EXECUTIVE SUMMARY

CONCLUSIONS

Ninyo & Moore has performed this Phase I ESA in conformance with the scope and limitations of ASTM E1527-21 of the property located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard in Cupertino, Santa Clara County, California (the Site). Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the Site, and no RECs were identified on the adjoining properties.

FINDINGS AND OPINIONS

Ninyo & Moore performed a Phase I Environmental Site Assessment (ESA) on the Site located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard, in Cupertino, Santa Clara County, California. A Summary of Findings is provided below. It should be recognized that all report details are not included in this Summary, and the report should be read in its entirety.

Site Location and Use

The approximately 4.3-acre Site is located along Stevens Creek Boulevard. The Site consisted of 4 two-story commercial office buildings, and parking lots.

Historical Information

Review of historical resources, such as aerial photographs, topographic maps, fire insurance maps, and available City Directory listings, as well as through review of historical records, interviews, and research, revealed that the Site was developed with scattered farmhouses and buildings and orchard trees from sometime prior to 1939, until the early 1960s, when some of the farm buildings on the Site were removed and two commercial buildings (20065 A & B) and a parking lot were developed on the southeastern portion of the Site. By the early 1980s, three of the remaining four farm buildings were removed from the Site, and a commercial building (20111) and a parking lot were constructed on the western portion of the Site. By the early 1990s, the last remaining farm building was removed from the Site, and commercial buildings and parking lots were constructed on the central (20085), northeastern (20045), and southeastern (20065 C) portions of the Site.

Adjoining properties have primarily been commercial and residential properties from at least 1956 until the present. No RECs were identified in the historical review.

Records Review

Review of an environmental database report obtained for this project indicated that the Site was not listed on any of the *Standard Federal, State, and Tribal Environmental Record sources*. The Site was listed on the *Additional Federal, State, Tribal and Local Environmental*

Record sources regulatory databases researched by EDR, including the RCRA NonGen / NLR, FINDS, ECHO, HWTS, HAZNET databases. Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Based on the available EDR information and the nature of these specific databases listing types, no RECs were identified at the Site in connection with these database listings.

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Several off-Site facilities were located within the EDR search radius from the Site. None of the listed facilities are considered to be a REC to the Site based on several factors, including distance from the Site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the Site), database listing type, and/or affected media (soil only).

Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the Site.

Site Reconnaissance

On December 4, 2024, Mr. Luke Swickard with Ninyo & Moore conducted a Site reconnaissance of the property that included a visual inspection of the Site, and observations of adjoining properties. At the time of the reconnaissance, the Site was developed with 4 two-story commercial office buildings and parking lots. A description of the buildings is given below:

20045 Stevens Creek Blvd: Two-story commercial office building with 13 units.

20065 Stevens Creek Blvd: Two-story commercial office building with 12 units, made up of three connected buildings (A, B, and C).

20085 Stevens Creek Blvd: Two-story commercial office building, and a parking garage on the first floor.

20111 Stevens Creek Blvd: Two-story commercial office building with 16 units, and a courtyard in the center and a playground area on the western exterior of the building.

Additionally, three pad-mounted transformers were observed on the Site.

Adjoining Properties

The areas surrounding the Site consist of commercial and residential properties. The Site is bordered on the north by residential development (20064-20104 Wheaton Drive); on the south by 20080 Stevens Creek Blvd (Rose Tea Lounge, Curry Pizza House, The Counter), 20100 Stevens Creek Blvd (Chicago Title Company, Safari Kid - Cupertino), and an apartment building (20128 Stevens Creek Blvd); on the east by 20007 Stevens Creek Blvd (Kabab &

Curry's), 20015 Stevens Creek Blvd (Vidyarambh Cupertino-Preschool & Childcare center), and a vacant commercial building (20021 Stevens Creek Blvd); and on the west by 20149 Stevens Creek Blvd (Sun Design Center), and a residential house (10080 Randy Ln).

Based on observations made during the Site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.

Recognized Environmental Conditions:
This assessment has revealed no evidence of RECs in connection with the Site or adjoining properties.

Controlled Recognized Environmental Conditions:
This assessment has revealed no evidence of CRECs in connection with the Site.

Historical Recognized Environmental Conditions:
This assessment has revealed no evidence of HRECs in connection with the Site.

Business Environmental Risks:
The following Business Environmental Risks were identified:

- Due to the age of the 20065 A & B buildings, asbestos-containing building materials (ACBMs) and lead based paint (LBP) are assumed to be present on the Site.

RECOMMENDATIONS
Based on the findings of this ESA, no further investigation is recommended at this time.

Certification Statement

This report has been prepared by the staff of Ninyo & Moore for Blaney Stevens Creek Investors LLC, a California Limited Liability Company under the professional supervision of the principal and/or senior staff whose signatures appear hereon. Neither Ninyo & Moore, nor any staff member assigned to this assessment, has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues observed during the course of this assessment, and has no personal bias with respect to the parties involved. The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments founded upon the findings of the assessment summarized in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied. Anyone seeking defenses to Comprehensive Environmental Response, Compensation and Liability Act liability must take independent action to protect their position.

1 INTRODUCTION

Ninyo & Moore has performed this Phase I Environmental Site Assessment (ESA) of the property located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard in Cupertino, Santa Clara County, California (Site). This ESA was conducted for Blaney Stevens Creek Investors LLC, a California Limited Liability Company as part of their due diligence on the property. This Phase I ESA meets the criteria set forth in the ASTM International (ASTM) E1527-21 Standard, was conducted by an Environmental Professional as defined by §312.10 of 40 CFR 312, and satisfies all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The following sections identify the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with this Phase I ESA.

1.1 Purpose

In accordance with the ASTM Standard Practice for ESAs on Commercial Real Estate E1527-21, the objective of the Phase I ESA is to identify recognized environmental conditions (RECs). The term recognized environmental conditions means: "*(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

Identification of RECs fall into three categories: an existing REC (as defined above), a Historical REC, or a Controlled REC, as defined below.

Historical Recognized Environmental Condition (HREC) An HREC is defined as "a previous release of *hazardous substances* or *petroleum products* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, *activity and use limitations* or *other property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*."

Controlled Recognized Environmental Condition (CREC) A CREC is defined as a "*recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or *other property use limitations*)."

Business Environmental Risk (BER) - A BER is defined as a "risk which can have a *material environmental* or *environmentally-driven impact* on the business associated with the current or planned use of *commercial real estate*, not necessarily related to those *environmental issues* required to be investigated in this practice." BERs include risks to the subject property that are outside the scope of the ASTM standard. BERs are not considered RECs.

1.2 Involved Parties

Mr. Luke Swickard, Project Manager with Ninyo & Moore, conducted the Site visit and performed the project reporting and research. Mr. Brandon Wilken, Principal Geologist with Ninyo & Moore, was the environmental professional assigned to this project, and performed project oversight and quality review. Resumes of these individuals are included in Appendix A.

1.3 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA included the following:

- Performed a Site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the Site, as well as observe visible exterior features of adjoining properties to observe areas of possibly contaminated surface soil or surface water, improperly stored hazardous materials, and possible risks of contamination from activities at the Site and adjoining properties.
- Reviewed reasonably ascertainable standard and additional environmental record sources including federal, state, local, and tribal regulatory agency databases for the Site and for properties located within a specified radius of the Site.
- Reviewed reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) topographic map, or historical 7.5-minute topographic map, and possibly including USGS and/or state groundwater and geologic maps, and soil maps. The purpose of this review was to note information about the geologic, hydrologic, or topographic characteristics of the Site and Site vicinity.
- Reviewed reasonably ascertainable standard historical resources, including aerial photographs, historical fire insurance rate maps, and city directories, as available. The purpose of this review was to review obvious uses of the Site from the present, back to the Site's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural uses and placement of fill dirt, and other uses that may not involve structures.
- Conducted interviews with present owners, operators, and/or occupants, or a designated representative, of the Site, as well as other knowledgeable parties as appropriate. The purpose of these interviews was to obtain information regarding potential RECs in connection with the Site.
- Performed a preliminary vapor encroachment screening assessment on the Site and adjoining properties.

- Prepared this ESA report documenting the methodology, significant data gaps, and findings and opinions regarding identified RECs, HRECs, and CRECs.

1.4 Tasks Not Undertaken

Non-scope considerations, as noted in ASTM E 1527-21, are discussed in Section 7 as appropriate. Ninyo & Moore did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.5 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No other warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

Our conclusions, recommendations, and opinions are based on an analysis of the observed Site conditions and the referenced literature. It should be understood that the conditions of a Site could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control.

Per Section 4.6 of the ASTM E1527-21 Standard, "an environmental Site assessment meeting or exceeding this practice is presumed to be viable when it is completed within 180 days prior to the date of acquisition of the subject property (or for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components (*interviews*, *review of government records, visual Site inspections, and declaration by the environmental professiona*l, shall be identified in the report."

All of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

- (i) interviews with owners, operators, and occupants;
- (ii) searches for recorded environmental cleanup liens;
- (iii) reviews of federal, tribal, state, and local government records;
- (iv) visual inspections of the subject property and of adjoining properties; and

- (v) the declaration by the environmental professional responsible for the assessment or update.

1.6 Special Terms and Conditions

Ninyo & Moore was not made aware of any special terms and conditions associated with the Site.

1.7 Reliance

This report may be relied upon by, and is intended exclusively for, the *Users* of this report, including Blaney Stevens Creek Investors LLC, a California Limited Liability Company, and any of its affiliates. Any use or reuse of the findings, conclusions, and/or recommendations of this report by parties other than the aforementioned *Users* is undertaken at said parties' sole risk.

2 PROPERTY OVERVIEW

The following sections describe the location and the current uses of the Site and adjoining properties. The Site Location is presented on Figure 1 and the Site vicinity with additional information concerning the Site and surrounding properties is presented on Figure 2. At the time of the Site reconnaissance, the Site was improved with 4 two-story commercial office buildings, and parking lots. The Site is generally located in Cupertino, Santa Clara County, California. The 4.3-acre Site is designated by Santa Clara County Assessor's Parcel Numbers 31623025, 31623026, 31623095, and 31623096.

2.1 Property Location and Land Use(s)

2.1.1 Property Location

The Site is located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard in Cupertino, Santa Clara County, California.

2.1.2 Adjacent Property Location and Land Uses

Table 1 lists the properties adjoining the Site and associated land use. Based on the nature of the current uses of the adjoining properties and observations made during the Site reconnaissance, it is unlikely that the current uses of these properties have impacted the environmental integrity of the Site.

Table 1 - Adjoining Properties

Location	Description
North	Residential development (20064-20104 Wheaton Drive)
South	Stevens Creek Boulevard, 20080 Stevens Creek Blvd (Starbird, Rose Tea Lounge, Curry Pizza House, The Counter), 20100 Stevens Creek Blvd (Chicago Title Company, Safari Kid - Cupertino), and an apartment building (20128 Stevens Creek Blvd)
East	20007 Stevens Creek Blvd (Kabab & Curry's, BeNatural Music), 20015 Stevens Creek Blvd (Vidyarambh Cupertino-Preschool & Childcare center), and 20021 Stevens Creek Blvd (Vacant)

Location	Description
West	20149 Stevens Creek Blvd (Sun Design Center), and a residential house (10080 Randy Ln)

2.1.3 Utilities

2.1.3.1Potable Water

California Water Services provides potable water to the Site and vicinity.

2.1.3.2 Sewage Disposal System

The Cupertino Sanitary District provides municipal sewer service to the Site and surrounding areas.

2.1.3.3 Source of Fuel for Heating and Cooling

The fuel source for the on-Site heating and cooling systems was provided by PG&E.

2.1.4 Description of Structures, Roads, and Other Improvements

As shown on Figure 2, the Site is accessible from Stevens Creek Boulevard. The Site is developed with 4 two-story commercial office buildings and parking lots. A description of the buildings is given below:

20045 Stevens Creek Blvd: Two-story commercial office building with 13 units. Tenants include: Chase Chiropractic, Hyvision System Inc, Dmax Imaging, Acorn Labs Inc, Ulkasemi Inc, NOVO Construction Inc, and Onestop Financial Services.
20065 Stevens Creek Blvd: Two-story commercial office building with 12 units, made up of three connected buildings (A, B, and C). Tenants include: Yi Luo DDS Dental Corp, LGM Group/Kids Kab, Extensure Financial Inc, Judy Zhang Insurance Agency, Sunware Technologies LLC, Excelsia Skin Spa, Eastgate RE-Nemo How, James T Fujimoto OD, Meixin Technology Inc, and Byung Suh Ahn Accountancy Corporation.
20085 Stevens Creek Blvd: Two-story commercial office building, one vacant unit with several offices, and a parking garage on the first floor. The building is vacant.
20111 Stevens Creek Blvd: Two-story commercial office building with 16 units, and a courtyard in the center and a playground area on the western exterior of the building. Tenants include: Pannu DDS, Little Tree, Hamaguchi, Chinese Abraham, D-Dao Technology, Sharon Lue-Law, Pacific Lynx Mortgage, State Assembly, Andrew Shaffer Law, Dharma Drum Mountain Buddhist Association, Trans-Continental, and Beamable Engineering.

