Phase I Environmental Site Assessment

REPORT DATE: January 10, 2024

PROPERTY INFORMATION:
10857, 10867, 10877 and 10887 Linda Vista Drive
Cupertino, Santa Clara County, California 95014

PROJECT INFORMATION:
AEI Project No. 482220
Site Assessment Date: August 23, 2023 and January 5, 2024

PREPARED FOR:
Roy Evulich and Angela Evulich
Co-Trustees of The Evulich Living Trust dated 7-8-1980, as amended
13616 Surrey Lane
Saratoga, California 95070

Barris J Evulich and Sondrea Evulich
Co-Trustees of The Evulich 2000 Family UTD Trust dated October 3, 2000, as amended
2451 Fairway Village Drive
Park City, Utah 84060

PREPARED BY:
AEI Consultants - Corporate Headquarters
2500 Camino Diablo
Walnut Creek, California 94597

Roy Evulich and Angela Evulich
Co-Trustees of The Evulich Living Trust dated 7-8-1980, as amended
13616 Surrey Ln., Saratoga, CA 95070
Barris J Evulich and Sondrea Evulich
Co-Trustees of The Evulich 2000 Family UTD Trust dated October 3, 2000, as amended
2451 Fairway Village Dr., Park City, UT 84060

Subject: Phase I Environmental Site Assessment
10857, 10867, 10877 and 10887 Linda Vista Drive
Cupertino, California 95014
AEI Project No. 482220

Ladies and Gentlemen:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6028 or jasmith@aeiconsultants.com.

Sincerely,

Jeremy Smith
Senior Project Manager
AEI Consultants

PROJECT SUMMARY

10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California 95014
AEI Project No. 482220

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Roy Evulich and Angela Evulich, Co-Trustees of The Evulich Living Trust dated 7-8-1980, as amended, and Barris J Evulich and Sondrea Evulich, Co-Trustees of The Evulich 2000 Family UTD Trust dated October 3, 2000, as amended, to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California 95014
Property ID (APN or Block/Lot)	356-06-001, -002, -003 and -004
Location	West side of Linda Vista Drive
Property Type	Residential
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	3.0 acres of land consisting of an unimproved cul-de-sac and four individual parcels totaling approximately 2.54 acres/Assessor
Number of Buildings	Four
Building Construction Date(s)/Source	1954 (10857 Linda Vista Drive), 1957 (10867 Linda Vista Drive), circa-1968 (10887 Linda Vista Drive), circa-1970s (10877 Linda Vista Drive)/Assessor data and/or aerial photographs
Building Square Footage (SF)/Source	4,911 SF/Assessor
Number of Floors/Stories	Single-story
Basement or Subgrade Area(s)	None identified
Number of Units	Four
Additional Improvements	Paved parking areas, associated landscaping, and two detached garages
On-site Occupant(s)	Private residents
Current On-site Operations/Use	Residential activities
Current Use of Hazardous Substances and/or Petroleum Products	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	EDR HIST AUTO, SWEEPS UST, CA FID UST, HIST UST; refer to Section 5.1

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use	Data failure; refer to Section 1.6.1
1939-1950	Orchards	Aerial photographs, historical topographic maps
1954	10857 Linda Vista Drive residence constructed	Aerial photographs, agency records

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1956-1963	Residential buildings developed on the north portion of the property and orchards (10857 and 10867 Linda Vista Drive) • 1957: 10867 Linda Vista Drive residence constructed	Aerial photographs, historical topographic maps
1968	10887 Linda Vista Drive residence constructed	Aerial photographs, historical topographic maps
1974-Present	Additional residential structure developed on the west portion of the subject property • 1970s: 10877 Linda Vista Drive residence constructed	Aerial photographs, city directories, historical topographic maps, agency records, interview, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Cupertino Hills Swim & Racquet (22090 Rae Lane); Residences (10847 Linda Vista Drive)	None identified
East	Linda Vista Drive followed by: Residences (10846-10896 Linda Vista Drive)	None identified
South	Residences (10915 Linda Vista Drive, 22063-22093 Baxley Court)	None identified
West	Stevens Creek Trail (APN: 356-05-005)	None identified

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- According to the Property Owner, the subject property is equipped with two 560-gallon USTs, constructed of steel, which were installed in 1972. According to information presented in the regulatory database report, the subject property is/was equipped with at least two, and potentially as many as four, 550-gallon USTs, containing regular leaded and unleaded gasoline, which were installed in 1972, and potentially 1982. Based on the lack of information regarding historical sampling or formal closure activities relating to the two known USTs, as well as the potential for up to two additional USTs, and the historical agricultural use of the subject property, AEI completed a limited subsurface investigation at the subject property in September 2023. Investigation efforts included performing a geophysical survey and advancing eleven soil borings at the site to collect soil samples. The geophysical survey was performed to evaluate if additional USTs (beyond the two known USTs) may be present, four deeper soil borings were advanced to assess soil conditions adjacent to the two known USTs, and seven shallow soil borings were advanced across the site to evaluate shallow soils in connection with historical agricultural use. The geophysical survey identified evidence of two potential existing USTs at the site, one in the northwest portion and one in the east portion, which correlate with the locations of the two known USTs identified at the site by property management during the Phase I ESA. No evidence of additional USTs was identified at the subject property. Therefore, the historical reference to additional USTs is considered to be incorrect. For the soil samples from borings advanced adjacent to the USTs, TPH was either not detected above laboratory limits or was detected at concentrations below the Tier I Environmental Screening Levels (ESLs). VOCs were not detected above laboratory limits in the samples from the soil borings. Based on this data it does not appear that a significant release has occurred from the historical USTs at the subject property. For the shallow soil samples from borings across the site, arsenic and lead were not detected above the known background levels (arsenic) or applicable Tier I ESL, indicating that lead arsenate does not appear to be a significant concern. In addition, organochlorine pesticides (OCPs) were either not detected above laboratory limits or were detected well below the Residential Direct Exposure ESLs. Therefore, significant residual pesticides were not identified in the areas sampled from the historical

agricultural use at the site. Based on the results summarized above, no additional investigation is recommended for the subject property; however, it is recommended that the two on-site abandoned USTs be formally closed/removed from the property. AEI's October 2023 *Limited Phase II Subsurface Investigation Report* is provided under separate cover.

- Numerous suspected petroleum and/or hazardous substance containers and drums were observed in a storage area located on the west portion of the subject property during AEI's January 5, 2024 return site reconnaissance. These materials and containers had not been identified during the initial August 2023 site reconnaissance due to the presence of dense vegetation and overgrowth. Based on the lack of observed spills, staining or evidence of materials mismanagement, these containers are not expected to represent a significant environmental concern. However, as a best management practice, these containers and drums should be removed from the subject property and properly disposed of off-site.
- According to the Property Owner, demolition of the subject property buildings is planned for the future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/ renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- A search of historical city directories was not conducted for the adjoining sites to the south and west (22063-22093 Baxley Court, and APN: 356-05-005). However, based on a review of other available historical sources, these sites appear to have historically been developed for residential and agricultural use. Therefore, this limiting condition is not expected to alter the findings of this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- AEI was not granted access to the interiors of the on-site residential buildings during the site reconnaissance. Features may be present that were not observed by AEI. However, based on the residential nature of use, this limitation is not expected to significantly alter the findings of this assessment.
- Following the initial inspection, and the subsequent removal of dense vegetation in the west portion of the subject property, drums, containers and other items were subsequently identified in the exterior storage area which were not previously identified during AEI's August 23, 2023 site reconnaissance due to the former present of the vegetation and overgrowth which has since been removed. As such, AEI staff returned to the site on January 5, 2024 to further evaluate this area and associated features.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was an aerial photographs from 1939, indicating that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

