All documents cited in this report and used in its preparation are hereby incorporated by reference into this document. Copies of documents referenced herein are available for review at the City of Cupertino Community Development Department at 10300 Torre Avenue, Cupertino, California 95014.

1. Introduction

This section describes the standards for determining a significant effect on the environment from construction and operation of the proposed Idlewild Townhomes Project (proposed project) pursuant to the requirements of the California Environmental Quality Act (CEQA).[1] Additionally, this section describes the standards in the City of Cupertino Municipal Code (CMC) Chapter 17.04, *Cupertino Standard Environmental Protection Requirements,* that apply to all projects in Cupertino.

1.1 CATEGORICAL EXEMPTION

Article 19 (Categorical Exemptions) of the CEQA Guidelines[2] includes, as required by CEQA Section 21084 (List of Exempt Classes of Projects; Projects Damaging Scenic Resources), a list of classes of projects that have been determined not to have a significant effect on the environment and, as a result, are exempt from review under CEQA. This document has been prepared to demonstrate CEQA compliance as it pertains to the redevelopment of the existing commercial development on the project site into the proposed 59-unit townhome development, herein referred to as the proposed project. This document also provides information to decision makers regarding a finding that the proposed project is exempt under CEQA.

This document describes how the proposed project qualifies for a Class 32 CEQA Exemption pursuant to CEQA Guidelines Section 15332 (Infill Development Projects), which requires that:

(a) The proposed project is consistent with the applicable General Plan designation and all applicable General Plan policies, as well as the applicable Zoning designations and regulations;
(b) The proposed project would occur within the city limits on a site of less than 5 acres in size that is substantially surrounded by urban uses;
(c) The project site has no value for endangered, rare or threatened species;
(d) The proposed project would not result in any significant effects related to traffic, noise, air quality or water quality; and
(e) The project site can be adequately served by all required utilities and public services.

[1] The CEQA Statute is found at Public Resources Code, Division 13, *Environmental Quality*, Sections 21000 to 21189.

[2] The CEQA Guidelines are found at California Code of Regulations, Title 14, *Natural Resources*, Division 6, *Resources Agency*, Chapter 3, *Guidelines for Implementation of the California Environmental Quality Act*, Sections 15000 to 15387.

In addition, this document demonstrates that none of the exceptions to categorical exemptions apply pursuant to CEQA Guidelines Section 15300.2 (Exceptions), which are based on the following:

(a) The project is not located within a sensitive environment;
(b) There would be no cumulative impacts;
(c) There would be no significant effects on the environment due to an unusual circumstance;
(d) There would be no impacts to a scenic highway;
(e) The project site is not located on a hazardous waste site; and
(f) There would be no impacts to historical resources.

1.2 STANDARD ENVIRONMENTAL PROTECTION REQUIREMENTS

In addition to the standards identified in Section 1.1, *Categorical Exemption*, all projects in Cupertino are required to comply with the CMC Chapter 17.04, *Standard Environmental Protection Requirements.* Pursuant to CMC Section 17.04.030(A), these requirements apply to every project in the city. Pursuant to CMC Section 17.04.030(B)(1), because the proposed residential townhome project has more than four units, compliance must be demonstrated through submittal and implementation of a construction management plan and/or permit plans, as applicable, prior to issuance of a discretionary approval, to the satisfaction of the City. Pursuant to CMC Chapter 17.04, development projects must submit technical reports for air quality, hazardous materials, vehicle miles traveled (VMT), and construction vibration. These reports are subject to peer review by the City's third-party reviewers. This chapter of the CMC also includes nine permit submittal requirements:

1. Air Quality
2. Hazardous Materials
3. Greenhouse Gas Emissions and Energy
4. Biologic Resources
5. Cultural Resources
6. Hydrology and Water Quality
7. Noise and Vibration
8. Paleontological Resources
9. Utilities and Service Systems

2. Project Description

2.1 REGIONAL LOCATION

The project site is in the city of Cupertino, approximately 38 miles southeast of San Francisco. Cupertino is on the western edge of Santa Clara County and west of the city of San Jose, south of the city of Sunnyvale, and north of the city of Saratoga. Regional access to the project site is provided by Interstate 280 (I-280) via North Wolfe Road to the north, and by Highway 85 via Stevens Creek Boulevard to the west. See Figure 2-1, *Regional and Vicinity Ma*p.

2.2 PROJECT SITE

2.2.1 Location

The 2.72-acre project site at 10065 East Estates Drive[3] in the central region of the city near the intersection of Stevens Creek Boulevard and Wolfe Road. The project site is within a Santa Clara Valley Transportation Authority (VTA) City Cores, Corridors, and Station Areas Priority Development Area (PDA)[4] and within a Transit Priority Area (TPA)[5] as defined by the Association of Bay Area Governments (ABAG) and Metropolitan Transportation Commission (MTC). As shown on Figure 2-2, *Aerial View of Project Site and Surroundings*, the project site is in a built-up and urbanized area in the vicinity of the Marketplace shopping mall and a private educational institution to the west and southwest, undeveloped land to the north, commercial uses to the east, and single-family residences to the south. The project site is bounded by Stevens Creek Boulevard to the north, East Estates Drive to the east, Richwood Drive to the south, a daycare to the southwest, and commercial buildings and surface parking lot to the west.

[3] Addresses for the project site include 10065-10075 East Estates Drive, but for the purposes of this document, a single address (10065 East Estates Drive) is used to represent the entire project site.

Figure 2-2
Aerial View of Project Site and Surroundings

Sensitive receptors include places with people that have an increased sensitivity to air pollution, noise, or environmental contaminants. These sites can include schools, parks and playgrounds, day care centers, hotels, senior housing, nursing homes, hospitals, and residential dwelling units. Sensitive receptors within 0.25 miles (1,320 feet)[6] of the project site include the following:

- Residential single-family units across Richwood Drive approximately 0.01 miles (60 feet) to the south;
- Daycare centers approximately 0.01 miles (40 feet) immediately southwest, 0.07 miles (380 feet) southeast, and 0.22 miles (1,140 feet) northwest;
- Medical buildings (dentist and orthodontist) approximately 0.03 miles (175 feet) east and medical clinics approximately 0.07 miles (350 feet) northeast and east;
- Wilson Park approximately 0.19 miles (1,010 feet) southwest and Main Street Park approximately 0.22 miles (1,150 feet) northeast;
- Bethel Lutheran Church approximately 0.22 miles (1,180 feet) southeast.

2.2.2 Existing Site Conditions

As shown on Figure 2-2, the project site is currently developed with a commercial building. The project site also currently includes a parking lot associated with the commercial building.

The project site is relatively flat with an elevation of approximately 200 feet above mean sea level.[7] The surficial geology consists of late Pleistocene older surficial sediments, which is described as older alluvial terrace gravel, sand, and clay, undeformed.[8] No paleontological resources have been identified on the project site; however, the presence of Pleistocene deposits that are known to contain fossils indicates that the overall city, including the project site, could contain paleontological resources.[9] Unique geological features are not common in Cupertino. The geology and soils on the project site are common throughout the city and region and are not considered to be unique.

The Phase I Environmental Site Assessment (ESA) conducted for the proposed project determined that the project site was used for agricultural purposes as orchards from 1939 through the late 1960s.[10] Between 1956 and 1960, the orchards were felled, and the project site was redeveloped with the existing commercial

[6] This distance is consistent with CEQA Guidelines topic *Hazards and Hazardous Materials*, which asks "Would the project emit hazardous emissions or handle hazardous materials, substances or waste within 0.25 miles of an existing or proposed school?"

[10] ENGEO, October 25, 2023, *Phase I Environmental Site Assessment, Idlewild Shopping Center, Cupertino, California.*

building and parking areas. One Hour Dry Cleaners operated a dry-cleaning business at 10045 East Estates Drive using tetrachloroethylene (PCE) as a dry-cleaning solvent between the 1960s and 2010, when the dry-cleaning operation converted to using a hydrocarbon-based solvent.

Due to the presence of PCE, believed to be associated with the former dry-cleaning operations, in soil and soil gas, the project site is listed as an open cleanup program site (case ID 2023-17s) under the oversight of Santa Clara County Department of Environmental Health (SCCDEH) and is listed on the State Water Quality Control Board's GeoTracker website.[11] Several soil, groundwater, soil gas, indoor air, and sub-slab soil gas investigations have been conducted to delineate the lateral and vertical extents of the plume and determine the human health risks to building occupants. The majority of the PCE is present within the back alley behind the former One Hour Cleaners tenant space and impacts only soil and soil gas. The plume extends westerly to the off-site property to the west.

The property owner entered into a voluntary remedial action agreement with SCCDEH in July 2023. A Remedial Action Plan was prepared for the proposed project in September 2023, which involved installing a soil vapor extraction (SVE) system to reduce the concentrations of PCE and its breakdown products in the subsurface to a level that is acceptable for residential occupancy. The SVE system was operated from June 2024 until January 2025, when the system was shut off to undergo rebound testing and determine if there was remaining PCE mass remaining in the subsurface. Based on the rebound testing results, the SVE system will be reactivated and an additional SVE extraction well will be added to the network.

The Phase I ESA identified the following Recognized Environmental Condition (REC) and (future) controlled REC at the project site:[12]

- REC: Former One Hour Cleaners PCE releases. Discharges of PCE from former dry cleaning operations have impacted the project site and off site property to the west. PCE is present in soil gas and to a lesser degree, soil, at concentrations exceeding residential and/or commercial Environmental Screening Levels (ESLs).
- Future Controlled REC: Institutional Controls/Deed Restrictions. Institutional Controls (IC) will be required following successful completion of SVE. ICs will likely include an access agreement to allow SCCDEH personnel on the project site at any time; funding for SCCDEH oversight; and operation maintenance and monitoring (OM&M) and reporting for the vapor mitigation system that is expected to be installed under the proposed project. A corresponding deed restriction would be recorded for the project site to ensure the systems remain operational. When approved, the ICs/deed restriction will represent a controlled REC.

[12] ENGEO, October 25, 2023, *Phase I Environmental Site Assessment, Idlewild Shopping Center, Cupertino, California.*

2. Project Description

An inspection for asbestos containing materials (ACMs) and lead based paint (LBP) was performed and identified the presence of ACMs within the existing building.[13] Based on current occupancy, a full inspection for asbestos in the shopping center was not feasible. The flooring, insulation, ceiling riles, wallboard, roofing, among other suspect ACMs may require additional inspection/testing and an abatement plan will be required to address ACMs.

The existing building on the project site is not currently listed on the National Register of Historic Places[14] or the list of California Historical resources,[15] nor is it associated with significant cultural events, persons in California's past, and does not have any distinctive historical characteristics, and as such does not have any qualifying historical value.

According to the Vegetation Map shown in the Environmental Resources and Sustainability Element of the Cupertino General Plan, the project site is within the urban forest (i.e., trees in the city).[16] The City recognizes that every tree on both public and private property is an important part of Cupertino's urban forest and contributes significant economic, environmental, and aesthetic benefits of the community.[17] There is currently no landscaping on-site.

The project site is in a Local Responsibility Area (LRA) but is not located within a fire hazard severity zone as designated by California Department of Forestry and Fire Protection (CAL FIRE). It is located approximately 3.2 miles northeast of a very high fire hazard severity zone in an LRA, and 2.6 miles east of lands that CAL FIRE designates as a high fire hazard severity zone in a State Responsibility Area (SRA).[18] The project site is located roughly 2.6 miles northeast of a wildland urban interface (WUI), which is an area of transition between wildland (unoccupied land) and land with human development (occupied land).[19]

2.3 LAND USE AND ZONING DESIGNATIONS

The project site is assigned Assessor's Parcel Numbers (APN) 369-06-002, 369-06-003, and 369-06-004. While the City was in the process of obtaining certification of its (2023-2031) Housing Element by the California Department of Housing and Community Development, the developer submitted a preliminary application pursuant to the Housing Crisis Act of 2019, commonly referred to by its legislative number, Senate Bill (SB) 330. SB 330 vests the standards that are in place at the time a "preliminary application" for a housing project is submitted and prevents jurisdictions from imposing or enforcing new design standards on housing projects that are not objective. As such, the project is subject to the regulations in place at the time of the preliminary application was submitted on February 7, 2024.[20] See density standards below.

The project site is within the Heart of the City Special Area with a Commercial/Residential Very High Density General Plan land use designation, and the Planned Development with General Commercial with Multi-Family Residential (P(CG, R-4)) zoning district at the time of application. The Commercial/Residential Very High Density land use designation allows mixed-use development with commercial uses and an established maximum residential density of up to 50 dwelling units per acre.[21] The Heart of the City Specific Plan (Specific Plan) contemplates mixed-use development with a primary focus on providing commercial uses that serve the public with frontages of buildings along Stevens Creek Boulevard. On sites with a mixed-use residential designation, residential is a permitted use only on Housing Element sites. The applicable standards in the General Plan allow for a maximum building height of 45 feet on the project site.

The general type of use allowed on the project site is General Commercial with Multi-Family Residential (P(CG, R-4)), which allows for residential uses. All planned development districts are identified on the zoning map with the letter code "P" followed by a specific reference to the general type of use allowed in the particular planning development zoning district. As described in CMC Section 19.80.010, *Purpose*, the planned development zoning district is intended to provide a means of guiding land development or redevelopment of the city that is uniquely suited for planned coordination of land uses. Development in this zoning district provides for a greater flexibility of land use intensity and design because of accessibility, ownership patterns, topographical considerations, and community design objectives. The planned development zoning district is intended to:

- Encourage variety in the development pattern of the community.
- Promote a more desirable living environment.
- Encourage creative approaches in land development.

[20] At the time of the preliminary Senate Bill 330 application, the project site was zoned as Planned Development with General Commercial and Residential (P(CG, Res)) with a density 25 dwelling units per acre and a height limit of 45 feet.

[21] City of Cupertino, May 2024, *Cupertino General Plan Community Vision 2015-2040, Appendix A: Land Use Definitions*, https://www.cupertino.gov/Your-City/Departments/Community-Development/Planning/General-Plan/General-Plan-Community-Vision, accessed March 18, 2025.

- Provide a means of reducing the amount of improvements required in development through better design and land planning.
- Conserve natural features.
- Facilitate a more aesthetic and efficient use of open spaces.
- Encourage the creation of public or private common open space.

Pursuant to the State Density Bonus Law (Government Code Section 65915) and the City's Density Bonus ordinance (CMC Chapter 19.56, *Density Bonus)*, the project applicant has requested the following, to the extent needed to comply with applicable objective standards:

- A waiver or reduction of development standards to reduce the front, side, and rear setbacks for portions of the project.
- A waiver or reduction of development standards to increase the maximum lot coverage from 40 percent to 42.4 percent.
- A waiver to the Heart of the City Specific Plan Design Guidelines for Common Open Space.
- A waiver for the Heart of the City retail requirement to allow for residential-only use.
- A reduction of vehicle parking standards pursuant to Government Code Section 65915(p).

2.4 PROPOSED PROJECT

The project applicant, Toll Brothers, is proposing the Idlewild Townhomes Development Project that would involve the demolition of the existing commercial building (approximately 35,170 square feet) and the construction of 55 townhome units and 10 accessory dwelling units (ADUs). The following provides a detailed description of the proposed project as shown on the conceptual site plan dated July 2024.[22]

2.4.1 Proposed Townhomes

The proposed townhomes would include 43 market-rate units and 12 below-market-rate units for a total of 55 townhome units, as well as 10 ADUs. There are several different townhome types proposed, including two-, three-, and four-bedroom units, ranging from 1,442 square feet to 2,295 square feet. Each townhome would have three stories with a roof deck and would be approximately 43 feet tall at the highest point. Each townhome would include private open space through a porch, roof deck, and balcony, averaging approximately 396 square feet per unit. The proposed project includes 110 off-street garage residential parking spaces and 9 guest uncovered parking spaces. Each unit will have an attached private two-car garage. Bicycle storage for residents is provided in the private garages. The proposed project would provide

[22] Effective January 1, 2023, Government Code Section 65103.5 (Senate Bill [SB] 1214) limits the distribution of copyrighted material associated with the review of development projects. Members of the public wishing to view plans that cannot otherwise be distributed under SB 1214 may make an appointment with the Planning Division to view them at City Hall by sending an email to planning@cupertino.org. Plans will also be made available digitally during hearings to consider the proposal.

1,140 square feet of common usable open space. The proposed project site plan is shown on Figure 2-3, *Proposed Site Plan*.

2.4.2 Landscaping

Groundcover, shrubs, and trees would be planted throughout the site. The total landscape area would be 3,745 square feet. Groundcovers and shrubs proposed on site would be of the *Agave, Aloe, Anigozanthus, Arctostaphylos, Bulbine, Calandrinia, Carpenteria, Cistus, Dianella, Dietes, Dodonea, Echeveria, Eremophila, Epilobium, Erigonum, Euphorbia, Galvezia, Grevillea, Festuca, Hemerocallis, Hesperaloe, Heurchera, Lirope, Lomandra, Myrsine, Myrtus, Muhlenbergia, Nandina, Pennisetum, Pittosporum, Polystichum, Prunus, Rhaphiolepis, Rosmarinus, Salvia, Senecio, Sesleria, Teucrium,* and *Yucca* genera. The proposed project would plant 93 trees on-site and off-site, including 18 street trees to replace the 9 existing trees off-site along East Estates Drive and Richwood Drive to be removed. Trees proposed as part of the plant palette include *Acer, Agonis, Cercis, Chionanthus, Chitalpa, Geijera Lagerstroemia, Laurus, Magnolia, Olea, Podocarpus, Prunus, Quercus, Rhaphiolepis, Styrax,* and *Zelkova* genera. The street trees proposed along East Estates Drive and Richwood Drive would be Wireless Zelkova (*Zelkova serrata 'Schmidtlow'*) trees.

2.4.3 Project Access and Circulation

2.4.3.1 VEHICULAR ACCESS

The proposed project would have a two-lane entrance/exit circulation pattern with the access point on East Estates Drive. The proposed emergency and garbage pick-up access route would be the same as the proposed vehicle access routes.

As stated in Section 2.2.1, *Location*, the project site is within a TPA and meets the standard for a major transit stop.[23] The closest bus stop to the project site is approximately 0.02 miles (115 feet) away, on the north side of Stevens Creek Boulevard. The nearest transit stop is located 0.05 miles (280 feet) away, on the west side of Miller Avenue, which provides stops with a bus frequency of service interval of 15 to 20 minutes during the peak weekday commute periods along VTA bus route 23 and Rapid Transit 523. In addition, VTA bus routes 25, 51, and 55 have a bus frequency of every 30 minutes or less. The project was reviewed by VTA and no improvements to the stops were requested.

[23] Public Resources Code Section 21099 states that a transit priority area means an area within one-half mile of a 'major transit stop' that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program or applicable regional transportation plan, and Section 21064.3 states that a 'major transit stop' is a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 20 minutes or less during the morning and afternoon peak commute periods. Note that Section 21064.3 was amended in 2024 and the change from 15 minutes to 20 minutes went into effect on January 1, 2025; however, the Cupertino Municipal Code Section 17.08.010, *Definitions*, includes the now outdated standard of 15 minutes.

PROJECT DESCRIPTION

Source: Toll Brothers; cbg Civil Engineers Surveyors Planners; R3 Studios; SDG Architects, Inc.

Figure 2-3
Proposed Site Plan

2.4.3.2 PEDESTRIAN AND BICYCLE ACCESS

Pedestrian access to the townhomes would be available from the access point along East Estates Drive. The proposed development provides interior pedestrian circulation throughout the site. While the proposed project does not propose any new bicycle lanes or routes, the project site is accessible via the existing Enhanced Bike Lane on Stevens Creek Boulevard.[24]

2.4.4 Utilities and Public Services Providers

The proposed utility infrastructure would connect to the existing water, sewer, storm drain system, and electricity network in the area, and would be served by an existing solid waste landfill.

2.4.4.1 WATER SUPPLY AND CONSERVATION

The project site is located within the Cupertino Water Service (CWS) area, leased to San José Water (SJW). Water service to the project site would be provided by the existing water line via an 8-inch pipe on Stevens Creek Boulevard and a 6-inch pipe on East Estates Drive. No new connections would be needed and are not proposed as part of the project.

The proposed project incorporates a number of features meant to conserve water. The proposed landscaping would include native and/or adaptive, and drought resistant plant materials of similar water use grouped by hydrozones. The majority of plantings would be drought tolerant grasses, shrubs, and trees that once established, would be adapted to a dry summer and intermittent rain in the winter season. All planting and irrigation would conform with the Cupertino Landscape Ordinance, and water uses would be tailored to meet CALGreen Building Standards, which requires water conservation and requires new buildings to reduce water consumption by 20 percent. CMC Sections 16.58.100 through 16.58.140 set forth the standards for green building requirements by type of building. As shown on Table 101.10 in CMC Section 16.58.230, new construction greater than nine homes is required to be Green Points Rated certified at minimum 50 points, Silver in Leadership in Energy & Environmental Design (LEED) (City's preferred method), or Alternate Reference Standard pursuant to Section 101.10.2.[25] The proposed project will be conditioned to meet one of these mandatory standards at the Building Permit phase. The LEED rating system encourages water use reduction. Specifically, in LEED v4.1 for Building Design and Construction (BD+C), Outdoor Water

[24] City of Cupertino, June 2016, *2016 Bicycle Transportation Plan*, https://www.cupertino.gov/files/assets/city/v/1/our-community/documents/cupertino-bicycle-transpor.pdf, accessed December 30, 2024.

[25] Leadership in Energy & Environmental Design (LEED) is a green building certification program that recognizes best-in-class building strategies and practices that reduce consumption energy, and water, and reduce solid waste directly diverted to landfills. LEED certified buildings are ranked in order of efficiency from Certified, Silver, Gold and Platinum being the highest ranking with the greatest efficiency standard. LEED Silver certified buildings typically reduce is the third highest ranking out of the four, with just being certified being the lowest and Gold and Platinum being the second highest.

2. Project Description

Use Reduction, Indoor Water Use Reduction and Building-level Water Metering are prerequisites for achieving Water Efficiency (WE) credits.

2.4.4.2 SANITARY SEWER SERVICE

The project site is located within the Cupertino Sanitary District (CSD) service area and wastewater would be treated at the San Jose/Santa Clara Water Pollution Control Plant (SJ/SCWPCD). Wastewater generated at the project site would be collected by the existing 8-inch sanitary sewer main on East Estates Drive.

2.4.4.3 STORMWATER MANAGEMENT

The proposed project would result in approximately 92,600 square feet of impervious surfaces coverage. Compared to approximately 118,800 square feet of impervious surfaces coverage in existing conditions, this would be a decrease of approximately 26,200 square feet of impervious surfaces. Stormwater will be treated on site as required to meet municipal stormwater permit requirements. The proposed project includes 3,720 square feet of on-site bioretention areas that would hold and treat stormwater before it is discharged to an existing 15-inch public storm drain on East Estates Drive. The proposed project is required to comply with the Santa Clara Valley Urban Runoff Pollution Prevention Program C.3 requirements, which include minimization of impervious surfaces, measures to detain or infiltrate runoff from peak flows to match pre-development conditions, and agreements to ensure that the stormwater treatment and flow control facilities are maintained in perpetuity. The proposed project also must comply with CMC Chapter 9.18, *Stormwater Pollution Prevention and Watershed Protection*, which is intended to provide regulations and give legal effect to certain requirements of the National Pollutant Discharge Elimination System (NPDES) permit issued to the City.

2.4.4.4 SOLID WASTE SERVICES

Recology South Bay would provide curbside recycling, garbage, and compost and landscaping waste service to the project site.[26] Each garage will include designated space where waste and recycling bins must be stored. Residents will place their bins on their driveway for pickup. All non-hazardous solid waste collected under the Recology franchise agreement is taken to Newby Island Sanitary Landfill for processing. Under the agreement between the City and Recology, Recology also handles recyclable materials.