2.2 Physical Setting

The following sections include discussions of topographic, geologic, and hydrologic conditions.

2.2.1 Topography

Based on a review of the United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Map Series of the Cupertino, California 2021 Quadrangle, the Site is situated at an elevation of approximately 210 feet above mean sea level. The general topographic gradient (EDR 2024a) is in an easterly direction.

2.2.2 Geology/Hydrogeology

The Site is located in the Coast Range geomorphic province of California. The Coast Ranges are northwest-trending mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level), and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. Strata dip beneath alluvium of the Great Valley. To the west is the Pacific Ocean. The coastline is uplifted, terraced and wave-cut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The Coast Ranges are subparallel to the active San Andreas Fault. The San Andreas is more than 600 miles long, extending from Pt. Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to the north of the Farallon Islands (CGS, 2002). The 1977 California Division of Mines and Geology, *Geologic Map of California*: (Jennings C.W.) shows the Site to be underlain by Quaternary Older Alluvium Deposits (Qoa). Based on our review of the EDR Radius Map report, the primary soil type beneath the Site is mapped as Botella clay loam (EDR, 2024a).

2.2.3 Surface Water Bodies

Natural surface water bodies, including streams or other bodies of water, are not present on or adjoining to the Site. The nearest body of water is the Calabazas Creek, located approximately 3,200-feet southeast of the Site.

2.2.4 Groundwater

Groundwater information for the Site was not available. Ninyo & Moore reviewed the State Water Resources Control Board's GeoTracker website (GeoTracker) for groundwater information in the Site vicinity. According to GeoTracker, groundwater information reported in a Quarterly Monitoring Report First Quarter 2013 for the 76 (Former BP) Service Station No. 11220 located at 19550 Stevens Creek Boulevard (approximately 3,000 feet east-southeast of the Site), the groundwater flow direction in the Site vicinity was reported to be in a northeasterly direction and the depth to groundwater was reported to be

approximately 79 to 81 feet below ground surface. Groundwater depths and flow directions can vary due to seasonal variations, groundwater withdrawal or injection, and other factors.

2.2.6 Flood Maps

According to the FEMA flood maps, the Site lies in the flood zone classified as Zone X. Zone X designates an area that has been determined to be outside of the 0.2% annual chance floodplain.

3 PROPERTY BACKGROUND

3.1 Interviews

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs in connection with the Site. Interviews with the present owners, operators, and/or occupants of the Site, as available, as well as other knowledgeable parties as appropriate, is mandated by ASTM E1527-21.

3.1.1 Current Owner/Site Manager or Occupant

Mr. Josh Vrotsos, Director of Acquisitions with Dividend Homes, was interviewed during the Site reconnaissance on December 4, 2024. Mr. Vrotsos provided access during the Site visit. Mr. Vrotsos was not aware of any hazardous materials incidents, spills, leaks or violations related to the Site.

3.1.2 Past Owner/Site Manager or Occupant

Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past Site owners were not conducted.

3.1.3 State and/or Local Agencies

State and/or local agencies were contacted regarding available records for the Site. These interviews and the records reviewed are summarized in Section 4.3.

3.2 Review of Aerial Photographs

Ninyo & Moore reviewed the EDR Aerial Photo Decade Package report (EDR, 2024a) dated November 11, 2024. The report included aerial photographs that begin in 1939. A listing of the photographs reviewed is presented in Table 2. Copies of the historical aerial photographs are provided in Appendix D.

Based on the review of the aerial photographs listed below, the Site was developed with scattered farmhouses and buildings and orchard trees from sometime prior to 1939, until the early 1960s, when some of the farm buildings on the Site were removed and two commercial buildings and a parking lot were developed on the southeastern portion of the Site. By the early 1980s, three of the remaining four farm buildings were removed from the Site, and a commercial building and parking lot were constructed on the western portion of the Site. By the

early 1990s, the last remaining farm building was removed from the Site, and commercial buildings and parking lots were constructed on the central, northeastern, and southeastern portions of the Site. The Site vicinity appeared to be developed since at least the 1930s. No RECs were identified for the Site or adjoining properties based on historical aerial photograph review.

Table 2 -Aerial Photographs Summary			
Date	**Sources**	**Site**	**Adjoining Properties**
1939	EDR	The Site was noted to be developed with scattered farmhouses and buildings and orchard trees.	The Site vicinity was noted to be developed with scattered farm buildings and orchard trees. Stevens Creek Boulevard was noted to the south of the Site.
1948-1950	EDR	No significant changes noted.	No significant changes noted.
1956	EDR	Some of the orchard trees were removed from the Site.	The farm buildings and orchard trees to the west of the Site were removed and were replaced with a commercial building. Two residential houses were noted to the west of the Site.
1963	EDR	Some of the farm buildings on the Site were removed and two commercial buildings and a parking lot were developed on the southeastern portion of the Site.	An additional commercial building was noted to the west of the Site, a commercial building and a parking lot along with vacant land were noted to the south of the Site, and a gas station was noted to the east of the Site.
1968	EDR	The northeastern portion of the Site was noted as vacant land.	A commercial building was noted to the east of the Site, and an additional commercial building was noted to the south of the Site. Stevens Creek Boulevard was noted to be expanded.
1974	EDR	No significant changes noted.	Residential development was noted to the north of the Site, one of the commercial buildings to the south of the Site was removed and an additional commercial building was noted. An additional commercial building was noted to the east of the Site.
1982	EDR	Three of the remaining four farm buildings were removed from the Site, and a	An additional commercial building was noted to the south of the Site. The gas

Date	Sources	Site	Adjoining Properties
		commercial building and parking lot were constructed on the western portion of the Site.	station to the east of the Site was replaced with two commercial buildings.
1991	EDR	The last remaining farm building was removed from the Site, and commercial buildings and parking lots were constructed on the central, northeastern, and southeastern portions of the Site.	No significant changes noted.
1998	EDR	No significant changes noted.	No significant changes noted.
2006	EDR	No significant changes noted.	One of the commercial buildings to the south of the Site was replaced with another commercial building.
2009-2012	EDR	No significant changes noted.	No significant changes noted.
2016	EDR	No significant changes noted.	Two of the commercial buildings to the south of the Site were replaced with another commercial building.
2020	EDR	An outdoor sitting area was noted on the southwestern portion of the Site.	No significant changes noted.

3.3 Review of Topographic Maps

Ninyo & Moore reviewed the EDR Historical Topo Map Report, dated November 11, 2024 (EDR, 2024b). A listing of the maps reviewed is presented in Table 3 below. Copies of the historical topographic maps are provided in Appendix D.

The review of topographic maps listed below indicates the Site was developed since at least 1943. Structures were depicted adjacent to the east, south, and west of the Site since at least 1943. No RECs were identified for the Site or adjoining properties based on a review of the historical topographic maps.

Table 3 - Topographic Maps Summary

Date	Quadrangle	Uses
1897-1902	Palo Alto,San Jose,Santa Cruz	The Site and Site vicinity were mapped as vacant land. Stevens Creek Boulevard was mapped to the south of the Site.
1943-1947	Palo Alto	Two buildings were mapped on the Site, and buildings were mapped surrounding the Site.
1948-1961	Palo Alto	Three buildings were mapped on the Site, and the Site and Site vicinity were mapped with orchards.

Date	Quadrangle	Uses
1968	Cupertino,San Jose West	Two additional buildings were mapped on the Site, and some of the orchards were removed. Commercial buildings were mapped to the east, south, and west of the Site.
1973	Cupertino,San Jose West	Residential development was mapped to the north of the Site.
1980	Cupertino,San Jose West	One of the buildings mapped on the Site was removed and an additional building was added to the Site.
1995	Cupertino	The Site and Site vicinity were mapped as urban land.
2012-2021	Cupertino,San Jose West	No buildings were mapped on the 2012 through 2021 topographic maps.

3.4 Review of Fire Insurance Maps

Ninyo & Moore reviewed the EDR Certified Sanborn Map Report, dated November 11, 2024 (EDR, 2024c) for historical fire insurance rate maps (Sanborn Maps) of the Site. Sanborn Map coverage was not available for the Site and/or adjoining areas. A copy of the EDR Sanborn Map Report is included in Appendix D.

3.5 Review of Reverse City Directories

Ninyo & Moore reviewed the EDR City Directory Image Report, dated November 14, 2024 (EDR, 2024d), for the Site and adjoining properties, to evaluate facilities of potential concern, which may have been historically located on or adjoining to the Site. A summary of historical City Directory listings for the Site and adjoining properties, as warranted, are discussed in Table 5 below. City directories for the Site and adjoining properties were researched from 1971 through 2020. A copy of the EDR City Directory Image report is included in Appendix D. Review of the City Directory listings did not identify any RECs associated with the Site or adjoining properties.

3.6 Title Records

A Preliminary Title Report was not provided to Ninyo & Moore. According to the Santa Clara County Assessor's website, the Site is currently owned by Arbor Group Investment, LLC.

3.7 Recorded Environmental Covenants and AULs

The EDR database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases, such as the *Engineering Controls Sites List* (US ENG CONTROLS), and *Institutional Controls Sites List* (US INST CONTROLS). Based on a review of the database report, the Site was not listed on the EC or IC databases, and ECs and ICs were not identified through review of the Department of Toxics Substances Control *Land Use Restriction Sites database,* or through review of the State Water Resources, *Sites with Deed Restrictions* database. In addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and AUL records recorded against the Site were not provided by the client. Performance of a review of these records was not included as part of the Phase I ESA scope of services, and unless notified otherwise, Ninyo & Moore assumes that the client is evaluating this information outside the scope of this report. An environmental lien search report was not requested by the client for review by Ninyo & Moore during the completion of this ESA.

3.8 Previous Investigations

Ninyo & Moore was not provided copies of prior environmental reports completed for the Site.

3.9 User-Provided Information

The following sections summarize information provided by the user to assist the Environmental Professional in identifying the possibility of RECs in connection with the Site and to fulfill the user's Title Records responsibilities in accordance with ASTM E1527-21. The User Questionnaire was completed by Mr. Josh Vrotsos, Director of Acquisitions with Dividend Homes. A copy of the User Questionnaire is included in Appendix B.

3.9.1 Environmental Lien and Activity and Use Limitations Search Results

Ninyo & Moore was not informed of the existence of environmental liens or AULs associated with the Site.

3.9.2 Specialized Knowledge

Ninyo & Moore was not informed of the existence of specialized knowledge pertaining to the Site that is material to the identification of RECs in connection with the Site.

3.9.3 Relationship of Purchase Price to Fair Market Value

According to Mr. Vrotsos, the purchase price being paid for the property reasonably reflects the fair market value of the property.

3.9.4 Commonly Known or Reasonable Ascertainable Information

Ninyo & Moore was not informed of the existence of commonly known or reasonably ascertainable information pertaining to the Site that is material to the identification of RECs in connection with the Site.

3.9.5 Owner, Property Manager, and Occupant Information

According to the Santa Clara County Assessor's website, the Site is currently owned by Arbor Group Investment, LLC.

4 REGULATORY DATABASE SEARCH AND SIGNIFICANT FINDINGS

REGULATORY DATABASE SEARCH AND FINDINGS

Environmental Data Resources, Inc. (EDR) performed a computerized environmental information database search for the Site and Site vicinity on November 12, 2024 (EDR, 2024e) that included searches of federal, state, tribal, and local databases. The purpose of the database search was to determine if the Site or adjoining properties were listed on one or more of the standard government environmental records resources, and if so, review agency records to determine if a REC, HREC, CREC, or de minimis condition exists at the Site. A summary of the listed properties of potential environmental concern to the Site are presented in Table 6 below. A list of the environmental databases searched and their corresponding search distance is included in the EDR Radius Map Report provided in Appendix C.

Table 6 - Summary of Environmental Records Sources Database Search

4.1 Subject Property

The following Table 7 summarizes the database listings associated with the Site.

Table 7 - On-Site Database Listings	
Site Name	TRANS-CONTINENTAL REAL ESTATE INVESTMENT CORP., DALVIR PANNU DDS INC
Site Address	20111 STEVENS CREEK BLVD
Database	RCRA NonGen / NLR, FINDS, ECHO, HWTS, HAZNET
Comments	The Site is listed on the RCRA NonGen / NLR, FINDS, and ECHO databases for handling but not generating hazardous waste in 2024; on the HWTS database for having tracked hazardous waste on the property from 2011 to 2014; and on the HAZNET database for transferring, and storing several tons of unspecified organic liquid mixture from 2011 to 2013. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

4.2 Surrounding Properties

Off-Site properties/facilities listed in the Summary of Environmental Records Sources table above were evaluated for their potential to impact soil, soil vapor, and/or groundwater at the Site. Table 8 below presents the off-Site properties/facilities that were interpreted to represent a potential environmental concern to the Site, based on their proximity to the Site, the nature of

the database(s) on which they are listed, and/or the location of the off-Site property in relation to the Site with respect to topography or expected groundwater flow direction (northeasterly).