This investigation was prepared for the sole use and benefit of Roy Evulich and Angela Evulich Co-Trustees of The Evulich Living Trust dated 7-8-1980, as amended, Barris J Evulich and Sondrea Evulich, Co-Trustees of The Evulich 2000 Family UTD Trust dated October 3, 2000, as amended, and Seubert Frimel & Warner LLP (the "Designated Recipients"). Such investigation results, both verbal and written, whether in draft or final, are for the benefit of the Designated Recipients and specified third parties, if any, who are named in a reliance letter executed by AEI Consultants. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI or reliance letter executed by AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal, Standard Terms & Conditions, and Addendum (collectively, the "Services Agreement") executed by AEI Consultants and the Designated Recipients. The limitation of liability defined in the Service Agreement is the aggregate limit of AEI Consultant's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

PROPERTY INFORMATION	
Site Address(es)	10857, 10867, 10877 and 10887 Linda Vista Drive, Cupertino, Santa Clara County, California 95014
Property ID (APN or Block/Lot)	356-06-001, -002, -003 and -004
Location	West side of Linda Vista Drive
Property Type	Residential
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	3.0 acres of land consisting of an unimproved cul-de-sac and four individual parcels totaling approximately 2.54 acres/Assessor
Number of Buildings	Four
Building Construction Date(s)/Source	1954 (10857 Linda Vista Drive), 1957 (10867 Linda Vista Drive), circa-1968 (10887 Linda Vista Drive), circa-1970s (10877 Linda Vista Drive)/Assessor data and/or aerial photographs
Building Square Footage (SF)/Source	4,911 SF/Assessor
Number of Floors/Stories	Single-story
Basement or Subgrade Area(s)	None identified
Number of Units	Four
Additional Improvements	Paved parking areas, associated landscaping, and two detached garages
On-site Occupant(s)	Private residents
Current On-site Operations/Use	Residential activities
Current Use of Hazardous Substances and/or Petroleum Products	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	EDR HIST AUTO, SWEEPS UST, CA FID UST, HIST UST; refer to Section 5.1

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	N/A
Potable Water	City of Cupertino
Sewage Disposal/Treatment	City of Cupertino

Utility source/system information listed in the table above is provided by Roy & Barris Evulich, property owners

2.3 Site and Vicinity Characteristics

The subject property is located in a primarily residential area of Cupertino, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Cupertino Hills Swim & Racquet (22090 Rae Lane); Residences (10847 Linda Vista Drive)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	Linda Vista Drive followed by: Residences (10846-10896 Linda Vista Drive)	None identified
South	Residences (10915 Linda Vista Drive, 22063-22093 Baxley Court)	None identified
West	Stevens Creek Trail (APN: 356-05-005)	None identified

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Q: Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast or desert playas/ USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land: this designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/ USDA Soil Survey
Groundwater Flow Direction/Source	West-northwest, toward Stevens Creek/ Topographic map interpretation
Estimated Depth to Groundwater/Source	25-30 feet bgs/Case Closure Summary for the San Leandro Avenue APN # 357-05-074 site (approximately 0.5 miles northwest of the subject property) obtained from the GeoTracker website
Surface waters on the subject property or adjoining sites	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use	Data failure; refer to Section 1.6.1
1939-1950	Orchards	Aerial photographs, historical topographic maps
1954	10857 Linda Vista Drive residence constructed	Aerial photographs, agency records
1956-1963	Residential buildings developed on the north portion of the property and orchards (10857 and 10867 Linda Vista Drive) • 1957: 10867 Linda Vista Drive residence constructed	Aerial photographs, historical topographic maps
1968	10887 Linda Vista Drive residence constructed	Aerial photographs, historical topographic maps
1974-Present	Additional residential structure developed on the west portion of the subject property • 1970s: 10877 Linda Vista Drive residence constructed	Aerial photographs, city directories, historical topographic maps, agency records, interview, site observation

Based on a review of aerial photographs, the subject property was historically used for agricultural purposes.

According to the Property Owner, the subject property is equipped with two 560-gallon USTs, constructed of steel, which were installed in 1972. According to information presented in the regulatory database report, the subject property is/was equipped with at least two, and potentially as many as four, 550-gallon USTs, containing regular leaded and unleaded gasoline, which were installed in 1972, and potentially 1982. Four unique State Water Resources Control Board (SWRCB) Tank ID numbers are identified within the SWEEPS UST database listing. The HIST UST listing and SWEEPS UST listings both identify the total number of tanks present at the site as four; however, it is unclear whether this is accurate or may have been the result of an administrative error, as property ownership was only aware of two USTs at the site.

Based on the lack of information regarding historical sampling or formal closure activities relating to the two known USTs, as well as the potential for up to two additional USTs, and the historical agricultural use of the subject property, AEI completed a limited subsurface investigation activities at the subject property in September 2023. Investigation efforts included performing a geophysical survey and advancing eleven soil borings at the site to collect soil samples. The geophysical survey was performed to evaluate if additional USTs

(beyond the two known USTs) may be present, four deeper soil borings were advanced to assess soil conditions adjacent to the two known USTs, and seven shallow soil borings were advanced across the site to evaluate shallow soils in connection with historical agricultural use.

On September 14, 2023, a geophysical survey was conducted by Foresite Engineering Surveys. The geophysical survey was conducted across the Site, in the area of the two known USTs and at other accessible areas of the Site. The purpose of the survey was to evaluate the potential presence of USTs and/or associated piping. The geophysical survey was conducted using ground penetrating radar (GPR) and reflective induction (RI). During geophysical scanning, evidence of two existing USTs on the Site was confirmed at the areas shown on Figure 2, which correlates with the location of the two known tanks identified by property management and observed by AEI. No evidence of additional USTs was identified in the areas scanned; therefore, AEI anticipates that only two USTs, not four, are present at the subject property.

On September 19, 2023, under the direct supervision of AEI, 11 exploratory soil borings were advanced at the site by ECA Inc. Groundwater was not encountered during drilling activities at the 11 borings. Eight soil samples were collected for analysis for volatile organic compounds (VOCs) and TPH from locations around the USTs. Seven soil samples from shallow borings were collected and analyzed for arsenic, lead and organochlorine pesticides (OCPs).

TPH as gasoline (TPH-g) was not detected at concentrations above the respective laboratory reporting limits (RLs) in the eight soil samples analyzed. TPH as diesel (TPH-D) was detected in each of the eight samples, however the detections were considered insignificant as they were well below the Tier I ESL of 260 mg/kg. TPH as motor oil (TPH-mo) was detected in one soil sample at a concentration of 7.12 mg/kg which is well below the Tier I ESL of 1,600 mg/kg. VOCs, including benzene, toluene, ethylbenzene, and xylenes (BTEX), were not detected above the laboratory reporting limit (RL) in the soil samples collected and analyzed.

