local agencies. The objective of the interview process is to obtain any information indicating recognized environmental conditions in connection with the Subject Property.

6.1. INTERVIEW WITH OWNER OR SITE MANAGER

An Environmental Questionnaire and Subject Property Boundary Verification Form were sent to Mr. Engelman, via e-mail.

FORM TITLE	DATE SENT	DATE RECEIVED	COMMENTS
Environmental Questionnaire - Part 1	11/30/2023	12/4/2023	Signed By: Ben Engelman
Environmental Questionnaire - Part 2	11/30/2023	12/4/2023	Signed By: Mohammad Falakdali
Property Boundary Verification Form	11/29/2023	11/29/2023	Confirmed via proposal

6.2. INTERVIEW WITH LOCAL GOVERNMENT OFFICIALS

Santa Clara County – Department of Public Works

The Santa Clara County Department of Public Works online database was searched on November 30, 2023, as part of the records review of the Subject Property. We found a property profile for the Subject Property. The site is listed as 0.9 Acres. Little additional information was listed.

Santa Clara County Assessor

The Santa Clara Assessor Parcel Viewer was reviewed November 30, 2023, as part of the records review of the Subject Property. We searched for a list of building permits and the dates issued. We found limited environmentally significant data recorded for the Subject Property.

Cupertino City Clerk

The Cupertino City Clerk was contacted via online records request, as part of the records review

of the Subject Property. We asked for a list of building permits and the dates issued. As of the date of this report we have not received a response. On March 5, 2025, Enviro Assessment, PC conducted an online search of the City's Permit Center for any building permits associated with the parcel. The Parcel was located on the GIS mapping system and an inquiry was conducted for building permits based on the subject property parcel. Below are the Results:

Type of Permit	Date	Details
Re-Roofing	11-8-2010	RE- ROOF 32SQ TEAR OFF SHAKES INSTALL 1/ 2 IN OSB Q INSTALL 30YR COMP SHINGLES CLASS A
Furnace	10-30-1997	Furnace Repair
Furnace	10-30-1997	Duplicate - permit for Furnace.
Plumbing	9-25-1967	Install 4 inch main drain line
Plumbing	9-25-1967	Install main drain, includes final card
Plumbing	9-25-1967	Duplicate of above permit.

Santa Clara County Fire Department

The Santa Clara County Fire Department was contacted via email on November 30, 2023, as part of the records review of the Subject Property. We requested any fire department reports related to underground or above-ground storage tanks or hazardous waste issues (permitting, tank removal, spillage, or contaminations), fire code violations, and the date of last inspection. As of the date of this report we have received no further significant environmental data.

GeoTracker / EnviroStor Database Review

The GeoTracker and EnviroStor databases were reviewed on November 30, 2023, for any additional information available regarding the Subject Property. We found no nearby sites of environmental significance.

6.3. INTERVIEW WITH OTHERS

No additional interviews were conducted in this assessment.

7. NON-SCOPE SERVICES

No additional services as listed in the ASTM Standard 1527-21 have been requested in writing and placed under contract in regard to this assessment. Including, but not limited to, asbestos testing of material at the Subject Property and drug lab uses of the Subject Property. However, Dr. Cathleen Fitzgerald, PE, Senior Engineer whom completed a third-party review of the project, requested that Asbestos containing material and lead based paint to be addressed.

7.1. ASBESTOS-LEAD RELATED REVIEW

7.1.1. Asbestos-Containing Material (ACM)

Asbestos-containing building materials were banned in 1978 by the federal government. The building was constructed in 1958. No sampling for asbestos containing material was conducted during the Phase I ESA. However, based on the date of construction asbestos containing material is anticipated to have been used in the original construction. This is considered a Business Environmental Risk (BER). Prior to remodel or demolition, an asbestos containing material survey needs to be completed to the State of California regulations.

7.1.2. Lead Based Paint Material (LBP)

Lead based paint materials were banned in 1978 by the federal government. The building was constructed in 1958. No sampling for LBP was conducted during the Phase I ESA. However, based on the date of construction LBP is anticipated to have been used in the original construction. This is considered a Business Environmental Risk (BER). Prior to remodel or demolition, a LBP survey needs to be completed to the State of California regulations.