Table 8 - Facilities of Potential Concern	
Facility Name	ARTS DRY CLG LDRY DRAPERY SVCS
Address	20021 STEVENS CREEK BLVD
Direction from Site	East-Southeast and crossgradient
Distance from Site	18 feet
Database	EDR Hist Cleaner
Notes/Comments	This property is listed on the EDR Hist Cleaner database for being a registered laundry facility from 1998 to 2003, however the City Directory listings do not list a dry cleaner at this property from 1998 tom 2003. Ninyo & Moore requested records for this address to confirm the presence of the historical dry cleaner. Neither Santa Clara County nor the City of Cupertino had records for this building indicating a dry cleaner was ever present at this address. Due to this, Ninyo & Moore has concluded that the EDR Hist Cleaner database listing is likely in error, and therefore is not considered a REC.

Facility Name	HALLER LUMBER
Address	20195 STEVENS CREEK BLVD
Direction from Site	West and upgradient
Distance from Site	214 feet
Database	UST FINDER RELEASE, HIST LUST SC, HIST CORTESE, CORTESE, CERS, LUST
Notes/Comments	This property is listed on the UST FINDER RELEASE, HIST LUST SC, HIST CORTESE, CORTESE, CERS, and LUST databases for a leaking gasoline UST that affected the soil beneath the property. The case was opened in August 1985, and after remediation and cleanup activities were completed to the satisfaction of the regulatory agency, the case was closed in July 1991. Due to the closed status and age of the case, the media affected (soil), and the distance from the Site, this is not considered a REC.

Facility Name	PAGEBOY CLEANER
Address	10080 N BLANEY AVE
Direction from Site	East-Northeast and downgradient
Distance from Site	242 feet
Database	EDR Hist Cleaner
Notes/Comments	This property is listed on the EDR Hist Cleaner database for being a registered laundry facility from 1986 to 1990. Based on the lack of records indicating a release associated with these listings, as well as the distance from the Site and downgradient relationship to the Site, this is not considered a REC.

Facility Name	JIM NAPPO
Address	10124 RANDY LANE
Direction from Site	North-Northwest and crossgradient
Distance from Site	250 feet
Database	E MANIFEST, RCRA NonGen / NLR
Notes/Comments	This property is a residential house listed on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating asbestos hazardous waste in 2019. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

Facility Name	ALEX DEMARCO
Address	10129 N BLANEY AVE
Direction from Site	Northeast and downgradient
Distance from Site	254 feet
Database	RCRA NonGen / NLR
Notes/Comments	This property is listed on the RCRA NonGen / NLR database for handling but not generating hazardous waste in 2023. Based on the lack of records indicating a release associated with this listing, this is not considered a REC.

Facility Name	PAGEBOY CLEANERS
Address	19995 STEVENS CREEK BLVD
Direction from Site	East-Southeast and crossgradient
Distance from Site	256 feet
Database	EDR Hist Cleaner
Notes/Comments	This property is listed on the EDR Hist Cleaner database for being a registered laundry facility from 1991 to 2000. Based on the lack of records indicating a release associated with these listings, as well as the distance from the Site and crossgradient relationship to the Site, this is not considered a REC.

Facility Name	DIAMOND QUALITY PRINTING
Address	19993 STEVENS CREEK BLVD
Direction from Site	East-Southeast and crossgradient
Distance from Site	268 feet
Database	HWTS, HAZNET, ECHO, FINDS, RCRA-SQG, CUPA SANTA CLARA
Notes/Comments	This property is listed on the RCRA-SQG, ECHO, and FINDS databases for generating a small quantity of hazardous waste in 1992; on the HWTS database for having tracked hazardous waste on the property from 1992 to 2002; on the HAZNET database for recycling several tons of photochemicals/photoprocessing waste, and alkaline solution (pH >= 12.5) with metals from 1992 to 2001; and on the CUPA SANTA CLARA database for generating over 100 kilograms of silver waste. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

Facility Name	ROBERT JOYCE
Address	10137 MYER PLACE
Direction from Site	North-Northeast and crossgradient
Distance from Site	292 feet
Database	E MANIFEST, RCRA NonGen / NLR
Notes/Comments	This property is a residential house listed on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating asbestos hazardous waste in 2019. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

Facility Name	SONGCOS SHELL, SHELL, STEVENS CREEK GAS, USA PETROLEUM COMPANY #214
Address	19990 STEVENS CREEK BLVD
Direction from Site	East-Southeast and crossgradient
Distance from Site	349 feet
Database	EDR Hist Auto, HIST LUST SC, CORTESE, LUST, HIST CORTESE, UST, EMI, HWTS, CERS, CERS TANKS, HAZNET, HIST UST, CORTESE, SWEEPS UST, CA FID UST, UST FINDER, UST FINDER RELEASE, RCRA-SQG, ECHO, FINDS, E MANIFEST, RCRA NonGen / NLR, CUPA SANTA CLARA
Notes/Comments	This property is listed on the EDR Hist Auto, HIST LUST SC, CORTESE, LUST, HIST CORTESE, UST, CERS TANKS, CORTESE, SWEEPS UST, CA FID UST, UST FINDER, CERS, and UST FINDER RELEASE databases for a leaking gasoline UST that affected the non-potable groundwater beneath the property. The case was opened in February 2003, and after remediation and cleanup activities were completed to the satisfaction of the regulatory agency, the case was closed in July 2005. Due to the closed status and age of the case, the crossgradient relationship to the Site, and the distance from the Site, this is not considered a REC. This property is also listed on the EMI database for emitting several tons of organic hydrocarbon gases, and reactive organic gases from 2017 to 2022; on the HWTS database for having tracked hazardous waste on the property in 2012; on the HAZNET database for transferring, recovering, and storing several tons of unspecified aqueous solutions, and waste oil and mixed oil from 2017 to 2019; on the CERS database for several administrative violations of the California Health and Safety Code from 2021 to 2023, all violations were later returned to compliance; on the CUPA SANTA CLARA, RCRA-SQG, ECHO, and FINDS databases for generating a small quantity of hazardous waste in 2001; and on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating hazardous waste in 2012. Based on the lack of records indicating a release associated with these listings, these are not considered RECs.

Facility Name	RAM SANKARAN
Address	19984 WHEATON DRIVE
Direction from Site	East-Northeast and downgradient
Distance from Site	369 feet
Database	E MANIFEST, RCRA NonGen / NLR
Notes/Comments	This property is a residential house listed on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating asbestos hazardous waste in 2022. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

4.3 Additional Environmental Record Sources

Local and state departments were contacted regarding available records for the Site. Results of the contacts and file reviews, as available, are discussed below. Copies of requests and responses, including public records, are included as Appendix E.

4.3.1 State/County Environmental Record Sources

Ninyo & Moore reviewed the Department of Toxic Substances Control (DTSC) EnviroStor and the Regional Water Quality Control Board (RWQCB) GeoTracker websites for hazardous substances or hazardous materials files for the Site addresses on November 15, 2024. No records were available for the Site through review of these agency databases.

The Santa Clara County Department of Environmental Health (SCCDEH) was contacted regarding hazardous materials or hazardous wastes records associated with the Site addresses on November 15, 2024. Files or records were not available for the Site addresses. A copy of the file review request response is included in Appendix E.

The Santa Clara County Fire Department (SCCFD) was contacted regarding hazardous materials or hazardous wastes records associated with the Site addresses on September 11, 2025. Files or records were available for the Site addresses and included a building fire sprinkler design review from August 1983, and a hazardous materials emergency from June 2012. The hazardous materials emergency pertained to an incident where an unknown black liquid was found in one of the tenant spaces in June 2012. The liquid was taken into evidence by the fire department and determined to not be hazardous. Copies of the records are included in Appendix E.

4.3.2 Local Environmental Record Sources

A Public Records Request was submitted to the City of Cupertino regarding hazardous materials, hazardous wastes and/or underground storage tank records for the Site November 15, 2024. The City of Cupertino responded via email that they had records on file for the Site which included a Storm Water Incident Inspection from August 2021. An

underground water line failed and discharged potable water to the storm water system. This record does not indicate a REC. A copy of the City of Cupertino record is included in Appendix E.

4.3.3 Federal Environmental Record Sources

Ninyo & Moore conducted an online search of the USEPA's MyPropertyInfo database for the Site and the vicinity. The Site addresses were not listed in the database.

4.3.4 Gas & Oil Maps

According to the CalGEM Online Mapping System, the Site does not lie within the administrative boundaries of an oil field and no oil or gas wells are located on the Site.

5 SITE RECONNAISSANCE

SITE RECONNAISSANCE

The following sections provide a general description of the Site and adjoining properties. The Site reconnaissance was conducted on December 4, 2024 by Mr. Luke Swickard with Ninyo & Moore. Mr. Luke Swickard was accompanied by Mr. Josh Vrotsos, Director of Acquisitions for Dividend Homes. Table 9 below summarizes key on-Site observations. Conditions of significant concern are discussed following the table. Photographs taken during the Site reconnaissance are provided in Appendix F.

Table 9 - On-Site Observations

Conditions	Not Observed or Noted	Observed or Noted	Significant Concerns?
Hazardous Substances	X		
Petroleum Products	X		
Underground Storage Tanks (USTs)	X		
Aboveground Storage Tanks (ASTs)	X		
Chemical/Petroleum Odors or Staining	X		
Standing Water/Pools/Sumps	X		
Drums and Totes	X		
Unidentified Hazardous Substance Containers	X		
Transformers/Potentially PCB-Containing Materials		X	No
Stains or Corrosion on Floors, Walls, or Ceilings	X		
Drains and Sumps	X		
Pits, Ponds, Lagoons	X		
Solid Waste	X		
Stained Soil or Pavement	X		
Stressed Vegetation	X		
Elevators		X	No
Waste or Storm Water Discharges		X	No

Conditions	Not Observed or Noted	Observed or Noted	Significant Concerns?
Septic Systems	X		
Wells	X		
Other	X		

Transformers/Potentially PCB-Containing Materials

Three pad-mounted transformers were observed on the Site. No signs of leaks or spills were observed.

ASSOCIATED PHOTOGRAPHS

View of a typical pad-mounted transformer.

Elevators

An elevator was located in each of the Site buildings. No spills or leaks were observed in the elevator mechanical rooms.

ASSOCIATED PHOTOGRAPHS

View of a typical elevator mechanical room.

Waste or Storm Water Discharges

Storm drain inlets were observed throughout the asphalt-paved parking areas. Indications of spills were not observed around the drain inlets.

ASSOCIATED PHOTOGRAPHS

View of a typical storm drain inlet.

5.1 Adjoining Properties

The areas surrounding the Site consist of commercial and residential properties. The Site is bordered on the north by residential development (20064-20104 Wheaton Drive); on the south by 20080 Stevens Creek Blvd (Rose Tea Lounge, Curry Pizza House, The Counter), 20100 Stevens Creek Blvd (Chicago Title Company, Safari Kid - Cupertino), and an apartment building (20128 Stevens Creek Blvd); on the east by 20007 Stevens Creek Blvd (Kabab & Curry's), 20015 Stevens Creek Blvd (Vidyarambh Cupertino-Preschool & Childcare center), and a vacant commercial building (20021 Stevens Creek Blvd); and on the west by 20149 Stevens Creek Blvd (Sun Design Center), and a residential house (10080 Randy Ln).

6 VAPOR ENCROACHMENT

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the Site as a result of contaminated soil and/or groundwater near the Site. The purpose of the pVES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site. The potential for VEC beneath the Site was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated properties surrounding or upgradient of the Site within specific search radii, a COC Test (for those known or suspect contaminated properties identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the Site (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants).

Four suspected non-petroleum hydrocarbon contaminated properties were identified within the 1/3-mile search radius (Arts Dry Cleaning, Pageboy Cleaner, N&K Cleaners, and Dryclean-Pro). Three suspected petroleum hydrocarbon contaminated properties were

identified within the 1/10-mile search radius (Haller Lumber, Shell, and Cupertino Fire Station). None of these properties are considered a VEC based on their distance from the Site (further than 100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants).

Based on the results of the VESM, it is unlikely a VEC currently exists beneath the Site. A copy of the VESM is included in Appendix G.

7 NON-SCOPE CONSIDERATIONS

In accordance with ASTM E1527-21, the following, which is not intended to be all inclusive, represent non-scope considerations and, therefore, were not addressed in this Phase I ESA: asbestos, radon, lead-based paint, lead in drinking water, emerging contaminants, regulatory compliance, cultural and historical risk, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage power lines. In addition, Ninyo & Moore did not address interpretations of zoning regulations, building code requirements, or property title issues.