Arsenic was detected in each of the seven shallow soil samples collected and analyzed, observed at a maximum concentration of 3.55 mg/kg, however the identified levels are not considered significant as they are below the generally accepted background soil concentration of 11 mg/kg for arsenic. Lead was detected in each of the seven soil shallow samples collected and analyzed, observed at a maximum concentration of 10.5 mg/kg, however the concentrations are not considered significant as they are below the Tier I ESL of 32 mg/kg, and well below the Residential Direct Exposure ESL of 80 mg/kg. OCP compounds p,p-DDE and p,p-DDT were detected above laboratory RLs in three of the seven shallow soil samples, at maximum concentrations of 0.0278 mg/kg and 0.0107 mg/kg, respectively, however the detected concentrations are well below the Residential Direct Exposure ESL values of 1.8 mg/kg (p,p-DDE) and 1.9 mg/kg (p,p-DDT). OCP compounds p,p-DDD and dieldrin were additionally detected above laboratory MDLs in one shallow soil sample, at maximum concentrations of 0.00240 J mg/kg and 0.00129 J mg/kg, respectively, well below the Residential Direct Exposure ESLs of 1.8 mg/kg and 0.037 mg/kg, respectively.

Based on the results summarized above, no additional investigation is recommended for the subject property; however, it is recommended that the two on-site abandoned USTs be formally closed/removed from the site. AEI's October 2023 *Limited Phase II Subsurface Investigation Report* is provided under separate cover.

If available, copies of historical sources are provided in Appendix D.

3.1 Aerial Photographs

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020, non-inlcusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	Orchards	NORTH: Orchards EAST: Orchards SOUTH: Orchards WEST: Road
1948, 1950	No significant changes	NORTH: No significant changes EAST: Road followed by orchards SOUTH: No significant changes WEST: No significant changes
1956	Residential buildings developed on the northern portion of the property and orchards	NORTH: No significant changes EAST: No significant changes SOUTH: Orchards and residential building WEST: No significant changes
1963	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes except additional small residential structures developed WEST: No significant changes
1968	Additional residential structure developed on the southwest portion of the subject property	No significant changes
1974	Additional residential structure developed on the west portion of the subject property	NORTH: Portion of Cupertino Hills Swim & Racquet developed and an existing residential building EAST: Existing residential buildings SOUTH: No significant changes WEST: No significant changes
1991, 1998, 2006, 2009, 2012, 2020	No significant changes	NORTH: Existing Cupertino Hills Swim & Racquet developed and existing residential building EAST: No significant changes SOUTH: Existing residential buildings WEST: No significant changes

Subject property:

- Historical agricultural use - Refer to Section 3.0

Adjoining Site(s):

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1968-2020. The first listing for the subject property appeared in 1976. The following table summarizes the results of the city directory search for the subject property:

Subject Property

Year(s)	Address - Occupant Listed
1976	10857 Linda Vista Drive - private residence
1981	10857 Linda Vista Drive - XXXX 10887 Linda Vista Drive - private residence
1985	10857 Linda Vista Drive - XXXX 10867 Linda Vista Drive - private residence 10887 Linda Vista Drive - private residence
1992	10867 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence 10887 Linda Vista Drive - private residence
1995	10857 Linda Vista Drive - private residence 10867 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence 10887 Linda Vista Drive - private residence
2000	10857 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence
2005	10857 Linda Vista Drive - private residence 10867 Linda Vista Drive - private residence, Vinculum International
2010	10857 Linda Vista Drive - private residence 10867 Linda Vista Drive - occupant unknown 10877 Linda Vista Drive - private residence 10887 Linda Vista Drive - private residence
2014	10857 Linda Vista Drive - occupant unknown 10867 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence 10887 Linda Vista Drive - occupant unknown
2017	10857 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence 10887 Linda Vista Drive - private residence
2020	10857 Linda Vista Drive - private residence 10877 Linda Vista Drive - private residence

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

No potential environmental concerns were identified during the city directory review.

3.4 Historical Topographic Maps

AEI reviewed historical topographic maps of the subject property and surrounding area. A search was made of the EDR collection of topographic maps. Historical topographic maps were reviewed for the following years 1897-2018, non-inclusive:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1897, 1899, 1902, 1943, 1947	No features depicted	No features depicted
1948	Orchards	NORTH: Orchards EAST: Road followed by orchards SOUTH: Orchards WEST: Road depicted
1953	Orchards and small structures depicted, assumed to be residential	No significant changes
1961, 1968	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Orchards and structures depicted WEST: No significant changes
1973	Orchards and shaded urban development	NORTH: Orchards and shaded urban development EAST: Road and shaded urban development SOUTH: Orchards, structures, and shaded urban development WEST: No significant changes
1980	Structures and shaded urban development	NORTH: Partial shaded urban development EAST: No significant changes SOUTH: Structures and shaded urban development WEST: No significant changes
1995	Structures depicted	NORTH: Partial shaded urban development and a structure EAST: No significant changes SOUTH: Shaded urban development WEST: No features depicted
2012, 2015, 2018	No features depicted	NORTH: No features depicted EAST: Road depicted SOUTH: No features depicted WEST: Road depicted

Subject property:

- Historical agricultural use - Refer to Section 3.0

Adjoining Site(s):

- No potential environmental concerns identified

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	August 15, 2023	Online	Angelica Bryan	No records on file

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Cupertino Fire Department (CFD)	August 15, 2023	Online	Kirsten Squarcia	No records on file

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Cupertino Building Division (CBD)	August 15, 2023	Online	Kirsten Squarcia	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
10857 Linda Vista Drive		
2021	Evulich Roy A and Angela Trustee & Et Al	Building permit to repair roof eave from fallen tree; replace barge rafter; sheeting, and composition roofing - no structural damage
10867 Linda Vista Drive		
2007	Roy Evulich	Permit to install new sewer line. Abandon existing septic system and connect to sanitary sewer.
2020	Roy Evulich	Reroof tear-off policy
2021	Roy Evulich	Replacing hot and cold water lines with PEX- A. Also replacing the main water line with Copper L.
10887 Linda Vista Drive		
2018	Roy Evulich	Permit to reroof, tear off, install OSD

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the CBD.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Cupertino Planning Division (CPD)	August 15, 2023	Online	Kirsten Squarcia	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	August 15, 2023	Online	N/A	Information obtained is discussed below

Records Summary

APN	356-06-001, -002, -003 and -004
Acreage	3.0 acres of land consisting of an unimproved cul-de-sac and four individual parcels totaling approximately 2.54 acres.
Construction Date	1954 (10857 Linda Vista Drive), 1957 (10867 Linda Vista Drive), 1952 (10877 Linda Vista Drive), 1947 (10887 Linda Vista Drive)
Building Square Footage	4,911 square feet
Current Owner	Not provided
Additional Information	Dates of construction as provided by Assessor do not appear to be correct per historical aerial photographs reviewed, which do not depict the 10887 residence until 1968, and do not depict the 10877 residence until the 1970s.