[26] City of Cupertino, October 15, 2024, Service Providers, https://www.cupertino.gov/Your-City/City-Directory/Service-Providers, accessed January 2, 2025.

2.4.4.5 OTHER UTILITIES

Electric, cable, and telephone service is anticipated to connect to existing service lines along the north property line. A temporary overhead electric line would be installed to maintain power to the neighboring properties during construction. There are no existing overhead lines along the project site frontage. New on-site utilities would be placed underground, with the exception of the temporary overhead electric line and four pad-mounted transformers. The existing overhead electric lines running along Richwood Drive will remain.

The proposed project would be all electric and Pacific Gas & Electric (PG&E) would supply electricity to the project site via existing infrastructure.[27] The source of electricity would be provided through a partnership of Silicon Valley Clean Energy (SVCE), which provides a standard electricity offering from a 50 percent renewable portfolio,[28] and PG&E. SVCE also offers a 100 percent renewable option that electricity customers can opt into. As previously stated in Section 2.4.4.1, *Water Supply and Conservation*, the proposed project would comply with the City's adopted green building requirements, which includes the California Green Building Standards Code (Title 24) and is required to be Green Points Rated certified.

2.4.5 Demolition, Grading, and Construction

The proposed project demolition, grading, and construction is assumed to take place starting in summer 2026 and ending in 2028. The project applicant proposes to demolish the existing building on the project site.

Demolition and construction work would be conducted between 7:00 a.m. to 8:00 p.m. on weekdays, as provided for in CMC Section 10.48.053, *Grading, Construction and Demolition.* Demolition and construction is not permitted on weekends or holidays for sites within 750 feet of other residential properties.[29] Demolition debris would be off-hauled for disposal in accordance with the City of Cupertino's Recycling and Diversion of Construction and Demolition Waste Ordinance.[30] Preliminary grading plans show that there would be approximately 1,200 cubic yards of cut and 4,130 cubic yards of fill for a net 2,930 cubic yards of fill to be imported to the project site. Approximately 3,700 cubic yards of rock material would also be exported during the site preparation phase. Typical equipment to be used for demolition and site

[27] City of Cupertino, October 15, 2024, Service Providers, https://www.cupertino.gov/Your-City/City-Directory/Service-Providers, accessed January 2, 2025.

[28] Silicon Valley Clean Energy, 2022. It's All About Choice, https://www.svcleanenergy.org/choices/, accessed January 2, 2025.

[29] Cupertino Municipal Code, Title 10, *Public Peace, Safety and Morals*, Chapter 10.48, *Community Noise Control*, Section 10.48.053, *Grading, Construction and Demolition*.

[30] Cupertino Municipal Code, Title 16, *Building and Construction*, Chapter 16.72, *Recycling and Diversion of Construction and Demolition Waste.*

preparation would include concrete/industrial saws, rubber tired dozers, tractors, loaders, backhoes, graders, and scrapers.

No pile driving, rock blasting, or crushing would occur during the construction phase. Typical equipment to be used during construction of the proposed project would include cranes, forklifts, generator sets, tractors, loaders, backhoes, welders, cement and mortar mixers, pavers, paving equipment, and rollers. In compliance with CMC Section 17.04.050(A)(3) which requires the use of Tier 4 or higher equipment, the project applicant has voluntarily committed to the use of Tier 4 Final equipment, which will also be a condition of approval.

During demolition and construction, vehicles, equipment, and materials would be staged and stored on a centrally located portion of the project site when practical. The construction staging would be reduced in size and equipment needs as the site is built out. The project applicant would be conditioned to restrict any long-term staging of equipment from being around the perimeter of the site adjacent to existing residential uses. No staging would occur in the public right-of-way. The construction site and staging areas would be clearly marked, and construction fencing would be installed to prevent disturbance and safety hazards. A combination of on- and off-site parking facilities for construction workers would be identified during demolition, grading, and construction.

2.4.6 Required Permits and Approvals

Following adoption of the CEQA Categorical Exemption, Streamlined Review, and the approval of the proposed project by the City Council, the following discretionary approvals from the City would be required for the proposed project:

- Tentative Map
- Architectural and Site Approval
- Public Art or in-lieu fee determination
- Park Land Dedication or payment of in-lieu fee determination
- Concessions or incentives, waivers or reductions of development standards, and reductions of parking requirements pursuant to the State Density Bonus Law

In addition, permits for demolition, grading and building, and the certificate of occupancy would be required from the City. Encroachment permits from the City would also be required for any work performed in the public right-of-way.

Other agencies that also have discretionary authority related to the proposed project, such as PG&E would authorize the connection/reconnection of electric utilities, San José Water would authorize the installation of a water meter connection, and CSD would be responsible for authorizing the sanitary sewer line.

3. Exemption

As stated in Chapter 1, *Introduction*, of this document, Article 19 of the CEQA Guidelines includes a list of classes (1 through 33) of projects that have been determined not to have a significant effect on the environment and, as a result, are exempt from review under CEQA. This document has been prepared to serve as the basis for compliance with CEQA as it pertains to the proposed project, and to demonstrate that the project qualifies for a CEQA Exemption as an Infill Development Project, consistent with the provisions of CEQA Guidelines Sections 15332 and 15300.2. Specifically, the information provided herein shows that:

- The proposed project qualifies for an exemption under CEQA Guidelines Section 15332 (Class 32: Infill Development Projects) and, as a result, would not have a significant effect on the environment.
- No exceptions to the infill exemption, as identified in CEQA Guidelines Section 15300.2, apply to the proposed project.

This chapter is based in part on the following technical studies prepared for the project applicant:

- ENGEO, June 11, 2025, *Phase I Environmental Site Assessment, Idlewild Shopping Center, Cupertino, California* (see Appendix A, *Environmental Site Assessment*, of this document).
- Hexagon Transportation Consultants, Inc., September 24, 2025, *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* (see Appendix B, *Transportation Analysis*, of this document).

These technical studies were also peer reviewed by PlaceWorks on behalf of the City of Cupertino.

3.1 CEQA GUIDELINES SECTION 15332(A): GENERAL PLAN AND ZONING CONSISTENCY

For the reasons stated here, the proposed project is consistent with the applicable General Plan designation and all applicable General Plan policies, as well as the applicable zoning designations and regulations at the time of project application and therefore meets the criteria for CEQA Guidelines Section 15332(a).

3.1.1 General Plan

As described in Section 2.3, *Land Use and Zoning Designations*, the project site is designated Commercial/Residential Very High Density, which allows mixed-use development with commercial uses and an established residential density of up to 50 dwelling units per acre. In addition, the Heart of the City Specific Plan also designates the project site Commercial/Residential Very High Density and allows for fully

residential development through the approval of a Conditional Use Permit. The proposed project would include the demolition of the existing commercial buildings and replacement with 55 residential townhome units and 10 ADUs. Therefore, implementation of the proposed project will not introduce a new incompatible land use to the project site. The proposed project is within the density allowed for the project site.[31] Therefore, the proposed project is consistent with the General Plan land use designation for the project site. In addition, the proposed maximum building height of 45 feet is consistent with the 45-foot height limit allowed for the project site.

3.1.2 Zoning

As described in Section 2.3, *Land Use and Zoning Designations*, the project site's zoning district at the time of project application is Planned Development with General Commercial with Multi-Family Residential (P(CG, R-4)), which allows for residential uses on the property. Therefore, the proposed project will not introduce a new incompatible use and will continue to be consistent with the zoning designation on the project site applicable at the time of project application.

3.2 CEQA GUIDELINES SECTION 15332(B): PROJECT LOCATION, SIZE, AND CONTEXT

For the reasons stated here, the proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses and therefore meets the criteria of CEQA Guidelines Section 15332(b).

The proposed project is within city limits on an approximately 2.72-acre site. The project site is surrounded by urban uses and paved public streets, including commercial and residential uses, as shown on Figure 2-2, *Aerial View of the Project Site and Surroundings*. The project site is centrally located in the city and within a PDA and TPA. Accordingly, the proposed project meets the criteria of CEQA Guidelines Section 15332(b).

3.3 CEQA GUIDELINES SECTION 15332(C): ENDANGERED, RARE, OR THREATENED SPECIES

For the reasons stated here, which includes compliance with the standard condition of approval protecting nesting birds and glass and lighting standards to reduce bird mortality from windows, other specific glass features, and certain lighting elements listed herein, the project site has no value for endangered, rare, or threatened species and therefore meets the criteria of CEQA Guidelines Section 15332(c).

[31] A density of 50 units per acre is allowed on the project site, which would allow up to 136 units on the 2.72-acre project site. The proposed 55 townhome units and 10 ADUs are within this allowance.

The project site and surrounding area are developed with urban uses. Using data from the Classification and Assessment with Landsat of Visible Ecological Groupings (CALVEG)[32] habitat mapping program, the site is classified as an "urban area." Property with this classification tends to have low to poor wildlife habitat value due to replacement of natural communities, fragmentation of remaining open space areas and parks, and intensive human disturbance. The California Natural Diversity Database (CNDDB) has no record of special-status plant and animal species on the project site or urbanized areas within a one-mile area surrounding the project site.[33] There are no natural lands within a one-mile area of the project site. For these reasons, the project site has no value as habitat for endangered, rare, or threatened species.

While there is currently no landscaping on the project site, six existing off-site trees along Stevens Creek Boulevard will be removed as a part of the proposed project. Migratory birds, which are protected under the Migratory Bird Treaty Act, may use vegetation, including existing trees, on or near the project site for nesting. The project applicant will be required to comply with CMC Chapter 17.04, *Standard Environmental Protection Requirements*. Specifically, the project applicant will be required to comply with CMC Section 17.05.050(D)(1) listed here, which will minimize potential impacts to nesting birds during tree removal and construction:

> CMC Section 17.04.050(D)(1), ***Avoid Nesting Birds During Construction.*** For all projects that involve removal of a tree (either protected or unprotected) or other vegetation suitable for nesting birds, or construction or ground-disturbing activities defined in CMC Section 17.04.020, the project applicant shall comply with, and the construction contractor shall indicate the following on all construction plans, when required to ensure the following measures are performed to avoid inadvertent take of bird nests protected under the federal Migratory Bird Treaty Act and California Fish and Game Code when in active use:
>
> a. Demolition, construction, ground-disturbing, and tree removal/pruning activities shall be scheduled to avoid the nesting season to the extent feasible. If feasible, construction, ground-disturbing, or tree removal/pruning activities shall be completed before the start of the nesting season to help preclude nesting. The nesting season for most birds and raptors in the San Francisco Bay area extends from February 1 through August 31. Preconstruction surveys (described below) are not required for construction, ground-disturbing, or tree removal/pruning activities outside the nesting period.
>
> b. If demolition, construction, ground-disturbing, or tree removal/pruning activities occur during the nesting season (February 1 through August 31), preconstruction surveys shall be conducted as follows:

[32] The CALVEG system was initiated in January 1978 by the Region 5 Ecology Group of the US Forest Service to classify California's existing vegetation communities for use in statewide resource planning. CALVEG maps use a hierarchical classification on the following categories: forest, woodland, chaparral, shrubs, and herbaceous.

[33] California Natural Diversity Database, 2025, CNDDB Maps and Data, https://wildlife.ca.gov/Data/CNDDB/Maps-and-Data, accessed May 7, 2025.

3. Exemption

i. No more than seven days prior to the start of demolition, construction, ground-disturbing, or tree removal/pruning activities to identify any active nests with eggs or young birds on the site and surrounding area within 100 feet of construction or tree removal activities.

ii. Preconstruction surveys shall be repeated at 14-day intervals until demolition, construction, ground-disturbing, or tree removal/pruning activities have been initiated in the area, after which surveys can be stopped. As part of the preconstruction survey(s), the surveyor shall inspect all trees and other possible nesting habitats in, and immediately adjacent to, the construction areas for active nests, while ensuring that they do not disturb the nests as follows:

1. For projects that require the demolition or construction of one single-family residence, ground--disturbing activities affecting areas of up to 500 square feet, or the removal of up to three trees, the property owner, or a tree removal contractor, if necessary, is permitted to conduct preconstruction surveys to identify if there are any active nests. If any active nests with eggs or young birds are identified, the project applicant shall retain a qualified ornithologist or biologist to identify protective measures.

2. For any other demolition, construction, and ground-disturbing activity or the removal of four or more trees, a qualified ornithologist or biologist shall be retained by the project applicant to conduct the preconstruction surveys.

c. If the preconstruction survey does not identify any active nests with eggs or young birds that would be affected by demolition, construction, ground-disturbing or tree removal/pruning activities, no further mitigating action is required. If an active nest containing eggs or young birds is found sufficiently close to work areas to be disturbed by these activities, their locations shall be documented, and the qualified ornithologist or biologist shall identify protective measures to be implemented under their direction until the nests no longer contain eggs or young birds.

d. Protective measures may include, but are not limited to, establishment of clearly delineated exclusion zones (i.e., demarcated by identifiable fencing, such as orange construction fencing or equivalent) around each nest location as determined by the qualified ornithologist or biologist, taking into account the species of birds nesting, their tolerance for disturbance, and proximity to existing development. In general, exclusion zones shall be a minimum of 300 feet for raptors and 75 feet for passerines and other birds. The active nest within an exclusion zone shall be monitored on a weekly basis throughout the nesting season to identify signs of disturbance and confirm nesting status. The radius of an exclusion zone may be increased by the qualified ornithologist or biologist, if project activities are determined to be adversely affecting the nesting birds. Exclusion zones may be reduced by the qualified ornithologist or biologist only in consultation with California Department of Fish and Wildlife. The protection measures and buffers shall remain in effect until the young have left the nest and are foraging independently or the nest is no longer active.

A final report on nesting birds and raptors, including survey methodology, survey date(s), map of identified active nests (if any), and protection measures (if required), shall be prepared by the qualified ornithologist or biologist and submitted to the Director of Community Development or his or her designee, through the appropriate permit review process (e.g., demolition, construction, tree removal, etc.), and be completed to the satisfaction of the Community Development Director prior to the start of demolition, construction, ground-disturbing, or tree removal/pruning activities.

In addition to protecting migratory birds, there are numerous bat species that are known to be in the Cupertino area, most of which are relatively common and are not considered special-status species. The CNDDB does not show any occurrences of special-status bats within the site vicinity or anywhere in Cupertino but does show records within several miles of Cupertino.[34] The project applicant will be required to comply with CMC Chapter 17.04, *Standard Environmental Protection Requirements*. Specifically, the project applicant will be required to comply with CMC Section 17.05.050(D)(2) listed below, which will minimize potential impacts to roosting bats during tree removal and construction:

CMC Section 17.04.050(D)(2), *Avoid Special-Status Roosting Bats During Construction Permit Requirements*.

a. For all projects that involve demolition, renovation, or re-tenanting of an abandoned or vacant building or structure, where the property owner cannot show evidence to the satisfaction of the City of Cupertino Building Inspector that the building or structure was appropriately sealed at the time the building or structure was vacated to prevent bats from roosting, the project applicant shall retain a qualified biologist to conduct preconstruction surveys of the on-site buildings or structures prior to commencing any demolition, renovation, or re-tenanting activities. A building or structure is not appropriately sealed unless seal holes that are more than 0.5 inches in diameter or cracks that are 0.25 by 1.5 inches or larger are filled or closed with suitable material, such as caulking, putty, duct tape, self-expanding polyurethane foam, 0.25-inch mesh hardware cloth, 0.5-inch or smaller welded wire mesh, installing tighter-fitting screen doors, or steel wool.

b. The project applicant shall comply with, and the construction contractor shall include in the applicable construction documents, the following to ensure appropriate preconstruction surveys are performed and adequate avoidance provided for any special-status roosting bats, if encountered on the site. Preconstruction surveys shall:

    i. Be conducted by a qualified biologist prior to tree removal or building demolition, renovation, or re-tenanting. Note that the preconstruction survey for roosting bats is required at any time of year since there is no defined bat roosting season as there is with nesting birds.

[34] California Natural Diversity Database, 2025, CNDDB Maps and Data, https://wildlife.ca.gov/Data/CNDDB/Maps-and-Data, accessed May 7, 2025.

3. Exemption

ii. Be conducted no more than 14 days prior to the start of tree removal or demolition, renovation, or re-tenanting.

iii. Be repeated at 14-day intervals until construction has been initiated, after which surveys can be stopped, unless construction activities are suspended for more than 7 consecutive days, at which point the surveys shall be reinitiated.

iv. If no special-status bats are found during the survey(s), then no additional measures are warranted.

c. Protective measures shall be included in the applicable construction documents and implemented prior to issuance of permits, if any special-status bat species are encountered or for any roosts detected within the existing structures, where individual bats could be inadvertently trapped and injured or killed during demolition unless passively evicted in advance of construction activities. Protective measures shall include:

i. If no maternity roosts are detected, adult bats can be flushed out of the structure or tree cavity using a one-way eviction door placed over the exit location for a minimum 48-hour period prior to the time tree removal or building demolition is to commence.

ii. Confirmation by the qualified biologist that the one-way eviction door was effective, and that all bats have dispersed from the roost location, modifying any exclusion efforts to ensure individual bats have been successfully evicted in advance of initiating tree removal or building demolition.

iii. If a maternity roost is detected, and young are found roosting in a building identified for demolition, renovation, or re-tenanting, work shall be postponed until the young are flying free and are feeding on their own, as determined by the qualified biologist.

iv. Once the qualified biologist has determined that any young bats can successfully function without the maternity roost, then the adults and young bats can be excluded from the structure to be demolished using the one-way eviction methods described above.

v. Monitoring shall be provided by the qualified biologist as necessary to determine status of any roosting activity, success of any required bat exclusion, and status of any maternity roosting activity by bats, in the remote instance a maternity roost is encountered on the site.

Furthermore, the proposed applicant will be required to comply with CMC Chapter 19.102, *Glass and Lighting Standards*, which establishes regulations to reduce bird mortality from windows, other specific glass features, and certain lighting elements that are known to increase the risk of bird collisions. No more than 10 percent of the surface area of the façade will be untreated glass. The proposed project will avoid the funneling of flight paths along buildings or trees towards a building façade, avoid use of highly reflective glass or highly transparent glass, and not include skyways or walkways, balconies, freestanding walls, or building corners made of untreated glass or other transparent materials, or any other design elements that

are untreated and through which trees, landscape areas, water features, or the sky are visible from the exterior or from one side of the transparent element to the other. All outdoor lighting will be fully shielded fixtures, directed downward to meet the particular need and away from adjacent properties and rights-of-way to avoid light trespass.

Accordingly, the proposed project meets the criteria of CEQA Guidelines Section 15332(c).

3.4 CEQA GUIDELINES SECTION 15332(D): TRAFFIC, NOISE, AIR QUALITY, OR WATER QUALITY

For the reasons stated here, the proposed project will not result in any significant effects related to traffic, noise, air quality, or water quality and therefore meets the criteria of CEQA Guidelines Section 15332(d).

3.4.1 Traffic

The analysis presented in this section is based in part on the *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* prepared for the proposed project and appended as Appendix B, *Transportation Analysis*, to this document.

The project site is in the eastern region of the city along Stevens Creek Boulevard. Regional access to the project site is provided by I-280 via North Wolfe Road to the north, and by Highway 85 via Stevens Creek Boulevard to the west. Vehicular access to and from the project site on Stevens Creek Boulevard will be provided through the access point on East Estates Drive.

The project site will continue to be accessible to pedestrians, bicyclists, and transit users. The site is served by the existing Enhanced Bike Lane on Stevens Creek Boulevard. Public transit to the project site is provided by local municipal bus lines 23, 25, 51, 55, and Rapid Transit 523 operated by the VTA with bus stops approximately 0.02 miles away on the north side of Stevens Creek Boulevard.

3.4.1.1 CONSISTENCY WITH CIRCULATION SYSTEM PROGRAMS AND PLANS

Plan Bay Area 2050 is the Bay Area's Regional Transportation Plan (RTP) and Sustainable Community Strategy (SCS) that identifies the sustainable vision for the Bay Area. An overarching goal of the regional plan is to concentrate development in areas where there are existing services and infrastructure rather than allocate new growth to outlying areas where substantial transportation investments would be necessary to achieve VMT reductions. The proposed project is an infill development project within a Santa Clara VTA City

3. Exemption

Cores, Corridors, and Station Areas PDA[35] and within a TPA[36] that will result in a change in land use from commercial to residential in a portion of the city that has access to existing infrastructure and services. Therefore, the proposed project will not conflict with *Plan Bay Area 2050*.

Pedestrian, bicycle, and public transit access to and from the project site will not change from existing conditions. The proposed project will not increase the population at the project site such that it would result in a large number of vehicular trips (i.e., the existing commercial uses generate 350 net daily trips and the proposed project will generate approximately 100 net new daily trips to the project site)[37] and will not otherwise decrease the performance or safety of such pedestrian, bicycle, or public transit facilities or cause a substantial increase in transit demand that cannot be accommodated by existing or proposed transit capacity or alternative travel modes. Therefore, the proposed project will not result in changes to the City's transportation and circulation system that could conflict with adopted policies, plans, or programs regarding transit, bicycle, or pedestrian facilities.

3.4.1.2 VEHICLE-MILES TRAVELED

On February 16, 2021, the City adopted CMC Chapter 17.08, *Evaluation of Transportation Impacts Under the California Environmental Quality Act*, which provides screening criteria and VMT thresholds for land use development projects, transportation projects, and other projects pursuant to CEQA. Under CMC Chapter 17.08, a project would be screened out from more detailed VMT analysis if the project is consistent with applicable General Plan policies and supported by substantial evidence demonstrating cumulative VMT is declining. Project screening may be used for projects that meet one or more of the following criteria:

- A project located within one-quarter mile of a High-Quality Transit Corridor or transit stop as defined by CEQA.
- Local-serving retail of 50,000 square feet or less.
- Land-use projects consisting of 100% affordable housing.

CEQA Guidelines Section 21155(b) defines a high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours. The closest bus stop to the project site is approximately 0.02 miles away on the north side of Stevens Creek Boulevard. The nearest transit stop is located 0.05 miles away, on the west side of Miller Avenue, which provides stops with a bus frequency service interval of 15 to 20 minutes during the peak weekday commute periods along VTA

[35] Association of Bay Area Governments and Metropolitan Transportation Commission, updated March 22, 2023, Priority Development Areas (Plan Bay Area 2050), https://opendata.mtc.ca.gov/datasets/priority-development-areas-plan-bay-area-2050, accessed March 18, 2025.

[36] Association of Bay Area Governments and Metropolitan Transportation Commission, updated March 22, 2023, Transit Priority Areas (2021), https://www.arcgis.com/apps/mapviewer/index.html?layers=370de9dc4d65402d992a769bf6ac8ef5, accessed March 18, 2025.

[37] Hexagon Transportation Consultants, Inc., September 24, 2025, *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* (see Appendix B, *Transportation Analysis*, of this document).

bus route 23 and Rapid Transit 523. As previously described in Section 3.4.1.1, *Consistency with Circulation System Programs and Plans*, the project site is within a TPA.[38] Under the *Plan Bay Area 2050* strategies, just under half of all Bay Area households would live within one-half mile of frequent transit by 2050, with this share increasing to over 70 percent for households with low incomes. Transportation and environmental strategies that support active and shared modes, combined with a transit-supportive land use pattern, are forecasted to lower the share of Bay Area residents that drive to work alone from over 50 percent in 2015 to 36 percent in 2050. Accordingly, development in a TPA demonstrates a cumulative decline of VMT in the city and region. Pursuant to the City's Project Activity Map, the City is processing multiple applications for housing in the TPA.[39] Therefore, these projects, along with the proposed project, demonstrate a cumulative decline in VMT. As such, the proposed project meets the City's VMT screening criteria of being within 0.25 miles of a major transit stop[40] and declining cumulative VMT.