8 FINDINGS AND OPINIONS

FINDINGS AND OPINIONS

Ninyo & Moore performed a Phase I Environmental Site Assessment (ESA) on the Site located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard, in Cupertino, Santa Clara County, California. A Summary of Findings is provided below. It should be recognized that all report details are not included in this Summary, and the report should be read in its entirety.

Site Location and Use

The approximately 4.3-acre Site is located along Stevens Creek Boulevard. The Site consisted of 4 two-story commercial office buildings, and parking lots.

Historical Information

Review of historical resources, such as aerial photographs, topographic maps, fire insurance maps, and available City Directory listings, as well as through review of historical records, interviews, and research, revealed that the Site was developed with scattered farmhouses and buildings and orchard trees from sometime prior to 1939, until the early 1960s, when some of the farm buildings on the Site were removed and two commercial buildings (20065 A & B) and a parking lot were developed on the southeastern portion of the Site. By the early 1980s, three of the remaining four farm buildings were removed from the Site, and a commercial building (20111) and a parking lot were constructed on the western portion of the Site. By the early 1990s, the last remaining farm building was removed from the Site, and commercial buildings and parking lots were constructed on the central (20085), northeastern (20045), and southeastern (20065 C) portions of the Site.

Adjoining properties have primarily been commercial and residential properties from at least 1956 until the present. No RECs were identified in the historical review.

Records Review

Review of an environmental database report obtained for this project indicated that the Site was not listed on any of the *Standard Federal, State, and Tribal Environmental Record sources*. The Site was listed on the *Additional Federal, State, Tribal and Local Environmental Record sources* regulatory databases researched by EDR, including the RCRA NonGen / NLR, FINDS, ECHO, HWTS, HAZNET databases. Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Based on the available EDR information and the nature of these specific databases listing types, no RECs were identified at the Site in connection with these database listings.

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Several off-Site facilities were located within the EDR search radius from the Site. None of the listed facilities are considered to be a REC to the Site based on several factors, including distance from the Site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the Site), database listing type, and/or affected media (soil only).

Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the Site.

Site Reconnaissance

On December 4, 2024, Mr. Luke Swickard with Ninyo & Moore conducted a Site reconnaissance of the property that included a visual inspection of the Site, and observations of adjoining properties. At the time of the reconnaissance, the Site was developed with 4 two-story commercial office buildings and parking lots. A description of the buildings is given below:

20045 Stevens Creek Blvd: Two-story commercial office building with 13 units.

20065 Stevens Creek Blvd: Two-story commercial office building with 12 units, made up of three connected buildings (A, B, and C).

20085 Stevens Creek Blvd: Two-story commercial office building, and a parking garage on the first floor.

20111 Stevens Creek Blvd: Two-story commercial office building with 16 units, and a courtyard in the center and a playground area on the western exterior of the building.

Additionally, three pad-mounted transformers were observed on the Site.

Adjoining Properties

The areas surrounding the Site consist of commercial and residential properties. The Site is bordered on the north by residential development (20064-20104 Wheaton Drive); on the south by 20080 Stevens Creek Blvd (Rose Tea Lounge, Curry Pizza House, The Counter), 20100 Stevens Creek Blvd (Chicago Title Company, Safari Kid - Cupertino), and an apartment building (20128 Stevens Creek Blvd); on the east by 20007 Stevens Creek Blvd (Kabab & Curry's), 20015 Stevens Creek Blvd (Vidyarambh Cupertino-Preschool & Childcare center), and a vacant commercial building (20021 Stevens Creek Blvd); and on the west by 20149 Stevens Creek Blvd (Sun Design Center), and a residential house (10080 Randy Ln).

Based on observations made during the Site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.

8.1 Recognized Environmental Conditions

Recognized Environmental Conditions:

This assessment has revealed no evidence of RECs in connection with the Site or adjoining properties.

8.2 Controlled Recognized Environmental Conditions

Controlled Recognized Environmental Conditions:

This assessment has revealed no evidence of CRECs in connection with the Site.

8.3 Historical Recognized Environmental Conditions

Historical Recognized Environmental Conditions:

This assessment has revealed no evidence of HRECs in connection with the Site.

8.4 Business Environmental Risks

Business Environmental Risks:

The following Business Environmental Risks were identified:

- Due to the age of the 20065 A & B buildings, asbestos-containing building materials (ACBMs) and lead based paint (LBP) are assumed to be present on the Site.

9 DATA GAPS

The following data gaps were encountered during the Phase I ESA:

- The 20045 Stevens Creek Boulevard building was inaccessible during the Site reconnaissance.

Based on the history of the Site, this limitation does not constitute a significant data gap and did not affect the Environmental Professional's ability to identify RECs.

10 CONCLUSIONS

CONCLUSIONS

Ninyo & Moore has performed this Phase I ESA in conformance with the scope and limitations of ASTM E1527-21 of the property located at 20045, 20065, 20085, and 20111 Stevens Creek Boulevard in Cupertino, Santa Clara County, California (the Site). Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the Site, and no RECs were identified on the adjoining properties.

11 RECOMMENDATIONS

RECOMMENDATIONS

Based on the findings of this ESA, no further investigation is recommended at this time.

12 LIMITING CONDITIONS/DEVIATIONS

This report was prepared in accordance with ASTM E1527-21. No deviations from the standard occurred in this ESA. Based on the information gathered by Ninyo & Moore for the purposes of this ESA, it is Ninyo & Moore's opinion the data obtained from the Site reconnaissance, records reviewed, and interviews conducted, is adequate to make a conclusion on the environmental condition of the Site with respect to the existence or lack of RECs.

14 ENVIRONMENTAL PROFESSIONAL STATEMENT

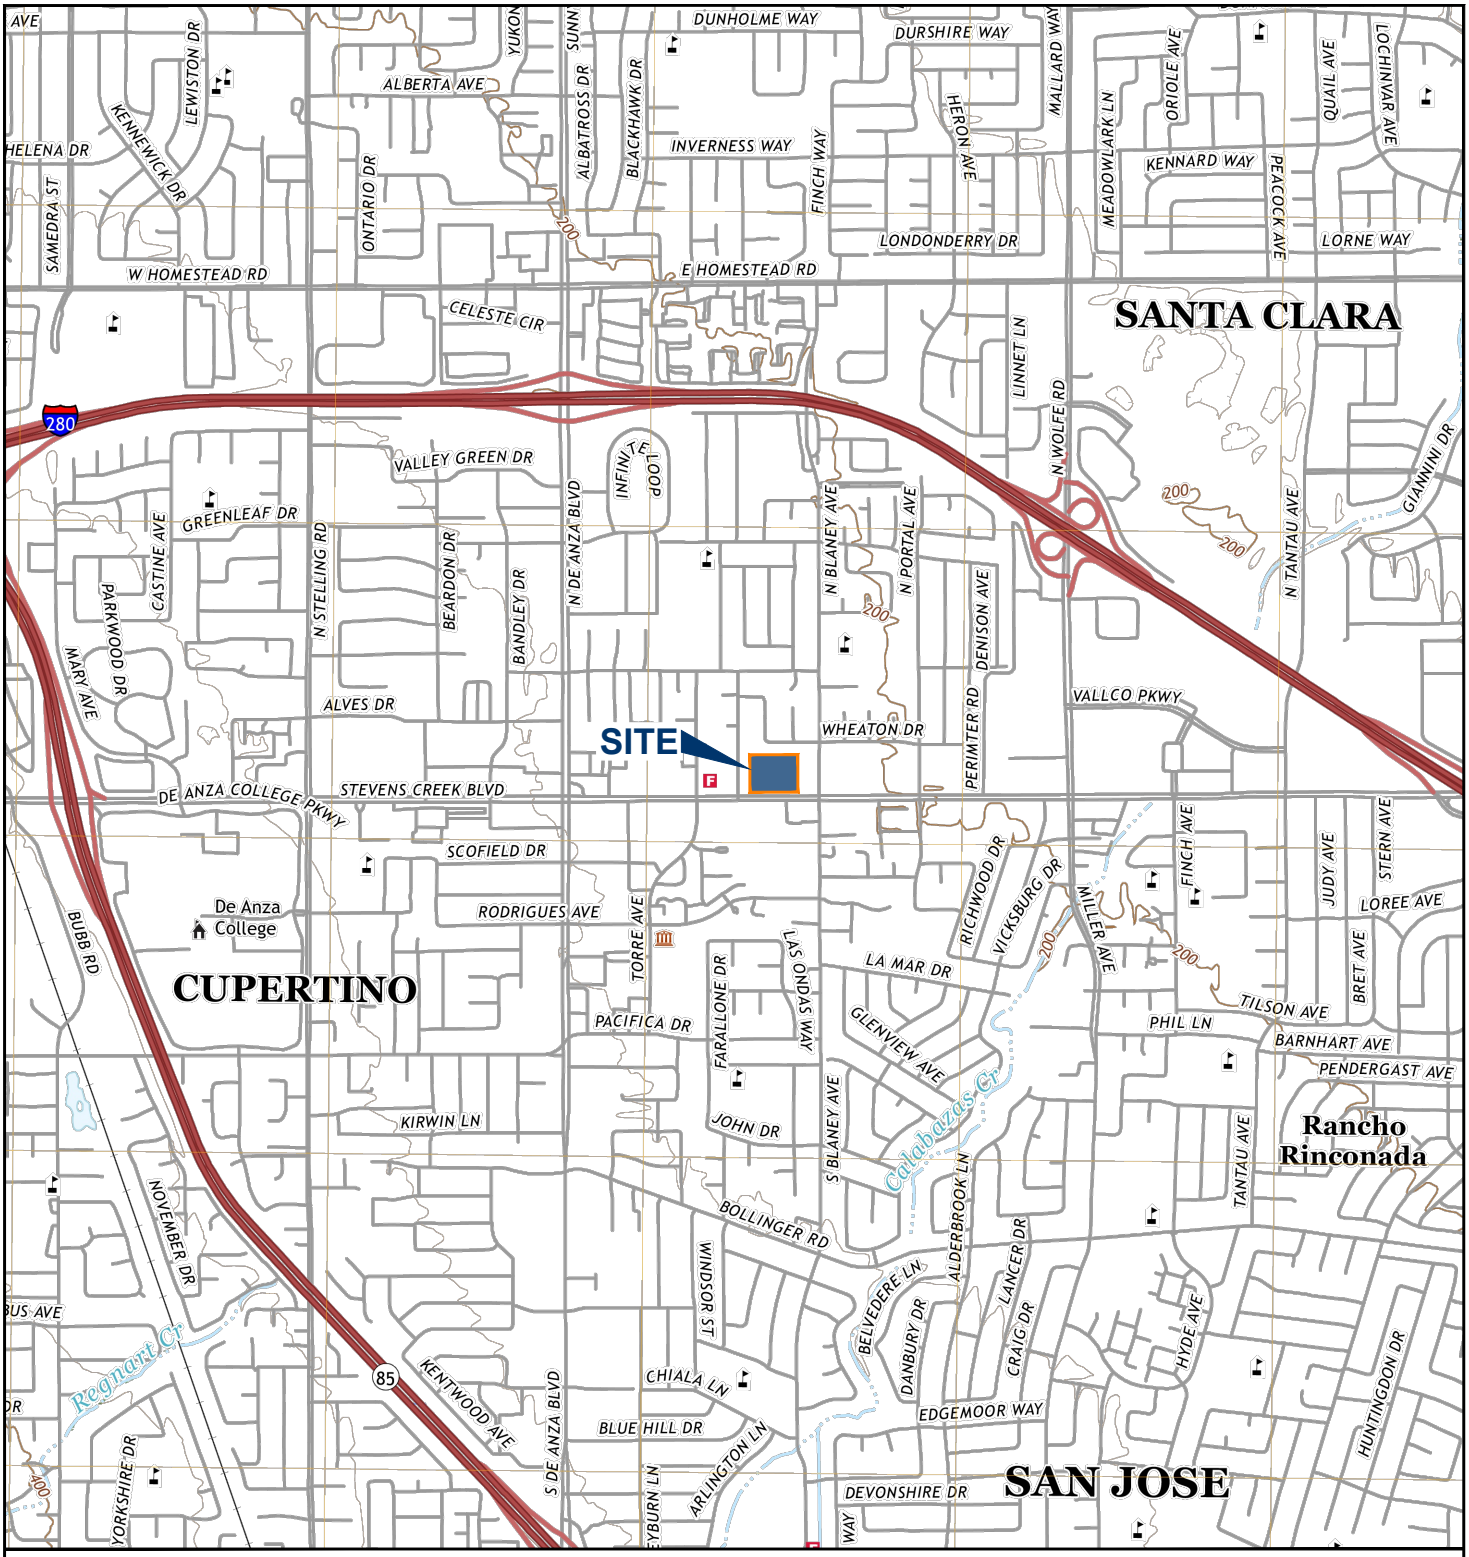

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

Geologic Society of America (GSA) – Hydrogeology Division

As a Principal Geologist for Ninyo & Moore, Mr. Wilken has 25 years of experience in the Environmental industry and started his career working in the field all over North America for a hard rock mineral exploration company. His experience in field geophysics led him to the contaminant assessment and remediation industry, providing professional geologic services including environmental hydrogeology, site investigation, remedial planning and implementation, health risk screening, due diligence, regulatory negotiations, and litigation support. Mr. Wilken has lead investigation and remediation projects driving risk-based solutions to successfully close environmental projects and reduce client's costs. He works closely with regulators, stakeholders, and clients to negotiate effective solutions utilizing sound science, strong technical expertise, and clear communication skills. Mr. Wilken has completed projects for a wide range of clients, including major oil companies, municipalities, manufacturing groups, and individual small business owners.