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	August 15, 2023	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	August 15, 2023	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	August 15, 2023	Online	N/A	No records on file
CA DTSC EnviroStor	August 15, 2023	Online	N/A	No records on file
CalEPA Regulated Site Portal	August 15, 2023	Online	N/A	No records on file
Bay Area Air Quality Management District (AQMD)	August 15, 2023	Online	Rochele Henderson, Public Records Officer	No records on file
Valley Water Information	August 15, 2023	Online	N/A	No records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	August 15, 2023	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	August 15, 2023	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR sites	SP/ADJ			
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State/tribal "Superfund" equivalent sites	1.0			
State/tribal hazardous waste facilities	0.5			
State/tribal landfill and solid waste disposal facilities	0.5			
State/tribal leaking storage tanks	0.5			
State/tribal registered storage tanks	SP/ADJ			
State/tribal voluntary cleanup sites	0.5			

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/tribal IC/EC registries	SP			
State/tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ	✔		

Facility Name	Vinculum International, Joseph Evulich
Address	10867 Linda Vista Drive
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	EDR HIST AUTO, SWEEPS UST, CA FID UST, HIST UST
Comments	The EDR HIST AUTO database lists "Vinculum International" automotive transmission repair shops, at the subject property in 2002-2008. The EDR HIST AUTO database does not report a release, but rather identifies businesses, based on name, that may have been associated with automotive activities. Since the subject property was developed with the current residential building at 10867 Linda Vista Drive in 1957, this listing appears associated with a tenant's home-based or off-site business. Furthermore, no historical auto businesses were reported or are known to have occurred at the subject property. In addition, no auto related facilities were identified on the subject property during city directory research or regulatory agency research. Based on this information, this listing is not expected to represent a significant environmental concern. According to the Property Owner, the subject property is equipped with two 560-gallon USTs, constructed of steel, which were installed in 1972. According to information presented in the regulatory database report, the subject property is/was equipped with at least two, and potentially as many as four, 550-gallon USTs, containing regular leaded and unleaded gasoline, which were installed in 1972, and potentially 1982. Four unique State Water Resources Control Board (SWRCB) Tank ID numbers are identified within the SWEEPS UST database listing. The HIST UST listing and SWEEPS UST listings both identify the total number of tanks present at the site as four; however, it is unclear whether this is accurate or may have been the result of an administrative error, as property ownership was only aware of two USTs at the site. Refer to Section 3.0 for further discussion.

5.2 Vapor Migration

A vapor encroachment condition (VEC) is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

AEI conducted a limited screening for potential VECs that may affect the subject property. The VEC screening focused on the current and historical usage of the subject property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons.

Determination of AOC

To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by the current ASTM E2600 of 1,760 feet (1/3 mile) from the subject property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology:

Non-petroleum hydrocarbon COCs:

- 1,760 feet in the upgradient direction
- 365 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if Light, Non-Aqueous Phase Liquid, (LNAPL, i.e. floating product) is suspected:

- 528 feet in the upgradient direction
- 165 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if LNAPL is *not* suspected:

- 528 feet in the upgradient direction
- 95 feet in the cross-gradient direction
- 30 feet in the downgradient position

Additional adjustment of the AOC may be conducted based on AEI's professional judgment.

Conclusions

AEI did not identify evidence of a VEC.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Roy & Barris Evulich	August 15, 2023	In Person	1962	Interviewed; see Interview Summary table below
Key Site Manager	Roy Evulich	August 15, 2023	In Person	1962	Owner is acting Key Site Manager; see Interview Summary table below

INTERVIEW SUMMARY

Question	Owner (Representative)/Key Site Manager Response/Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	Yes, the subject property is equipped with two (2) 560-gallon gasoline USTs; see Sections 3.0 and 7.1
Do you have any knowledge of previous environmental investigations conducted on site?	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No
Are you aware of any known plans for site redevelopment or change in site use?	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the	Information not provided

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien and AUL Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	August 23, 2023 and January 5, 2024
AEI Site Assessor(s)	Nanako Oba-Vano
Property Escort(s)/ Relationship(s) to Property	Roy Evulich/ Owner
Units/Areas Observed	All exterior grounds
Area(s) not accessed and reason(s)	Interior of residential buildings Refer to Section 1.5 for discussion of limiting condition(s)
Other Physical Constraints	• Dense vegetation in some areas which was removed subsequent to the initial August 23, 2023 site reconnaissance Refer to the notes below and to Section 1.5 discussion of limiting conditions
General Observations	The property includes four residential buildings, two detached garages, and a storage area located on the west portion of the subject property
Additional Notes	Following the initial inspection, and the subsequent removal of dense vegetation in the west portion of the subject property, drums, containers and other items were subsequently identified in the exterior storage area which were not previously identified during AEI's August 23, 2023 site reconnaissance due to the former present of the vegetation and overgrowth which has since been removed. As such, AEI staff returned to the site on January 5, 2024 to further evaluate this area and associated features.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔	
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers	✔	
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other	✔	

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

AST(s)

Size (gallons)	Contents	Installation Date	AST Condition	Location	Construction/ Secondary Containment	Product Piping	Staining/ Spills
300	Diesel	Between late 1960s and early 1970s	Good	Northwest portion of the subject property	Single-walled	Aboveground	None

One 300-gallon diesel AST was observed on site. The AST was observed to be in good condition, but with no secondary containment measures in place. Mr. Roy Evulich stated there have been no releases or problems with the AST. No stains, drains or damage to the concrete was observed in the vicinity of the AST. Based on the good condition of the equipment and the absence of staining, the presence of this AST is not expected to represent a significant environmental concern.

UST(s)

	UST #1	UST #2
Tank Capacity (Gallons)	560	560
Tank Contents	Gasoline	Gasoline
Tank Installation Date	1972	1972

Piping Release Detection Method	None	None
Date of Last UST Test	Unknown	Unknown
Test Results Passed	Unknown	Unknown
Permitting Agency	Unknown	Unknown

	UST #1	UST #2
Permit/ Registration Confirmed	Unknown	Unknown
Permit Expiration Date	Unknown	Unknown
UST Testing Requirements	Unknown	Unknown
Additional Information	N/A	N/A

According to the Property Owner, the subject property is equipped with two 560-gallon USTs, constructed of steel, which were installed in 1972. According to information presented in the regulatory database report, the subject property is/was equipped with at least two, and potentially as many as four, 550-gallon USTs, containing regular leaded and unleaded gasoline, which were installed in 1972, and potentially 1982. Four unique State Water Resources Control Board (SWRCB) Tank ID numbers are identified within the SWEEPS UST database listing. The HIST UST listing and SWEEPS UST listings both identify the total number of tanks present at the site as four; however, it is unclear whether this is accurate or may have been the result of an administrative error, as property ownership was only aware of two USTs at the site. Refer to Section 3.0 for further detailed discussion.

7.1.2 Unidentified Substance Containers

Numerous suspected petroleum and/or hazardous substance containers and drums were observed in a storage area located on the west portion of the subject property during AEI's January 5, 2024 return site reconnaissance. These materials and containers had not been identified during the initial August 2023 site reconnaissance due to the presence of dense vegetation and overgrowth. Based on the lack of observed spills, staining or evidence of materials mismanagement, these containers are not expected to represent a significant environmental concern. However, as a best management practice, these containers and drums should be removed from the subject property and properly disposed of off-site.

7.1.3 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/ No)	Non-PCB Label (Yes/ No)
Pole-Mounted	Two	Pacific Gas and Electric Company (PG&E)	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.1.4 Other

Small quantities of maintenance products, such as paint cans and buckets, were observed in the storage area located on the west portion of subject property. No signs of spills or leaks were observed in conjunction with the containers. No significant staining or evidence of release of any of the materials was observed during the site reconnaissance. Based on the relatively small quantities observed and the lack of evidence of the mismanagement of these materials, the use of these materials on site is not expected to represent a significant environmental concern.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.

Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the Property Owner, demolition of the subject property buildings is planned for the future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 93 tests were conducted for radon levels in the subject property zip code (95014) in 2016. 89 of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 Suspect Mold or Microbial Growth Conditions

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

AEI did not observe interior areas of the subject property buildings. Based on absence of mechanical ventilation for an extended period of time, the interior finishes may have been impacted by condensation and ensuing mold.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

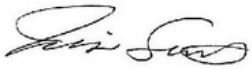

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is

1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PRIVATE RESIDENCE (Continued) **S110655376**

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: Orchard present onsite since 1939. The current residence was constructed in 1950 and since that time has been used only for residential purposes. City of Cupertino required shallow soil sampling due to historical agriculture onsite. Pesticides were reported to be present up to 8.3 ppm, but were not reported to exceed CHHSLs. Lead was reported to be present up to 390 ppm. Proposing to excavate areas of high lead concentrations.