In addition, the City's 2021 Transportation Study Guidelines provides detailed screening criteria to complete the screening process.[41] The 2021 Transportation Study Guidelines state that residential development projects located within a quarter-mile walkshed around an existing major transit corridor or a major transit stop (i.e., along Stevens Creek Boulevard in Cupertino) may be screened out of further VMT analysis pursuant to the TPA screening criteria. However, TPA screening would not apply if the project meets *any* of the following criteria:

- The project has a Floor Area Ratio (FAR) of 0.75 or less;
- The proposed parking exceeds the minimum required by the Zoning Code or applicable plan;
- The Project is inconsistent with the City's General Plan, applicable Specific Plan, or applicable Sustainable Communities Strategy (as determined by the lead agency, with input from ABAG and MTC);
- The Project removes or reduces the number of existing on-site affordable residential units; or,
- Significant levels of VMT generation are anticipated due to project-specific or location-specific information.

As described, the project site is within a quarter-mile walkshed around an existing major transit corridor due to its northern frontage located along Stevens Creek Boulevard. The proposed project would have a FAR greater than 0.75. The proposed project would replace commercial uses with 55 residential townhomes

[38] Association of Bay Area Governments and Metropolitan Transportation Commission, updated March 22, 2023, Transit Priority Areas (2021), https://www.arcgis.com/apps/mapviewer/index.html?layers=370de9dc4d65402d992a769bf6ac8ef5, accessed March 18, 2025.

[39] City of Cupertino, Major Projects, https://www.cupertino.gov/Your-City/Departments/Community-Development/Planning/Major-Projects.

[40] Public Resources Code Section 21064.3 states that a major transit stop is a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 20 minutes or less during the morning and afternoon peak commute periods. Note that Section 21064.3 was amended in 2024 and the change from 15 to 20 minutes went into effect on January 1, 2025; however, the Cupertino Municipal Code Section 17.08.010, *Definitions*, includes the now outdated standard of 15 minutes.

[41] City of Cupertino, May 2021, *City of Cupertino Transportation Study Guidelines*.

and 10 ADUs and is consistent with the City's General Plan. The City's parking requirement for the proposed townhomes is 2.8 parking space per dwelling unit (CMC Table 19.124.040(A)) resulting in 154 spaces and the project parking includes 119 parking spaces. No affordable housing is being removed as a result of the proposed project, and as explained, development in a PDA and TPA is assumed to reduce cumulative VMT. Accordingly, the proposed project qualifies for the TPA screening criteria, and no VMT-related impacts would occur.

3.4.1.3 DESIGN FEATURE OR INCOMPATIBLE USE HAZARDS

The proposed internal roadways will be constructed to be 24 to 39 feet wide and the proposed driveway along East Estates Drive to be approximately 26 feet wide, which is consistent with the CMC roadway standards. Since the increase of the number of vehicle trips resulting from the proposed project will be minor, the proposed driveway is expected to operate acceptably during both peak hours. The speed limit along East Estates Drive is 25 miles per hour (mph), for which the California Department of Transportation recommends a stopping sight distance of 200 feet. Some minor roadway curvature is present along East Estates Drive; however, a clear line of sight is available in both directions for at least 200 feet so that exiting vehicles can see along both directions of East Estates Drive. The proposed project will not include landscaping or signage along the project site frontage and entrances that will interfere with the corner triangles at the proposed driveways. The canopies of trees along East Estates Drive would be maintained so that they are at least 10 feet in height and do not impede the view of exiting drivers. While street parking is permitted along East Estates Drive, the red curb would be striped equal to one car length south of the proposed driveway and all the way to Stevens Creek Boulevard north of the proposed driveway. [42] Therefore, no significant hazards in the area will occur during operation.

During the construction period, the proposed project will result in temporary changes to existing transportation conditions. Temporary traffic will be generated by construction employees and construction activities, including haul trucks. As discussed in Section 2.4.5, *Demolition, Grading, and Construction*, during demolition and construction, vehicle, equipment, and materials will be staged and stored on a portion of the project site. The construction site and staging areas will be clearly marked, and construction fencing will be installed to prevent disturbance and safety hazards. Therefore, no significant hazards in the area will occur during the construction phase.

[42] Hexagon Transportation Consultants, Inc., September 24, 2025, *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* (see Appendix B, *Transportation Analysis*, of this document).

3.4.1.4 EMERGENCY ACCESS

The proposed project will not alter the existing circulation pattern on Stevens Creek Boulevard. The proposed internal roadways will be constructed to 24 to 39 feet wide, consistent with the CMC and Cupertino Fire Department's requirements, and will provide emergency vehicles with sufficient space to access each of the residential units on-site. Therefore, the proposed project will not result in inadequate emergency access.

3.4.2 Noise

The analysis presented in this section is based in part on the *Noise Technical Memorandum* prepared for the proposed project and appended as Appendix C, *Noise Analysis*, to this document.

Pursuant to the CEQA Statute (Public Resources Code) Section 21085, for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment. Accordingly, this section evaluates the noise from construction equipment, buildings, and vehicles.

The noise environment in the project vicinity is primarily characterized by vehicular traffic along Stevens Creek Boulevard to the north of the project site. Operations and activities from adjacent commercial, institutional, and residential uses also contribute to the existing noise environment in the project vicinity. The closest existing noise-sensitive receptors to the project site are the adjacent single-family residences to the south of the project site along Richwood Drive.

3.4.2.1 AMBIENT NOISE LEVELS

Construction Impacts

According to CMC Section 10.48.053, *Grading, Construction and Demolition*, construction is allowed during "daytime hours" (7:00 a.m. to 8:00 p.m. Monday through Friday, and 9:00 a.m. to 6:00 p.m. on weekends) and exempt from the City's daytime and nighttime maximum noise level limits, provided that such construction activities do not exceed 80 dBA at the nearest affected property or individual equipment items do not exceed 87 dBA at 25 feet. Only one of these two criteria must be met. In addition, construction is prohibited on holidays and within 750 feet of residential areas on weekends, holidays, and during the nighttime, unless a special exception has been granted, and during nighttime hours unless it meets the nighttime noise level standards. Even with these restrictions, project construction would temporarily increase ambient noise. However, noise levels would subside again after construction is completed.

3. Exemption

Noise generated by on-site construction equipment is based on the type of equipment used, its location relative to sensitive receptors, and the timing and duration of noise-generating activities. Each stage of construction involves different kinds of equipment and has distinct noise characteristics. Noise levels from construction activities are typically dominated by the loudest pieces of equipment. The dominant noise source of construction equipment is typically the engine, although work-piece noise (such as dropping of materials) can also be noticeable.

The noise produced at each construction stage is determined by combining the contributions from each piece of equipment used at a given time, while accounting for the on-going time-variations of noise emissions (commonly referred to as the usage factor) to determine the L_{eq} noise levels. Heavy equipment, such as a bulldozer, can have maximum, short-duration noise levels of up to 85 dBA at 50 feet. However, overall noise emissions vary considerably, depending on what specific activity is being performed at any given moment. Noise attenuation due to distance, the number and type of equipment, and the load and power requirements to accomplish tasks at each construction phase would result in different noise levels from construction activities at a given receptor. Since noise from construction equipment is intermittent and diminishes at a rate of at least 6 dBA per doubling of distance (conservatively ignoring other attenuation effects from air absorption, ground effects, and/or shielding/scattering effects), the average noise levels at noise-sensitive receptors could vary considerably, because mobile construction equipment would move around the site with different loads and power requirements. Noise levels from project-related construction activities were calculated from the simultaneous use of all applicable construction equipment at spatially averaged distances (i.e., from the acoustical center of the general construction site or phase) to the property line of the nearest receptors. Although construction may occur across the entire phase area, the center of construction activities best represents the potential construction-related noise levels from multiple pieces of equipment at the various sensitive receptors. This is represented by the center of the entire construction site for activities such as paving, demolition, site preparation, and grading, which are expected to take place across the entire site. Other activities, such as building construction and architectural coating are expected to occur in a focused area of the construction site. Distances for these activities were measured from the nearest sensitive receptor to the nearest phase of potential focused construction activity. The expected construction equipment mix was estimated and categorized by construction activity and the three loudest equipment per activity phase using the Federal Highway Administration Roadway Construction Noise Model (RCNM). The associated, aggregate noise levels, grouped by construction activity, are summarized in Table 3-1, *Project-Related Construction Noise, dBA L_{eq} Noise Levels*. As shown in Table 3-1, construction noise levels would not exceed 80 dBA L_{eq} at nearby sensitive receptor locations, therefore complying with the City's construction noise limit.

TABLE 3-1 PROJECT-RELATED CONSTRUCTION NOISE, DBA L_{EQ} NOISE LEVELS

Construction Activity	Reference Noise Level	Residential/Daycare Receptor to the West	Residential Receptor to the South	Residential Receptor to the Southwest
Distance	**50 feet**	**250 feet**	**280 feet**	**180 feet**
Demolition	84	73	69	73
Site Prep	84	73	69	73
Grading	83	72	68	72

CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Sections 17.04.050(G)(1) and 17.04.050(G)(2) listed here, which will minimize impacts related to construction noise:

CMC Section 17.04.050(G)(1), ***Notice and Signage.*** At least 10 days prior to the start of any demolition, ground disturbing, or construction activities, because the project site is between 0.25 to 0.5 acres, the project applicant shall send notices shall be sent to off-site businesses and residents within 250 feet of the project site. The notification shall include a brief description of the project, the activities that would occur, the hours when activity would occur, and the construction period's overall duration. The notification should include the telephone numbers of the contractor's authorized representatives that are assigned to respond in the event of a noise or vibration complaint. The project applicant shall provide the City with evidence of mailing of the notice, upon request. Additionally, the at least 10 days prior to the start of construction activities, a sign shall be posted at the entrance(s) to the job site, clearly visible to the public, which includes permitted construction days and hours, as well as the telephone numbers of the City's and contractor's authorized representatives that are assigned to respond in the event of a noise or vibration complaint. If the authorized contractor's representative receives a complaint, they shall investigate, take appropriate corrective action, and report the action to the City within three business days of receiving the complaint.

CMC Section 17.04.050(G)(2), ***Manage Noise During Construction.***

a. The project applicant and contractors shall prepare and submit a Construction Noise Control Plan to the City's Planning Department for review and approval prior to issuance of the first permit. The

3. Exemption

Construction Noise Plan shall demonstrate compliance with daytime and nighttime decibel limits pursuant to Chapter 10.48 (Community Noise Control) of Cupertino Municipal Code. The details of the Construction Noise Control Plan shall be included in the applicable construction documents and implemented by the on-site Construction Manager. Noise reduction measures selected and implemented shall be based on the type of construction equipment used on the site, distance of construction activities from sensitive receptor(s), site terrain, and other features on and surrounding the site (e.g., trees, built environment) and may include, but not be limited to, temporary construction noise attenuation walls, high quality mufflers. During the entire active construction period, the Construction Noise Control Plan shall demonstrate that compliance with the specified noise control requirements for construction equipment and tools will reduce construction noise in compliance with the City's daytime and nighttime decibel limits.

b. Select haul routes that avoid the greatest amount of sensitive use areas and submit to the City of Cupertino Public Works Department for approval prior to the start of the construction phase.

c. Signs will be posted at the job site entrance(s), within the on-site construction zones, and along queueing lanes (if any) to reinforce the prohibition of unnecessary engine idling. All other equipment will be turned off if not in use for more than 5 minutes.

d. During the entire active construction period and to the extent feasible, the use of noise producing signals, including horns, whistles, alarms, and bells will be for safety warning purposes only. The construction manager will use smart back-up alarms, which automatically adjust the alarm level based on the background noise level or switch off back-up alarms and replace with human spotters in compliance with all safety requirements and law.

Pursuant to CMC Section 17.04.050(G)(2), the proposed project would be required to prepare and implement a noise control plan to ensure compliance with daytime and nighttime decibel limits in the CMC. Therefore, the proposed project will not increase ambient noise levels in the vicinity of the project in excess of standards established in the CMC during the construction phase.

Operational Impact

Stationary-Source Noise

Noise from sources such as people talking and using outdoor common areas or property maintenance may contribute to the total noise environment within the direct vicinity of the proposed project site. However, these types of noise are commonly associated with uses that already exist on the project site and surrounding uses. CMC Section 10.48.040, *Daytime and Nighttime Maximum Noise Levels*, sets the maximum noise level at the site of a receiving residential property to be 60 dBA during the daytime and 50 dBA during the nighttime and 65 dBA during the daytime and 55 dBA during the nighttime at the site of a receiving nonresidential property. Noise associated with landscape maintenance activities is exempt from

the provisions of the CMC, provided said activities take place between the hours of 7:00 a.m. to 8:00 p.m. on weekdays, and 9:00 a.m. to 6:00 p.m. on weekends and holidays.

The project's common space area is in the center of the proposed project, approximately 170 feet north of the nearest residence on Richwood Drive. A typical conversation between two people 3 feet apart is 60 dBA.[43] At a distance of 170 feet, noise levels would attenuate to approximately 25 dBA. Therefore, noise from typical use of the open space area would result in noise levels less than the CMC Section 10.48.040 nighttime 50 dBA limit for residential uses.

The proposed townhomes are anticipated to have mechanical heating, ventilation, and air conditioning (HVAC) equipment on the ground next to units or on the on the rooftop. The exterior mechanical and HVAC equipment associated with the proposed townhomes are expected to be similar to the existing commercial uses on the site or quieter. Because mechanical specifications for these proposed units are not yet available, it is conservatively assumed that noise from these units would be up to 72 dBA L_{eq} at a distance of 3 feet and that they could be located within approximately 45 feet from the nearest residential property lines to the west. At this distance, the sound pressure level associated with a common HVAC unit would be approximately 48 dBA at the nearest noise sensitive receptor. Therefore, the noise level associated with HVAC in the backyards of the future residential units would not exceed the CMC Section 10.48.040 standards, which limit nighttime noise to 50 dBA at nearby residential uses.

Traffic Noise

The proposed project would generate an increase of 100 net new trips per day with 15 new AM peak hour trips compared to existing daily trips attributed to the existing shopping center at the project site. A project will normally have a significant effect on the environment related to traffic noise if it substantially increases the ambient noise levels for adjoining areas. Most people can detect changes in sound levels of approximately 3 dBA under normal, quiet conditions, and changes of 1 to 3 dBA under quiet, controlled conditions. Changes of less than 1 dBA are usually indiscernible. A change of 5 dBA is readily discernible to most people in an outdoor environment. Noise levels above 65 dBA CNEL are normally unacceptable at sensitive receptor locations such as residences, schools, and noise environments in these areas would be considered degraded. Based on this, a significant impact would occur if traffic noise increases by 3 dBA.

Traffic noise increases were calculated using a version of the Federal Highway Administration RD-77-108 Traffic Noise Prediction Model. The traffic noise prediction model takes into account the following inputs: average daily traffic volumes; vehicle mix; speeds; number of lanes; and day, evening, and night traffic splits. Existing traffic noise estimates are based on the City of Cupertino's baseline roadway volumes modeled for

[43] Engineering ToolBox, 2005, Voice Level at Distance, https://www.engineeringtoolbox.com/voice-level-d_938.html, accessed June 6, 2025.

3. Exemption

the General Plan 2040 and Zoning Code Amendments Environmental Assessment in April 2024.[44] Project trips were provided by Hexagon Transportation Consultants Inc.[45] Traffic noise modeling does not account for existing masonry walls at adjacent residential property lines. Table 3-2, *Project-Related Increases in Traffic Noise, dBA CNEL at 50 Feet,* shows that the addition of proposed project trips would result in an increase of less than 1 dBA over existing conditions. Therefore, project traffic would not result in a significant noise impact.

TABLE 3-2 PROJECT-RELATED INCREASES IN TRAFFIC NOISE, DBA CNEL AT 50 FEET

	Segment		Traffic Noise Increase		
Roadway	From	To	Existing No Project	Existing with Proposed Project	Difference
Stevens Creek Boulevard	Tantau Avenue	Portal Avenue	70	70	<1
Wolfe Road	I-280 Overpass	Stevens Creek Boulevard	72	72	<1
Miller Avenue	Stevens Creek Boulevard	Mitty Way	69	69	<1

3.4.2.2 GROUNDBORNE VIBRATION

Potential vibration impacts associated with construction projects are usually related to the use of heavy construction equipment during the demolition phase of construction. Construction can generate varying degrees of ground vibration depending on the construction procedures and equipment. Construction equipment generates vibration that spreads through the ground and diminishes with distance from the source. The effect on buildings in the vicinity of the construction site varies depending on soil type, ground strata, and receptor-building construction. The effects from vibration can range from no perceptible effects at the lowest vibration levels, to low rumbling sounds and perceptible vibrations at moderate levels, to slight structural damage at the highest levels. Vibration from construction activities rarely reaches the levels that can damage structures. Table 3-3, *Vibration Levels at Nearby Structures,* summarizes vibration levels for typical construction equipment at the nearest structures to the project site. As noted in Table 3-3, the vibratory roller, which would be used during paving activities on project streets, would produce the highest levels of vibration. Therefore, the distances shown in Table 3-3 reflect the distance from the nearest off-site buildings to the nearest paved street area shown on the proposed site plan.

[44] City of Cupertino, April 2024, *General Plan 2040 and Zoning Code Amendments Environmental Assessment*, Table 4.11-6, *Baseline Roadway Noise Levels*, https://www.cupertino.gov/files/assets/city/v/2/departments/documents/community-development/planning/general-plan/current-gp-documents/cupgp_appendix_g_2024update_9-30-2024_reduced_size.pdf.

[45] Hexagon Transportation Consultants, Inc., September 24, 2025, *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* (see Appendix B, *Transportation Analysis*, of this document).

TABLE 3-3 VIBRATION LEVELS AT NEARBY STRUCTURES

Equipment	Inches/Second Peak Particle Velocity		
	Residential/Daycare Receptor to the West (80 Feet)	Residential Receptor to the South (130 Feet)	Commercial Uses to the West (145 Feet)
Vibratory Roller	0.037	0.018	0.015
Hoe Ram	0.016	0.008	0.006
Large Bulldozer	0.016	0.008	0.006
Caisson Drilling	0.016	0.008	0.006
Loaded Trucks	0.013	0.006	0.005
Small Bulldozer	0.006	0.003	0.003
Jackhammer	0.001	0.000	0.000

Note: As measured from the center of the nearest street on the project site to the nearest off-site building.
Source: Federal Transit Administration, September 2018, *Transit Noise and Vibration Impact Assessment Manual*, https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/research-innovation/118131/transit-noise-and-vibration-impact-assessment-manual-fta-report-no-0123_0.pdf.

The nearest structure to the site's construction activities, the residential/daycare building to the southwest, is approximately 80 feet from the nearest proposed project construction activities. At this distance, construction vibration would attenuate to 0.037 inches per second peak particle velocity (in/sec PPV) or less. Vibration levels at the other nearby residence 130 feet south of the project site and the commercial uses to the west would also attenuate to 0.018 in/sec PPV or less. Therefore, proposed construction activities would not exceed the City's vibration standard of 0.2 in/sec PPV or 0.12 in/sec PPV (for historic structures) at nearby off-site structures.

CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Section 17.04.050(G)(3), which will minimize impacts related to construction vibration:

> CMC Section 17.04.050(G)(3), ***Manage Vibrations During Construction.*** In the event pile driving is required, the project applicant shall:
>
> a. Notify all vibration-sensitive receptors within 300 feet of the project site of the schedule 10 days prior to its commencement and include the contact information for the person responsible for responding to complaints on site.
>
> b. The project applicant shall retain a qualified acoustical consultant or structural engineer, to prepare and implement a Construction Vibration Monitoring Plan, which is subject to third-party peer review under the direction of the City at the applicant's cost, for areas within 100 feet for pile driving, 25 feet for vibratory roller, or 15 feet for other heavy equipment (e.g., bulldozer); and for historical structures: within 135 feet for pile driving, 40 feet for vibratory roller, or 20 feet for other

heavy equipment. The plan shall include surveying the condition of existing structures; and determining the number, type, and location of vibration sensors and establish a vibration velocity limit (as determined based on a detailed review of the proposed building), method (including locations and instrumentation) for monitoring vibrations during construction, location of notices displaying the contact information for on-site coordination and complaints on site, and method for alerting responsible persons who have the authority to halt construction should limits be exceeded or damaged observed.

c. Submit final monitoring reports to the City upon completion of vibration related construction activities.

d. Conduct a post-survey on any structure where either monitoring has indicated high vibration levels or complaints that damage has occurred are received.

e. The project applicant shall be responsible for appropriate repairs as determined by the qualified acoustical consultant or structural engineer where damage has occurred as a result of construction activities.

Should the proposed project require the use of the construction equipment listed in CMC Section 17.04.050(G)(3)(b) within the specified distances to receptors, it will be required to prepare a Construction and Vibration Monitoring Plan by a qualified acoustical consultant to ensure that no damage due to vibration from construction equipment would occur. Therefore, the proposed project will not result in an increase in excessive ground-borne vibration.

3.4.2.3 AIRPORT NOISE

Because the project site is not within two miles of a private or public use airport, which is the standard for assessing noise impacts under CEQA, the proposed project will not result in the exposure of people residing or working in the project area to excessive noise levels associated with the proximity of an airport.

3.4.3 Air Quality

The analysis presented in this section is based in part on the *Air Quality Technical Memorandum* and *Health Risk Assessment* prepared for the proposed project and appended as Appendix D, *Air Quality Analysis*, to this document.

The analysis of the proposed project's air quality impacts follows the guidance and methodologies recommended in the Bay Area Air District (Air District)[46] *2022 CEQA Air Quality Guidelines*. CEQA allows the significance criteria established by the applicable air quality management or air pollution control district to be used to assess impacts of a project on air quality. The guidelines provide recommended procedures for

[46] Formerly known as the Bay Area Air Quality Management District (BAAQMD)

evaluating potential air impacts during the environmental review process, consistent with CEQA requirements, and include recommended thresholds of significance, mitigation measures, and background air quality information.

Attainment Status of the Air Basin

The proposed project is in the San Francisco Bay Area Air Basin (Air Basin) under the jurisdiction of the Air District, which regulates air quality in the San Francisco Bay Area. Within the Air Basin, ambient air quality standards for ozone, carbon monoxide (CO), nitrogen dioxide (NO_2), sulfur dioxide (SO_2), particulate matter (PM_{10}, $PM_{2.5}$), and lead (Pb) have been set by both the State of California and the federal government. The State has also set standards for sulfate and visibility. The Air Basin is under State nonattainment status for ozone and particulate matter (both PM_{10} and $PM_{2.5}$) standards. The Air Basin is classified as nonattainment for the federal ozone 8-hour standard and nonattainment for the federal 24-hour standard for $PM_{2.5}$.[47]

Air Quality Plans

The Air District is directly responsible for reducing emissions from area, stationary, and mobile sources in the Air Basin to achieve national and California Ambient Air Quality Standards (AAQS). The Air District's *2017 Clean Air Plan* is a regional and multiagency effort to reduce air pollution in the Air Basin.[48] A consistency determination with the air quality management plan plays an important role in local agency project review by linking local planning and individual projects to the *2017 Clean Air Plan*. It fulfills the CEQA goal of informing decision makers of the environmental efforts of the project under consideration early enough to ensure that air quality concerns are fully addressed. It also provides the local agency with ongoing information as to whether they are contributing to the clean air goals in the *2017 Clean Air Plan*.

Regional Significance Thresholds

As described previously, the Air Basin is currently designated a nonattainment area for California and National O_3, California and National $PM_{2.5}$, and California PM_{10} air quality standards. Any project that produces a significant project-level regional air quality impact in an area that is in nonattainment adds to the cumulative impact. Due to the extent of the area potentially impacted by cumulative-plus-project emissions (the Air Basin), a project is cumulatively significant when project-related emissions exceed the Air District's emissions thresholds.