EXPERIENCE

Aerospace Manufacturing, Confidential Manufacturing Business, Torrance, California: Principal Geologist for the PFAS assessment at an operating Aerospace manufacturing facility. Assessed PFAS in soil, wastewater effluent, storm water, and groundwater by advancing five soil borings, installing three monitoring wells, collecting wastewater effluent, municipal water, and storm water samples. The data was compared, and recommendations were provided to the RWQCB.

Major Oil Company Refinery, Martinez, California: Principal Geologist for the environmental services at a 640-acre refining complex. The team is developing a PFAS assessment strategy for the facility to comply with a RWQCB request for assessment. Furthermore, the project team was planning to demolish an old wastewater treatment pond and developing a replacement treatment facility. Lastly the team operated, maintained, and optimized 27 groundwater extraction systems for contaminant plume control, to limit impacts to adjacent wetlands and surface water bodies.

S Street Redevelopment Project, Sacramento, California: Principal Geologist for the soil, soil vapor, and groundwater assessment and in situ ELSTM and zero valent iron injections to remediate site CVOC's. Assessment included advancement of soil borings, installation of groundwater monitoring and soil vapor wells, and routine sampling. Remedial activities included closing an UST in-place and injecting approximately 6,900 pounds of ELSTM and 58,000 pounds of zero valent iron into targeted areas. Interfaced with multiple stakeholders and agencies including property owner/client (Capitol Area Development Authority), City of Sacramento, RWQCB, and SCEMD.

Former Orchard Supply Facility, Sacramento, California: Principal Geologist for in situ EHC® injections to remediate site VOC's. Approximately 24,525 gallons of 30% EHC® slurry was injected into the subsurface; approximately 1,272 gallons of EHC® slurry was injected into the shallow zone aquifer; and approximately 23,253 gallons of EHC® slurry was injected into the deep zone aquifer. Interfaced with multiple stakeholders and agencies including property owner, client (Capitol Area Development Authority), DTSC, City of Sacramento, RWQCB, and SCEMD.

Stewart's Automotive, Sacramento, California: Principal Geologist for

soil, soil vapor, and groundwater assessments, SVE system operation, and in situ EDS-ERTM and zero valent iron injections to remediate site CVOC's. Assessment included vertical delineation of groundwater, the installation of soil vapor wells, and routine sampling. Remedial activities included upgrading and operating an SVE system and the injection of approximately 31,900 pounds of EDS-ERTM; 19,900 pounds of mZVI; and 82 liters of KB-1 into targeted areas. Interfaced with multiple stakeholders and agencies including property owner/client, site tenant, City of Sacramento, Caltrans, RWQCB, and SCEMD.

Manufacturing Facilities, San Carlos, California: Principal Geologist and previous Senior Project Manager for assessment and remediation of PCBs and CVOCs at two adjacent manufacturing facilities. Project required managing corrective action account between two clients that at times had competing interests. Also, over saw the sale of one of the properties and the development of a plan to meet redevelopment goals which included a cap for PCBs, stormwater infrastructure decontamination, and other redevelopment activities.

Ecodyne Pond Site, Windsor, California: Principal Geologist for the assessment and remediation of a former wood treatment facility that utilized creosote and pentachlorophenol to treat lumber. The facility also had a lead dip-treatment tank for coating metal hardware. Brandon's team designed a remedial excavation to remove residual dioxin, lead, and poly aromatic hydrocarbons from soil at the site. The excavation extended offsite, which involved removing soil beneath a concrete-lined drainage ditch that conveyed stormwater from the site to a nearby creek. In addition, a natural gas transmission line was located approximately 2 to 4 feet below the grade of the drainage ditch. To minimize potential damage, Brandon's team worked closely with the owner of the natural gas line and excavated soil by hand digging around the natural gas line. The work was completed safely without incident. A total of 15,587 tons of non-hazardous and 6,411 tons of hazardous soil were excavated, and 4,718,739 gallons of water were extracted, and properly handled and disposed of offsite. The team also provided technical assistance to the client's legal team prior to and during remedial activities for several lawsuits related to the site. All lawsuits were resolved in our client's favor.

Ranch Headquarters, Woodland, California: Principal Geologist and previous Senior Project Manager for fixed fee remediation of a several acre light non aqueous phase liquid plume near a network of irrigation canals at an operating ranch/farm headquarters. He managed a cost cap and a pollution liability limit insurance policy to provide long term liability protection for the client. This project also utilized a land discharge permit obtained from the RWQCB to discharge treated groundwater from the multi-phase extraction treatment system. Successfully negotiated with the RWQCB to shut down and remove the remediation system after no reoccurrences of LNAPL were observed and approximately 1 month after the treatment system's mass removal rate went asymptotic. Post-remediation groundwater monitoring has ceased. He was working with the stakeholders to get a land covenant in place to facilitate case low threat case closure.

Former Paint Manufacturing Facility, San Leandro, California: Senior Project Manager for a former paint manufacturing facility contaminated with various chlorinated and non-chlorinated volatile organic compounds (VOCs). The project consisted of environmental investigations, agency liaison, and the operation and maintenance of a multi-phase extraction treatment system. The team successfully implemented a carbohydrate injection program, after active mechanical remediation reached asymptotic recovery, to increase the rate of reductive dechlorination to accelerate the timeframe to regulatory case closure.

Service Station Site, Fremont, California: Senior Project Manager for a service station that has petroleum hydrocarbons impacts in the first water-bearing zone, in an aquitard, and the Newark Aquifer. He was given this site to manage, and he completely reevaluated the conceptual site model during the production of a remedial action plan proposing the installation of multiple groundwater extraction recirculation wells screened in the Newark Aquifer. He convinced the client to not invest in the $1,800,000 remediation project and to challenge the regulatory agency. He was successful in negotiating with the regulatory agency that remediation in the drinking water aquifer was not necessary. Allowing the client to pursue a more cost feasible remedial solution.

Former Bulk Terminal, Rio Vista, California: Senior Project Manager for a former bulk terminal with LNAPL detections directly adjacent to the Sacramento River. The site had been utilized by many businesses in its history and the first known crude oil above ground storage tank (AST) was onsite as early as 1896. Defined the extent of hydrocarbons in soil and groundwater, including LNAPL plume. Planned and submitted a remedial excavation along the Sacramento River to the Army Corps of Engineers and received approval without further review. During negotiations with the RWQCB, successfully negotiated a soil cleanup goal of 1,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons (TPH), which saved the client hundreds of thousands of dollars in cleanup costs.

Luke I. Swickard

Project Manager

EDUCATION

B.S., Environmental Science and Management, 2017, University of California, Davis, California

REGISTRATIONS/CERTIFICATIONS

AHERA Accredited Asbestos Inspector, #45593

40-Hour HAZWOPER with Annual Updates

As a Project Manager for Ninyo & Moore, Mr. Swickard has 6 years of experience in various environmental field work, including Phase I and Phase II ESAs, corridor studies, oversight of soil boring drilling, well installation and UST removal activities, as well as water, soil and soil vapor sampling. He has also conducted Spill Prevention, Control, and Countermeasure (SPCC) audits, prepared Storm Water Pollution Prevention Plan (SWPPP), and designed stormwater Best Management Practices (BMP).

EXPERIENCE

FCS New Solano County Hall of Justice Phase I Environmental Site Assessment (ESA), Fairfield, California: Provided project management for the completion of a Phase I ESA on the approximately 15-acre Solano County Justice Campus that includes the Solano County Courthouse, Law Library, Office of Emergency Operations, Solano County Coroner, and the Solano County Jail. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

US Agriculture Phase I ESA, Yakima, Washington: Provided project management for the completion of four Phase I ESAs on approximately 350-acres of agricultural property that are utilized as fruit orchards. The Phase I ESAs were conducted to evaluate the potential for RECs on and adjacent to the sites for ongoing use of the properties. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Reports.

SWCA, Transmission Line Corridor Assessments, California: Provided project management for the completion of three corridor assessments on over 1,000 parcels along over 100-mile long transmission line routes in San Jose and the California Valley. Activities included the created of parcel information databases, reviewing historical and regulatory environmental data, conducting site reconnaissance and preparing the corridor assessments and figures.

Mikesell Avenue Properties Reports Manteca, California: Provided project management and oversight for the completion of six Phase I ESAs, Pipeline Risk Analyses, Railroad Safety Studies, Geotechnical Hazard Surveys, and California Department of Education Checklists, for the Manteca Unified School District. The reports were conducted to evaluate the potential for environmental hazards and RECs. Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

City of West Sacramento Sacramento River West North Levee Corridor Assessment, West Sacramento, California: Provided project management and implementation for the completion of a corridor assessment on over 200 parcels along a 5.8-mile long area, as part of the Sacramento River levee expansion project. Activities included reviewing historical and regulatory environmental data, conducting site reconnaissance and preparing the corridor assessment. The project was conducted in accordance with EPA Brownfields Grant guidelines and requirements.

Luke I. Swickard

Project Manager

MIG Anthony Chabot Sewer Line Project San Leandro, California: Provided project management for the completion of a Phase I ESA for the nee sewer line installation in the Anthony Chabot Regional Park. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) along the 8-mile long project route, through the regional park and adjacent golf course. Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Floating Photovoltaic (PV) Solar Array, Windsor, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of a proposed floating PV solar array on an existing water treatment facility. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) adjacent to the site so that electrical infrastructure could be installed from the floating PV solar array to a collection system. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Duncan Enterprises Phase I Environmental Site Assessment (ESA), Fresno, California: Provided project management for the completion of a Phase I ESA on an approximate 14-acre industrial property that is utilized for paint, ceramics, and craft goods manufacturing and distribution. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Lemoine Ranch Property Phase I ESA, Alturas, California: Provided project management for the completion of a Phase I ESA on an approximate 2,026-acre agricultural property that is utilized for cattle grazing. The Phase I ESA was conducted to evaluate the potential for RECs on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Former Richmond Hospital, Richmond, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of the former Richmond Hospital for potential redevelopment. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) on or adjacent to the site. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

City of Sacramento, 3739 Marysville Boulevard Phase II ESA, Sacramento, California: Staff Environmental Scientist a Community Wide Assessment under an existing US EPA Brownfields grant. Review of historical information indicated the site was formerly a gasoline station and convenience store and a former dry cleaner was also identified on the adjacent parcel. Soil samples collected from beneath seven former USTs and the associated piping and dispensers indicated that an unauthorized release of petroleum hydrocarbons had occurred from the former fuel dispensing system. In 2018, Ninyo & Moore conducted a Phase I ESA on the site and the adjoining dry cleaner property. Results of the Phase I ESA, along with the results of the prior sampling and remediation were used to prepare a Sampling and Analysis Plan (SAP) for review by the RWQCB to conduct a Phase II ESA, which included installing and sampling 33 temporary soil gas samples, collecting soil samples from five soil borings, and collecting grab groundwater samples from three on-site borings.

Are there any groundwater monitoring wells or irrigation wells on the property?

___Yes ___X___ No ___Unknown

If Yes, how many____ and when were they installed?_____

Does the property discharge waste water, or storm water into a municipal sanitary sewer system? If Yes, does the facility discharge under an NPDES Permit or Waste Discharge Permit?

___Yes ___X___ No ___Unknown Permit Number/Agency:_____

Are there any current or previous sumps used for waste-water collection/treatment on the property?

___Yes ___X___ No ___Unknown

Are there any septic systems, dry wells or leach fields on the property?

___Yes ___X___ No ___Unknown If Yes, Where?:_____

ENVIRONMENTAL COMPLIANCE

Is there knowledge of environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances?

___Yes ___X___ No ___Unknown

Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?

___Yes ___X___ No ___Unknown

Has the property or related facilities or operations ever been the subject of enforcement actions by governmental authorities resulting in penalties of any kind?

___Yes ___X___ No ___Unknown

ENVIRONMENTAL CONDITIONS

Has groundwater or soils on the property ever been tested?

___Yes __x__ No ___Unknown

If Yes, provide details:

_____

Have any contaminants been identified which exceed standards or guidelines levels?

___Yes __x__ No ___Unknown

If Yes, provide details:

_____

BUILDING CONDITIONS

What is/are the age of the structure(s)? 39_____.

Have any major renovations been completed and if so, describe type and when completed:

None

Has an asbestos and/or lead-based paint survey been performed on the site structure(s)?