8. FINDINGS AND OPINION

8.1. FINDINGS

Site Description

The Subject Property is located at 10621 Madera Drive, Cupertino, CA 95014. The Subject Property is identified by its APN as 32635061.

Historical Review Summary

Based on the aerial photos, topographic maps, and City Directory listings of the Subject Property, in addition to information obtained while conducting interviews, the Subject Property was developed with the present-day residential structure sometime around 1958. Prior to the development of the original structure, the Subject Property existed as an orchard, dating back to the first located aerial photograph from 1948. Historical use of the Subject Property includes, but is not limited to, an orchard and residential property.

Site Observations

Enviro Assessment personnel identified no significant observable contaminated areas on the Subject Property during the site reconnaissance.

ERIS Report Findings for the Subject Property

The Subject Property was not listed in the ERIS Report. Please refer to Section 5.4 of this report for additional details.

Additional ERIS Report Findings

The ERIS Report was reviewed for any adjoining and/or surrounding sites which may pose a risk of significant environmental concern to the Subject Property. One site of potential concern was identified in the surrounding area. Please refer to Sections 5.5 and 5.6 of this report for additional details on these sites.

Local Records Review

Interviews were conducted with individuals and local government agencies in an attempt to obtain any information indicating recognized environmental conditions in connection with the Subject Property. Please refer to Section 6 of this report for additional details on these interviews.

8.2. OPINION

Historical Records

All available standard historical sources have been reviewed in an attempt to identify the likelihood of past uses of the Subject Property and surrounding area, having led to Recognized Environmental Conditions (RECs) in connection with the site. No significant environmental concerns have been identified based on the historical use of the Subject Property or surrounding area, with the exception of the past usage of the Subject Property as an orchard and the possibility of OCPs around the residential foundation. Orchards in the past used organochlorine pesticides, and this likely past usage is considered a Recognized Environmental Condition. In addition, organochlorine pesticides associated with termiticides has likely been applied to the ground around the single-family dwelling, this is also considered a REC.

Due to the age of the residence, there is an increased likelihood of Asbestos containing material and lead based paint to be located within the residential structure. This is considered a Business Environmental Risk.

Site Observations

Enviro Assessment personnel did not observe any visible RECs related to the Subject Property.

ERIS Report Opinion for the Subject Property

The Subject Property was not listed in the ERIS Report; therefore, no RECs were identified within any database listings for the site.

Additional ERIS Report Opinion

The ERIS Report was reviewed for any adjoining, surrounding, or Unplottable sites which may pose a risk of significant environmental concern to the Subject Property. Based on the description

of the cases, the type of database listings, the amount of past regulatory oversight, and the relative distances to the Subject Property, the sites listed are not anticipated to impact the Subject Property at this time.

Local Records

No significant environmental concerns were identified during the interviews conducted for the Subject Property.

8.3. VAPOR INTRUSION

For the purposes of this Report, hazardous substances or petroleum products in any form, including (for example) solid and liquid at the surface or subsurface, and vapor in the subsurface were evaluated for possible impacts to the Property. Any likely impacts to the Property in any form (for example soil vapor intrusion) are identified in this report. If vapor intrusion is not mentioned during the discussion of each record, that indicates that no vapor intrusion risk to the subject property was anticipated.

9. CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property at 10621 Madera Drive, Cupertino, CA 95014. The Subject Property is identified by its APN(s) as 32635061. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed the following recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

- The previous usage of the Subject Property as an orchard and the likely past usage of organochlorine pesticides in this time period represent a likely risk of release and is considered a REC.
- Organochlorine pesticides associated with termiticides has likely been applied to the ground around the single-family dwelling, this is also considered a REC.

10. PROFESSIONAL SIGNATURE

According to Code of Federal Regulations C.F.R. - Title 40 §312.10, Environmental Professional is defined as:

"(1) a person who possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must:

- (i) hold a current professional engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or*
- (ii) Be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or*
- (iii) Have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or*
- (iv) Have the equivalent of ten (10) years of full-time relevant experience".*

We declare to the best of our professional knowledge and belief, we have met the definition of Environmental Professional as defined in §312.10 of 40 C.F.R. 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. 312.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

ENVIRO ASSESSMENT, PC

James D. Robinson
Environmental Professional

Academic Education

Bachelor of Science, 1997, Geology, California State University, Northridge, California.