[47] Bay Area Air District, 2025, Air Quality Standards and Attainment Status, https://www.baaqmd.gov/about-air-quality/research-and-data/air-quality-standards-and-attainment-status, accessed February 12, 2025.

[48] Bay Area Air District. April 19, 2017, Final 2017 Clean Air Plan, https://www.baaqmd.gov/~/media/files/planning-and-research/plans/2017-clean-air-plan/attachment-a_-proposed-final-cap-vol-1-pdf.pdf.

3. Exemption

The Air District has identified thresholds of significance for criteria pollutant emissions and criteria air pollutant precursors, including reactive organic gas (ROG), NO_X, PM_{10}, and $PM_{2.5}$. Development projects below the significance thresholds would not generate sufficient criteria pollutant emissions to violate any air quality standard or contribute substantially to an existing or projected air quality violation.

CO Hotspots

Congested intersections have the potential to create elevated concentrations of CO, referred to as CO hotspots. The significance criteria for CO hotspots are based on the California AAQS for CO, which are 9.0 ppm (8-hour average) and 20.0 ppm (1-hour average). With the turnover of older vehicles, introduction of cleaner fuels, and implementation of control technology, the SFBAAB is in attainment of the California and national AAQS, and CO concentrations in the SFBAAB have steadily declined. Because CO concentrations have improved, the Air District does not require a CO hotspot analysis if the following criteria are met:

- The project is consistent with an applicable congestion management program established by the County Congestion Management Agency for designated roads or highways, the regional transportation plan, and local congestion management agency plans.
- The project would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.
- The project traffic would not increase traffic volumes at affected intersection to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, below-grade roadway).

Health Risk

The Air District's significance thresholds for local community risk and hazard impacts apply to both the siting of a new source and to the siting of a new receptor. Local community risk and hazard impacts are associated with TACs and $PM_{2.5}$ because emissions of these pollutants can have significant health impacts at the local level. The proposed project would generate TACs and $PM_{2.5}$ during construction activities that could elevate concentrations of air pollutants at the nearby receptors. The thresholds for construction-related local community risk and hazard impacts are the same as for project operations. The Air District has adopted screening tables for air toxics evaluation during construction. Construction-related TAC and $PM_{2.5}$ impacts are addressed on a case-by-case basis, taking into consideration the specific construction-related characteristics of each project and proximity to off-site and on-site receptors, as applicable.

Project-level emissions of TACs or $PM_{2.5}$ from individual sources that exceed any of the thresholds listed below are considered a potentially significant community health risk in the absence of a qualified community risk reduction plan:

- An excess (i.e., increased) cancer risk level of more than 10 in one million
- Noncancer (i.e., chronic or acute) hazard index greater than 1.0
- An incremental increase of greater than 0.3 micrograms per cubic meter ($\mu g/m^3$) annual average $PM_{2.5}$

Cumulative sources represent the combined total risk values of each of the individual sources within the 1,000-foot evaluation zone. A project would have a cumulatively considerable impact if the aggregate total of all past, present, and foreseeable future sources within a 1,000-foot radius from the fence line of a source or location of a receptor, plus the contribution from the project, exceeds any of the following in the absence of a qualified community risk reduction plan:

- An excess cancer risk level of more than 100 in one million (from all sources)
- Chronic noncancer hazard index (from all local sources) greater than 10.0
- 0.8 $\mu g/m^3$ annual average $PM_{2.5}$ (from all local sources)

3.4.3.2 CONSISTENCY WITH APPLICABLE AIR QUALITY PLANS

The regional emissions inventory for the Air Basin is compiled by the Air District. Regional population, housing, and employment projections developed by the Association of Bay Area Governments (ABAG) are based, in part, on cities' general plan land use designations. These projections form the foundation for the emissions inventory of the *2017 Clean Air Plan*. These demographic trends are incorporated into *Plan Bay Area 2050*, compiled by ABAG and the Metropolitan Transportation Commission (MTC) to determine priority transportation projects and vehicle miles traveled in the Bay Area. The *2017 Clean Air Plan* strategy is based on projections from local general plans. Projects that are consistent with the local general plan are considered consistent with the air quality-related regional plan. Large projects that exceed regional employment, population, and housing planning projections have the potential to be inconsistent with the regional inventory compiled as part of the *2017 Clean Air Plan*.

The proposed residential uses would be consistent with the Commercial/Residential land use designation of the General Plan. Additionally, under CEQA Guidelines Section 15206,[49] the proposed project is not considered a regionally significant project that would affect regional vehicle miles traveled and warrant intergovernmental review by ABAG and MTC. Additionally, the proposed project would serve the existing community and not induce substantial unplanned population growth. Lastly, as shown in Table 3-5, the proposed project would not generate operational emissions that would exceed the Air District's emissions thresholds. These thresholds are established to identify projects that have the potential to generate a substantial amount of criteria air pollutants. Because the proposed project would not exceed these thresholds, the proposed project would not be considered by the Air District to be a substantial emitter of

[49] Pursuant to CEQA Guidelines Section 15206(b)(2)(A), a proposed residential development of more than 500 dwelling units would be considered a project of statewide, regional, or areawide significance.

criteria air pollutants. Therefore, the proposed project would not conflict with or obstruct implementation of the *2017 Clean Air Plan*.

3.4.3.3 CUMULATIVELY CONSIDERABLE NET INCREASE CRITERIA POLLUTANT

Construction Impacts

Construction activities produce combustion emissions from various sources, such as on-site heavy-duty construction vehicles, vehicles hauling materials to and from the site, and motor vehicles transporting the construction crew. Site preparation activities produce course fugitive dust (PM_{10}) and fine fugitive dust ($PM_{2.5}$) from demolition and soil-disturbing activities, such as grading and excavation. Air pollutant emissions from construction activities on-site will vary daily as construction activity levels change. Construction activities associated with the proposed project will result in emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$.

CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Sections 17.04.050(A)(1), 17.04.050(A)(3), and 17.04.050(A)(4) as listed here, which will minimize impacts from construction:

CMC Section 17.04.050(A)(1), *Control Fugitive Dust During Construction*. Projects shall implement the Bay Area Air Quality Management District Basic Control Measures included in the latest version of BAAQMD's CEQA Air Quality Guidelines, as subsequently revised, supplemented, or replaced, to control fugitive dust (i.e., particulate matter, $PM_{2.5}$ and PM_{10}) during demolition, ground-disturbing activities, and/or construction. The project applicant shall include these measures in the applicable construction documents, prior to issuance of the first permit.

CMC Section 17.04.050(A)(3), *Control Construction Exhaust*. Projects that disturb more than one-acre and are more than two months in duration, shall implement the following measures and the project applicant shall include them in the applicable construction document, prior to issuance of the first permit:

a. Utilize off-road diesel-powered construction equipment that is rated by the U.S. Environmental Protection Agency (EPA) as Tier 4 or higher for equipment more than 25 horsepower. Any emissions control device used by the contractor shall achieve emissions reductions that are no less than what could be achieved by a Tier 4 interim emissions standard for a similarly sized engine, as defined by the California Air Resources Board's (CARB) regulations. Applicable construction documents shall clearly show the selected emission reduction strategy for construction equipment over 25 horsepower.

b. Ensure that the construction contractor shall maintain a list of all operating equipment in use on the project site for verification by the City. The construction equipment list shall state the makes, models, and number of construction equipment on-site.

c. Ensure that all equipment shall be properly serviced and maintained in accordance with the manufacturer's recommendations.

CMC Section 17.04.050(A)(4), *Control Volatile Organic Compound Emissions from Paint.* Project shall use low VOC-paint (i.e., 50 grams per [g/l] or less) for interior and exterior wall architectural coatings. The project applicant shall include the use of low-VOC paint in the applicable construction documents prior to issuance of the first permit.

In reference to CMC Section 17.04.050(A)(1), the Air District considers all impacts related to fugitive dust emissions from construction to be less than significant with implementation of the Air District's best management practices. The current best management practices that are required to be implemented by the project applicant are listed herein:

- All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
- All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- All vehicle speeds on unpaved roads shall be limited to 15 miles per hour.
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible.
- Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points.
- All construction equipment shall be maintained and properly tuned in accordance with the manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- A publicly visible sign shall be posted with the telephone number and person to contact at the City of Cupertino regarding dust complaints. This person shall respond and take corrective action within 48 hours. The phone number shall also be visible to ensure compliance with applicable regulations.

3. Exemption

Construction is anticipated to occur from Summer 2026 to 2028. For the purposes of this analysis, a 21-month construction schedule was utilized, with construction starting in August 2026 and lasting until May 2028. Based on information provided by the applicant, construction activities are expected to occur 11 hours a day Monday through Friday and 9 hours a day on Saturdays.

Construction emissions were estimated using CalEEMod version 2022.1. Table 3-4, *Construction Criteria Air Pollutant Emissions*, shows the average daily construction emissions of ROG, NO_X, PM_{10} exhaust, and $PM_{2.5}$ exhaust during construction of the proposed project. As indicated in Table 3-4, average project construction emissions will not exceed the Air District's significance thresholds. Therefore, the proposed project will not result in a cumulatively considerable net increase of criteria air pollutants during the construction phase.

TABLE 3-4 CONSTRUCTION CRITERIA AIR POLLUTANT EMISSIONS

	ROG	NO_X	Exhaust PM_{10}	Fugitive PM_{10}	Exhaust $PM_{2.5}$	Fugitive $PM_{2.5}$
Criteria Air Pollutants (tons/year)						
2026	<1	<1	<1	<1	<1	<1
2027	<1	1	<1	<1	<1	<1
2028	<1	<1	<1	<1	<1	<1
Total	<1	1	<1	1	<1	<1
Criteria Air Pollutants (average lbs/day) [a]						
Average Daily Emissions	**2**	**5**	**<1**	**2**	**<1**	**<1**
Air District Average Daily Threshold	*54*	*54*	*BMPs*	*82*	*BMPs*	*54*
Exceeds Threshold?	**No**	**No**	**No**	**No**	**No**	**No**

Notes: Modeling assumes compliance with Cupertino Municipal Code (CMC) Sections 17.04.050(A)(1), 17.04.050(A)(3), and 17.04.050(A)(4). Specific to CMC Section 17.04.050(A)(3), modeling for the proposed project assumes that all equipment over 25 horsepower used during construction activities will meet Tier 4 Interim standards as a conservative analysis.
a. Average daily emissions are based on the total construction emissions divided by the total number of active construction days. The total number of construction days is estimated to be about 548 days.
Source: CalEEMod Version 2022.1, Air District, 2023 (see Appendix D, *Air Quality Analysis*, of this document)

Operational Impacts

Typical long-term air pollutant emissions are generated by area sources (e.g., landscape fuel use, aerosols, architectural coatings, and asphalt pavement), energy use (natural gas), and mobile sources (i.e., on-road vehicles). Types of land uses that typically generate substantial quantities of criteria air pollutants and toxic air contaminants include industrial (stationary sources), manufacturing, and warehousing (truck idling) land uses. These types of major air pollutant emissions sources are not included as part of the proposed project. As described in Section 2.4.4, *Utilities and Public Service Providers*, the proposed project will be designed as 100 percent electric, which will also be a condition of approval, and will not include stationary sources that emit toxic air contaminants or generate a significant amount of heavy-duty truck trips (a source of diesel particulate matter).

Table 3-5, *Operational Criteria Air Pollutant Emissions*, shows average daily emissions of ROG, NO_X, total PM_{10}, and total $PM_{2.5}$ during operation of the project. As indicated in Table 3-5, operational emissions will not exceed the Air District's significance thresholds. Therefore, the proposed project will not result in cumulatively considerable net increase of criteria air pollutants during operation.

TABLE 3-5 OPERATIONAL CRITERIA AIR POLLUTANT EMISSIONS

	ROG	NO_X	PM_{10} Exhaust	$PM_{2.5}$ Exhaust
Criteria Air Pollutants (tons/year)				
Total	**1**	**<1**	**<1**	**<1**
Air District Thresholds (tons/year)	*10*	*10*	*15*	*10*
Exceeds Threshold?	**No**	**No**	**No**	**No**
Criteria Air Pollutants (average lbs/day)[a]

Energy	<1	<1	<1	<1
On Road Mobile	<1	<1	<1	<1
Total	**4**	**<1**	**<1**	**<1**
Air District Thresholds (pounds/day)	*54*	*54*	*82*	*54*
Exceeds Threshold?	**No**	**No**	**No**	**No**

Note: Emissions may not total to 100 percent due to rounding.
a. Average daily emissions are based on the annual operational emissions divided by 365 days.
Source: See Appendix D, *Air Quality Analysis*, of this document.

Carbon Monoxide Hotspots

Areas of vehicle congestion have the potential to create pockets of CO, called hotspots. These pockets have the potential to exceed the State's 1-hour standard of 20 parts per million (ppm) or the 8-hour standard of 9 ppm.

Under existing and future vehicle emission rates, a project would have to increase traffic volumes at a single intersection by more than 44,000 vehicles per hour—or 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited—to generate a significant CO impact. The proposed project will result in 100 net new daily vehicle trips (15 AM peak hour trips).[50] Thus, the proposed project will not increase traffic volumes at affected intersections by more than 44,000 vehicles per hour or 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited.[51] The proposed project will not have the potential to substantially increase CO hotspots at intersections in the project vicinity. Therefore, the proposed project will not increase CO concentration at intersections.

[50] Hexagon Transportation Consultants, Inc., September 24, 2025, *Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA* (see Appendix B, *Transportation Analysis*, of this document).

[51] Bay Area Air District, 2022, *California Environmental Quality Act Air Quality Guidelines.*

3. Exemption

3.4.3.4 SENSITIVE RECEPTORS

Project impacts related to increased health risk can occur by generating emissions of TACs and air pollutants. Construction activity under the proposed project will generate dust and equipment exhaust that can affect nearby sensitive receptors. The proposed project will include a stationary source of air pollutants and TACs in the form of an emergency generator and will also generate some traffic consisting of mostly light-duty gasoline-powered vehicles, which will produce TAC and air pollutant emissions.

The closest existing sensitive receptors to the project site are at the adjacent single-family residences and daycare to the south and southwest, respectively. The nearest school receptor is a private academy (Fusion Academy Cupertino) located in the shopping mall adjacent to the project site, approximately 450 feet to the west.

Health risk impacts were addressed by predicting increased cancer risk, the increase in annual $PM_{2.5}$ concentrations, and by computing the Hazard Index for noncancer health risks. The project's maximally exposed receptor (MER) is identified as the sensitive receptor that is most impacted by the project's construction and operation. The cancer risk MER is at the residence/daycare southwest of the project site and the annual $PM_{2.5}$ MER is at the shopping center approximately 80 feet west of the project site.

Table 3-6, *Construction Risk Summary*, summarizes the maximum cancer risks, $PM_{2.5}$ concentrations, and health Hazard Index for construction-related activities. As shown in Table 3-6, for non-carcinogenic effects, the chronic hazard index identified for each toxicological endpoint equaled less than one for each identified receptor, which is within acceptable limits. Cancer risk for the worker, daycare, and K-12 student receptors were each calculated to be less than 1 in one million, which would not exceed the 10 in one million significance threshold. However, with the use of Tier 4 Interim equipment, cancer risk for the residential MER from project-related construction emissions was calculated to be approximately 18 in one million, which would exceed the 10 in one million significance threshold. Similarly, with the use of Tier 4 Interim equipment, the annual average $PM_{2.5}$ concentration at the worker MER would reach 0.303 $\mu g/m^3$, which would exceed the Air District's significance threshold of 0.3 $\mu g/m^3$. However, as discussed in Section 2.4.5, *Demolition, Grading, and Construction*, in compliance with CMC Section 17.04.050(A)(3), the project applicant has voluntarily committed to the use of Tier 4 Final equipment, which will also be a condition of approval. With the use of Tier 4 Final equipment, cancer risk for the residential MER from project-related construction emissions would be 6.45 in one million, under the Air District's significance threshold. Similarly, the annual average $PM_{2.5}$ concentration at the worker MER would reach 0.27 $\mu g/m^3$, which is also under the Air District's significance threshold.

TABLE 3-6 CONSTRUCTION RISK SUMMARY

	Cancer Risk (per million)	Chronic Hazards	$PM_{2.5}$ ($\mu g/m^3$)
Use of Tier 4 Interim Equipment			
MER – K-12 Student[1]	<1	<0.1	0.02
MER – Daycare	7.98	<0.1	0.12
MER – Resident	**17.96**	<0.1	0.28
MER – Worker	<1	<0.1	**0.303**
Air District Threshold	*10*	*1.0*	*0.30*
Exceeds Threshold?	**Yes**	**No**	**Yes**
Use of Tier 4 Final Equipment			
MER – Resident	6.45	<0.1	0.25
MER – Worker	<1	<0.1	0.27
Air District Threshold	*10*	*1.0*	*0.30*
Exceeds Threshold?	**No**	**No**	**No**

Note: Cancer risk calculated using 2015 California Office of Environmental Health Hazard Assessment's Health Risk Assessment Guidance Manual.
1. While risks were calculated for each type of student receptor separately (including preschool, elementary school, middle school, and high school), these results report the highest risk among all student receptor types, the middle school student receptors at Fusion Academy Cupertino.

In addition to a project-level health risk assessment, the Air District recommends assessing the potential cumulative impacts from sources of TACs within 1,000 feet of a project. The existing TACs that the Air District recommends a cumulative analysis include permitted stationary sources, marine sources, roadway sources, rail sources, and highway sources. Risks from permitted stationary sources within 1,000 feet of the project site can be identified using the Air District's Stationary Source Screening Map.[52] The residential MER was utilized in the cumulative community risk assessment as it represents the greatest impact to nearby receptors during project construction. No marine or rail risks are shown in the cumulative health risk assessment as no marine or rail activities occur within 1,000 feet of the project site.

Table 3-7, *Cumulative Community Risk Summary*, summarizes the existing TAC source risks at the residential MER from mitigated project construction emissions in combination with existing TAC sources within 1,000 feet of the project site. As shown therein, the proposed project's construction emissions with Tier 4 Final equipment combined with existing TAC emissions within 1,000 feet do not exceed the Air District's cumulative community health risk significance thresholds at the residential MER location.

[52] Bay Area Air District, updated August 1, 2024, Stationary Source Screening Map, https://baaqmd.maps.arcgis.com/apps/webappviewer/index.html?id=845658c19eae4594b9f4b805fb9d89a3.

3. Exemption

TABLE 3-7 CUMULATIVE COMMUNITY RISK SUMMARY

Source	Source Type	Distance to MER[1]	Cancer Risk (per million)	Chronic Hazards	$PM_{2.5}$ ($\mu g/m^3$)
Project Impacts					
Project Construction[2]	Diesel Construction Equipment	-	6.45	<0.1	0.25
Permitted Stationary Source Impacts					
Boyett Petroleum Boyett Site #18 (Facility ID 112405-1)	Gas Dispensing Facility	158	2.08	0.01	0.00
Roadway & Highway Impacts					
Air District-Provided Roadway Values[3]	Vehicles	-	11.70	<0.1	0.41
Cumulative Health Impacts					
Cumulative Project Health Impacts			20.23	<0.1	0.66
		Air District Threshold	*100*	*10.0*	*0.80*
		Exceeds Threshold?	**No**	**No**	**No**

Notes: MER = Maximally Exposed Receptor
1. Values expressed in feet. Residential MER is a residence adjacent to the southwestern project boundary.
2. Includes use of Tier 4 Final equipment.
3. Air District-provided values correspond with risks experienced at the residential MER.

3.4.3.5 ODORS

Construction activities could also generate odors from construction equipment, such as diesel exhaust, and VOCs from architectural coatings and paving activities. However, these odors will be temporary and limited to the construction period. By the time such emissions reach any sensitive receptor sites, they would be diluted well below any level of air quality concern.

The type of facilities that are typically considered to have objectionable odors include wastewater treatments plants, compost facilities, landfills, solid waste transfer stations, fiberglass manufacturing facilities, paint/coating operations (e.g., auto body shops), dairy farms, petroleum refineries, asphalt batch plants, chemical manufacturing, and food manufacturing facilities.[53] The proposed project consists of residential development, which is not considered a type of land use typically associated in generating objectionable odors that would affect a substantial number of people. Therefore, the proposed project will not create objectionable odors affecting a substantial number of people.

[53] Bay Area Air District, 2022. *California Environmental Quality Act Air Quality Guidelines.*

3.4.3.6 GREENHOUSE GAS EMISSIONS

A project does not generate enough greenhouse gas (GHG) emissions on its own to influence global climate change; therefore, this section measures the proposed project contribution to the cumulative environmental impact associated with GHG emissions. Development of the proposed project will contribute to climate change through direct and indirect GHG emissions from the construction activities needed to implement the proposed project, which will generate a short-term increase in GHG emissions.

Construction Impacts

The Air District does not have thresholds of significance for construction-related GHG emissions, which are one-time, short-term emissions and therefore will not significantly contribute to the long-term cumulative GHG emissions impacts of the proposed project. Implementation of the Air District's basic construction best management practices required pursuant to CMC Section 17.04.050(A)(1) will reduce GHG emissions by reducing the amount of construction vehicle idling and by requiring the use of properly maintained equipment. Therefore, project construction impacts associated with GHG emissions will be reduced to the extent feasible, as required by the Air District.

Operational Impacts

The proposed project will generate a net increase of 209 daily weekday trips compared to existing on-site land uses. Because transportation emissions will generate the majority of GHG emissions associated with the proposed project, this net increase in daily trips will not substantially increase GHG emissions in the city. Additionally, the new buildings will be more energy efficient than the existing structures and will be built to achieve the latest Title 24 Building and Energy-Efficiency Standards.

The Air District has the following thresholds for land use projects in analyzing GHG emissions impacts; projects must include conditions listed under either Criterion A or B:

A. Projects must include, at a minimum, the follow project design elements:
    1. Buildings
        a. The project will not include natural gas appliances or natural gas plumbing (in both residential and nonresidential development).
        b. The project will not result in any wasteful, inefficient, or unnecessary energy usage as determined by the analysis required under CEQA Section 21100(b)(3) and Section 15126.2(b) of the State CEQA Guidelines.
    2. Transportation
        a. Achieve a reduction in project-generated vehicle miles traveled (VMT) below the regional average consistent with the current version of the California Climate Change Scoping Plan (currently 15 percent) or meet a locally adopted Senate Bill 743 VMT target, reflecting the

3. Exemption

recommendations provided in the Governor's Office of Land Use and Climate Innovation's Technical Advisory on Evaluating Transportation Impacts in CEQA:

i. Residential projects: 15 percent below the existing VMT per capita
ii. Office projects: 15 percent below the existing VMT per employee
iii. Retail projects: no net increase in existing VMT

b. Achieve compliance with off-street electric vehicle requirements in the most recently adopted version of CALGreen Tier 2.

B. Projects must be consistent with a local GHG reduction strategy that meets the criteria under State CEQA Guidelines Section 15183.5(b).

As described herein, the proposed project will meet the conditions listed under Criterion B, for being consistent with a locally adopted GHG reduction strategy. In addition, it will not include natural gas appliances or plumbing, or result in any wasteful, inefficient, or unnecessary energy usage, as previously explained. Other applicable plans adopted for the purpose of reducing GHG emissions include the California Air Resources Board's (CARB) *Climate Change Scoping Plan* (Scoping Plan) and *Plan Bay Area 2050*. A consistency analysis with these plans is also presented herein.

Cupertino Climate Action Plan

The *Cupertino Climate Action Plan* 2.0 (CAP 2.0) is a strategic planning document that identifies sources of GHG emissions in the city's boundaries, presents current and future emissions estimates, identifies a GHG reduction target for future years, and presents strategic goals, measures, and actions to reduce emissions from the energy, transportation, land use, water, solid waste, and green infrastructure sectors.