___Yes __x__ No ___Unknown

If Yes, was asbestos containing materials identified?

___Yes ____ No

If Yes, was lead-based paint present identified?

___Yes ____ No

PHASE I ESA/AAI REQUIREMENTS

According to the All Appropriate Inquiry (AAI, 40 CFR 312) requirements and ASTM (E 1527-05) guidance on conducting Phase I Environmental Site Assessments, the "user" of the assessment must provide the following information, if available, to the environmental professional in order to qualify for Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Please check yes or no and provide any additional information you may have regarding the site. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 132.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

☐ Yes ☑ No

If yes, please explain:

(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes ☑ No

If yes, please explain:

(3) Specialized knowledge or experience of the person/department requesting the Phase I ESA and seeking to qualify for the landowner liability protections (40 CFR 312.28).
As the user of this ESA, do you have any specialized knowledge or experience related to the property or adjoining properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☑ No

If yes, please explain:

(4) Relationship of the purchase price to the fair market value of the property, if it were not contaminated (40 CFR 312.29).
Does the purchase price offered for this property reasonably reflect the fair market value of the property? If there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be at the property?

Please discuss: Yes. The purchase price is a reasonable price for entitled land in Cupertino.

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
(a) Do you know the past uses of the property?
(b) Do you know of specific chemicals that are present or once were present at the property?
(c) Do you know of spills or other chemical releases that have taken place at the property?
(d) Do you know of any environmental cleanups that have taken place or are ongoing at the property?

☐ Yes ☑ No

If yes, please explain:

(6) The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☐ Yes ☑ No

If yes, please explain:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2024 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that

there are 47 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 06/17/2024 has revealed that there are 11 Cortese sites within approximately 0.5 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 11 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SONGCOS SHELL	19990 STEVENS CREEK	ESE 0 - 1/8 (0.066 mi.)	F15	51

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description:	Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes:	Pooled fuel observed in all four dispenser pans. Leaks need to be investigated and remedied.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	157272
Site Name:	STEVENS CREEK GAS
Violation Date:	07-21-2022
Citation:	HSC 6.7 25292.2(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.2(a)
Violation Description:	Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes:	Returned to compliance on 08/17/2022. CFO letter last signed 11/18/2020; CERS submittal made 8/17/2022 with updated CFO letter.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	157272
Site Name:	STEVENS CREEK GAS
Violation Date:	07-28-2021
Citation:	23 CCR 16 2715(a)(1)(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(a)(1)(B)
Violation Description:	Failure to submit the Designated Underground Storage Tank Operator Identification Form within 30 days of installing a UST system or within 30 days of a change in DO.
Violation Notes:	Three DOs inspecting the system have not been reported on the DO notification form.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	157272
Site Name:	STEVENS CREEK GAS
Violation Date:	07-28-2021
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	87-2 Fill spill container is badly damaged (grossly cracked at the base) and has leaked fuel into the fill sump.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Historical application of pesticides to the outside of the administration building has impacted shallow soil. The administration building is to be demolished to allow for the expansion of the Lawson Middle School’s outdoor recreation area. A natural grass athletic field will be constructed with a track around the outside. Impacted soil was excavated and removed from the site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker,

Site ID:	75403
Site Name:	THEODORE A FLOOR DDS
Violation Date:	01-20-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the

THEODORE A FLOOR DDS (Continued) **S112346990**

designated facility which received the waste.
Violation Notes: Returned to compliance on 02/14/2017. Manifests for disposal of tartar and stain remover were not available for inspection. Forward all receipts for disposal of this material for the past 3 years to the HMCD office for review.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-20-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates waste corrosive tartar and stain remover and disposes of material in closed, labeled containers. Facility uses only digital x-ray. Amalgam scrap, chair traps, and separator waste is picked up by Stericycle (receipts reviewed). Facility disposes on non-rcra pharmaceuticals and lidocaine in accordance with medical waste management regulations. Surfaces are disinfected with cavicide and ultrasonic bath uses non-hazardous enzymatic liquid. Facility uses only steam autoclave for sterilizing and uses non-hazardous cleaners to clean impression trays. Tooth whitener is used completely during treatments. Fire extinguishers are annually serviced, spill kit is adequate, and emergency posting is up-to-date.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 112785
Site Name: DRYCLEAN-PRO
Violation Date: 05-05-2016
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 06/06/2016. EPA ID number CAL000380674 is currently inactive. Ms. Tsai was given DTSC form 1358 at the time of inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Eval Date: 05-05-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility has 1 dry cleaning machine that uses petroleum distillates. Filters are changed and managed as hazardous waste and dry lint is disposed of to the garbage. This machine requires that the water in the still be replaced every time filters are cleaned and all contaminated water is managed as hazardous waste. Facility owner manually activates a program that triggers the machine to empty the internal waste container to an external bin and waste is immediately placed into a closed and labeled container. Spotting table has drain tubes that empty to an open container at the bottom and waste containers on the spotting table and machine were empty and dry at the time of inspection. Ms. Tsai trains her employees on hazardous waste management and maintains records of waste pickups every 6 months. Records were reviewed during the course of inspection. Facility has adequate spill response, annually serviced fire extinguishers, and waste containers are inspected weekly. covered [Truncated]

Violations:
Site ID: 104966
Site Name: CHEVRON STATION #95954
Violation Date: 01-19-2022
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 01/19/2022. Premium gasoline fill spill container assembly within containment sump failed initial integrity testing (leaking into tank fill pipe observed). This container was replaced, retested, and passed during this inspection on 1/19/22.

Violation Program: UST
Violation Source: CERS,

Site ID: 104966
Site Name: CHEVRON STATION #95954
Violation Date: 01-23-2024
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Overfill prevention inspection is overdue. Last conducted on 1/21/2021. Attempt to inspect was made 1/23/2024 without success according to service technician.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Four 10,000-gallon fuel tanks were removed from the site on May 15, 1998, during a system upgrade. Tested soil samples from around the UST cluster and dispensers documented that some fuel release(s) had occurred, but the reported concentrations were relatively low. An initial deep boring (B-1) was advanced on the south side of the UST area (see Figure 2) in July 1998 and found detectable fuel impacts to soils (higher than the initial tests) to a depth of 75 feet. Construction of the site s first groundwater monitoring well (MW-1) in July 1999 involved sampling and testing of even deeper soil (to 100 feet below grade) along with the encountered groundwater. Over the next two years (2000-2001) another deep exploration boring (EB-1) was advanced, two additional groundwater monitoring were installed (MW-2 and MW-3), MW-1 was deepened/reconstructed as MW-1R, and three vadose-zone wells (VW-1 through VW-3) were installed. The soil analyses from these holes only documented noteworthy fuel impacts at MW-3. On-site groundwater monitoring wells MW-4 and MW-5 were installed in May 2004; neither location exhibits significant impacts. After repeated being denied access to the adjoining property to the north, the first off-site well, MW-6, was installed in July 2007 over 200 feet north of the site, at the corner of De Anza Blvd. and Lazaneo Drive. In February, 2008, two additional off-site wells were installed in North De Anza Boulevard on an apparent migration path from the fuel source area through MW-3. Soil and groundwater samples from all three off-site wells showed no apparent impact from fuel-related compounds. Since 2001, groundwater sounding and sample testing have occurred at least twice a year, and usually quarterly. The cumulative data on groundwater level measurements and analyses (through March 2008) are presented in tables in Appendices A and B, respectively. The impacts are a combination of traditional BTEX plus lesser concentrations of oxygenates, mostly TBA. Site remediation activities to date have included removal of shallow soils around the old tanks and dispensers in 1998 and a five-day soil vapor extraction (SVE) test from MW-3 in 2003. Periodic soil vapor extraction began in July 2008. Groundwater elevation has fallen prior to June 2008 and the wells remain dry.

FINDS:
Registry ID: 110055823541

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110019006332

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release

SEARS, #1468 (Continued) **1008153180**

Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Description:	Caller states substance released due to a fire. Caller states a sprinkler fused which resulted in the tank filling and overflowing. Caller states substance released to grease traps and possibly into a sanitary sewer. Caller states a contractor is enroute for clean-up. Caller states this occurred at the Vallco Shopping Mall and approximately 20 people were evacuated from the mall and theater. Caller also states no waterways were impacted. Caller states the fire is out with minor flame damage and moderate water damage.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

APPLE INC (Continued) **1000142172**

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U022
Waste Description: Benzo[A]Pyrene

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U075
Waste Description: Dichlorodifluoromethane (Or) Methane, Dichlorodifluoro-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U404
Waste Description: U404

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110002411649

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA

APPLE INC (Continued) **1000142172**

Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Quarterly Update:	Four-Phase Systems, Inc., a manufacturer of semi-conductor components and printed circuit boards, was granted a hazardous waste permit in 1982. Motorola acquired Four-Phase that same year, but soon discontinued it's operations and submitted a closure plan on 10/30/1984. Their closure was certified by DHS on 2/2/1987. After the closure, DHS conducted an inspection of the site and found waste that was not completely removed from the site. Cleanup of the site was conducted and closure activities were finally completed. Motorola was certified closed again on 7/30/2001. The site is currently used by Apple Computer.

Completed Date: 12/12/2023
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/22/2016
Comments: DTSC letter with oversight cost estimate for project activities for fiscal year 2016/2017. The anticipated project activities include the Soil Vapor Extraction Status Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/26/2013
Comments: The public notice announces the public comment period for the Draft Response Plan, which runs from January 6, 2014 through February 5, 2014. The Draft Response Plan proposes the continued operation of the pilot test soil vapor extraction system as the final response action for the Site. The public notice is scheduled to run in the Cupertino Courier on January 3, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/29/2021
Comments: Soil Vapor Extraction Extended Pulse Operation Report (Report) summarizes results of sampling and analysis of a soil vapor extraction treatment system installed at the Former Cupertino Village Cleaners site, between January 2019 and December 2020. Report recommends continuing the approved rebound test program in accordance with the March 14, 2014 Reponses Action Plan, the April 11, 2016 Soil Vapor Extraction System Restart Work Plan and the requirement set forth by the Department of Toxic Substances Control (DTSC) on December 9, 2020 regarding the November 16, 2020 Cupertino Village Cleaners Extended Pulse SVE operation Interim Data Submittal

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 10/06/2022
Comments: Revised Soil Vapor Extraction System 2022 Rebound Test Report (Report) summarizes results of the rebound testing from December 2020

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

to March 2022. The Rebound test that is currently being conducted since the shutdown of the soil vapor extraction (SVE) system installed at the Cupertino Village Cleaners site (Site) in December 2020. The Rebound Test is being conducted according to the 2014 Response Plan 2016 SVE System Restart Work Plan, and 2020 Soil Vapor Monitoring Probe Rebound Testing Plan. The Rebound Test will continue with monitoring of soil gas in the shallow soil (4.5 to 22 feet below grade surface). Soil gas sampling will continue on a quarterly basis, with sampling conducted in March, June, September, and December to assess whether seasonal weather changes (e.g., temperature and atmospheric barometric pressure) at the Site induce additional upward migration of soil gas and release to the atmosphere and potentially indoor air.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020
Comments: DTSC concurs with Cupertino Village Cleaners recommendations to shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2021
Comments: The Technical Memorandum discuss the presence of tetrahydrofuran (THF) in soil vapor samples collected from soil vapor monitoring points and its association with the soil vapor extraction (SVE) system s polyvinyl chloride (PVC) piping off-gassing or a potential subsurface source at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 12/08/2021
Comments: The Revised Final Work Plan provides the sampling methodology of indoor air quality (IAQ) sampling activities to be conducted at two commercial buildings (Buildings) located in the vicinity of the Site. One building is currently occupied by the 99 Ranch Market and the other by Good Samaritan United Methodist Church and associated Pre-School (Church Facility).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/08/2020
Comments: The Technical Memorandum summarizes the accessibility and current condition of existing soil vapor monitoring points (SMPs) at the Site. DTSC concurs with the Technical Memorandum s recommendations of

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

inclusion of SMPs VMW-1A and VMP-1AA as part of the Cupertino Village soil vapor extraction rebound testing program.

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/12/2022
Comments: August 12, 2022, DTSC correspondence provides a review on soil gas sample results collected between December 2020 and March 2022 as part of soil vapor extraction (SVE) system rebound testing that is currently being conducted at the former Cupertino Village Cleaners site. Correspondence provides recommendations to be followed until reported PCE concentrations reach a steady state at the selected soil gas monitoring locations. DTSC will consider the results provided in Annual Monitoring Summary Reports (an Annual Monitoring Summary Reports summarizes the quarterly soil gas sampling efforts from the previous calendar year and results and include appropriate recommendations/conclusions) to determine whether the SVE system will be suitable to be decommissioned and the implemented remedy certified.