BLACKBERRY FARM PLAY AREA (Continued) **S109424762**

Confirmed COC: 30 023 300 133 000 700 000
Potential Description: SOIL
Alias Name: Captain Stevens Play Area
Alias Type: Alternate Name
Alias Name: 60001205
Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/10/2009
Comments: Soil samples were collected from within the footprint of a proposed play area and analyzed for organochlorine pesticides and metals because of the possible historical use of a nearby parcel for agricultural use. There were some exceedances of human health risk-based screening levels for lead and toxaphene. In May 2009, approximately 72 cubic yards of soil was excavated to address the locations where there were exceedances of screeening levels and the excavated soil was disposed at a permitted, off-site Class II landfill. The Soil Removal Completion Report presents the results of soil sampling and documents the soil removal. DTSC issued a no further action letter to the City of Cupertino based on the information presented in the Report and determined that the proposed play area has been made suitable for unrestricted use.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023
Date Data Arrived at EDR: 07/06/2023
Date Made Active in Reports: 07/24/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools

Elevation:	381 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640178 CUPERTINO, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

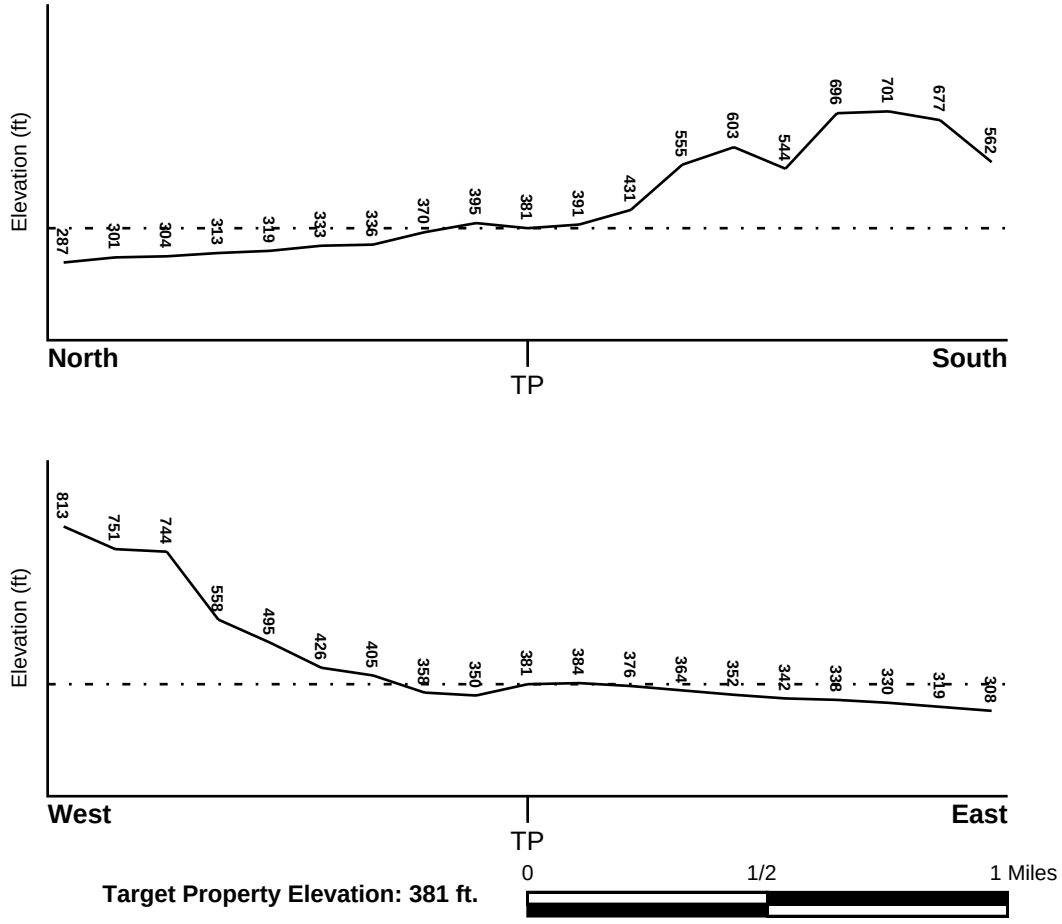

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0216H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0204H	FEMA FIRM Flood data
06085C0208H	FEMA FIRM Flood data
06085C0212H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Pliocene
Code:	Tpc *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: gravelly - loam
clay

Surficial Soil Types: gravelly - loam
clay

Shallow Soil Types: clay loam
clay

Deeper Soil Types: unweathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Cupertino, CA 95014	Walnut Creek, CA 94597
EDR Inquiry # 7416954.4	Contact: Dania Ledezma

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 342379

Project: 482220

Coordinates:

Latitude:	37.310439 37° 18' 38" North
Longitude:	-122.060638 -122° 3' 38" West
UTM Zone:	Zone 10 North
UTM X Meters:	583240.72
UTM Y Meters:	4129724.91
Elevation:	380.23' above sea level

Request

Hello. We are working on a Phase I Environmental Site for a properties at 10857, 10867, 10877, and 10887 Linda Vista Drive, Cupertino, CA 95104 (APN: 356-06-001, 356-06-002, 356-06-003, 356-06-004). I am looking to obtain all existing electronic copies of records related to hazardous materials, aboveground storage tanks, underground storage tanks, and hazardous waste spills on file for this property.

Timeline Documents

Request Closed

Public

Good afternoon,

Thank you for your recent record request received on 08/15/23 for the following address in CUPERTINO:

10857, 10867, 10877, and 10887 Linda Vista Drive, Cupertino, CA 95104

(APN: 356-06-001, 356-06-002, 356-06-003, 356-06-004)

Unfortunately, we have no records for this location. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

Request

Hello. We are working on a Phase I Environmental Site Assessment for properties at 10857, 10867, 10877, and 10887 Linda Vista Drive, Cupertino, CA 95104 (APN: 356-06-001, 356-06-002, 356-06-003, 356-06-004). As part of the assessment, we are looking for all existing records related to fire inspections, hazardous materials, aboveground storage tanks, underground storage tanks, building records, and records related to Activity Use Limitations (AULs: any restriction on future development because of environmental contamination) or zoning violations if there are any. Thank you.