A specific project proposal is considered consistent with the Cupertino CAP 2.0 if it does not conflict with the required GHG reduction measures contained in the adopted CAP. Project consistency with the adopted GHG reduction measures is shown in Table 3-8, *Cupertino Climate Action Plan Consistency Matrix*.

TABLE 3-8 CUPERTINO CLIMATE ACTION PLAN CONSISTENCY MATRIX

Measure	Consistency
Measure BE-1 Reduce non-SVCE usage rate to 2 percent for residential and 10 percent for commercial by 2030 and maintain through 2040.	**Consistent.** As described in Chapter 2, *Project Description*, the proposed project will comply with the current California Building and Energy Efficiency Standards to reduce energy consumptions.
Measure BE-4 Require new residential and commercial development to be all-electric at time of construction.	**Consistent.** As described in Chapter 2, *Project Description*, the proposed project will be fully electric.

TABLE 3-8 CUPERTINO CLIMATE ACTION PLAN CONSISTENCY MATRIX

Measure	Consistency
Measure TR-1 Develop and implement an Active Transportation Plan to achieve 15 percent of active transportation mode share by 2030 and 23 percent by 2040.	**Consistent.** The City is the responsible party for this measure. As described in Chapter 2, *Project Description*, while the proposed project does not propose any new bicycle lanes or routes, the site is accessible from the existing Enhanced Bike Lane on Stevens Creek Boulevard. As such, the proposed project will not conflict with the City's 2016 *Bicycle Transportation Plan*. Pedestrians will also have access to the site via the existing sidewalks that will connect to the pedestrian network surrounding the project site. Therefore, the proposed project will promote and will not obstruct these alternative modes of transportation.
Measure TR-2 Implement public and shared transit programs to achieve 29 percent of public transit mode share by 2030 and maintain through 2040.	**Consistent.** The City is the party responsible for this measure. The closest bus stop to the project site is approximately 0.02 miles (115 feet) away, on the north side of Stevens Creek Boulevard. The nearest transit stop is located 0.05 miles (280 feet) away, on the west side of Miller Avenue, which provides stops with a bus frequency of service interval of 15 to 20 minutes during the peak weekday commute periods along VTA bus route 23 and Rapid Transit 523.
Measure TR-3 Increase zero-emission vehicle (ZEV) adoption to 35 percent for passenger vehicles and 20 percent for commercial vehicles by 2030 and 100 percent for all vehicles by 2040.	**Consistent.** The proposed project will result in an increase in land use intensity in a portion of the city that has access to existing transportation infrastructure and services, including the VTA bus routes 23, 25, 51, 55, and Rapid Transit 523. To encourage transition to electric vehicles (EVs), the proposed project will be required to install EV charging stations pursuant to the City's code. The proposed project will be conditioned by the City to install six Level 2 EV Ready Circuits and six Level 1 EV Ready Circuits, one of each in each of the townhome units, and therefore will be consistent with this standard to increase this to the minimum of EV-capable charging spaces to comply with the voluntary Tier 2 standards of CALGreen, as required by the Air District.
Measure W-1 Implement SB 1383 requirements and reduce communitywide landfilled organics 75 percent by 2025 and inorganic waste 35 percent by 2030 and reduce all waste 90 percent by 2040.	**Consistent.** The City is the party responsible for implementing this measure. As described in Chapter 2, *Project Description*, the proposed project will include compost and green waste disposal services through the City's contracts with Recology South Bay. The proposed project will not conflict with implementation of this measure.
Measure W-2 Reduce overall waste disposed to garbage, recycling, and compost per capita by 15 percent by 2035.	**Consistent.** The City is the party responsible for implementing this measure. As described in Chapter 2, *Project Description*, the proposed project will include compost and green waste disposal services through the City's contracts with Recology South Bay. The proposed project will not conflict with implementation of this measure.

3. Exemption

TABLE 3-8 CUPERTINO CLIMATE ACTION PLAN CONSISTENCY MATRIX

Measure	Consistency
Measure W-3 Meet or exceed the SB 1383 recycled organics products procurement requirements and sequester or avoid at least 0.018 MT CO_2e per person by through 2045.	**Consistent.** The City is the party responsible for implementing this measure. As described in Chapter 2, *Project Description*, the proposed project will include compost and green waste disposal services through the City's contracts with Recology South Bay. The proposed project will not conflict with implementation of this measure.
Measure WW-2 Reduce per capita water consumption 15 percent compared to 2019 levels by 2030 and maintain through 2040	**Consistent.** The proposed project will comply with Senate Bill (SB) X7-7, which requires California to achieve a 20 percent reduction in urban per-capita water use by 2020 and will implement best management practices for water conservation to achieve the City's water conservation goals. As described in Chapter 2, *Project Description*, the project incorporates low water-use groundcovers, shrubs, and trees throughout the project site. All landscape zones will be irrigated as required by the Cupertino Landscape Ordinance, and water uses will be tailored to meet CALGreen Building Standards, which requires water conservation and requires new buildings to reduce water consumption by 20 percent. The proposed project will not conflict with implementation of this measure.
Measure CS-1 Increase carbon sequestration through tree planting by developing and implementing an Urban Forest Management Plan.	**Consistent.** The City is the party responsible for this measure. As described in Chapter 2, *Project Description*, the proposed project will increase landscaping on-site. This will increase tree canopy over the buildings and hardscaped areas, reducing energy needed to cool the buildings. The proposed project will include 3,720 square feet of on-site bioretention facilities that will hold and treat stormwater before dispersal to the City's off-site storm drain infrastructure. Furthermore, the project will comply with the Santa Clara Valley Urban Runoff Pollution Prevention Program C.3 and CMC Chapter 9.18, *Stormwater Pollution Prevention and Watershed Protection*, to ensure ongoing compliance with the City's municipal stormwater and urban runoff requirements. The proposed project will not conflict with implementation of this measure.

Notes: Measures BE-2 and BE-3 apply to existing development and are not applicable. Measure TR-4 is a city measure to re-focus transportation infrastructure in the city that is not applicable on a project-level. Measure CS-2 is for open space projects that can sequester carbon dioxide (CO_2), and therefore, is not directly applicable to the project.
Source: City of Cupertino, August 2022, *City of Cupertino Climate Action Plan 2.0.*

Development in Cupertino, including the proposed project, is required to adhere to City-adopted policy provisions, including those contained in the adopted CAP 2.0. The City ensures that the provisions of the Cupertino CAP 2.0 are incorporated into projects and their permits through development review and applications of conditions of approval as applicable. Additionally, as previously stated, the proposed project will replace the older structures with newer, more energy-efficient structures that achieve the most recent California Building and Energy-Efficiency Standards and water-efficiency standards.

Furthermore, CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Section 17.04.050(C), which will minimize stormwater runoff:

> CMC Section 17.04.050(C), *Reduce Greenhouse Gas Emissions (GHG) and Energy Use*. The project applicant shall complete the City of Cupertino Climate Action Plan – Development Project Consistency Checklist, for review and approval by the City Environment and Sustainability Department prior to issuance of the first permit, to demonstrate how the project is consistent with the Cupertino Climate Action Plan, as subsequently revised, supplemented, or replaced, in order to reduce greenhouse gas emissions and conserve energy.

Therefore, the proposed project will be consistent with Cupertino CAP 2.0.

CARB's Scoping Plan

CARB's Scoping Plan outlines the State's strategies to reduce GHG emissions in accordance with the targets established under SB 32, Assembly Bill (AB) 32, and Executive Order (EO) B-55-18. The Scoping Plan is applicable to State agencies and is not directly applicable to cities/counties and individual projects. Nonetheless, the Scoping Plan has been the primary tool that is used to develop performance-based and efficiency-based CEQA criteria and GHG reduction targets for climate action planning efforts. CARB recently released the 2022 Scoping Plan to address measures to achieve the State's carbon neutrality goals under EO B-55-18.

Statewide strategies to reduce GHG emissions in the 2017 Climate Change Scoping Plan include implementing SB 350, which expands the Renewable Portfolio Standards to 50 percent by 2030 and doubles energy-efficiency savings; expanding the Low Carbon Fuel Standards (LCFS) to 18 percent by 2030; implementing the Mobile Source Strategy to deploy zero-electric vehicle buses and trucks; implementing the Sustainable Freight Action Plan; implementing the Short-Lived Climate Pollutant Reduction Strategy, which reduces methane and hydrofluorocarbons to 40 percent below 2013 levels by 2030, and black carbon emissions to 50 percent below 2013 levels by 2030; continuing to implement SB 375; creating a post-2020 Cap-and-Trade Program; and developing an Integrated Natural and Working Lands Action Plan to secure California's land base as a net carbon sink.

Statewide strategies to reduce GHG emissions include the low carbon fuel standards, California Appliance Energy Efficiency regulations, California Renewable Energy Portfolio standard, changes in the CAFE standards, and other early-action measures as necessary to ensure the State is on target to achieve the GHG emissions-reduction goals of SB 32, AB 32, and EO B-55-18. In addition, new buildings are required to comply with the current Building Energy-Efficiency Standards and CALGreen. The Cupertino CAP 2.0 is consistent with the statewide GHG reduction strategy and therefore complying with the CAP 2.0 will ensure the proposed project complies with the CARB Scoping Plan. The project's GHG emissions will be reduced

from compliance with statewide measures that have been adopted since SB 32, AB 32, and EO B-55-18 were adopted.

Plan Bay Area

Plan Bay Area 2050 is the Bay Area's RTP/SCS that identifies a sustainable vision for the Bay Area. To achieve the MTC/ABAG's sustainable vision for the Bay Area, the *Plan Bay Area 2050* land use concept plan for the region concentrates the majority of new population and employment growth in the region in PDAs. An overarching goal of the regional plan is to concentrate development in areas where there are existing services and infrastructure rather than allocate new growth to outlying areas where substantial transportation investments would be necessary to achieve the per-capita passenger vehicle, VMT, and associated GHG emissions reductions. The project site is in a Santa Clara VTA City Cores, Corridors, and Station Areas PDA and the proposed project is an infill development project that will result in an increase in land use intensity in a portion of the city that has access to existing infrastructure and services, including transit service. Therefore, the proposed project will be consistent with *Plan Bay Area 2050*.

3.4.4 Water Quality

3.4.4.1 WATER QUALITY STANDARDS

The City, as a participant in the Santa Clara Valley Urban Runoff Pollution Prevention Program, which is regulated by the NPDES Program, is committed to reducing pollutants entering waterways. Below is a discussion of the proposed project's compliance with water quality standards.

Construction Impacts

Because the proposed project is greater than one acre, it will be required to comply with the General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activity (Construction General Permit). The proposed project will also be required to comply with the Regional Water Board Municipal Regional Permit (MRP), because it will create more than 10,000 square feet of impervious surfaces. The proposed project is required to comply with the Santa Clara Valley Urban Runoff Pollution Prevention Program C.3 requirements, which include minimization of impervious surfaces, measures to detain or infiltrate runoff from peak flows to match pre-development conditions, and agreements to ensure that the stormwater treatment and flow-control facilities are maintained in perpetuity. Compliance with applicable regulations will ensure that the proposed project will not result in adverse impacts to water quality during the construction period.

Operational Impacts

As stated previously, the proposed project will be required to comply with the MRP. Furthermore, stormwater from implementation of the proposed project will be directed to the existing stormwater system, in addition to being filtered through the 3,720 square feet of on-site bioretention areas as described in Section 2.4.4.3, *Stormwater Management*. Therefore, the proposed project will continue to minimize pollutant runoff from the project site and will not result in adverse water quality impacts during operation.

3.4.4.2 GROUNDWATER

The proposed project will connect to the existing water lines on-site and will not use groundwater at the site. Additionally, as described in Section 2.4.4.3, *Stormwater Management*, the proposed project will include 3,720 square feet of on-site bioretention areas, which will allow water to percolate into the groundwater basin below the project site. Therefore, the proposed project will not deplete groundwater supplies or interfere substantially with groundwater recharge.

3.4.4.3 DRAINAGE PATTERNS

Stormwater runoff from the project site is channeled into a storm drain under Stevens Creek Boulevard. Stormwater from Cupertino is eventually discharged into San Francisco Bay. As described in Section 2.4.4.3, *Stormwater Management*, the proposed project includes 3,720 square feet of on-site bioretention areas and will result in a decrease of approximately 26,200 square feet of impervious surfaces. The proposed project will be required to comply with the Santa Clara Valley Urban Runoff Pollution Prevention Program C.3 requirements, which include minimization of impervious surfaces, measures to detain or infiltrate runoff from peak flows to match pre-development conditions, and agreements to ensure that the stormwater treatment and flow-control facilities are maintained in perpetuity.

Additionally, CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Section 17.04.050(F), which will minimize stormwater runoff:

> CMC Section 17.04.050(F), *Control Stormwater Runoff Contamination*. The project applicant shall demonstrate compliance with Chapter 9.18 (Stormwater Pollution Prevention and Watershed Protection) of the Cupertino Municipal Code, to the satisfaction of the City of Cupertino. All identified stormwater runoff control measures shall be included in the applicable construction documents.

CMC Chapter 9.18 is intended to provide regulations and give legal effect to certain requirements of the NPDES permit, which requires erosion and siltation-control measures, issued to the City. Therefore, compliance with the CMC and Santa Clara Valley Urban Runoff Pollution Prevention Program C.3 requirements will ensure that the proposed project will not substantially alter the existing drainage pattern of the site or area.

3.4.4.4 INUNDATION

The project site is not in a 100-year flood zone or special flood hazard area as mapped by the Federal Emergency Management Agency (FEMA). Additionally, the project site is also not in an area subject to tsunami, seiche, or dam failure inundation. Therefore, the proposed project will not risk release of pollutants due to project inundation.

3.5 CEQA GUIDELINES SECTION 15332(E): UTILITIES AND PUBLIC SERVICES

For the following reasons, the project site can be adequately served by all required utilities and public services and therefore meets the criteria of CEQA Guidelines Section 15332(e).

The project site is in an urban area already served by all necessary municipal utilities (i.e., stormwater, water, wastewater, solid waste) and public services (i.e., police and fire).

3.5.1 Stormwater

The project site is served by existing stormwater sewer systems, and the proposed project will not require additional or modified stormwater sewer systems. As described in Section 2.4.4.3, *Stormwater Management*, the proposed project will also implement 3,720 square feet of on-site bioretention areas to reduce or slow stormwater runoff and will result in a decrease of approximately 26,200 square feet of impervious surfaces. Therefore, the proposed project will reduce demand to stormwater infrastructure when compared to existing conditions and will not result in significant impacts to stormwater utilities.

3.5.2 Water

The project site is in the CWS service area. Water service to the project site will be provided by the existing water lines on Stevens Creek Boulevard and East Estates Drive. No new connections will be needed and are not proposed as part of the proposed project. As shown in the water supply evaluation included in Appendix G, *Environmental Assessment,* of the Cupertino General Plan, which evaluated the project site being developed at a greater density (80 dwelling units per acre) than what is proposed (25 dwelling units per acre), CWS predicts that there will be sufficient water supplies to meet citywide demand through year 2040 during normal, single-dry, and multiple-dry years.[54] Furthermore, the project applicant will be required to comply with CMC Chapter 17.04, *Standard Environmental Protection Requirements*. Specifically, the project

[54] City of Cupertino, April 2024, *Cupertino General Plan Community Vision 2015-2040,* Appendix G*, General Plan 2040 and Zoning Code Amendments Environmental Assessment*, Table 4.15-3, *Cal Water PAS Supply and Demand Comparison: 2025 to 2040 (AFY)*, https://www.cupertino.gov/Your-City/Departments/Community-Development/Planning/General-Plan/General-Plan-Community-Vision, accessed March 18, 2025.

applicant will be required to comply with CMC Section 17.04.050(I)(2), which will ensure adequate water supply and infrastructure:

> CMC Section 17.04.050(I)(2), *Ensure Adequate Water Supply and Infrastructure*. The project applicant shall obtain written approval from the appropriate water service provider for water connections, service capability, and location and layout of water lines and backflow preventers, prior to issuance of the first permit.

This will ensure that the existing system can support the proposed project. Therefore, the proposed project will not result in significant impacts to water utilities.

3.5.3 Wastewater

The project site is in the CSD service area, and wastewater will be treated at SJ/SCWPCP. Wastewater generated by the proposed project will be collected by the existing sanitary sewer main along Stevens Creek Boulevard. As shown in the wastewater evaluation included in Appendix G, *Environmental Assessment,* of the Cupertino General Plan, which evaluated the project site being developed at a greater density (80 dwelling units per acre) than what is proposed (25 dwelling units per acre), CSD has sufficient capacity for buildout of the General Plan. As shown, the increase in wastewater demand due to future potential development from the General Plan is estimated to be approximately 0.41 million gallons per day (mgd). As of 2020, the SJ/SCWPCP is treating 110 mgd with a permitted capacity of 167 mgd. Therefore, the wastewater treatment facility has a residual capacity of 57 mgd and the addition of 0.41 mgd from implementation of the General Plan buildout is only 0.7 percent of the residual capacity.[55]

The project applicant will be required to comply with CMC Chapter 17.04, *Standard Environmental Protection Requirements*. Specifically, the project applicant will be required to comply with CMC Section 17.04.050(I)(1), which will minimize potential impacts to the sewer system:

> CMC Section 17.04.050(I)(1), *Manage Wastewater Inflow and Infiltration to Sewer System*. Project applicants shall implement the following measures to reduce wastewater flow:
>
> a. The project applicant shall demonstrate, to the satisfaction of the City of Cupertino and Cupertino Sanitary District (CSD) that the project would not exceed the peak wet weather flow capacity of the Santa Clara sanitary sewer system by implementing one or more of the following methods:
>
> i. Reduce inflow and infiltration in the CSD system to reduce peak wet weather flows, or

[55] City of Cupertino, April 2024, *Cupertino General Plan Community Vision 2015-2040,* Appendix G*, General Plan 2040 and Zoning Code Amendments Environmental Assessment*, Table 4.15-6, *Increase in Wastewater Demand with Proposed Modified Project,* https://www.cupertino.gov/Your-City/Departments/Community-Development/Planning/General-Plan/General-Plan-Community-Vision, accessed March 18, 2025.

ii. Increase on-site water reuse, such as increased grey water use, or reduce water consumption of the fixtures used within the proposed project, or other methods that are measurable and reduce sewer generation rates to acceptable levels, to the satisfaction of the CSD.

b. The project's estimated wastewater generation shall be calculated using the current generation rates used by the CSD unless alternative (i.e., lower) generation rates achieved by the project are substantiated by the project applicant based on evidence to the satisfaction of the CSD.

c. The project applicant shall obtain a letter of clearance from the Cupertino Sanitary District and provide a copy of the letter of clearance to the City prior to issuance of the first permit.

This will ensure that the existing system can support the proposed project. Therefore, the proposed project will not result in significant impacts to wastewater utilities.

3.5.4 Solid Waste

The City contracts with Recology to provide solid waste collection services to residents in the city. Solid waste is collected by Recology and deposited at the Newby Island Sanitary Landfill in Milpitas. The proposed project site is already served by solid waste services and will continue to be served by Recology under the proposed project. As shown in the solid waste evaluation included in Appendix G, *Environmental Assessment,* of the Cupertino General Plan, which evaluated the project site being developed at a greater density (80 dwelling units per acre) than what is proposed (25 dwelling units per acre), the Newby Island Sanitary Landfill has sufficient capacity for buildout of the General Plan. As shown, an increase of 8.8 tons per day from implementation of the General Plan buildout would be 0.4 percent of the current residual capacity of Newby Island Sanitary Landfill. [56] The proposed project will not result in an excess of solid waste that will not be able to be accommodated under existing services.

3.5.5 Public Services Providers

The primary purpose of the public services impact analysis is to examine the impacts associated with physical improvements to public service facilities required to maintain acceptable service ratios, response times, or other performance objectives. Public service facilities need improvements (i.e., construction, renovation, or expansion) as demand for services increase. Increased demand is typically driven by increases in population. The proposed project will have a significant environmental impact if it exceeds the

[56] City of Cupertino, April 2024, *Cupertino General Plan Community Vision 2015-2040,* Appendix G*, General Plan 2040 and Zoning Code Amendments Environmental Assessment*, Table 4.15-7, *Increase in Solid Waste Generation with Proposed Modified Project,* https://www.cupertino.gov/Your-City/Departments/Community-Development/Planning/General-Plan/General-Plan-Community-Vision, accessed March 18, 2025.

ability of public service providers to adequately serve residents, thereby requiring construction of new facilities or modification of existing facilities.

The proposed project is in an area already served by public service providers. Through developer impact fees, development of the proposed project will support the City's public services funds that are used, in part, to maintain City services. Likewise, and pursuant to SB 50,[57] the project applicant will be required to pay the school impact fees required for residential development to offset impacts to the school district. As shown in the public services evaluation included in Appendix G, *Environmental Assessment,* of the Cupertino General Plan, which evaluated the project site being developed at a greater density (80 dwelling units per acre) than what is proposed (25 dwelling units per acre), impacts to public service providers (fire protection, police, schools, libraries, and parks) were found to be less than significant at General Plan buildout. Therefore, the proposed project will not result in an increase in demand that will prevent public service providers from adequately serving residents.

[57] Senate Bill 50 amended California Government Code Section 65995, which contains limitations on Education Code Section 17620, the statute that authorizes school districts to assess development fees within school district boundaries.

3. Exemption

This page has been intentionally left blank.

4. Exceptions

In addition to analyzing the applicability of CEQA Guidelines Section 15332 (Class 32), this document assesses whether any of the exceptions to categorical exemptions identified in CEQA Guidelines Section 15300.2 (Exceptions) apply to the proposed project. The following analysis compares the criteria in CEQA Guidelines Section 15300.2 (Exceptions) to the project, and concludes, based on substantial evidence, that none of the exceptions are applicable to the project, and that the project is categorically exempt from CEQA pursuant to CEQA Guidelines Sections 15300 and 15332.

4.1 CEQA GUIDELINES SECTION 15300.2(A): LOCATION

Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may, in a particularly sensitive environment, be significant. Therefore, these classes are considered to apply to all instances, except where the project may impact an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, State, or local agencies.

The proposed project does not qualify for an exemption under Classes 3, 4, 5, 6, or 11. The project site is in an urban developed area and is not in a sensitive environment. In addition, the proposed project will not result in any impacts on an environmental resource of hazardous or critical concern. Therefore, the exception under CEQA Guidelines Section 15300.2(a) does not apply to the proposed project.

4.2 CEQA GUIDELINES SECTION 15300.2(B): CUMULATIVE IMPACT

All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time, is significant.

The project site is in a developed urban neighborhood that is already served by utilities and public services, as well as transportation. As discussed in Section 3.4, *CEQA Guidelines Section 15332(d): Traffic, Noise, Air Quality, or Water Quality*, the proposed project will not result in significant impacts pertaining to traffic, noise, air quality, or water quality. Any construction effects will be temporary, confined to the project vicinity, and reduced to the extent feasible through compliance with the CMC and applicable regulations. Therefore, the exception under CEQA Guidelines Section 15300.2(b) does not apply to the proposed project.

4.3 CEQA GUIDELINES SECTION 15300.2(C): SIGNIFICANT EFFECT

A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

There are no known unusual circumstances that are applicable to the project, which may result in a significant effect on the environment. The proposed project consists of the demolition of the existing commercial building on the project site and the construction of 55 new residential townhome units and 10 ADUs. The proposed project will not result in a change in the existing land use or zoning designations or introduce a new activity to the area that could result in a significant effect on the environment. Therefore, the exception under CEQA Guidelines Section 15003.2(b) does not apply to the proposed project.

4.4 CEQA GUIDELINES SECTION 15300.2(D): SCENIC HIGHWAYS

A categorical exemption shall not be used for a project that may result in damage to scenic resources, including, but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to improvements that are required as mitigation by an adopted negative declaration or certified environmental impact report (EIR).