Completed Document Type:	Pilot/Treatability Study Report
Completed Date:	03/03/2014
Comments:	The report documents the implementation of the Soil Vapor Extraction (SVE) System Pilot Test Work Plan, and describes the SVE system design and installation, describes the startup monitoring results, describes the pilot testing procedures, and presents the results and conclusions of the pilot testing program . DTSC agreed in its approval letter that soil vapor extraction is a feasible technology for the Site and directed that it be the remedy proposed in a Draft Response Plan.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	09/22/2014
Comments:	The Report summarizes the interim results of rebound testing being implemented to determine if the operation of the soil vapor extraction (SVE) system from November 2011 to March 2014 effectively remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be restarted if an increasing concentration trend is observed during the next sampling event.
Completed Area Name:	PROJECT WIDE

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/22/2016
Comments: DTSC letter with oversight cost estimate for project activities for fiscal year 2016/2017. The anticipated project activities include the Soil Vapor Extraction Status Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/26/2013
Comments: The public notice announces the public comment period for the Draft Response Plan, which runs from January 6, 2014 through February 5, 2014. The Draft Response Plan proposes the continued operation of the pilot test soil vapor extraction system as the final response action for the Site. The public notice is scheduled to run in the Cupertino Courier on January 3, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/29/2021
Comments: Soil Vapor Extraction Extended Pulse Operation Report (Report) summarizes results of sampling and analysis of a soil vapor extraction treatment system installed at the Former Cupertino Village Cleaners site, between January 2019 and December 2020. Report recommends continuing the approved rebound test program in accordance with the March 14, 2014 Reponses Action Plan, the April 11, 2016 Soil Vapor Extraction System Restart Work Plan and the requirement set forth by the Department of Toxic Substances Control (DTSC) on December 9, 2020 regarding the November 16, 2020 Cupertino Village Cleaners Extended Pulse SVE operation Interim Data Submittal

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 10/06/2022
Comments: Revised Soil Vapor Extraction System 2022 Rebound Test Report (Report) summarizes results of the rebound testing from December 2020 to March 2022. The Rebound test that is currently being conducted since the shutdown of the soil vapor extraction (SVE) system installed at the Cupertino Village Cleaners site (Site) in December 2020. The Rebound Test is being conducted according to the 2014 Response Plan 2016 SVE System Restart Work Plan, and 2020 Soil Vapor Monitoring Probe Rebound Testing Plan. The Rebound Test will continue with monitoring of soil gas in the shallow soil (4.5 to 22 feet below grade surface). Soil gas sampling will continue on a quarterly basis, with sampling conducted in March, June, September, and December to assess whether seasonal weather changes (e.g., temperature and atmospheric barometric pressure) at the Site induce additional upward migration of soil gas and release to the atmosphere and potentially indoor air.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020
Comments: DTSC concurs with Cupertino Village Cleaners recommendations to shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2021
Comments: The Technical Memorandum discuss the presence of tetrahydrofuran (THF) in soil vapor samples collected from soil vapor monitoring points and its association with the soil vapor extraction (SVE) system s polyvinyl chloride (PVC) piping off-gassing or a potential subsurface source at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 12/08/2021
Comments: The Revised Final Work Plan provides the sampling methodology of indoor air quality (IAQ) sampling activities to be conducted at two commercial buildings (Buildings) located in the vicinity of the Site. One building is currently occupied by the 99 Ranch Market and the other by Good Samaritan United Methodist Church and associated Pre-School (Church Facility).

Completed Sub Area Name: Not reported
Completed Document Type: AB 389 Response Plan
Completed Date: 02/24/2014

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Comments:	The response action selected in the Response Plan is continued operation of the existing soil vapor extraction system that is on the Site. The system was installed as part of a pilot test. The Response Plan established both residential and commercial cleanup goals for tetrachloroethylene in subsurface and sub-slab soil vapor. PCE in soil vapor will be reduced to the extent practicable. A Land Use Covenant will be put in place to restrict any portion of the Site where the residential or unrestricted use cleanup goals are not achieved.

Completed Date: 03/03/2014
Comments: The report documents the implementation of the Soil Vapor Extraction (SVE) System Pilot Test Work Plan, and describes the SVE system design and installation, describes the startup monitoring results, describes the pilot testing procedures, and presents the results and conclusions of the pilot testing program . DTSC agreed in its approval letter that soil vapor extraction is a feasible technology for the Site and directed that it be the remedy proposed in a Draft Response Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2014
Comments: The Report summarizes the interim results of rebound testing being implemented to determine if the operation of the soil vapor extraction (SVE) system from November 2011 to March 2014 effectively remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be restarted if an increasing concentration trend is observed during the next sampling event.

Completed Area Name: PROJECT WIDE

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

STEVENS CREEK BOULEVARD
20111 STEVENS CREEK BOULEVARD
CUPERTINO, CA 95014

TARGET PROPERTY COORDINATES

Latitude (North):	37.323618 - 37° 19' 25.02''
Longitude (West):	122.02486 - 122° 1' 29.50''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	586398.2
UTM Y (Meters):	4131015.2
Elevation:	210 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005309 CUPERTINO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

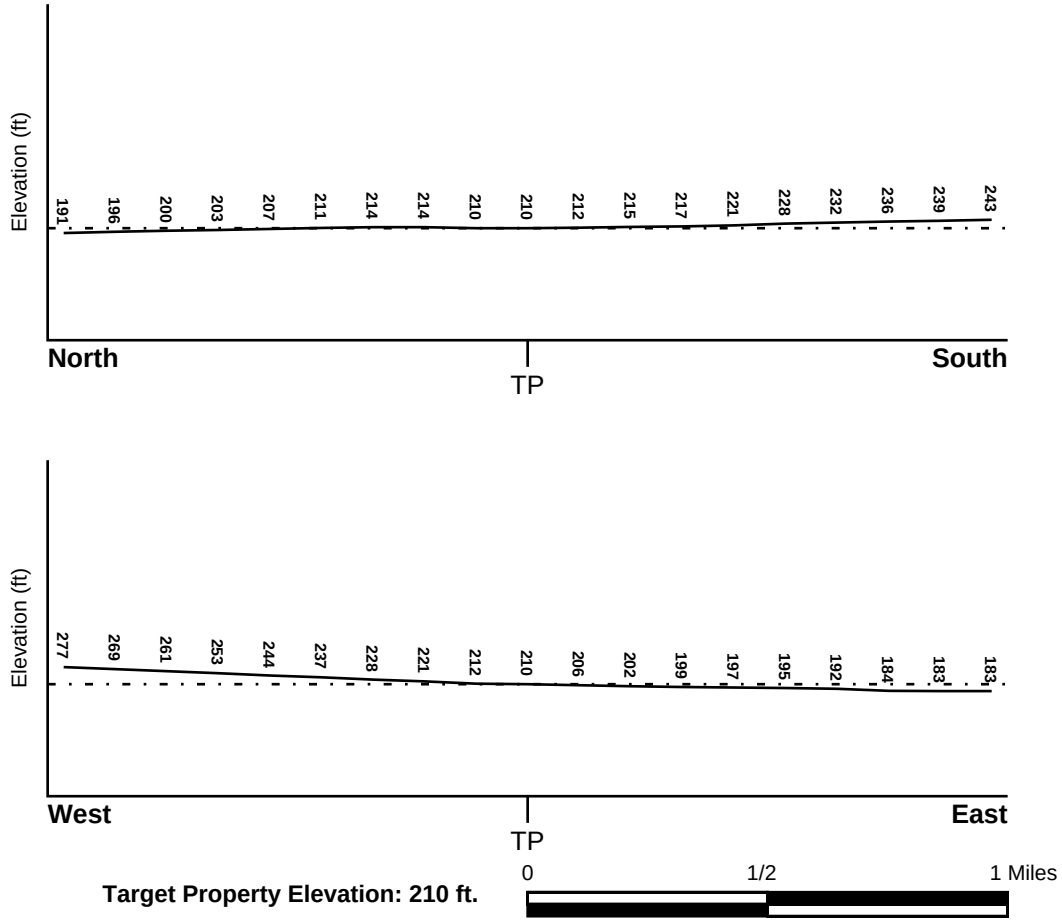

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0209H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0208H	FEMA FIRM Flood data
06085C0216H	FEMA FIRM Flood data
06085C0217H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	Hewlett Packard Cico Div
Site EPA ID Number:	CAD049227390
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	approximately 50 feet.
Hydraulic Connection:	A hydraulic connection exists between the surficial and lower aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: A review of the SEMS list, as provided by EDR, and dated 09/25/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

STEVENS CREEK BOULEVARD
20111 STEVENS CREEK BOULEVARD
CUPERTINO, CA 95014

TARGET PROPERTY COORDINATES

Latitude (North):	37.323618 - 37° 19' 25.02''
Longitude (West):	122.02486 - 122° 1' 29.50''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	586398.2
UTM Y (Meters):	4131015.2
Elevation:	210 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005309 CUPERTINO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

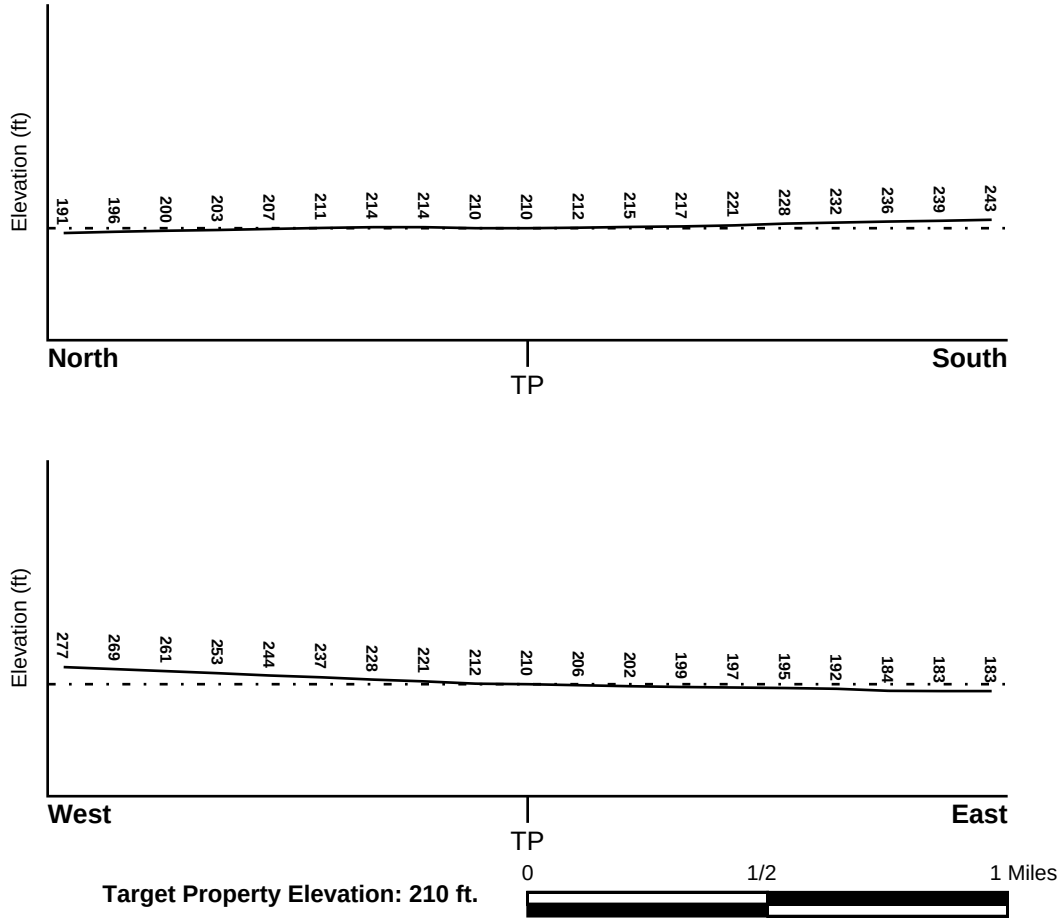

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0209H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0208H	FEMA FIRM Flood data
06085C0216H	FEMA FIRM Flood data
06085C0217H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	Hewlett Packard Cico Div
Site EPA ID Number:	CAD049227390
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	approximately 50 feet.
Hydraulic Connection:	A hydraulic connection exists between the surficial and lower aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

West Sacramento, CA 95691
Contact: Luke Swickard

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8388-4538-9C67

PO # NA

Project 405015001

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8388-4538-9C67

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Ninyo & Moore (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Year	*Target Street*	*Cross Street*	*Source*

Site Documentation and Regulatory Records

From: County of Santa Clara Public Records
To: Luke Swickard
Subject: Your County of Santa Clara public records request #24-1698 has been closed.
Date: Thursday, November 21, 2024 10:38:00 AM

-- Attach a non-image file and/or reply ABOVE THIS LINE with a message, and it will be sent to staff on this request. --

County of Santa Clara Public Records

Record request #24-1698 has been closed. The closure reason supplied was:

Good morning,
Thank you for your recent record request received on 11/11/2024 for the following address in Cupertino:
20111, 20045, 20065, and 20085 Stevens Creek Boulevard
We have no records for this location. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

