Section 1 | Economic Update

Economic Update

- Market volatility has been heightened by financial stress in the U.S. regional banking sector and the global banking system. Both domestically and abroad, risks were addressed in an expeditious manner by government regulators, providing liquidity and financial support to the banking system. The recent financial stress when combined with getting inflation under control present a major challenge for the Federal Open Market Committee in determining the appropriate path for monetary policy. Labor markets remain strong, and the U.S. consumer has demonstrated resiliency. However, recent financial market stress has resulted in significant changes in market expectations for Fed policy and significantly lower rate levels across the curve.
- As expected at the February 1st meeting, the Federal Open Market Committee (FOMC) raised the fed funds target rate by 25 basis points to a range of 4.50 - 4.75%, in a continuing downshift from previous hikes. The decision was unanimous and the statement reflects inflation is easing “somewhat.” The sentiment was hawkish, indicating that the extent of “ongoing increases” in the fed funds rate will be data dependent. We believe the FOMC will continue to implement tighter monetary policy at a slower pace and hold rates at restrictive levels for some time until inflationary pressures subside and remain in the Fed’s target range.
- In February, the yield curve inversion widened. The 2-year Treasury yield surged 62 basis points to 4.82%, the 5-year Treasury yield increased 57 basis points to 4.18%, and the 10-year Treasury yield rose 41 basis points to 3.92%. The inversion between the 2-year Treasury yield and 10-year Treasury yield increased to -90 basis points at February month-end versus -69 basis points at January month-end. The spread was a positive 39 basis points one year ago. The inversion between 3-month and 10-year treasuries narrowed to -89 basis points in February from -115 basis points in January. The shape of the yield curve indicates that the probability of recession is increasing.

Employment

Source: US Department of Labor

The U.S. economy added 311,000 jobs in February, continuing to surpass market expectations of 225,000, on the heels of a very strong January jobs report of 504,000 jobs. Trends in employment remain strong, with the three-month moving average payrolls at 351,000 and the six-month moving average at 336,000. There were broad gains in employment, led by roles in the private sector with leisure and hospitality employment growth remaining solid. The unemployment rate rose to 3.6% due to more workers entering the labor force as the participation rate increased to 62.5% from 62.4% in January, the highest level since March 2020. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, increased to 6.8% from the prior month at 6.6%. Average hourly earnings rose 4.6% year-over-year in February from a 4.4% increase in January. Job Openings decreased to 10.8 million. Overall, the February employment report demonstrates a strong demand for labor and supports the case for the Fed to continue raising the federal funds rate at a slower pace.

Inflation

Consumer Price Index (CPI)

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

The Consumer Price Index (CPI) increased in February 0.4% month-over-month and 6.0% year-over-year, down from 6.4% in January. The Core CPI, which excludes volatile food and energy components, rose 0.5% month-over-month and 5.5% year-over-year, decelerating from 5.6% in January. Shelter costs were the primary factor in the headline CPI representing 70% of the increase. Of note, used car prices experienced a significant drop of 13.6% when compared to a year ago, the largest decline since 1960. The Personal Consumption Expenditures (PCE) index accelerated more than expected in January, increasing 5.4% year-over-year versus an upwardly revised 5.3% year-over-year gain in December. Core PCE increased 4.7% in January versus an upwardly revised 4.6% year-over-year gain in December. Inflationary trends are declining but remain well above the Fed's 2% target.

Federal Reserve

As expected at the February 1st meeting, the Federal Open Market Committee (FOMC) raised the fed funds target rate by 25 basis points to a range of 4.50 – 4.75%, in a continuing downshift from previous hikes. The decision was unanimous, and the statement reflects inflation easing “somewhat”. The sentiment was hawkish, indicating that the extent of “ongoing increases” in the fed funds rate will be data dependent on labor market conditions, inflation expectations, and financial and international developments. The December Summary of Economic Projections indicated a peak median forecast of 5.1% in 2023 and no rate cuts until 2024; however, the market consensus diverged, implying rate cuts in the second half of 2023. FOMC members forecasted a higher fed funds rate, slower GDP growth, higher inflation, and higher unemployment in 2023 than in the September projections. We believe the FOMC will implement tighter monetary policy at a slower pace and hold rates at restrictive levels until inflationary pressures subside and remain in the Fed’s target range for some time.

Bond Yields

Source: Bloomberg

At the end of February, the 2-year Treasury yield was 339 basis points higher, and the 10-Year Treasury yield was about 210 basis points higher, year-over-year. The inversion between the 2-year Treasury yield and 10-year Treasury yield increased to -90 basis points at February month-end versus -69 basis points at January month-end. The average historical spread (since 2003) is about +130 basis points. The inversion between 3-month and 10-year treasuries narrowed to -89 basis points in February from -115 basis points in January. The shape of the yield curve indicates that the probability of recession is increasing.

Important Disclosures

As of February 28, 2023

2023 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

ICE BofA 1-5 Yr US Treasury & Agency Index

The ICE BofA 1-5 Year US Treasury & Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for sovereigns and \$250 million for agencies.