The proposed project will not affect a resource within a State Scenic Highway. The nearest scenic highway, State Route 9, is over five miles south of the project site. The nearest eligible State Scenic Highway, I-280, is approximately 0.5 miles northeast of the project site, with urban development between.[58] The project site is not visible from I-280. Additionally, the project site and surrounding area are already developed. Therefore, no scenic resources within view of a State Scenic Highway will be altered as part of the project.

4.5 CEQA GUIDELINES SECTION 15300.2(E): HAZARDOUS WASTE SITES

A categorical exemption shall not be used for a project on a site that is included on any list compiled pursuant to Section 65962.5 of the Government Code.

California Government Code Section 65962.5 requires the California Environmental Protection Agency (CalEPA) to compile, maintain, and update specified lists of hazardous material release sites. CEQA requires the lead agency to consult the lists compiled pursuant to Government Code Section 65962.5 to determine whether a project and any alternatives are identified.[59] The required lists of hazardous material release sites are commonly referred to as the "Cortese List" named after the legislator who authored the legislation.

[58] California Department of Transportation, 2025, California State Scenic Highway System Map, https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa, accessed May 8, 2025.

[59] California Public Resources Code Section 21092.6.

Because the statute was enacted more than 20 years ago, some of the provisions refer to agency activities that were conducted many years ago and are no longer being implemented and, in some cases, the information required in the Cortese List does not exist. Those requesting a copy of the Cortese Lists are now referred directly to the appropriate information resources contained on internet websites hosted by the boards or departments referenced in the statute, including California Department of Toxic Substance Control's (DTSC) online EnviroStor database and the State Water Resources Control Board's (SWRCB) online GeoTracker database. These two databases include hazardous material release sites, along with other categories of sites or facilities specific to each agency's jurisdiction.

The project site is listed as an open cleanup program site on the State Water Quality Control Board's GeoTracker website.[60] However, the project site is not included on the Hazardous Waste and Substances Site List (Cortese) pursuant to Government Code Section 65962.5 as of May 2025.[61] Additionally, the project site is not listed on any of the following CalEPA's Cortese List Data Resources:[62]

- List of Hazardous Waste and Substances sites from DTSC EnviroStor database[63]
- List of Leaking Underground Storage Tank Sites from SWRCB's GeoTracker[64]
- List of solid waste disposal sites identified by SWRCB with waste constituents above hazardous waste levels outside the waste management unit[65]
- List of "active" Cease and Desist Orders and Cleanup and Abatement Orders from SWRCB[66]
- List of hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code, identified by DTSC[67]

[60] State Water Resources Control Board, 2024, GeoTracker, https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000021095, accessed May 5, 2025.

[61] California Department of Toxic Substances Control, 2025, Hazardous Waste and Substances Site List (Cortese), https://www.envirostor.dtsc.ca.gov/public/search?cmd=search&reporttype=CORTESE&site_type=CSITES,FUDS&status=ACT,BKLG,COM&reporttitle=HAZARDOUS+WASTE+AND+SUBSTANCES+SITE+LIST+%28CORTESE%29, accessed May 8, 2025.

[62] California Environmental Protection Agency, 2025, Cortese List Data Resources, https://calepa.ca.gov/SiteCleanup/CorteseList/, accessed May 8, 2025.

[63] California Department of Toxic Substances Control, 2025, Hazardous Waste and Substances Site List (Cortese), https://www.envirostor.dtsc.ca.gov/public/search?cmd=search&reporttype=CORTESE&site_type=CSITES,FUDS&status=ACT,BKLG,COM&reporttitle=HAZARDOUS+WASTE+AND+SUBSTANCES+SITE+LIST+%28CORTESE%29, accessed May 8, 2025.

[64] State Water Resources Control Board, 2025, GeoTracker, https://geotracker.waterboards.ca.gov/search?CMD=search&case_number=&business_name=&main_street_name=&city=&zip=&county=&SITE_TYPE=LUFT&oilfield=&STATUS=&BRANCH=&MASTER_BASE=&Search=Search, accessed May 8, 2025.

[65] California Environmental Protection Agency, 2025, Sites Identified with Waste Constituents Above Hazardous waste Levels Outside the Waste Management Unit, https://calepa.ca.gov/wp-content/uploads/2016/10/SiteCleanup-CorteseList-CurrentList.pdf, accessed May 8, 2025.

[66] California Environmental Protection Agency, 2025, List of "active" CDO and CAO from Water Board, https://calepa.ca.gov/wp-content/uploads/2016/10/SiteCleanup-CorteseList-CDOCAOList.xlsx, accessed May 8, 2025.

[67] California Environmental Protection Agency, 2025, Cortese List: Section 65962.5(a), https://calepa.ca.gov/sitecleanup/corteselist/section-65962-5a/, accessed May 8, 2025.

Therefore, the exception under CEQA Guidelines Section 15300.2(e) does not apply to the proposed project.

4.6 CEQA GUIDELINES SECTION 15300.2(F): HISTORICAL RESOURCES

A categorical exemption shall not be used for a project that may cause a substantial adverse change in the significance of a historical resource.

No historic resources exist in the vicinity of the project site. There is also no known sensitivity for archaeological or paleontological resources on the site. However, the site may contain previously unknown subsurface archaeological and paleontological deposits. The proposed project will comply with Land Use and Community Design Element Policy 2-72 in the General Plan, which requires compliance with City, State, and federal historic preservation laws, regulations, and codes, including laws related to archaeological resources. In particular, the proposed project will be required to comply with CEQA Guidelines Section 15064.5(e), which specifies procedures to be used in the event of a discovery of Native American human remains on non-federal land. Additionally, CMC Chapter 17.04, *Standard Environmental Protection Requirements*, identifies standard environmental protection requirements that all construction projects must meet. Specifically, the project applicant will be required to comply with CMC Sections 17.04.050(E)(1), 17.04.050(E)(2), and 17.04.050(H), which will minimize impacts to archaeological resources, tribal cultural resources, and paleontological resources:

CMC Section 17.04.050(E)(1), *Protect Archaeological Resources and Tribal Cultural Resources*. For all projects requiring ground-disturbing activities on land with no known archaeological or tribal cultural resources that has not been previously disturbed and/or where ground-disturbing activities would occur at a greater depth or affect a greater area than previously disturbed, the following shall be required:

a. Areas with No Known Cultural Resources. For all projects within areas where there are no known cultural resources, prior to soil disturbance, the project applicant shall provide written verification, including the materials provided to contractors and construction crews, to the City confirming that contractors and construction crews have been notified of basic archaeological site indicators, the potential for discovery of archaeological resources, laws pertaining to these resources, and procedures for protecting these resources as follows:

    i. Basic archaeological site indicators that may include, but are not limited to, darker than surrounding soils of a friable nature; evidence of fires (ash, charcoal, fire affected rock or earth); concentrations of stone, bone, or shellfish; artifacts of stone, bone, or shellfish; evidence of living surfaces (e.g., floors); and burials, either human or animal.

    ii. The potential for undiscovered archaeological resources or tribal cultural resources on site.

iii. The laws protecting these resources and associated penalties, including, but not limited to, the Native American Graves Protection and Repatriation Act of 1990, Public Resources Code Section 5097, and California Health and Safety Code Section 7050 and Section 7052.

iv. The protection procedures to follow should construction crews discover cultural resources during project-related earthwork, include the following:

1. All soil disturbing work within 25 feet of the find shall cease.

2. The project applicant shall retain a qualified archaeologist to provide and implement a plan for survey, subsurface investigation, as needed, to define the deposit, and assessment of the remainder of the site within the project area to determine whether the resource is significant and would be affected by the project.

3. Any potential archaeological or tribal cultural resources found during construction activities shall be recorded on appropriate California Department of Parks and Recreation forms by a qualified archaeologist. If the resource is a tribal cultural resource, the consulting archaeologist shall consult with the appropriate tribe, as determined by the Native American Heritage Commission, to evaluate the significance of the resource and to recommend appropriate and feasible avoidance, testing, preservation or mitigation measures, in light of factors such as the significance of the find, proposed project design, costs, and other considerations. The archeologist shall perform this evaluation in consultation with the tribe.

b. Areas with Known Cultural Resources. For all projects within areas of known cultural resources as documented in the 2015 General Plan EIR Table 4.4-2, Cultural Resources in the Project Study Area and Vicinity, as subsequently revised, supplemented, or replaced by the City, and the archaeological or tribal cultural resources cannot be avoided, in addition to the requirements in Section E.1.a for all construction projects with ground-disturbing activities, the following additional actions shall be implemented prior to ground disturbance:

i. The project applicant shall retain a qualified archaeologist to conduct a subsurface investigation of the project site, and to ascertain the extent of the deposit of any buried archaeological materials relative to the project's area of potential effects, in consultation with a tribal representative as applicable. The archaeologist shall prepare a site record and file it with the California Historical Resource Information System and the City of Cupertino.

ii. If the resource extends into the project's area of potential effects as determined by the archaeologist, the resource shall be evaluated by a qualified archaeologist to determine if the resource is eligible for listing on the California Register of Historical Resources. If the qualified archaeologist determines that the resource is not eligible, no further action is required unless there is a discovery of additional resources during construction (as required above for all construction projects with ground-disturbing activities). If the qualified archaeologist

4. Exceptions

determines that the resource is eligible, the qualified archaeologist shall identify ways to minimize the effect which the project applicant shall implement. A written report of the results of investigations and mitigations shall be prepared by the qualified archaeologist and filed with the California Historic Resources Information System Northwest Information Center and the City of Cupertino.

CMC Section 17.04.050(E)(2), *Protect Human Remains and Native American Burials*. The project applicant shall comply with California Health and Safety Code Section 7050.5 and California Public Resources Code Section 5097.98.

a. In the event of discovering human remains during construction activities, there shall be no further excavation or disturbance of the site within a 100-foot radius of the remains, or any nearby area reasonably suspected to overlie adjacent remains.

b. The Santa Clara County Coroner shall be notified immediately and shall make a determination as to whether the remains are Native American.

c. If the Santa Clara County Coroner determines that the remains are not subject to his authority, he shall notify the Native American Heritage Commission (NAHC) within 24 hours.

d. The NAHC shall attempt to identify descendants (Most Likely Descendant) of the deceased Native American.

e. The Most Likely Descendant has 48 hours following access to the project site to make recommendations or preferences regarding the disposition of the remains. If the Most Likely Descendant does not make recommendations within 48 hours after being allowed access to the project site, the owner shall, with appropriate dignity, reinter the remains in an area of the property secure from further disturbance and provide documentation about this determination and the location of the remains to the NAHC and the City of Cupertino. Alternatively, if the owner does not accept the Most Likely Descendant's recommendations, the owner or the descendent may request mediation by the NAHC. Construction shall halt until the mediation has concluded.

CMC Section 17.04.050(H), *Protect Paleontological Resources During Construction.* If paleontological resources are encountered during ground disturbing and/or other construction activities, all construction shall be temporarily halted or redirected to allow a qualified paleontologist, which shall be retained by the project applicant, to assess the find for significance. If paleontological resources are found to be significant, the paleontological monitor shall determine appropriate actions, in coordination with a qualified paleontologist, City staff, and property owner. Appropriate actions may include, but are not limited to, a mitigation plan formulated pursuant to guidelines developed by the Society of Vertebrate Paleontology and implemented to appropriately protect the significance of the resource by preservation, documentation, and/or removal, prior to recommencing activities. Measures may include, but are not limited to, salvage of unearthed fossil remains and/or traces (e.g., tracks, trails, burrows); screen washing to recover small specimens; preparation of salvaged fossils to a point of being

ready for curation (e.g., removal of enclosing matrix, stabilization and repair of specimens, and construction of reinforced support cradles); and identification, cataloging, curation, and provision for repository storage of prepared fossil specimens.

With mandatory compliance with CMC Sections 17.04.050(E)(1), 17.04.050(E)(2), and 17.04.050(H), the proposed project will not result in significant impacts to unknown archaeological, tribal cultural, or paleontological resources. Therefore, the exception under CEQA Guidelines Section 15003.2(f) does not apply to the proposed project.

4. Exceptions

This page has been intentionally left blank.

5. Conclusion

As discussed in Chapter 3, *Exemption*, of this document, the proposed project meets the criteria for categorically exempt in-fill development projects in CEQA Guidelines Section 15332 and because, as discussed previously, none of the exceptions to the categorical exemptions in CEQA Guidelines Section 15300.2 apply, and it will not have a significant effect on the environment pursuant to CEQA, this analysis finds that a Notice of Exemption is appropriate for the proposed project.

5. Conclusion

This page has been intentionally left blank.

Subject: Idlewild Shopping Center
19610 to 19590 Stevens Creek Boulevard and 10025, 10045, 10051, 10065, and 10075 East Estates Drive
Cupertino, California

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Connolly:

We are pleased to present our phase I environmental site assessment of the subject property (Property) located in Cupertino, California. The attached report includes a description of the site assessment activities, along with our findings, opinions, and conclusions regarding the Property.

We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property. We have prepared this phase I environmental site assessment in general accordance with United States Environmental Protection Agency (USEPA) *Standards and Practices for All Appropriate Inquiries (AAI) Final Rule* set forth in 40 Code of Federal Regulations (CFR) Part 312 (USEPA, 2021a) and the American Society for Testing and Materials (ASTM) E1527-21: *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM International, 2021). We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-21.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

Jenna Keith, PE

Nadine Periat, PG

EXECUTIVE SUMMARY

We conducted a phase I environmental site assessment (phase I ESA) for the subject property located at 19610 to 19590 Stevens Creek Boulevard and 10025, 10045, 10051, 10065, and 10075 East Estates Drive in Cupertino, California (the Property). The Property is approximately 2.7 acres in area and is identified by Assessor's Parcel Numbers (APNs) 369-06-002, 369-06-003, and 369-06-004.

The Property consists of an approximately 41,000-square-foot commercial building and associated parking and landscaped areas. Most of the former tenant spaces are vacant, while a furniture store, restaurant, and salon remain on site. Review of historical records indicates that one to three structures were located along the eastern edge of the Property as early as 1897. Orchards are visible across the Property and surrounding sites in the earliest aerial photograph of the Property from 1939. Between 1956 and 1960, the orchards were felled, and the Property was redeveloped with the present-day commercial building and parking areas. The Property has remained in similar condition since. One-Hour Dry Cleaners operated a dry-cleaning business at 10045 East Estates Drive using tetrachloroethylene (PCE) as a dry-cleaning solvent between the 1960s and 2010, when the dry-cleaning operation converted to using a hydrocarbon-based solvent. We understand that the proposed development for the Property includes 55 high-density residential units (row townhouses).

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps, and physical setting sources. A Property reconnaissance was conducted to observe site use and current conditions, and to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials. Written/oral interviews were conducted with persons knowledgeable about current and past site use.

A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and in general, did not identify contaminated facilities within the appropriate ASTM search distances that would reasonably be expected to impact the Property. However, the site reconnaissance and records review found documentation and physical evidence of soil and soil gas impairments associated with the past use of the Property.

Several previous environmental investigations have been conducted to evaluate whether the subsurface has been impacted by the historical use of the Property for agriculture and dry cleaning operations. Soil samples were collected at the Property in 2021 and analyzed for agrichemicals (organochlorine pesticides [OCPs], arsenic, and lead), in addition to other constituents. Soil gas samples were collected and analyzed for volatile organic compounds (VOCs). Soil sampling results suggested that shallow soil had not been impacted by historical agricultural activities. However, soil and soil gas have been impacted with chlorinated solvents associated with historical dry cleaning operations.

One-Hour Dry Cleaners is listed as an open cleanup program site (Case ID 2023-17s) under the oversight of Santa Clara County Department of Environmental Health (SCCDEH) and is listed on GeoTracker under global ID T10000021095. Several soil, groundwater, soil gas, indoor air, and sub-slab soil gas investigations have been conducted to evaluate the lateral and vertical extents of the PCE plume and human health risks to building occupants. The majority of PCE impacts are within the back alley behind (west of) the former One-Hour Cleaners tenant space, which is

presently vacant. PCE was likely released from dumping mop water out the back door, or leaked from the sanitary sewer. The PCE released at the Property impacts soil and soil gas; there is no indication of free product in the subsurface, and groundwater has not been encountered to the total depth explored (80 feet) during previous investigations. The soil gas plume extends west to the off-site property located at 19620 Stevens Creek Boulevard. The Property owner, Idlewild Tenants in Common (TIC), entered into a voluntary remedial action agreement (RAA) with SCCDEH on July 31, 2023.

Terraphase Engineering Inc. (Terraphase) prepared a Remedial Action Plan (RAP) for the Property dated September 18, 2023. The RAP proposed implementing soil vapor extraction (SVE) to remedy PCE impacts in the vadose zone beneath the Property and neighboring property to the west. The objective of SVE is to reduce the concentrations of PCE and its breakdown products in the subsurface to a level where a vapor barrier equipped with a passive venting system can mitigate indoor air intrusion of PCE at concentrations above residential indoor air environmental screening levels (ESLs)[1]. The SVE system began operating in June 2024. By December 2024, Terraphase and SCCDEH concluded that SVE had been successful, and that at the current soil gas concentrations, it was appropriate to discontinue active remediation.

The SVE system was shut down in January 2025 to monitor for rebound; however, SCCDEH opined that the soil gas concentrations had not reached equilibrium. An additional extraction well was installed near the northwestern corner of the on-site commercial building and has been operating since April 2025. SVE system operation and rebound testing will continue in accordance with SCCDEH requirements.

In addition to the documented on-site PCE release, several nearby historical gasoline service stations, dry cleaners, and the former Vallco Shopping Mall have been evaluated as potential sources of soil gas impacts at the Property. We have not identified nearby releases likely to pose a current or future vapor intrusion risk to the Property. Furthermore, any soil gas impacts that remain at the Property following SVE operation will be mitigated by the installation of vapor intrusion mitigation systems (VIMS) beneath the planned buildings.

Based on the findings of this assessment, no Historical Recognized Environmental Conditions (Historical RECs) were identified for the Property. The following REC and (future) Controlled REC were identified.

- **REC: Former One-Hour Cleaners PCE Releases**
  - Discharges of PCE from former dry cleaning operations have impacted the Property and off-site property to the west. PCE is present in soil gas and, to a lesser degree, soil, at concentrations exceeding residential and/or commercial ESLs[2,3]. We understand that Idlewild TIC is responsible for site cleanup prior to transfer of the Property. We recommend continued remediation-related activities of the PCE plume at the Property as appropriate with regulatory oversight.

[1] San Francisco Bay Regional Water Quality Control Board (SFBRWQCB); Indoor Air Direct Exposure Human Health Risk Levels (Table IA-1); Residential; January 2019 (Rev. 1).
[2] SFBRWQCB; Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Residential; January 2019 (Rev. 1).
[3] SFBRWQCB; Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Commercial/Industrial; January 2019 (Rev. 1)

- **Future Controlled REC: Institutional Controls/Deed Restriction**
  - Institutional Controls (ICs) will be required following successful completion of SVE. ICs will likely include an access agreement to allow SCCDEH personnel on Site at any time; funding for SCCDEH oversight; restriction of uses of the Property, restriction of modifications to the Property development without SCCDEH approval, and operation maintenance and monitoring (OM&M) and reporting for the VIMS that is expected to be installed under the planned residential units. A corresponding deed restriction would be recorded for the Property to ensure the systems remain operational. When approved, the ICs/deed restriction will represent a controlled REC for the Property.

Based on our review of regulatory databases and observations during the site reconnaissance, we identified the following business environmental risks (BERs), potential environmental concerns (PECs), and/or de minimis conditions. While not considered to be RECs, these features may pose an environmental concern to the Property. We briefly discuss each feature below.

- A hazardous building materials survey performed in 2023 identified asbestos-containing materials in the on-site commercial building. The cost of asbestos abatement and disposal is considered a BER.

The following data gap and/or data failure were identified during this assessment.

- At the time of report publication, we had not received a response from the Santa Clara County Fire Department (SCCFD).

The data gap and/or data failure identified during this assessment does not affect our conclusions as to the presence of RECs at the Property. We believe that sufficient information has been obtained during our contracted scope of services to evaluate the presence of RECs at the Property. This assessment has revealed evidence of one REC, no Historical RECs, one (future) Controlled REC, and no evidence of significant data gaps, in connection with the Property. We recommend the following.

- The remedial program should be continued under the oversight of SCCDEH.
- SVE wells should be destroyed under SCCDEH oversight prior to Property redevelopment.
- We recommend engaging a licensed asbestos abatement contractor to develop an asbestos abatement plan and remove asbestos-containing materials prior to building demolition.

We have performed a phase I environmental site assessment of the Property in general conformance with the scope and limitations of ASTM E1527-21 and the standards and practices of the AAI Final Rule (40 CFR Part 312). Any exceptions to, or deletions from this practice are described in Sections 7.0 and 9.0 of the report.

Please note, the findings from this report are valid until May 9, 2026, one year from the earliest dates of the following components: interviews, review of government records, visual inspections, and declaration of environmental professional. Updates of portions of the assessment may be necessary after a period of 180 days from the earliest date of the above components (November 5, 2025).

1.0 INTRODUCTION

1.1 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

This phase I ESA was performed at the request of Toll Brothers, Inc., the User, for the purpose of environmental due diligence during property acquisition. The objective of this phase I ESA is to identify RECs associated with the Property. As defined in the ASTM Standard Practice E1527-21, a REC is:

> *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

ASTM Standard Practice E1527-21 provides that identified RECs can be evaluated and classified into Controlled RECs or Historical RECs based on the following definitions.

A Controlled REC is defined as:

> *…a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place, subject to implementation of required controls (for example, activity and use limitations, institutional controls, or engineering controls).*

A Historical REC is defined as:

> *…a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example, activity and use limitations or other property use limitations).*

In addition, while not necessarily related to those environmental issues required to be investigated in this practice, a BER is defined as:

> *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate.*

A de minimis condition is defined as:

> *A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*

1.2 USER-PROVIDED INFORMATION

ASTM Standard Practice E1527-21 describes responsibilities of the User, Toll Brothers, Inc., to complete certain tasks in connection with the performance of AAI into the Property. We requested that the User provide the following documents and information:

- Previous environmental reports (Section 3.0)
- Preliminary Title Report (Section 4.1.1)
- User questionnaire and/or interview (Section 6.0)

1.3 DETAILED SCOPE OF SERVICES

The scope of services performed included the following.

- A review of previous environmental reports prepared for the Property provided to us and/or readily available.
- A review of publicly available and practicably reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practicably reviewable standard historical sources, aerial photographs, fire insurance maps, and physical setting sources.
- A Property reconnaissance to observe site use and current conditions, and storage, use, production, or disposal of hazardous or potentially hazardous materials.
- Written/oral interviews with owners/occupants and public sector officials, as needed.
- Preparation of this report with our findings, opinions, and conclusions.

1.4 NON-SCOPE SERVICES

No non-scope services were performed in conjunction with this assessment.

1.5 SITE LOCATION AND DESCRIPTION

The Property is located at 19610 to 19590 Stevens Creek Boulevard and 10025, 10045, 10051, 10065, and 10075 East Estates Drive, Cupertino, California (Figures 1 and 2). The approximately 2.7-acre Property is identified as APNs 369-06-002, 369-06-003, and 369-06-004 (Figure 3) and is currently occupied by the following tenants.