- UNIDOCS – Who regulates what in Santa Clara County

TABLE 1A

Illegal Connection & Illegal Dumping Incident Types		Definitions (discharges are defined as releases potentially resulting in pollutants entering storm water conveyance systems and/or surface waters.
1	Tracking soil	The movement of soil and other materials from vehicle or heavy machinery operations. Typically occurring at construction sites.
2	Saw cutting slurry discharge	The cutting of asphalt, cement, concrete, etc. that results in a discharge
3	Surface cleaning discharge	The washing of toxic materials such as oil, antifreeze, grease, as well as cleaning chemicals used to clean parking lots, sidewalks, buildings or other surfaces.
4	Vehicle & equipment leaking	The leaking of fluids from automobiles, trucks, heavy machinery and other equipment, including but not limited to: brake fluid, radiator fluid, motor oil, transmission fluid, battery acid, etc. resulting in discharge.
5	Dewatering	Contaminated water from construction areas.
6	Water line breaks	Unplanned release of water from break in water pipes and potential soil erosion.
7	Landscape material dumping	The illegal dumping of landscape materials resulting in a discharge.
8	SWIDs	Storm Water Infiltration Devices
9	Vehicle washing	The washing of vehicles that result in a discharge.
10	Vehicle repair	The illicit discharge of automotive fluids or contaminated water from vehicles associated with activities such as oil changing and/or radiator flushing that result in a discharge.
11	Used oil dumping	The illegal dumping of motor oil resulting in a discharge.
12	Unhardened cement discharge (includes plaster, tile cuttings)	The washing of cement and/or the rinsing of cement mixing and laying equipment resulting in a discharge.
13	Equipment cleaning	The washing of equipment using solvents resulting in a discharge.
14	Dumpster discharge	Dumpster that is exposed to rainwater and/or contains leaks resulting in a discharge.
15	Pools/Spas/Fountain discharge	The release of contaminated pool, spa and/or fountain water resulting in a discharge.
16	Cooling water discharge	The release of contaminated water associated with flushing, leaking or blow down of cooling towers.
17	Accidental spills	Accidental releases of pollutants resulting in a discharge.
18	Abandoned drums discharge	Drums of hazardous or non-hazardous materials dumped and exposed to rainwater or runoff which results in a discharge.
19	Sanitary spill or leak	Accidental release from sanitary sewer system resulting in a discharge.
20	Dumping - hazardous	Improper disposal of hazardous materials.
21	Dumping - non-hazardous	Improper disposal of materials not considered hazardous. Materials include but not limited to: construction materials, animal waste, medical waste and pesticide.
22	Grey water discharge	The release of contaminated water associated with wash water discharge.
23	Carpet cleaning discharge	The dumping of contaminated water collected during the cleaning of carpets resulting in a discharge.
24	Paint discharge	The dumping of paint and/or the washing of painting equipment resulting in a discharge.
25	Food facility oil & grease discharge	Fats, oils or grease released from improperly maintained grease traps resulting in a discharge.
26	RV waste discharge	The dumping of wastes collected in Recreational Vehicles resulting in a discharge.
27	Allowable discharge	Discharges noted in C.15 when proper control measures are implemented (e.g. pumped ground water).
28	Miscellaneous incidents	Any type of discharge not listed above including but not limited to: sediment laden water and animal waste.
29	Illicit connections	Any improperly plumbed facility or parcel plumbed to the storm sewer instead of the sanitary sewer.
30	Complaint not found	Complaint not found.
31	Conditionally Exempt Discharges	Conditionally Exempt Discharge with improper or no BMPs in place.
32	Construction Debris	Improper storage of construction materials.
33	Litter or Debris not contained	trash, pieces of cardboard, vegetative debris, plastic, paper

TEST LIST - HALON 1301 SYSTEMS

JOB NAME: ACTIVISION

LOCATION: 20411 ST. CREER

TYPE OF HAZARD AREA: H&T

ROOM OR AREA VOLUME: 1539 TOTAL LBS OF HALON REQUIRED: 39 REQ 42 ACT.

NUMBER OF EXITS REQUIRED FROM PROTECTED AREA: 1

✓ Check that all agent storage containers are properly located in accordance with an approved set of system drawings.

✓ Check that the containers and mounting brackets are securely fastened in accordance with the Installation Manual.

___ If Halon 122 is designated as the test agent, has it been determined that the containers are, in fact, filled with Halon 122 and that the proper amount of agent (82% of the required amount of Halon 1301) in the containers are filled with this quantity of test gas?

✓ Check that piping joints, discharge nozzles and piping supports are securely fastened to prevent agent leakage and hazardous movement during discharge.

✓ Check detection devices for proper type and location as specified on the system drawings.

✓ Calibrate concentration meter on site prior to test.

N.F.P.A. #12A:

✓ Test each detector for alarm* (1-7.4/1-8.2)

✓ Test each pull station for alarm** (1-7.4)

✓ Remove detector head for trouble alarm (1-8.2/1-8.5)

✓ Disconnect or break firing circuit for trouble alarm (1-8.5)

✓ Disconnect battery supply for trouble alarm (1-8.5)

✓ Doors normally open must close automatically on alarm (2-2.2)

✓ Doors and windows must be weatherstripped (1-6.1.2/1-7.4)

✓ Wall penetrations must be sealed (1-7.4/1-6.1.2)

✓ Ventilation exhaust and supply must shut down on alarm or be dampered (2-2.2)

✓ Electrical equipment must shut down on second alarm (1-8.3)

✓ Check discharge time - 10 seconds or less (1-6.2)

✓ Check proper pipe type (1-10.1.2)

✓ All fittings 300 lb class *** (1-10.2.2)

✓ Check wiring protection (1-8.3.4)

✓ Warning and instruction signs posted at the entrances to the protected area (1-8.5.5)

✓ Permanent nameplate specifying the number, filling weight and pressurization level of the containers (1-9.5.6)

Concentration after 10 minutes 7.6% 6.8% (minimum 5%)

* *If a graphic annunciator panel is in use, check that each annunciated detector signals at the annunciator.*

** *If an abort switch is used, pull station must override abort. If an abort switch is used, it shall be a dead-man type. Latching abort switches must have an audible and visual integral alarm.*

***For 3/4-inch or smaller pipe sizes, 150 lb class fittings are acceptable.*

PLAN REVIEW COMMENTS #482

CODE/SECTION	SHEET	NO.	
		1	The main exit door(s) from the room shall swing in the direction of exit travel due to the hazardous atmosphere created when the Halon system is discharged.
		2	Provisions for prompt ventilation of the room should be made so that the hazardous atmosphere created by the total flooding system can be dissipated. This may be accomplished by providing a ventilation control switch outside of the room.
		3	Automatic fire sprinkler protection shall be maintained in the room.

L Remarks

Local Option

1. Engine 1 responded to a possible hazmat detail.

2. Enroute Engine 1 Captain added Haz Mat 2, Engine 9 and Battalion 2 crews to the call. Engine 1 crew arrived to find a two story business office with nothing showing from the exterior. Engine 1 Captain established "Stevens Creek" Incident Command.

3. Engine 1 crew met with the reporting party who stated that one of his former tenants at [redacted] left the building on bad terms. The reporting party stated that he picked up some envelopes from the Santa Clara address that had been addressed to various addresses around the United States. The reporting party stated that the envelopes were returned for insufficient postage. The reporting party stated that he returned to his office and opened one of the envelopes in the upstairs bathroom at his office. The reporting party stated that the envelope contained a plastic bag with a black, liquid substance inside. Engine 1 crew evacuated the second floor of the building and secured the Heating Ventilation & Air Conditioning system. Battalion 2 assumed Incident Command and assigned Engine 9 crew HazMat Group, Haz Mat 2 crew entry team and Engine 1 crew Decon group and site access control. Santa Clara County Sheriff's Office provided traffic control and assisted Hazmat Group with the notifications.

4. Haz Mat 2 determined that the substance was not hazardous and the building was released back to the tenants. Santa Clara County Sheriff's Office took the evidence into custody.

Site Photographs

1: View of the Site sign.

2: View of the Site sign.

3: View of 20045 Stevens Creek Blvd.

4: View of 20065 Stevens Creek Blvd.

5: View of a typical office space in 20065 Stevens Creek Blvd.

6: View of 20085 Stevens Creek Blvd.

7: View of the parking garage on the first floor at 20085 Sevens Creek Blvd.

8: View of a common kitchen area in 20085 Stevens Creek Blvd.

9: View of a typical office area in 20085 Stevens Creek Blvd.

10: View of 20111 Stevens Creek Blvd.

11: View of the courtyard in 20111 Stevens Creek Blvd.

12: View of the parking lot on the northwestern portion of the Site.

13: View of a typical storm drain inlet.

14: View of a typical elevator mechanical room.

15: View of a typical electrical room.

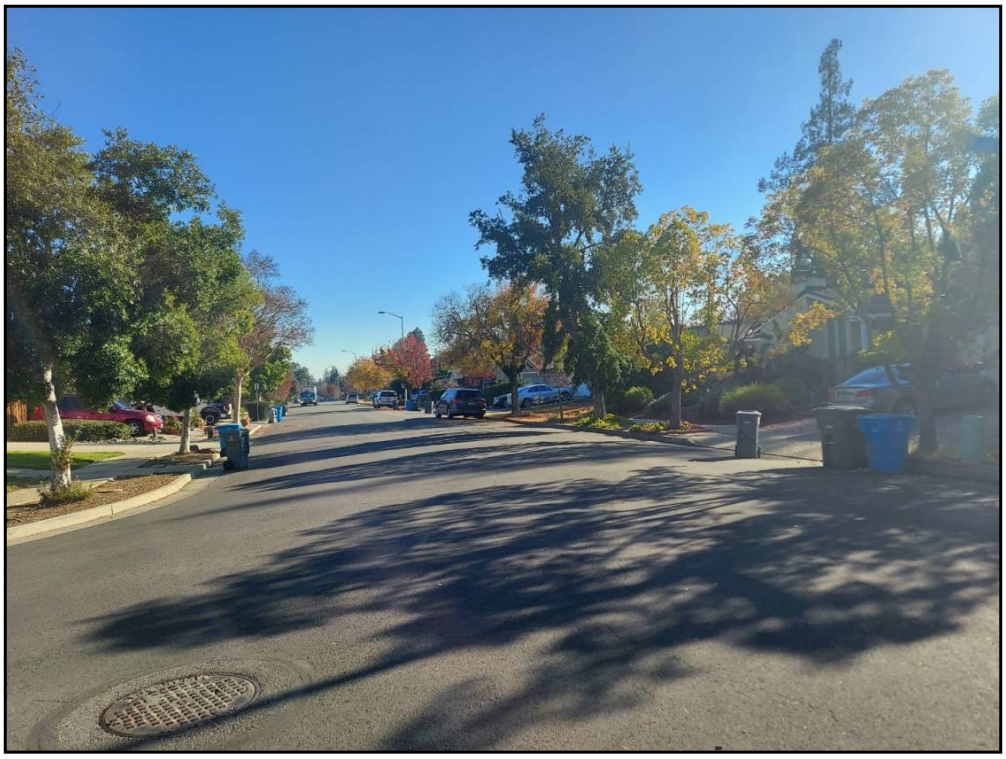

16: View of a typical bathroom.

17: View of a typical stairway.

18: View of a typical pad-mounted transformer.

19: View of the residential development (20064-20104 Wheaton Drive) to the north of the Site.

20: View of 20007 Stevens Creek Blvd (Kabab & Curry's, BeNatural Music) to the east of the Site.

21: View of 20015 Stevens Creek Blvd (Vidyarambh Cupertino-Preschool & Childcare center) to the east of the Site.

22: View of 20021 Stevens Creek Blvd (Paradise Foot Spa) to the east of the Site.

23: View of 20100 Stevens Creek Blvd (Chicago Title Company, Safari Kid - Cupertino) to the south of the Site.

24: View of 20080 Stevens Creek Blvd (Starbird, Rose Tea Lounge, Curry Pizza House, The Counter) to the south of the Site.

25: View of 20128 Stevens Creek Blvd to the south of the Site.

26: View of 20149 Stevens Creek Blvd (Sun Design Center) to the west of the Site.

27: View of a residential house (10080 Randy Ln) to the west of the Site.

28: View down Stevens Creek Boulevard, facing west.

29: View down Stevens Creek Boulevard, facing east.

Appendix G -

Vapor Encroachment Screening Matrix

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (including the site)?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(2) Chemicals of Concern Test: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3) Critical Distance Test*: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☐ Yes ☒ No — (3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)?
(3b) If ***No***, then a VEC cannot be ruled out; check ***Yes*** in #4 below indicating it is likely a VEC exists. If ***Yes***, then:

☐ Yes ☒ No — (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

☐ Yes ☒ No — (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

*If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?

☐ Yes ☒ No — If ***No***, then the VEC screening is complete and no further investigation is recommended at this time. If ***Yes***, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.