Professional History

James Robinson has grown up surrounded by geotechnical engineering, engineering geology, and environmental sciences. He has followed his father (Brian) along with six of his siblings into the field of environmental sciences, engineering and geology. James Robinson has been practicing both engineering geology and environmental since 1992 and has been involved in development of residential, commercial, and industrial properties and helped several school districts through the environmental process. He has investigated many types of chemical contamination, including hydrocarbons, PCEs, DDT, PCBs, and arsenic. James started his own firm in 2008 and currently is Owner and President of Enviro Assessment, PC. Enviro Assessment, PC offers environmental site assessments, soils and groundwater investigations, industrial wastewater systems, vapor mitigation foundation designs, and manager over publication of NEPA and CEQA Initial Studies.

Professional History

Brian Robinson and Associates (1997-2000) -Staff Geologist
Applied Engineering and Geology (2000-2002) – Project Geologist
Wiebe Environmental (2003-2004) – Canadian Firm – Professional Geologist
Neil Anderson and Associates, Inc (2005-2008) – Environmental Division Manager
JR Squared Consulting (2008-2010) – Principal Geologist

ENVIRO ASSESSMENT, PC (2010-PRESENT)

James currently is the principal Geologist and Civil Engineer at Enviro Assessment, PC. James oversees the production of the Phase I ESAs, Phase II ESAs, NEPA/CEQA, and Soils and Geology Reports. James is licensed in multiple states allowing him to provide this service for larger national clients which need services in multiple states.

STEPHEN ASHE – ENVIRONMENTAL CONSULTANT**Academic Education**

BS in Environmental Studies from California State University at San Jose
BA in Geology from California State University at Sacramento

Professional Experience:

Mr. Ashe has over 45 years of experience in environmental and occupational safety consulting, in which time he has performed over 400 Phase I and II Environmental Site Assessments, Transaction Screens, and similar environmental investigations. In addition, Steve has experience with a variety of asbestos, mold, PCB and lead-based paint consulting and management projects for commercial, institutional, industrial, and multi-family residential properties.

Select project experience for Mr. Ashe includes:

- **Phase II, Former Chevron Gas Station, Sacramento, California** – Mr. Ashe collect soil and groundwater samples to assess the environmental impacts of the former gas station prior to redevelopment.
- **Phase I, self-storage property, 1,239 SF constructed in 1952, Sacramento, California** – Mr. Ashe identified environmental issues of the subject property as an underground storage tank (UST) with no closure documents and an inactive railroad spur. Recommendations were made to assess the presence or absence of a release from the former UST through ground penetrating radar and to characterize potential impacts to the subsurface through collection of soil and groundwater samples.
- **Phase I, construction service and office structure, 23,900 SF constructed in 1981, Santa Clara, California** – Ms. Ashe identified the historic use of the subject Property as an automotive salvage yard. Site reconnaissance of the subject property revealed evidence of an abandoned oil/water separator in the present-day structure. Recommendations were made to assess whether the long-time industrial use and associated features of concern have adversely impacted the subject property.
- **Phase I, office structure, 32,300 SF constructed in 1984, Sacramento, California** – Mr. Ashe identified the historic dry-cleaning tenant on the subject property from local agency records and later confirmed through historical research. A subsequent soil vapor investigation identified a release of tetrachloroethylene (PCE) and Trichloroethene (TCE). These concentrations were below their commercial/industrial land screening levels and required no further corrective action.
- **Asbestos and lead-paint survey, SAFE Credit Union Performing Arts Center, 38,425 SF constructed in 1974, Sacramento, California** – Mr. Ashe conducted a comprehensive asbestos and lead survey prior to major renovation of the Sacramento Community Theater. He performed oversight management and monitoring of three abatement companies during removal of asbestos-containing structural fireproofing throughout structure.

13. DEFINITIONS

Significant Data Gaps

Data Gaps are a lack of—or inability to—obtain information required by this practice, despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance. Data gaps are only significant if other information and/or professional experience raises reasonable concerns involving the data gaps. Significant data gaps may not include the exceptions identified in Section 2.4 of this report (Limitations and Exceptions).

Business Environmental Risks

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated based on the ASTM International E1527-21 Standard.