COMPANY NAME Roof Roofing Inc	E-MAIL admin@roofroofingsanjose.com		FAX 408-622-8105
STREET ADDRESS 5577 Vassar Dr	CITY, STATE, ZIP Sanjose, CA 95118		PHONE 408-265-9270

I UNDERSTAND AND AGREE TO THE FOLLOWING:

1. The re-roof project shall comply with all applicable provisions of the 2016 California Codes.
2. An inspection request can be scheduled **up to one business day before the requested inspection date**. Please schedule inspections online or call (408) 777-3228 from 7:30-3:30pm (Mon-Thurs) or 7:30-2:30pm (Friday) to schedule inspection. For Tear-Off and Nailing Inspections, you must also call on the day of the inspection **only after that phase of the work is completed**. The building inspector will be available within one hour. The hours for this service are: **7:30-10:30am and 12:30-3:30 (Mon-Thurs) and 7:30-10:30am and 12:30-2:30 (Friday).** Final Inspections will be given a two hour window.
3. **Tear-Off Inspection is required.** Any and all dry-rotted wood shall be replaced prior to this inspection. Unless new plywood roof sheathing is proposed throughout, **all the nails/fasteners shall be either completely knocked-down or removed** prior to this inspection.
4. If plywood is installed, a plywood **Nailing Inspection is required**.
5. Roofing shall not be applied without first obtaining all prior inspection and written approvals from the building inspector. Any roofing which is applied without first obtaining an approved inspection will require the removal of all new material down to the sheathing so a proper inspection can be performed.
6. A **Final Inspection and approval shall be obtained** from the building inspector when the re-roofing is completed. To receive a final sign-off, the following items will be verified:
   a. Flat roofs shall have a minimum of ¼" per foot of slope and demonstrate there is no ponding.
   b. Listings from approved testing agencies for all pre-manufactured products used shall be available on-site to review at the time of the inspection.
   c. Proper spark arrestor installation, vents painted, gutter/downspouts installed, debris removed. CMC Section 9.18.210 **does NOT allow copper roofing or copper architectural materials**.
7. NOTE: If you call for a tear-off or plywood nailing inspection and the work is not complete, you will be charged a re-inspection fee. The re-inspection fee **shall be paid before another inspection can be**

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason. (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for purpose of sale.).

☒ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code:) The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____, B & P C for this reason

Owner [signature] Date 9/20/07

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Carrier: _____ Policy No.: _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California. Date [signature] 9/20/07

Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

(We) agree to save, indemnify and keep harmless the City of Cupertino against liabilities, judgments, costs and expenses which may in any way accrue against said City in consequence of the granting of this permit.

APPLICANT UNDERSTANDS AND WILL COMPLY WITH ALL NON-POINT SOURCE REGULATIONS.

(Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for purpose of sale.).

☑ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code:) The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____, B & P C for this reason

HAZARDOUS MATERIALS DISCLOSURE

Will the applicant or future building occupant store or handle hazardous material as defined by the Cupertino Municipal Code, Chapter 9.12, and the Health and Safety Code, Section 25532(a)?

☐ Yes ☐ No

Will the applicant or future building occupant use equipment or devices which emit hazardous air contaminants as defined by the Bay Area Air Quality Management District?

☐ Yes ☐ No

I have read the hazardous materials requirements under Chapter 6.95 of the California Health & Safety Code, Sections 25505, 25533 and 25534. I understand that if the building does not currently have a tenant, that it is my responsibility to notify the occupant of the requirements which must be met prior to issuance of a Certificate of Occupancy.

August 21, 2023

SUBJECT: Planning Division Memo Regarding Public Records Request 23-95 for 10857, 10867, 10877, and 10887 Linda Vista Drive, Cupertino, CA 95104 (APN: 356-06-001, 356-06-002, 356-06-003, 356-06-004).

To Whom it May Concern:

Planning Division staff has reviewed the property files for the above-listed properties and reviewed ariel photographs of the property to respond to your request if any zoning violations exist for these properties. Since staff does not have sufficient information about the existing setbacks or floor area or lot of each residence, staff did not these components of each property. This letter also does not provide Code Enforcement cases which the Code Enforcement Division provided to you separately.

The only apparent zoning violation that staff was able to identify was an accessory structure that is constructed on the City-owned, dedicated but un-improved cul-de-sac adjacent to 10867 Linda Vista, but over the property line.

There is no active code case for this structure, but since it is on City property, the City can require that it be removed at any time. Additionally, if a permit were submitted, it would need to be corrected and the structure and encroaching fence demolished at that time.

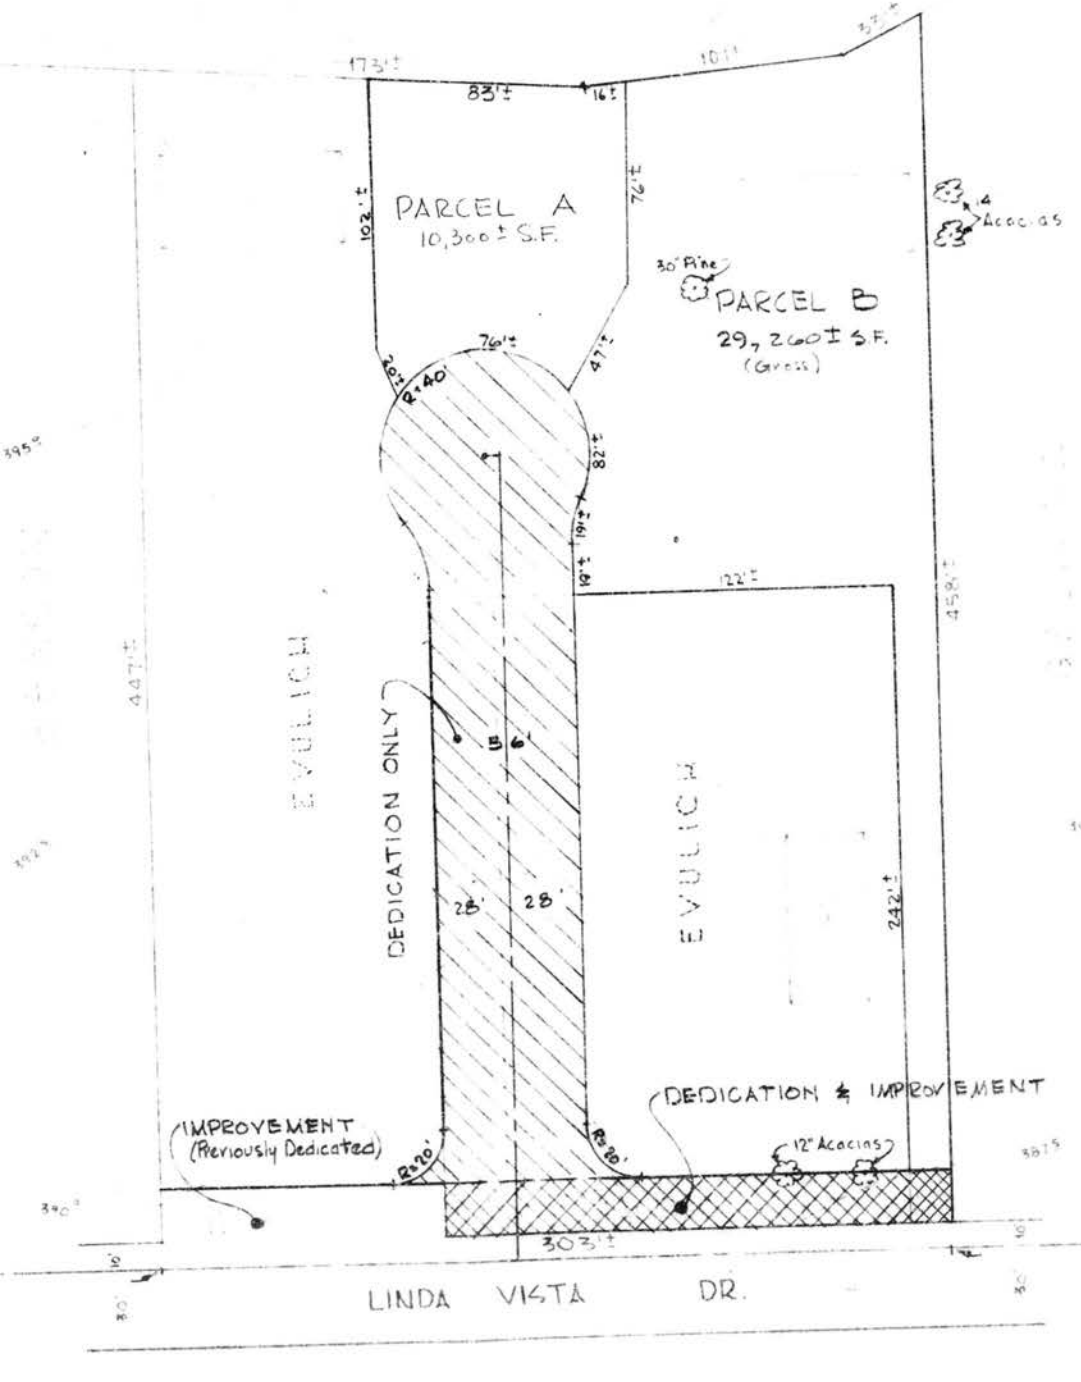

Staff is submitting for your review the original Tentative Map (TM-69-4) for this property that shows that improvement of this cul-de-sac was approved to be deferred until the time when further subdivision is made, as stated by Condition 13 of Planning Commission Resolution 631.