TABLE 1.5-1: Current Site Occupants

ADDRESS	OCCUPANT
19590 Stevens Creek Boulevard	House of Falafel
19610 Stevens Creek Boulevard	Soon's Beauty Salon
10025 East Estates Drive	Vacant (former watch repair shop)
10045 East Estates Drive	Vacant (former One-Hour Dry Cleaners)
10051 East Estates Drive	Vacant (former Joyheart Cupertino Chinese grocery store)
10055 East Estates Drive	Vacant (former Le Caprice, Boutique and fine tailoring)
10065 East Estates Drive	Vacant (former Computer 4 Kids Green Apple Education)
10071 East Estates Drive	Vacant (former Mongkol and Sons Collision)
10075 East Estates Drive	United Furniture Club

1.6 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES

The Property is currently a commercial shopping center with some active businesses. The majority of the tenant spaces are vacant. However, the Property is zoned as a general commercial, planned residential development (P[CG, R4]), which permits high, very high, and highest density multiple-family residential uses. We understand that the proposed development for the Property will include 55 high-density residential units (row townhouses).

Based on a review of current records and observations during our site reconnaissance, the adjoining site uses are summarized below.

TABLE 1.6-1: Adjoining Site Uses

DIRECTION	SITE USE
North	Stevens Creek Boulevard and former Vallco shopping center
South	Single-family residential neighborhood
East	East Estates Drive, gasoline service station/tire repair shop, restaurant, and medical offices
West	Commercial shopping center

2.0 PHYSICAL SETTING

2.1 TOPOGRAPHY, GEOLOGY, AND HYDROGEOLOGY

According to published topographic maps, the Property is relatively level and is situated at approximately Elevation 200 feet (NAVD88). Review of the Geologic Map of the Cupertino and San Jose West Quadrangles, Santa Clara and Santa Cruz Counties (Dibblee and Minch, 2007) found that the Property is underlain by Holocene-aged surficial sediments (Qa.1) consisting of alluvial fan deposits (fine-grained sand, silt, and gravel).

Groundwater has not been encountered on site during previous environmental explorations. Groundwater is likely present at the Property at depths greater than 100 feet below the ground surface (bgs) (Path Forward Environmental Engineering and Geology, 2021b). Therefore, we reviewed the following sources for groundwater depth and flow direction records for the Property and nearby facilities.

- The Geocheck – Physical Setting Source Summary of the Environmental Data Resources, Inc. (EDR) Radius Map Report (Appendix A)
- The Department of Water Resources (DWR) Online Water Data Library website (California DWR, n.d.)
- EnviroStor, a website maintained by the State of California Department of Toxic Substances Control (DTSC, n.d.)
- GeoTracker, a website maintained by the State of California Water Resources Control Board (SWRCB, n.d.)

The Geocheck – Physical Setting Source Summary indicated that one Federal United States Geological Survey (USGS) well and 56 state wells are located within 1 mile of the Property. The DWR website did not identify any wells within 1 mile of the Property. The following information was obtained regarding local groundwater conditions.

TABLE 2.1-1: Local Groundwater Conditions

FACILITY/WELL NAME	DISTANCE AND DIRECTION FROM PROPERTY	REPORTED GROUNDWATER DEPTH	REPORTED GROUNDWATER FLOW DIRECTION
Tosco #11220	150 feet east	70.86 to 93.06 feet	Northeast
19720 Stevens Creek Boulevard	460 feet west	80 feet	Northeast

The site-specific groundwater depth and flow direction were not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors.

2.2 OIL AND GAS

We reviewed the Department of Conservation (DOC), Geologic Energy Management (CalGEM) website and map database to determine if any historical oil and/or gas wells were located within or near the Property (CalGEM, n.d.). No oil or gas wells were mapped on or within 1 mile of the Property.

We reviewed the United States Department of Transportation, Pipeline and Hazardous Materials Safety Administration (USDOT-PHMSA) National Pipeline Mapping System (NPMS) public viewer website for information about petroleum, natural gas, or hazardous liquid storage, processing, or transmission facilities in the vicinity of the Property (USDOT-PHMSA, n.d.). No facilities were mapped on or within ¼ mile of the Property. An active natural gas pipeline maintained by PG&E is located along Stevens Creek Boulevard, along the northern Property boundary. This pipeline would not be expected to pose an environmental concern to the Property.

2.3 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Public Health (DPH) has conducted studies of radon risks throughout the state, sorted by zip code (California DPH, 2016). Results of the studies indicate that 93 tests have been conducted within the Property zip code, with four tests exceeding the current USEPA action level of 4 picocuries per liter (pCi/L).

As part of this assessment, we conducted a Tier 1 Vapor Encroachment Screen (VES) for the Property in general accordance with ASTM E2600-22 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM International, 2022). The purpose of the VES is to evaluate whether a vapor encroachment condition (VEC) exists at the Property. A VEC represents the presence of likely presence of vapor-forming compounds (VFCs) in the vadose zone of the Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Property. We did not identify any on-site releases of petroleum hydrocarbons, but we note that the fuel constituent benzene has been detected in soil gas at the Property (refer to Section 3.0). Additionally, the former on-site dry cleaner is a source of chlorinated VOC impacts in soil and soil gas which creates a VEC for the Property. We also identified several potential petroleum hydrocarbon sources of vapor intrusion within $^{1}/_{10}$ mile of the Property and VOC sources within $^{1}/_{3}$ mile of the Property: Former Vallco Shopping Center (petroleum hydrocarbon and VOC source; 10123 North Wolfe Road); two gasoline service stations (petroleum hydrocarbon sources; 19550 and 19480 Stevens Creek Boulevard); and two dry cleaners (VOC sources; 19720 and 19705 Stevens Creek Boulevard). These sites are further

discussed in Section 4.3.2 and after further review, are not believed to pose a current vapor intrusion risk to the Property.

3.0 PREVIOUS ENVIRONMENTAL REPORTS

The Property was used for agriculture between 1939 and 1956. The existing commercial building was constructed at the Property in 1960. One-Hour Dry Cleaners operated at the Property using PCE as a dry-cleaning solvent between the 1960s and 2010, when the dry-cleaning operation converted to using a hydrocarbon-based solvent. The dry cleaner was identified as an environmental concern during a phase I ESA conducted by Path Forward Environmental Engineering and Geology (Path Forward, not available for ENGEO's review). The phase I ESA also identified potential environmental contamination from OCPs and metals associated with the former agricultural use of the Property.

This facility is listed as an open cleanup program site (case ID 2023-17s) under the oversight of SCCDEH, and is listed on GeoTracker under global ID T10000021095. Previous environmental investigations are summarized below.

Path Forward Environmental Engineering and Geology. 2021a. DRAFT Subsurface Investigation Report, Cupertino Retail Center, 10025-10075 East Estates Drive and 19590-19610 Stevens Creek Boulevard, Cupertino, California. August 6, 2021.

Path Forward conducted a phase II environmental site assessment (phase II ESA) for the Property in June 2021, to evaluate shallow soil and soil gas conditions for environmental due diligence purposes in support of the planned redevelopment of the Property. The objective was to evaluate shallow soil impacts associated with the former agricultural operations at the Property and evaluate soil gas impacts from the former dry cleaner.

The scope of the investigation included the advancement of seven soil borings (B1 through B7) to a maximum depth of 15.5 feet below the ground surface (bgs). Soil samples were collected at 1.0 and 2.5 feet. Temporary soil gas probes were installed at depths of 5 and 15 feet bgs in the back alley and around the property boundary, and soil gas samples were collected. A total of 14 soil samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline, diesel, and motor oil (TPH-g, TPH-d, and TPH-mo), VOCs, semi-volatile organic compounds (SVOCs), California Assessment Manual (CAM) 17 Metals, OCPs, polychlorinated biphenyls (PCBs), and asbestos. A total of 14 soil gas samples were analyzed for VOCs and fixed gases.

Soil results were compared to the San Francisco Bay Regional Water Quality Control Board's (SFBRWQCB's) residential ESLs[4]. Arsenic results were compared to the naturally occurring background concentration of 11 milligrams per kilogram (mg/kg)[5]. The soil results indicated that PCE and 4,4'-DDT were detected in several samples above laboratory reporting limits but below residential ESLs. None of the arsenic concentrations in the samples exceeded 11 mg/kg. The OCP and arsenic results suggested that the Property had not been adversely impacted by historical agricultural activities. TPH, SVOCs, metals, PCBs, and asbestos were either not detected above laboratory reporting limits or were detected below the ESLs.

[4] SFBRWQCB; Environmental Screening Levels (ESLs); Direct Exposure Human Health Risk Levels: Residential Shallow Soil Exposure (Table S-1); 2019 (Rev. 2).
[5] Duverge, D.J., Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Region, December 2011.

Soil gas results were compared to the SFBRWQCB's residential subslab/soil gas vapor intrusion human health risk levels[6] with an attenuation factor of 0.03. The results indicated that PCE was detected above the ESL of 15 micrograms per cubic meter (µg/m^3) in six samples, at concentrations ranging between 17 µg/m^3 and 20,000 µg/m^3. The maximum concentration was detected in B3 at 15 feet bgs. Chloroform was also detected above the residential ESL of 4.0 µg/m^3 in Sample B7 at 5 feet (5.7 µg/m^3). Several samples also exceeded the commercial ESL[7] of 67 µg/m^3 for PCE. Path Forward calculated the cumulative vapor intrusion cancer risks and noncancer hazard indices for each soil gas sample. The highest estimated cancer risk was estimated to be $1.3x10^{-3}$ in Sample B3 at 15 feet, above the 1 to 100 per million ($1×10^{-6}$ to $1×10^{-4}$) risk management range. The highest estimated non-cancer index was estimated to be 14, above the threshold value of 1.

Path Forward concluded that the extent of PCE in soil gas is mostly limited to the northwestern portion of the Property, and noted that based on the cancer risk, a response action (vapor mitigation and/or source remediation) was warranted. Path Forward recommended that groundwater samples should be collected near the locations of elevated soil gas concentrations to assess if PCE has impacted groundwater; and that the risk to current occupants from PCE vapor intrusion should be evaluated. Path Forward recommended that the Property owner submit the report to the local regulatory agency for review.

Path Forward Environmental Engineering and Geology. 2021b. DRAFT Additional Investigation Report, Cupertino Retail Center, 10025-10075 E Estates Drive and 19610 Stevens Creek Boulevard, Cupertino, California. October 1, 2021.

Path Forward conducted an additional investigation in September 2021 to characterize subsurface conditions and determine if PCE had impacted groundwater. The scope of the investigation included the advancement of three borings (B8, B9, B9A) along the northern portion of the Property (B9A was a step-out boring advanced due to refusal at B9). Path Forward additionally reviewed off-site (downgradient) soil gas data. During drilling, borings were screened for VOCs using a photoionization detector (PID).

During the investigation, the highest PID readings were detected in Boring B8 at 15 feet bgs and decreased with depth. Path Forward opined that a secondary PCE source in groundwater was unlikely to be present based on this trend. All borings encountered refusal between 72 and 97 feet bgs, and did not encounter groundwater.

During their evaluation of off-site properties, Path Forward reviewed available data for the Vallco Shopping Mall. Details regarding this site are discussed in Section 4.3.2.

Path Forward concluded the following.

- Shallow groundwater is not present within the upper 100 feet of the Property.
- Based on PID results and off-site deep soil gas samples, a secondary source of PCE is unlikely to be present at depth.

[6] SFBRWQCB; Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Residential; January 2019 (Rev. 1).
[7] SFBRWQCB Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Commercial/Industrial; January 2019 (Rev. 1)

- The presumed downgradient extent of PCE at the Property is generally defined by off-site data collected during investigations of the former Vallco Mall.

Path Forward Environmental Engineering and Geology. 2022. DRAFT Regulatory Path for Remediation, Cupertino Retail Center, 10025-10075 E Estates Drive and 19610 Stevens Creek Boulevard Cupertino, California. Memorandum from David A Grunat, P.G., C.H.G. (Path Forward) to Deke Hunter (Hunter Storm, LLC). February 25, 2022.

Path Forward provided a memorandum dated February 25, 2022, to summarize previous environmental investigations conducted at the Property and to provide a summary of the anticipated regulatory path for remediation present at the Property.

Path Forward recommended that results of previous investigations be presented to an appropriate regulatory agency for review and development of next steps. Path Forward recommended SCCDEH as the most appropriate regulatory agency, as SCCDEH was currently overseeing two adjacent PCE release sites (Vallco Town Center and 19720 Stevens Creek Boulevard). Path Forward noted that additional site characterization would likely be required.

Path Forward indicated that as the Property was anticipated to undergo redevelopment, it is likely that the most appropriate and financially efficient remedial action would be the excavation of approximately 1,200 cubic yards of contaminated soil following building demolition. Excavated soil would be loaded directly into haul trucks and transported to an appropriate disposal facility. Soil samples would be collected to confirm that the remedial excavation successfully removed the PCE-impacted soil.

Path Forward also indicated that residual PCE in soil gas would likely remain present for some time until it could naturally attenuate below regulatory action levels. During that period, the SCCDEH could require ongoing monitoring of soil gas to demonstrate that concentrations are decreasing following the excavation. Additionally, buildings constructed in this area would require VIMS incorporated into the building slabs, which would require ongoing OM&M. Finally, a deed restriction for the Property that includes ongoing OM&M would likely be required to ensure the systems remained operational.

Terraphase Engineering. 2022a. Indoor Air and Soil-Gas Sampling Results, 10025, 10045, and 10051 East Estates Drive, Cupertino, California. May 11, 2022.

Terraphase Engineering (Terraphase) conducted an investigation of the Property in April 2022 to evaluate the vapor intrusion risk in the former dry cleaner, watch repair shop, and current Chinese grocery store. The scope of the investigation included the collection of indoor air and sub-slab soil gas samples from three units: the dry cleaner (10045 East Estates Drive), watch repair shop (10025 East Estates Drive), and Chinese grocery store (10051 East Estates Drive).

Results of the indoor air samples were compared to the SFBRWQCB commercial/industrial indoor air ESLs[8]. The results indicated that PCE was not detected above the ESL of 2 µg/m^3. However, benzene was detected above the indoor air ESL of 0.42 µg/m^3 in the sample collected from the former watch repair shop (1.4 µg/m^3). Terraphase concluded that the detection of benzene was not likely due to vapor intrusion; rather, more likely due to in-house chemicals.

[8] SFBRWQCB; Indoor Air Direct Exposure Human Health Risk Levels (Table IA-1); Commercial/Industrial; January 2019 (Rev. 1).

The sub-slab soil gas results were compared to the sub-slab/soil gas commercial ESLs. The PCE concentrations reported in the samples collected from the former watch repair shop, dry cleaner, and just outside the Chinese grocery store were 120 µg/m^3, 79 µg/m^3, and 99 µg/m^3, respectively. All concentrations exceeded the commercial/industrial soil gas ESL of 67 µg/m^3.

Terraphase provided the following conclusions.

- The PCE release only impacts soil and soil gas. The bulk of PCE is present within the back alley. PCE was likely released from dumping mop water out the back door or leaked from the sanitary sewer.
- The PCE detections in the soil samples collected at 1 foot and 2.5 feet bgs from Boring B4 (Path Forward, 2021a), located in the far northern end of the site adjacent to Stevens Creek Boulevard, likely represent a sewer leak or migration through utility trench bedding sand.
- Terraphase agreed with Path Forward that it is unlikely for PCE to impact groundwater due to the depth to groundwater and clay layers encountered during Path Forward's previous investigation between 25 to 80 feet in B8 and 45 to 65 feet in B9 (Path Forward, 2021a).

At the time of publication of Terraphase's report, the former dry cleaner and watch repair shop had been vacated; hence, there was no risk at the time. Terraphase provided the following recommendations.

- Terraphase recommended that epoxy coating should be installed on the concrete slabs in the former dry cleaner and watch repair shop if the dry cleaner and watch repair shop units were to be occupied in the future. The PCE detection in the grocery store (0.13 µg/m^3) represented a risk of 7×10^{-8} under a commercial/industrial scenario.
- Terraphase disagreed with Path Forward's conclusion that PCE could be remediated by excavation of 1,222 cubic yards of soil. Terraphase noted that the vertical extent of contamination was not sufficiently delineated; the 15-foot samples collected during Path Forward's 2021 investigation reported higher PCE concentrations than the shallow samples. If remedial action was warranted, Terraphase recommended SVE, which was more cost effective.
- Terraphase noted that the need for remediation was questionable, as the threat to groundwater was minimal, and the pathway between future residential receptors and impacted soil could be eliminated (based on site development plans included on the figures in Path Forward's (2021b) report, which showed the bulk of the impacted soil would be beneath parking lots). Terraphase noted that based on the extent of the plume, vapor barriers may need to be installed beneath Buildings 1 and 3 of the proposed development; however, extensive remedial actions did not appear to be warranted.
- The highest concentration of PCE detected in soil gas at the Vallco site was 5,890 µg/m^3 in sample SV-14N. Terraphase noted that it is highly unlikely that the PCE release at the Property crossed Stevens Creek Boulevard and impacted the Vallco site. As groundwater was not a potential pathway, the PCE would have to reach the Vallco site through either soil gas migration or a preferential pathway. Based on the demonstrated attenuation of PCE in soil gas between the release area (behind the dry cleaner) and samples collected at the north of the Property, it was unlikely that PCE could migrate in soil gas across Stevens Creek Boulevard at the concentrations observed. Additionally, Terraphase concluded that transport through the sanitary sewer was unlikely, as the Property sanitary sewer drains to a 12-inch sewer main in Stevens Creek Boulevard that drains to the east, away from the Vallco site.

Terraphase. 2022b. Soil-Gas Investigation Report, 10025-10075 East Estates Drive, Cupertino, California; August 16, 2022.

Terraphase conducted an additional investigation in July 2022 to evaluate the current concentrations at the former dry cleaner unit and the extent of PCE migration in soil gas. The scope of the investigation included installation and sampling of three permanent and one temporary nested soil vapor probes in the former dry cleaner unit, near the western site boundary, and on the adjacent property to the west. Two triple-depth nested borings (B-11 and B-12) were installed with probe depths of 5, 15, and 25 feet bgs in the alley behind the dry cleaner. One dual-depth nested boring (B-10) was installed within the dry cleaner with probe depths of 5 and 10 feet bgs. One temporary dual-depth nested boring (B-13) was installed on the neighboring site to the west of the Property with probe depths of 7 and 10 feet.

The sample results indicated that the highest concentration of PCE detected was 30,000 µg/m^3 in the 10-foot sample collected from inside the former dry cleaner (B-10). The PCE concentrations from samples collected in the back alley were consistent with Path Forward's previous results. PCE was non-detect in the 25-foot sample collected from Boring B-12; however, the 25-foot sample collected from Boring B-11 contained a PCE concentration of 5,700 µg/m^3.

Terraphase concluded that PCE had migrated through the sand in most of the borings between 15 and 25 feet bgs to the adjacent property to the west. PCE was detected in the 15-foot sample collected from B-13 at a concentration of 7,100 µg/m^3. However, the shallow PCE concentration within sample B-13 was below commercial screening levels.

Terraphase concluded that the PCE released at the Property impacts only soil and soil gas; there is no indication of free product in the subsurface. PCE had migrated westward beneath the adjacent commercial property at concentrations above the commercial ESLs; however, Terraphase noted that ESLs are intended to be conservative. Terraphase recommended that SVE be implemented to remediate soil vapor concentrations on site and off site. Terraphase recommended a 300-cubic-feet-per-minute SVE system. Terraphase also opined that removal of impacted soil is not economically feasible, as the impacts extend to 25 feet bgs.

Terraphase. 2022c. Soil-Vapor Investigation and Soil-Vapor Extraction Pilot Test Report, 10025-10075 East Estates Drive, Cupertino, California; September 6, 2022.

Terraphase prepared an additional investigation report dated September 6, 2022, to summarize the previous investigations conducted by Path Forward and Terraphase, and to provide recommendations for additional sampling. The report also includes a work plan for additional soil gas investigations at the neighboring property and a pilot scale test of SVE at the Property.

Terraphase noted that although the levels of contamination may not, under a risk-based analysis, require remediation, the Property owner has decided to conduct remediation because the Property is for sale and because the soil gas plume extends beneath the neighboring property to the west. The following scopes of work were recommended as part of the work plan.

Additional Air Sampling

Terraphase recommended that three indoor air samples and one outdoor ambient air sample be collected from the neighboring building to the west of the Property (19620 Stevens Creek Boulevard). Prior to sampling, the building would be screened for indoor air sources and a building survey form would be completed.

Additional Nested Soil Gas Monitoring Point Installation and Sampling

Terraphase recommended that three permanent, triple-nested soil vapor monitoring wells (B-14 through B-16) be installed at the neighboring property to the west of the Property, to facilitate the collection of soil gas samples and for monitoring of vacuum responses during SVE pilot testing to evaluate the effective vacuum radius of influence.

SVE Pilot Test Program

Terraphase proposed a SVE pilot test to evaluate the effectiveness of SVE as a remedy to reduce concentrations of PCE in soil gas at the Property and neighboring site to the west, to below the commercial/industrial ESLs, and to evaluate SVE design parameters useful for full-scale design and technical feasibility under site-specific conditions. The proposed scope of the SVE pilot test included installing one, 6-inch-diameter PVC SVE extraction well near the back door of the dry cleaner. The well would be screened in a layer of gravel from 13 to 23 feet bgs, and soil vapor would be extracted to evaluate several SVE parameters.

Terraphase. 2023a. Soil-Vapor Extraction Pilot-Scale Test Work Plan, 10025, 10045, and 10051 East Estates Drive, Cupertino, California. June 20, 2023.

Terraphase prepared a work plan for an SVE pilot-scale study dated June 20, 2023. The work plan expanded upon the recommendations provided in the pilot test report (Terraphase, 2022c). The scope of work completed is discussed below.

Terraphase. 2023b. Preliminary Results of the Soil Vapor Extraction Pilot Test Conducted at the Idlewild Shopping Center, 10025-10075 East Estates Drive, Cupertino, California. August 4, 2023.

Terraphase prepared a technical memorandum to summarize the preliminary results of the pilot-scale SVE test. Terraphase conducted a 120-hour pilot-scale test of SVE in the alleyway behind the former dry cleaner between July 18 and July 23, 2023.

Terraphase installed the extraction well, SVE-01, in the alleyway. The well contained a 4-inch-diameter pipe screened between 7 and 23 feet bgs. A trailer-mounted SVE system was installed across the alley from SVE-01. The system is equipped with a variable frequency drive (VFD) controlling a blower capable of producing an air maximum flow rate of 190 standard cubic feet per minute at 190.5 inches of water column (in H_2O)/14 inches of mercury (in Hg) vacuum. The off-gases from the SVE well are scrubbed in two 300-pound canisters of granular activated carbon (GAC) arranged in series.

The soil gas concentrations generally indicated that PCE concentrations decreased in each well.

As part of the off-site investigation, Terraphase installed two Vapor Pins (SV-7 and SV-8) in the sidewalk adjacent to the building of the Property, approximately 70 feet from SVE-01. The PCE results were non-detect for SV-7 and 11 µg/m^3 for SV-8.

Terraphase. 2023c. Remedial Action Plan, 10025-10075 East Estates Drive and 19590-19610 Stevens Creek Boulevard, Cupertino, California. September 18, 2023.

Terraphase prepared a RAP for the Property. The purpose of the RAP was to remedy PCE impacts in the vadose zone beneath the Property and neighboring property to the west. The objective was to reduce the concentrations of PCE and its breakdown products in the subsurface

to a level where a vapor barrier equipped with a passive venting system can mitigate indoor air intrusion of PCE at concentrations above residential indoor air ESLs, when combining the total risk from each detected compound in shallow soil gas. The initial remedial goal was to reduce PCE concentrations to below 460 µg/m^3 in shallow soil gas, based on an attenuation factor of 1,000 for a vapor barrier and passive venting system.

Terraphase noted that the radius of influence (ROI) determined in the SVE pilot study was 80 feet. Given this effective radius, the pilot-scale SVE system would be able to reach the known extents of the VOC plume under the Property and neighboring property to the west.

The preliminary remedial design included the following: permitting requirements, an OM&M plan, summary of design details, performance monitoring metrics, system shutdown conditions, and contingency actions. Terraphase also noted that ICs would be required following completion of SVE. ICs will likely include the following.