Recognized Environmental Conditions

A Recognized Environmental Condition (REC) is (1) The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

Historical Recognized Environmental Conditions

An Historical Recognized Environmental Condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Subject Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Controlled Recognized Environmental Conditions

A Controlled Recognized Environmental Condition (CREC) is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Vapor Intrusion

For the purposes of this Phase 1 ESA, hazardous substances, or petroleum products in several forms, including solid and liquid at the surface or subsurface, and vapor in the subsurface were evaluated for possible impacts to the Subject Property. Any likely impacts to the Subject Property in these forms (for example soil vapor intrusion) are identified in this report.

This report was produced in accordance with the American Society for Testing and Materials (ASTM) International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM International E1527-21) and is compliant with the All Appropriate Inquiries (AAI) rule.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Oct 26, 2023

SEMS List 8R Active Site Inventory:

SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Sep 19, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Sep 19, 2023

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Oct 2, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Oct 2, 2023

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Oct 2, 2023

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Oct 2, 2023

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jul 10, 2023

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Oct 2, 2023

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Oct 2, 2023

Federal Engineering Controls-ECs:[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Oct 26, 2023

Federal Institutional Controls- ICs:[FED INST](#)

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Oct 26, 2023

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Oct 26, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Aug 12, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Mar 13, 2023

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: May 2, 2023

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: May 2, 2023

Historical Gas Stations:**HIST GAS STATIONS**

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:**REFN**

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Sep 20, 2023

Petroleum Product and Crude Oil Rail Terminals:**BULK TERMINAL**

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from the Federal Communications Commission Data hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Sep 22, 2023

LIEN on Property:**SEMS LIEN**

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Sep 19, 2023

Superfund Decision Documents:**SUPERFUND ROD**

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Sep 19, 2023

Formerly Utilized Sites Remedial Action Program:**DOE FUSRAP**

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State**State Response Sites:****RESPONSE**

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Oct 23, 2023

EnviroStor Database:**ENVIROSTOR**

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Oct 23, 2023

Delisted State Response Sites:**DELISTED ENVS**

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Oct 23, 2023

Solid Waste Information System (SWIS):

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Aug 10, 2023

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database:

WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Oct 23, 2023

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers:

C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers:

RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 16, 2023

Listing of Certified Processors:

PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 16, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs:

CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 19, 2023

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 13, 2023

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 13, 2023

Delisted Leaking Storage Tanks:

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Sep 18, 2023

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Aug 14, 2023

Proposed Closure of Underground Storage Tank Cases:

UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Sep 18, 2023

Historical Hazardous Substance Storage Information Database:

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System:

UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks:

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks:

AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks:

TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Oct 13, 2023

Delisted Storage Tanks:

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Oct 13, 2023

California Environmental Reporting System (CERS) Tanks:[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 16, 2023

Delisted California Environmental Reporting System (CERS) Tanks:[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Oct 16, 2023

Historical Hazardous Substance Storage Container Information - Facility Summary:[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 23, 2023

CALSITES Database:[CALSITES](#)

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions:[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 13, 2023

Voluntary Cleanup Program:[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 23, 2023

GeoTracker Cleanup Program Sites:[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 13, 2023

Delisted Cleanup Program Sites:[DELISTED CLEANUP](#)

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Government Publication Date: Jul 13, 2023

Delisted County Records:

DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Nov 1, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands:

INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 19, 2023

Underground Storage Tanks on Tribal/Indian Lands:

INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 19, 2023

Delisted Tribal Leaking Storage Tanks:

DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks:

DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

County

Santa Clara County - Historic Solvent Case Listing:

HSOL SANTA CLARA

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing:

LOP SANTA CLARA

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks:

UST SANTA CLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Nov 15, 2023

Santa Clara County - CUPA Facilities List:

CUPA SANTA CLARA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Mar 13, 2021

Santa Clara County - City of San Jose Hazardous Material Facilities:

HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Oct 15, 2020

Santa Clara County - Gilroy City CUPA Facilities List:

CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jun 3, 2022

Santa Clara County - Sunnyvale City CUPA List:

CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jun 10, 2022

Additional Environmental Record Sources**Federal****Facility Registry Service/Facility Index:**

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 8, 2023

Toxics Release Inventory (TRI) Program:

TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites:

PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Sep 14, 2023

Federal Agency Locations with Known or Suspected PFAS Detections:

PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to September 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Sep 5, 2023

SSEHRI PFAS Contamination Sites:

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: <https://pfasproject.com/pfas-sites-and-community-resources/>

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills:

ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam," "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Sep 23, 2023

PFAS NPDES Discharge Monitoring:

PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Sep 4, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest :[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Oct 11, 2023

PFAS Industry Sectors:[PFAS IND](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System:[HMIRS](#)

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: Mar 6, 2023

National Clandestine Drug Labs:[NCDL](#)

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Jul 26, 2023

Toxic Substances Control Act:[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Oct 26, 2023

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Jan 21, 2023

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jul 23, 2023

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jul 23, 2023

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites:

FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Dec 30, 2022

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: May 1, 2023

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into eAMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: Jun 13, 2023

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: May 25, 2023

Alternative Fueling Stations:

ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 30, 2023

Superfunds Consent Decrees:

CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System:

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers:

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Mar 20, 2023

State

PFAS Sampling Locations:

PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Sep 25, 2023

Dry Cleaning Facilities:

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners:

DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program:

DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites:

PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 13, 2023

PFOA/PFOS Groundwater:

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Jul 31, 2023

PFAS Investigations:

PFAS INVEST

This list of potential Per- and Polyfluoroalkyl Substance (PFAS) sites is compiled from the California State Water Resources Control Board's (SWRCB) PFAS Investigations Map tool. The SWRCB issued investigative orders, per California Water Code (CWC) Section 13267 and/or 13383, to these sites. This does not mean that PFAS has been produced, used, or discharged at these sites. Orders were also issued to the public water systems to sample wells in the vicinity of these locations. The data includes locations for airports, landfills, suspected chrome plating facilities, publicly owned treatment works (aka wastewater treatment plants), bulk fuel terminals, refineries, and military facilities that have potential sources of PFAS.

Government Publication Date: Nov 28, 2022

Hazardous Waste and Substances Site List - Site Cleanup:

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites:

TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is no longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Jul 28, 2023

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Oct 23, 2023

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jul 26, 2023

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data:

HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data:

HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data:

HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters:

HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Sep 28, 2023

Registered Waste Tire Haulers:

WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Aug 29, 2023

California Medical Waste Management Program Facility List:

MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Historical Cortese List:

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites:

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 16, 2023

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 13, 2023

Mines Listing:

[MINE](#)

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jun 16, 2023

Recorded Environmental Cleanup Liens:

[LIEN](#)

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Sep 15, 2023

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 13, 2023

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

CITY DIRECTORY

Project Property: *Madera Dr Property

RE: CITY DIRECTORY RESEARCH
10621 Madera Dr.
Cupertino, CA 95014

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

10500-10600 of Creston Dr
10500-10650 of Madera Dr

Date Completed:	November 30, 2023

Please note that no information was found for your site or adjacent properties.

ENVIRONMENTAL SITE ASSESSMENT - ENVIRONMENTAL QUESTIONNAIRE**PART ONE ~ USER'S RESPONSIBILITIES***To be completed by the Client*

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), **the user** must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. **The user** should provide the following information to the environmental professional. **Failure to conduct these inquiries could result in a determination that “all appropriate inquiries” is not complete.** (Quote from ASTM1527-21 Appendix X1.3)

These searches are required to be conducted by the user during their due diligence.

1. Environmental liens that are filed or recorded against the *Subject Property* (40 C.F.R. § 312.25).

Did a search of *land title records* (or judicial records where appropriate, see Note 1 below) identify any *environmental liens* filed or recorded against the *Subject Property* under federal, tribal, state, or local law?

NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that *environmental liens* and *AULs* be filed in judicial records rather than in *land title records*. In such cases judicial records shall be searched for *environmental liens* and *AULs*.

Did you search for these records? ☒ Yes or No

Did you discover any environmental liens? Yes or ☒ No If yes, please provide a copy.

2. Activity and use limitations that are in place on the *Subject Property* or that have been filed or recorded against the *Subject Property*.

Did a search of *land title records* (or judicial records where appropriate, see Note 1 above) identify any *AULs*, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *Subject Property* and/or have been filed or recorded against the *Subject Property* under federal, tribal, state or local law?

Did you search for these records? ☒ Yes or No

Did you discover any *Activity and Use Limitations*? Yes or ☒ No

If yes, please provide a copy.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the *Subject Property* or nearby *properties*? For example, are you involved in the same line of business as the current or former *occupants* of the *Subject Property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes or ☒ No If yes, please explain.