If you have any questions about these findings, you may reach me at (408) 777-3297 or catherinet@cupertino.org.

Sincerely,

Catherine Tarone

CITY OF CUPERTINO
California

MEMO: April 10, 1969

TO: The Honorable Chairman and Members of the Planning Commission

FROM: Adde Laurin, Senior Planner

SUBJECT: Items on the Agenda for the Planning Commission meeting of April 14, 1969

Approved 4-0

4-TM-69 JOSEPH and ROSE EVULICH: TENTATIVE MAP, approximately 2 acres located west side of Rae Lane (also known as Linda Vista Drive) between Hyannisport Drive and Columbus Avenue. First H'g contd.

At the last meeting the Planning Commission requested a revision of the Tentative Map so that it would show a cul-de-sac, to be dedicated but not improved. The applicant has supplied a map which complies.

Suggested Condition 13: Streets to be dedicated and improved, improved (previously dedicated), or dedicated only, as shown on the approved Tentative Map; improvement of the cul-de-sac to be deferred until the time when further subdivision is made.

9-Z-69 RODGER B. WOOLEY: REZONING from Agricultural-Residential Single-family 1-acre lots (A1-43) to Residential Single-family 15,000 sq. ft. lots (R1-15), approximately 30,000 square feet located at south end of Mount Crest Place. First Hearing.

The zoning of this area is A1-43. A subdivision into half-acre lots was requested in 1965. As the City had no half-acre zoning, the request was granted through Variance 20-V-65 and Tentative Map 13-TM-65 (after denying Application 17-Z-65 for Rezoning to A-2:B-2 permitting 10,000 sq. ft. lots). This may be considered rezoning through Variance, a not entirely proper procedure; however, Ordinance 220(f) which permits flexibility in lot sizes was drafted but not enacted at that time.

Variance 20-V-65 was granted subject to the following conditions stated in PC Resolution 290:

1. That the area be subdivided commensurate with the Tentative Map (13-TM-65) that was presented to the Planning Commission this day; this map showing division in seven (7) lots.

2. That average net lot size in the area covered by this Variance shall be not less than one-half acre.

3. That the net size of each individual lot shall be at least fifteen thousand (15,000) square feet.

Mr. Joseph Evulich presented the application.

Commissioner Irwin moved, Commissioner Hirshon seconded and it was passed unanimously to combine the hearings of both applications. hearings combined

Discussion ensued on what the applicant intended to do with the proposed lot split. The applicant stated that he only intended to develop the middle lot for his own use and that he did not intend to sell any of the other lots at this time.

When asked for his opinion, Senior Planner Laurin suggested that the presented development plan which had been requested by the Planning Department be filed with the Tentative Map for reference and be kept in the Planning Department's files. City Engineer Boyd suggested that dedication for the public right of way be accepted but that improvements of the dedicated street be deferred until the ultimate development of the land so that there would be a recorded lien on the property which would obligate the applicant in case he wished to transfer title to the properties or sell same. Also, that the approved Tentative Map show the actual dedication. staff reports

Chairman Frolich suggested that the zoning be voted on and that the Tentative Map matter be continued so that the map could be re-drawn to include the statement that it is this Planning Commission's recommendation that a Cul-de-Sac street be dedicated but that improvements be deferred until such time as the actual development takes place. suggestion by chair

City Attorney Anderson stated that, in the event the annexation does not materialize, a reversionary clause would permit the land to revert back to the land owner.

There were no audience comments . no comments

Commissioner Irwin moved, Commissioner Hirshon seconded and it was passed unanimously to close the public hearing. p. h. closed

Commissioner Irwin moved to continue Application 4-TM-69 to the next regular meeting. Commissioner Puetz seconded and it was passed unanimously. 4-TM-69 continued

Commissioner Irwin moved to approve Application 7-Z-69 subject to the 12 Standard Conditions with the additional condition that the proposed street as shown on the ultimate development plan is dedicated to the City of Cupertino subject to a reversionary clause if the annexation does not materialize. Commissioner Puetz seconded. 7-Z-69 approved

Ayes: Commissioners Irwin, Hirshon, Buthenuth, Puetz, Frolich

Donald A. Frolich, Chairman
Planning Commission

C I T Y O F C U P E R T I N O Telephone: (408) 252-4505
City Hall, 10300 Torre Avenue, Cupertino, California 95014

STANDARD CONDITIONS

1. Install ornamental street lights. All lighting shall be designed to in no way interfere with adjacent residential district.

2. Street trees will be planted in the public right-of-way and shall be of a type approved by the City in places designated by the City.

3. Traffic control signs will be placed at locations to be specified by the City.

4. Fire hydrants shall be located as requested by the City.

5. A masonry wall will be built separating any commercial area from any residential area; which wall shall be six feet high above the highest adjoining finished grade.

6. All parking areas and driveways will be paved as shown on the plot plan.

7. Curbs, gutters, sidewalks, and structures shall be installed to grades and be constructed in accordance with standards specified by the City Engineer.

8. Drainage within and without the development shall be to the satisfaction of the City Engineer.

9. Street improvements abutting the applicant's property shall be according to City standards and specifications.

10. The applicant shall be responsible for completing site as shown on approved plot plan, and shall be required to pay for required engineering, checking, and inspection fees prior to issuance of building permit.

11. Landscaping shall be as approved and maintained as shown on plot plan.

12. Street widening and dedications shall be in accordance with street widths approved by City Engineer.

RESOLUTION NO. 831
OF THE PLANNING COMMISSION OF THE CITY OF CUPERTINO
GRANTING A USE PERMIT to defer the undergrounding of public utilities requirement, as set forth by the Subdivision Ordinance, relative to Parcel Map recorded in Book 258 of Maps, Page 52, Santa Clara County Records.

APPLICANT:	Joseph M. Evulich
ADDRESS:	10851 Linda Vista Drive, Cupertino, California
SUBMITTED:	November 6, 1970
LOCATION:	Westerly of and adjacent to Linda Vista Drive, approx. 350 feet south of Hyannisport Drive
ZONE:	R1-7.5

CONDITIONS:

1-14. Standard Conditions

15. At such time as the neighboring properties or the balance of the applicant's property are developed, the pole removal and undergrounding shall be brought about.