4. Relationship of the purchase price to the fair market value of the *Subject Property* if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this *Subject Property* reasonably reflect the fair market value of the *property*?

☒ Yes or No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *Subject Property*?

5. Commonly known or reasonably ascertainable information about the *Subject Property* (40 C.F.R. § 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *Subject Property* that would help the *environmental professional* to identify conditions indicative of *releases* or threatened *releases*? For example,

(a.) Do you know the past uses of the *Subject Property*?

RESIDENTIAL

(b.) Do you know of specific chemicals that are present or once were present at the *Subject Property*?

NO

(c.) Do you know of spills or other chemical *releases* that have taken place at the *Subject Property*?

NO

(d.) Do you know of any environmental cleanups that have taken place at the *Subject Property*?

NO

6) The degree of obviousness of the presence or likely presence of contamination at the *Subject Property*, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the *Subject Property*, are there any *obvious* indicators that point to the presence or likely presence of *releases* at the *Subject Property*?

NO

7) Have any previous Phase 1 or other environmental reports been prepared for the Subject Property (Please provide copies of any available reports)?

N/A

8) Why have you requested this Phase 1 Environmental Site Assessment?

- i) To qualify for one of the Landowner Liability Protections (LLPs)
- ii) Due to bank / loan requirement
- iii) Other reason (specify): REQUIRED BY LOCAL PLANNING DEPT.

9) What is the last known or current use of the Property?

SINGLE FAMILY RESIDENTIAL

10) What is the proposed future use of the Property?

Please provide a site map, if available.

SINGLE FAMILY RESIDENTIAL, NEW CONSTRUCTION

As the User of the Phase I Environmental Site Assessment being prepared for the Subject Property (or the duly authorized representative of such User), I have specific knowledge of the questions posed in Part I of the Questionnaire regarding the Property, and hereby certify that to the best of my knowledge, information, and belief, the information disclosed above is true and correct.

Environmental Site Assessment Questionnaire Part II – Page 2

Project Number: 2023-11-018

Project Name: Madera Dr Property

SITE INFORMATION

1. Please describe current use(s) of the Property:

Residential

2. Please describe any other known past use(s) of the Property, and approximate dates of each use:

3. Are there any businesses using any portion of the Property which are operated by an entity other than the Property owner (including a tenant farming operation)? If yes, please provide contact name and phone number for each:

N/A

4. To the best of your knowledge has the Property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill; or as a waste treatment, storage, disposal, processing, or recycling facility?

No

5. To the best of your knowledge has any **adjoining** property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill; or as a waste treatment, storage, disposal, processing, or recycling facility?

No

6. Do you have any knowledge of environmental liens or governmental notifications relating to past or recurrent violations of environmental laws, with respect to the Property or any facility located on the Property?

No

7. Do you have any knowledge of past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the Property or any facility located on the Property?

No

8. Please describe any other relevant historical information in your possession concerning the Property:

N/A

9. Did you conduct an Environmental Site Assessment when you purchased the property?

No

ASSESSMENT, PC

Environmental Site Assessment Questionnaire Part II – Page 3

Project Number: 2023-11-018

Project Name: Madera Dr Property

10. Do you have any past Environmental Reports (Phase I Assessment, Phase II Investigations) available for review?

No

11. Are there any electrical transformers or capacitors on the Property which are known to contain Polychlorinated Biphenyls (PCBs), or which may have been manufactured before 1980 and the PCB content is unknown?

No

12. Water is provided to the Property by: Public

- A well
- Public water system
- N/A

13. Waste water disposal is provided to the Property by: Public Sewer

- Public sewer system: Age of system _____
- On-site septic system: Age of system _____
- Pond(s)
- Other
N/A

14. Are there any wastewaters generated and /or disposed of on the Property, other than storm water runoff and domestic sewage? Please describe (please attach copies of any wastewater discharge permits or licenses pertaining to operations of the Property).

No

15. Are there any other types of liquid wastes or solid wastes generated at the Property? Please describe how they are handled and disposed of (please attach copies of any waste disposal permits or licenses pertaining to operations on the Property).

No

16. Are there any activities on the Property which generate air pollutants, including fuel burning equipment? Please describe (please attach copies of any air permits or licenses pertaining to operations on the Property).