16. The applicant shall install the underground conduits at this time.

PASSED AND ADOPTED this 14th day of December, 1970, at a regular meeting of the Planning Commission of the City of Cupertino, State of California, by the following roll call vote:

AYES:	Commissioners Buthenuth, Hirshon, Meyers, Puetz
NAYS:	None
ABSENT:	Commissioner Irwin

APPROVED:

Gerald A. Puetz, Chairman
Planning Commission

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

- M.S. – Environmental Studies, San José State University

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Oba-Vano provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I ESAs, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

PROJECT EXPERIENCE

Project experience for Ms. Oba-Vano includes:

- Phase I ESAs
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETSs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

As a Due Diligence Project Manager, Ms. Oba-Vano provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in the Northern California area.

In addition, prior to joining the environmental consulting industry, Ms. Oba-Vano spent six years studying a diverse range of environmental disciplines including: environmental science, water resource management, energy and the environment, forest ecology and conservation, ecological sampling and design analyses, and geographic information system.

Jessie H. Smith

Regional Director, Rocky Mountain States

EDUCATION

- B.S. - Environmental Science, Michigan State University

CERTIFICATIONS

- ASTM Compliance Training for Property Condition Assessments

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Smith has been working in the environmental service and due diligence industry for AEI Consultants since 2004. His AEI project management and supervision has included Limited Environmental Site Assessments (LESA), Environmental Transaction Screens (ETS), Phase I Environmental Site Assessments (PHI), Phase II Limited Subsurface Investigations (PHII), Property Condition Assessments (PCA), and Physical Needs Assessments (PNA). Mr. Smith also has experience in asbestos, lead, and mold assessments.

As Regional Director, Mr. Smith provides direct supervision and quality control of work product for environmental and engineering due diligence and consulting projects conducted by technical staff in the Rocky Mountain regional office, to meet client expectations as well as compliance with ASTM, EPA's All Appropriate Inquiry (AAI), and custom client standards. Daily responsibilities include senior project oversight, staff supervision and mentorship, technical senior author services, client management, and business development.

Additional responsibilities include supervision of the design and implementation of appropriate scopes of work for Phase II Subsurface Investigations of facilities which have included industrial and commercial use, gasoline stations, drycleaners, and manufacturing facilities.

Mr. Smith is AEI's national practice lead for environmental due diligence requirements for the U.S. Small Business Administration (SBA), as specified under the Environmental Policies and Procedures within the latest version of the SBA's SOP 50 10 5.

Mr. Smith directs operations for AEI in the Denver, Colorado office, which operates throughout the Rocky Mountain Region of the United States. The Rocky Mountain Regional territory includes Colorado, Utah, Idaho, Montana, Wyoming, North Dakota, South Dakota, Nebraska, and Kansas. Prior to working in the Denver office for AEI since 2008, Mr. Smith formerly directed operations for AEI throughout the southeastern United States from AEI's Hollywood, Florida office.

Jeremy A. Smith
Senior Project Manager

EDUCATION

- B.S. – Environmental Biology, Taylor University

CERTIFICATIONS

- OSHA 40-Hour HAZWOPER Training
- OSHA 8-Hour HAZWOPER Site Supervisor

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Smith has over twenty-one years experience in environmental consulting and engineering services. His project experience includes: Environmental Consulting, Phase II Subsurface Environmental Investigations, In-situ and Ex-situ Soil and Groundwater Mitigation, Underground Storage Tank Removals, Underground Storage Tank System Inspections, and Aboveground Storage Tank Installations.

Mr. Smith is currently a senior project manager for petroleum and hazardous materials investigation and cleanup in Northern California. Responsibilities include client management, project oversight, project design and review, project implementation, and cost estimating. Current clients include private property and fuel station owners, property managers, developers, financial institutions, and public agencies.

PROJECT EXPERIENCE

Project experience for Mr. Smith includes:

- The design and implementation of numerous site investigations, groundwater monitoring programs, remedial investigations / feasibility studies (RI/FS), pilot tests, and corrective action plans (CAP) under the direction of various state and local regulatory oversight agencies
- The implementation of numerous soil, soil gas, and groundwater investigations for environmental due diligence (Phase II Investigations) for a variety of suspected contaminants, including UST sites, dry-cleaning facilities, agricultural operations, and other industrial facilities
- Designated Underground Storage Tank Operator for multiple sites throughout northern California
- Investigation and mitigation at active gasoline stations throughout Indiana and California for Large Oil Companies
- Design, implementation, and management of various remedial technologies, including, soil vapor extraction / air sparge, dual phase extraction, *in situ*

chemical oxidation (ISCO), bio-remediation, soil removal, and natural attenuation
- Design and implementation of vapor intrusion assessments and mitigation

APPENDIX H

LIST OF COMMONLY USED ABBREVIATIONS

UNITS

µg/L	Micrograms per Liter	**pCi/L**	PicoCuries per Liter
mg/kg	Milligrams per Kilogram	**ppb**	Parts per Billion
mg/L	Milligrams per Liter	**ppm**	Parts per Million

ABBREVIATIONS AND ACRONYMS

ACM	Asbestos-Containing Material	**NESHAP**	National Emission Standards for Hazardous Air Pollutants
ADJ	Adjacent site	**NFA**	No Further Action
AEI	AEI Consultants	**NFRAP**	No Further Remedial Action Planned
AHERA	Asbestos Hazard Emergency Response Act	**NLR**	No Longer Reporting
APN	Assessor's Parcel Number	**NOV**	Notice of Violation
AST	Aboveground Storage Tank	**NPL**	National Priorities List
AUL	Activity and Use Limitation	**O&M**	Operations and Maintenance
bgs	Below Ground Surface	**OEC**	Other Environmental Considerations
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes	**OSHA**	Occupational Safety and Health Administration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	**PCB**	Polychlorinated Biphenyl
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System	**PCE, PERC**	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
CESQGs	Conditionally Exempt Small Quantity Generators	**RCRA**	Resource Conservation and Recovery Act
COC	Contaminant of Concern	**REC**	Recognized Environmental Condition
CREC	Controlled Recognized Environmental Condition	**RP**	Responsible Party
EC	Engineering Controls	**SDS**	Safety Data Sheet
EDR	Environmental Data Resources, Inc.	**SEMS**	Superfund Enterprise Management System
EPA	Environmental Protection Agency	**SF**	Square Footage/Square Feet
ERIS	Environmental Risk Information Services	**SP**	Subject Property
ERNS	Emergency Response Notification System	**SQG**	Small Quantity Generator
ESA	Environmental Site Assessment	**SWLF**	Solid Waste Landfill
GPR	Ground-Penetrating Radar	**SVOC**	Semi-Volatile Organic Compound
HREC	Historical Recognized Environmental Condition	**TCE**	Trichloroethylene, Trichloroethene
HVAC	Heating, Ventilation and Air Conditioning	**TPH**	Total Petroleum Hydrocarbons
HWS	Hazardous Waste Site	**TPHd**	Total Petroleum Hydrocarbons (diesel range)
IC	Institutional Controls	**TPHg**	Total Petroleum Hydrocarbons (gasoline range)
LBP	Lead-Based Paint	**TPHo**	Total Petroleum Hydrocarbons (oil range)
LCP	Lead-Containing Paint	**TRPH**	Total Recoverable Petroleum Hydrocarbons
LLP	Landowner Liability Protection	**TSDF**	Treatment, Storage, and Disposal Facility
LQG	Large Quantity Generator	**USDA**	United States Department of Agriculture
LUST	Leaking Underground Storage Tank	**USGS**	United States Geological Survey
MCL	Maximum Contaminant Level	**UST**	Underground Storage Tank
MTBE	Methyl Tertiary Butyl Ether	**VCP**	Voluntary Cleanup Program
ND	None Detected	**VOC**	Volatile Organic Compound