No

STRUCTURES

Are there currently any structures on the Property?

Yes

To the best of your knowledge, have there been any structures on the Property in the past which have been removed?

No

If the answer to either question is “yes” please answer the following ~

1. For each existing building, please provide the type of building and date of original construction, and any substantial renovations:

Single family residence built in 1958

2. For each building known to have been removed, please provide the type of building and approximate dates the building existed:

N/A

3. How are the structures heated and cooled (e.g., central, wall-mounted unit, space heaters, etc.), and what powers the heating and cooling devices (e.g., electric, propane, fuel oil tank, fireplace, etc.)?

4. Provide a brief description of existing development with Property dimensions, area, and acreage: The lot is 0.77 Acres

5. Are there currently, or to the best of your knowledge, have there previously been, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?

No

6. If any buildings were constructed prior to 1980, is there currently, or was there previously, asbestos in any of the construction materials contained in the building(s)?

Unknown

If so, has a survey been conducted to assess the type, amount, location and condition of asbestos? (Please attach a copy of any survey report.)

7. If any buildings were constructed prior to 1980, is there currently, or was there previously, any lead-based paint applied to the building(s)?

Unknown

If so, has a survey been conducted to assess the type, amount, location and condition of lead based paint? (Please attach a copy of any survey report.)

STORAGE TANKS AND OTHER CHEMICAL STORAGE

Are there currently, or to the best of your knowledge, have there previously been, any registered or unregistered gasoline, diesel, fuel oil, or other chemical storage tanks (above or underground) located on the Property?

No

Are there any pesticides, paints, or other chemicals stored or used on the property in drums, sacks, or other containers, greater than 5 gallons each, or 50 gallons in the aggregate? No

If the answer to either question is “yes” please answer the question below

1. For each tank, please list the substance stored and tank capacity.

N/A

2. Have the tanks been inspected or tested for leakage? When was the most recent test? What were the results? (Please attach copies of results if available).

N/A

3. For other storage containers, please describe the substances, quantities stored, and types of containers.

N/A

4. Have there been any spills, leaks, or other releases of chemicals on the Property? If so, please describe the chemicals and quantities released, the cleanup measures taken, and the results of any soil or groundwater samples performed to detect the presence of chemicals spilled, leaked, or released on the Property.

N/A

5. Please attach copies of any permits or licenses pertaining to the use, storage, handling, or disposal of chemicals on the Property.

N/A

INDUSTRIAL PROPERTIES

Is the property currently used for any industrial purpose?

No

Has the Property ever been used for an industrial purpose (other than the current use)?

No

If the answer to either question is “yes” please answer the following ~

1. Has the Property been used for disposal of any liquid or solid waste?

N/A

2. Have evaporation or storage ponds been located on the Property?

N/A

3. Have wastewater treatment facilities, such as acid neutralization vaults, been located on the Property?

N/A

4. Are there raw chemical or waste chemical storage areas on the Property?

N/A

If the answer to any of questions 1 – 4 are “yes,” please provide a description, including the location of all disposal sites, treatment facilities and storage areas, the type of chemicals or wastes handled at each site, the results of any soil or groundwater samples taken in the vicinity of each site, and the manner in which each site not presently in use was closed.

N/A

AGRICULTURAL PROPERTIES

Is the Property currently used for agricultural purposes other than grazing or pasture land?

No

To the best of your knowledge, has the Property been used in the past for agricultural purposes other than grazing or pasture land?

No

If the answer to either question is “yes,” please answer the following ~

1. Have pesticides, herbicides, or other agricultural chemicals been applied to the Property? If so,

please describe the locations where such pesticides, herbicides, or chemicals were applied, and the type of pesticides, herbicides, or chemicals applied in each area. (Please attach copies of pesticide use reports if available.)

N/A

2. Have pesticides, herbicides, or other agricultural chemicals been mixed, formulated, rinsed, or disposed of on the Property? If so, please describe the locations where such pesticides, herbicides, or chemicals were mixed, formulated, rinsed, or disposed of, and the type of pesticides, herbicides, or chemicals mixed, formulated, rinsed, or disposed of at each location.

N/A

3. Has any soil or groundwater analysis been performed to detect pesticides, herbicides, or chemicals used at on the Property? If so, please provide a summary of the finding or attach the report(s).

N/A