- An access agreement to allow SCCDEH personnel on site at any time.
- Funding for SCCDEH oversight.
- OM&M and reporting for the vapor barrier that is expected to be installed under the planned residential units.

ENGEO. 2023a. Phase I Environmental Site Assessment, Idlewild Shopping Center, 19610 to 19590 Stevens Creek Boulevard and 10025, 10045, 10051, 10065, and 10075 East Estates Drive, Cupertino, California. October 25, 2023. Project No. 22934.000.001.

We prepared a phase I ESA for the Property dated October 25, 2023. At the time of the assessment, the Property consisted of an approximately 41,000-square-foot commercial building and associated parking and landscaped areas.

Based on the findings of the assessment, no Historical RECs were identified for the Property. The following REC and (future) Controlled REC were identified:

- **REC: Former One-Hour Cleaners PCE Releases**
  - Discharges of PCE from former dry cleaning operations have impacted the Property and off-site property to the west. PCE is present in soil gas and, to a lesser degree, soil, at concentrations exceeding residential and/or commercial ESLs. We understand that Idlewild TIC is responsible for site cleanup prior to transfer of the Property. We recommended continued remediation-related activities of the PCE plume at the Property as appropriate with regulatory oversight.

- **Future Controlled REC: Institutional Controls/Deed Restriction**
  - ICs will be required following successful completion of SVE. ICs will likely include an access agreement to allow SCCDEH personnel on Site at any time; funding for SCCDEH oversight; and OM&M and reporting for the vapor barrier that is expected to be installed under the planned residential units. A corresponding deed restriction would be recorded for the Property to ensure the systems remain operational. When approved, the ICs/deed restriction will represent a Controlled REC for the Property.

Based on our observations during the site reconnaissance, we also identified the following PEC, not considered to be a REC.

- During the site reconnaissance, several wells observed were missing bolts or gaskets. The Property owner should be alerted, and these features should be repaired to maintain the integrity of the wells and ensure that they do not act as a pathway for stormwater to enter the subsurface.

We recommended the following.

- The proposed remedial program should be continued under the oversight of SCCDEH.
- Wells with missing bolts and gaskets should be repaired to maintain the integrity of the wells and ensure that they do not act as a pathway for stormwater to enter the subsurface.

ENGEO. 2023b. Environmental Peer Review, Idlewild Shopping Center, 19610 to 19590 Stevens Creek Boulevard and 10025, 10045, 10051, 10065, and 10075 East Estates Drive, Cupertino, California. November 30, 2023. Project No. 22934.000.001.

We prepared an environmental peer review of previous environmental reports for the Property dated November 30, 2023, and provided review comments. We generally agreed with the findings stated in Path Forward's and Terraphase's reports, including the characterization of PCE impacts and the conclusion that former dry cleaning activities likely had not affected the former Vallco site. We disagreed with excavation as a sole remedy but supported Terraphase's recommendation for SVE and targeted soil excavation(s).

We noted that benzene had been detected in soil gas above the residential ESLs and noted that SCCDEH may consider benzene a contaminant of concern. We also noted that indoor air sampling had not been completed at the neighboring property as recommended, and requested clarification.

The SVE pilot test lacked key data, and we recommended including boring logs, operational metrics, and updated plume maps. We also advised further soil sampling to define the depth of PCE impacts to soil and assess sewer line contributions.

We also questioned the proposed remediation timelines and suggested clarifying the SVE operational schedule and regulatory review periods. Lastly, we noted that SCCDEH may require site-specific attenuation factors and active VIMS, and we agreed that institutional controls and a deed restriction will likely be needed post-remediation.

Terraphase. 2024a. Technical Memorandum, Idlewild Soil Vapor Extraction (SVE) System Status Update. August 12, 2024.

Terraphase prepared a status update of the SVE system that began operating in June 2024. Terraphase reported that concentrations of PCE in the SVE well influent had decreased by more than a factor of 10 since operation began. PCE concentrations in the monitoring wells had similarly decreased. Terraphase concluded that the system was operating effectively.

Terraphase. 2024b. Soil Vapor Extraction Operations, 10025-10075 East Estates Drive and 19590-19610 Stevens Creek Boulevard, Cupertino, California. December 4, 2024.

Terraphase prepared a report on SVE system progress which included the following.

- A gridded soil sampling program in the former dry cleaner in September 2023.
- The installation of one new soil gas monitoring point (B-14).
- Six rounds of soil gas/SVE system monitoring.

Terraphase concluded the following:

- No significant “hot spot” of PCE was identified in soil beneath the former dry cleaning tenant space. The source of PCE in soil vapor at the Property was likely incidental releases of mop water containing PCE released to the environment through leaks in the sanitary sewer.
- The extent of PCE in soil vapor has been adequately characterized in all directions from the likely release location. The depth of PCE impacts has been adequately characterized.
- The SVE remediation has been successful. Concentrations of PCE in soil gas have fallen by almost two orders of magnitude at location B-10 inside the former dry cleaner unit. Other monitored locations throughout the radius of influence have also seen significant reductions. Terraphase concluded that at the current soil gas concentrations, it was appropriate to discontinue active remediation. Residual PCE concentrations would be managed through the mitigation measures planned for the future Property development.
- Terraphase recommended discontinuing the SVE system and initiating rebound testing to assess if the effect of SVE on the PCE concentrations in the subsurface was permanent.

SCCDEH. 2025a. Letter, One-Hour Dry Cleaners, 10045 East Estates Dr., Cupertino, CA 95014, APN: 369-06-22. Site Cleanup Program Case No. 2023-17s, GeoTracker ID No. T10000021095. January 17, 2025.

SCCDEH issued a letter to the Property owner summarizing their review of Terraphase’s (2024b) report. SCCDEH agreed it was acceptable to discontinue the SVE system operation and initiate rebound testing but required changes to the scope of testing.

Terraphase. 2025. One-Month Soil-Vapor Extraction (SVE) Rebound Testing Report, 10025-10075 East Estates Drive and 19590-19610 Stevens Creek Boulevard, Cupertino, California. March 12, 2025.

The SVE system was shut down on January 23, 2025, to monitor for rebound. Terraphase prepared a report to summarize the rebound testing results. Terraphase noted that in general, PCE concentrations had stabilized in the wells sampled. Terraphases noted that Idlewild TIC was not requesting site closure at the time. The future housing developer would be installing VIMS under the future structures and would continue to monitor the subsurface under SCCDEH oversight. Terraphase opined that PCE concentrations in the subsurface were well below levels where a properly installed VIMS would protect future site occupants. Terraphase also recommended abandonment of the sanitary sewer behind the former dry cleaner and opined that this would remove residual PCE source material.

Terraphase opined that the SVE system had removed as much PCE mass from the subsurface as was practical, and recommended decommissioning the SVE system, as continued operation was unlikely to result in significant further removal from the subsurface.

SCCDEH. 2025b. Letter, One-Hour Dry Cleaners, 10045 East Estates Dr., Cupertino, CA 95014, APN: 369-06-22. Site Cleanup Program Case No. 2023-17s, GeoTracker ID No. T10000021095. April 3, 2025.

SCCDEH issued a letter summarizing their review of Terraphase's (2025) report. SCCDEH did not agree with Terraphase's recommendation that the SVE system could be shut down because they did not believe that the soil gas concentrations had reached equilibrium. SCCDEH opined that in order to demonstrate that the soil gas concentrations had reached equilibrium, the rebound monitoring period should be at least 6 months.

On March 31, 2025, SCCDEH received an email from Terraphase stating that the SVE system would be restarted and an additional SVE well would be installed and connected to the existing system. SCCDEH noted that this decision was counter to Terraphase's previous conclusions and recommendations. SCCDEH required quarterly remediation progress reports documenting the operational parameters of the system.

We note that the SVE system was restarted on April 4, 2025. During our reconnaissance of the Property on June 3, 2025, we observed the second SVE well and operation of the SVE system. As of the publication of this report, no additional reports documenting the SVE progress or sampling results have been uploaded to GeoTracker.

4.0 RECORDS REVIEW

4.1 PROPERTY RECORDS

4.1.1 Title Report/Ownership

ASTM Standard Practice E1527-21 requires a review of title records dating back to 1980. A Preliminary Title Report (PTR) lists recorded land title details, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a PTR can vary greatly by jurisdiction. As a result, we utilize a PTR, when provided to us, as a supplement to other historical record sources. We assume that any environmental liens, activity and use limitations (AULs), deed restrictions, and/or institutional controls for the Property are noted in the PTR.

A PTR for the Property, prepared by Chicago Title Company and dated May 29, 2025, was provided for our review. The Property title is vested in the following entities: Joseph Nacy Castello; Rosalie Castello Flores; Tamara M. Foglesong; Jennifer Castello; Rick Costello II; Victor M. Castello; Gina C. Wagner; Geno I. Castello and Victoria M. Castello; Rosalyn J. Castello; Ryan Andersen; Cara Clover Borromei; Danica Cavigliano; and Nicolas Cavigliano.

No references to environmental liens, AULs, deed restrictions, and/or institutional controls were noted. However, the PTR states that there are three monitoring wells located on the Property with no recorded agreements. Several soil gas extraction and monitoring wells associated with SVE

are located on the Property. These wells should be destroyed prior to Property redevelopment. This report is included in Appendix B.

4.1.2 Environmental Liens and Activity and Use Limitations

The PTR did not identify environmental liens or AULs associated with the Property. In addition, a questionnaire completed by the User (Appendix C) indicated that they are not aware of any environmental cleanup liens recorded against the Property.

We reviewed two engineering control (EC) and IC registries for environmental liens or AULs associated with the Property: EnviroStor, a website maintained by DTSC, and GeoTracker, a website maintained by SWRCB. No records of environmental liens or AULs were noted. However, we anticipate that a deed restriction will be recorded on the Property following completion of SVE and installation of VIMS.

4.2 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to identify uses or occupancies of the Property and surrounding areas that are likely to have led to RECs on the Property.

4.2.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

We reviewed historical USGS topographic maps and aerial photographs for discernible changes to the Property. EDR provided the following maps and photographs, presented in Appendices D and E. No Sanborn fire insurance maps were available for the Property; the search report is presented in Appendix F.

TABLE 4.2.1-1: Historical Review Summary

HISTORICAL MAP/PHOTOGRAPH	YEARS
Topographic Maps	1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, 2012, 2015, 2018, 2021
Aerial Photographs	1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1991, 1998, 2006, 2009, 2012, 2016, 2020
Sanborn Maps	N/A

In the 1897 topographic map, the Property is depicted as undeveloped. Stevens Creek Boulevard is located in its present-day alignment north of the Property. A dirt road and structure extend south from Stevens Creek Boulevard, adjacent to the eastern side of the Property. Calabazas Creek is depicted approximately $^{1}/_{8}$ mile southeast of the Property. In the 1939 aerial photograph, orchards are located across the Property and surrounding sites. The dirt road and three structures (homesteads) appear to be either adjacent to the current Property boundary or within the eastern side of the Property. The Property and surrounding areas appeared in similar condition until the late 1950s. Between 1956 and 1961, the orchards were felled and the Property was redeveloped with the present-day commercial building and parking areas. The Property has appeared in similar condition since.

The remaining agricultural areas around the Property were redeveloped into commercial uses between the early 1960s and early 1980s. The gasoline service station adjacent to the east of the Property across East Estates Drive was constructed between 1956 and 1961. Residential developments were constructed south of the Property. The former Vallco shopping center was

constructed between 1968 and 1974. Between 1974 and 1982, the commercial shopping center to the west of the Property was constructed. The Vallco shopping center was demolished between mid-2019 and early 2020. Recent aerial imagery shows that grading has begun on the Vallco redevelopment.

4.2.2 City Directory

City Directories, published since the 18th century for major towns and cities, list the name of the resident or business associated with each address. A city directory search conducted by EDR is included in Appendix G. Listings for the Property are tabulated below.

TABLE 4.2.2-1: City Directory Listings

Other listings in the vicinity of the Property are primarily associated with various commercial establishments such as restaurants, banks, medical and dental offices, gasoline service stations, and retail stores.

4.3 ENVIRONMENTAL DATABASE RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases for records for the Property and nearby properties. Details of the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

4.3.1 Property Database Records

The Property is listed on the following environmental database record sources.

TABLE 4.3.1-1: Environmental Database Listings for the Property

FACILITY	STREET	DATABASES
One-Hour Cleaners by Lee / One-Hour Martinizing by Lee/ Enterprise Controls, Inc.	10045 East Estates Drive	CERS, CPS-SLIC, CUPA LISTINGS, DRYCLEANERS, ECHO, EDR HIST CLEANER, EMI, FINDS, HAZNET, HWTS, RCRA-LQG

The listings for the Property pertain to hazardous waste generation, disposal, and release for the One-Hour Cleaners facility. The Property is listed as a dry cleaner between 1969 and 2014. Halogenated solvents are listed as wastes between 1993 and 2000. Petroleum hydrocarbon solvent is listed as a waste in 2019. Site investigations related to releases from the former One-Hour Cleaners facility are discussed in Section 3.0.

4.3.2 Adjoining and Nearby Property Database Records

The following databases include adjoining and nearby facilities listed within the appropriate ASTM search distances of the Property on environmental database record sources.

Adjoining and nearby properties of potential environmental concern are discussed below.

Former Vallco Shopping Center – 10123 North Wolfe Road

The former Vallco Shopping Mall, located between approximately 120 to 2400 feet north-northeast of the Property, is listed in the AST, CA FID UST, CERS, CHMIRS, CORTESE, CPS-SLIC, CUPA LISTINGS, ECHO, E MANIFEST, FINDS, HAZNET, HIST CORTESE, HIST LUST, HIST UST, HWTS, LUST, RCRA NONGEN/NLR, RCRA-SQG, SWEEPS UST, and UST FINDER RELEASE databases searched by EDR. The Vallco Shopping Mall operated from 1979 to 2018, and is divided into the western portion (west of North Wolfe Road) and the eastern portion (northeast of North Wolfe Road and Vallco Parkway). We discuss the western and eastern sites below.

Western Vallco Site:
One closed leaking underground storage tank (LUST) case (Sears Automotive Center, GeoTracker ID T0608552828) and one open cleanup program site (CPS) case (Vallco Town Center, GeoTracker ID T10000017167) are associated with the western Vallco Site. The LUST case pertains to the removal of six underground storage tanks (USTs) in 1985 and subsequent soil sampling and removal.

The CPS case pertains to investigations of PCE release(s). The source is not known due to the many tenants of the mall. WSP conducted a soil gas investigation at the Vallco facility in 2021 which included an evaluation of whether the Idlewild site may be contributing to PCE in soil gas at Vallco by sampling along the southern Vallco site boundary (WSP, 2021). WSP concluded that it was unlikely that the PCE release at the Property contributed to elevated concentrations at Vallco. Terraphase also evaluated WSP's findings and opined that it was unlikely that PCE could migrate in soil gas across Stevens Creek Boulevard at the concentrations observed at Vallco.

In 2023, as part of redevelopment of the western Vallco Mall site, soil was excavated to a depth of 15 feet for the construction of underground parking, and additional recent targeted excavations were conducted to remove soils impacted with PCBs, TPH, pesticides, and metals. Additionally, a PCE hot spot was excavated to a depth of 20 feet (WSP, 2023). The 2024 Updated Site Management Plan prepared by EKI provides recent soil and soil gas data showing that several VOC plumes remain in soil gas at the western Vallco Mall site after removal, though concentrations have decreased since pre-excavation. Generally, the plumes are confined to the western Vallco Mall site and contain concentrations of VOCs within the same order of magnitude or one order of magnitude higher than the residential soil gas ESLs, and below concentrations observed at the Property. No further remediation is required or planned at Vallco. We do not consider this site a potential source of petroleum hydrocarbon or VOC impacts to the Property, and vice-versa.

Eastern Vallco Site:
One closed LUST case (J.C. Penney, GeoTracker ID T0608500770) and one open CPS case (East Vallco Mall Site, GeoTracker ID T10000020648) are associated with the eastern site. The eastern Vallco site is in the early stages of redevelopment and investigation. Because this site is situated east of the western Vallco Mall site and northeast of the Property, any impacts from the eastern Vallco site would impact the western Vallco before the Property. Due to the distance and location of the eastern Vallco site, we do not consider this site a potential source of vapor impacts to the Property.

Joe's Union Service/Tosco #11220/Mobil Service Station/Vallco 76 Service Station #112220-30242/Apro LLC DBA United Pacific 2205/Stan Boyett & Son Inc. DBA Boyett Petroleum/Estates Mobile Service/Platinum Energy #2611220/ConocoPhillips Company #2611220 – 19550 Stevens Creek Boulevard

This former gasoline service station, located adjacent to the eastern side of the Property across East Estates Drive, is listed in the CUPA LISTINGS, EDR HIST AUTO, HIST UST, LUST, CERS HAZ WASTE, SWEEPS UST, CA FID UST, CERS TANKS, CERS, CORTESE, HIST CORTESE, HIST LUST, SWEEPS UST, EMI, HIST RCRA NONGEN/NLR, RCRA-SQG, FINDS, ECHO, and UST databases searched by EDR. This site is associated with two closed LUST cases on GeoTracker: Tosco #11220 (global ID T0608575840) and Mobil (global ID T0608500926).

According to the case summary available on GeoTracker for the Mobil case, in 1985, a loss of 1,800 gallons of product was identified through inventory reconciliation. The USTs were removed in 1985 and soil investigations were completed in the UST area to 120 feet bgs. Very low levels of contamination were detected and groundwater was not encountered. Santa Clara Valley Water District (SCVWD) issued a case closure/no further action letter on March 15, 1996.

In April 2001, free product was encountered in a soil boring. Extensive additional investigation and remediation was subsequently conducted. In May 2012, verification groundwater monitoring commenced. The site was granted case closure by SCCDEH on September 23, 2014. Based on distance and the remedial actions implemented at this facility, this facility would not be expected to pose a concern to the Property.

Shell Automotive/Jiffy Lube #2355/Allan Domash – 19480 Stevens Creek Boulevard

This gasoline service station/Jiffy Lube site, located approximately 417 feet east of the Property, is listed in the LUST, HIST LUST, CORTESE, HIST CORTESE, CERS, AST, CERS HAZ WASTE, CA FID UST, CERS TANKS, CUPA LISTINGS databases searched by EDR. This facility is also listed as a closed LUST case on GeoTracker under case ID T0608501269.

According to the case closure summary/no further action letter, one 10,000-gallon gasoline UST, two 6,000-gallon gasoline USTs, three 12,000-gallon gasoline USTs, and one 550-gallon waste oil UST were removed from the site between 1987 and 1990. Soil vapor extraction was performed at the site from February to August 1992, and four consecutive quarters of groundwater monitoring were conducted after shutdown of the SVE system. Based upon the results of source removal, remedial actions performed, and verification monitoring, the extent of soil contamination was defined, and groundwater did not appear to be impacted, and SCVWD issued case closure on September 30, 1994. Based on distance and the case closure status, this facility would not be expected to pose a concern to the Property.

One-Hour Photo Service/Holiday Cleaners of America – 19720 Stevens Creek Boulevard

This former photo developing facility and former dry-cleaning facility, located approximately 466 feet west of the Property, is listed in the CERS, CPS-SLIC, CUPA LISTINGS, DRYCLEANERS, EMI, FINDS databases searched by EDR. This facility is also listed as a cleanup program site on GeoTracker under case ID T10000016970, with the status open – assessment and interim remedial action as of April 1, 2021.

The site owner entered into a voluntary remedial action agreement with SCCDEH on April 1, 2021. According to the Corrective Action Work Plan (CAP) (WSP, 2022), the southwestern area of the site is impacted by PCE in soil gas associated with historical dry cleaning operations. In September 2019 and January 2020, samples of soil gas, sub-slab vapor, and indoor air were collected to evaluate the potential for vapor intrusion from VOCs. Analytical results revealed that PCE was detected in sub-slab vapor samples (from 37 to 1,500 µg/m^3) and in soil gas samples (from 1.68 to 1,050 µg/m^3). Furthermore, PCE was detected in indoor air samples (from 1.15 to 2.64 µg/m^3). In September 2020, WSP performed additional sub-slab vapor and indoor air sampling and analyses. The results indicate that the PCE impacts to soil gas are concentrated in the southwestern area of the site and do not appear to extend easterly beyond the site boundary (towards the Property). Therefore, this facility is not expected to pose a concern to the Property.

Wardrobe Custom Cleaners/Minuteman Press/Mel's Cleaners – 19705 Stevens Creek Boulevard

This former dry cleaning facility, located approximately 577 feet northwest of the Property, is listed in the CUPA LISTINGS, ECHO, EDR HIST CLEANER, FINDS, and RCRA-SQG databases searched by EDR. No information is available regarding chemicals handled at this property or previous investigations; however, based on distance, this facility would not be expected to pose a concern to the Property.

Orphan Properties

One property is listed on the EDR "Orphan Summary" list but appears to be located beyond the ASTM recommended radius search criteria.

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that releases from the above-stated database sites pose a current risk to the Property. Furthermore, soil gas conditions at the Property are well characterized and vapor intrusion will be mitigated through the installation of VIMS beneath future building foundations.

4.4 REGULATORY AGENCY FILES AND RECORDS

The following agencies were contacted for records pertaining to the Property.

TABLE 4.4-1: Regulatory Agency Records

NAME OF AGENCY	RECORDS REVIEWED
City of Cupertino Building and Planning Departments	We contacted the City of Cupertino Building and Planning Departments on May 9, 2025, regarding historical building permit and planning records for the Property. The Building and Planning Departments provided the following files. • Planning documents, construction plans, and certificates of occupancy for the original businesses at the Property (circa 1960) and renovations for later Property tenants (various dates). • Applications for electrical and building permits for One-Hour Martinizing Dry Cleaners at 10045 East Estates Drive, from 1960. • A plumbing/water system permit for 10045 East Estates Drive from 1986. • Signage, HVAC, and other building permits for the other Property addresses.

NAME OF AGENCY	RECORDS REVIEWED
City of Cupertino Fire Department	We contacted the City of Cupertino Fire Department on May 9, 2025, regarding hazardous material and UST records for the Property. The City of Cupertino Fire Department indicated they have no files pertaining to the Property.
City of Cupertino Code Enforcement Department	We contacted the City of Cupertino Code Enforcement Department on May 9, 2025, regarding records of illegal dumping and other code violations for the Property. The Code Enforcement Department indicated they have no files pertaining to the Property.
Santa Clara County Department of Environmental Health	We contacted the SCCDEH on May 9, 2025, regarding environmental records for the Property. The SCCDEH provided inspection forms for the former One-Hour Cleaners dated between 1999 and 2015. The inspection forms did not suggest that there were large-scale releases of hazardous materials. We also contacted Mr. Aaron Costa, the case worker for the One-Hour Dry Cleaners cleanup case, to schedule a phone interview. However, Mr. Costa declined to conduct an interview and referred us to the case's GeoTracker page.
Santa Clara County Fire Department (SCCFD)	We contacted the SCCFD on May 12, 2025, regarding environmental records for the Property. As of the publication of this report, we have not received a response from SCCFD. This constitutes a data gap for the Property.
Santa Clara Valley Water District (Valley Water)	We reviewed the online well information map provided by Valley Water regarding groundwater well records for the Property. The map depicts two soil vapor extraction wells, SVE-01 and SVE-02, on the Property.
Santa Clara County Assessor's Office	We reviewed online parcel maps provided by the Santa Clara County Assessor's Office. The Property boundary and APNs provided in the EDR radius map report are consistent with the online parcel maps.
California SWRCB	We reviewed GeoTracker, the website maintained by SWRCB, for files pertaining to the Property. The Property is listed as an open CPS case under global ID T10000021095.
California DTSC	We reviewed EnviroStor, the website maintained by DTSC, for files pertaining to the Property. No listings were found for the Property.

4.5 PER- AND POLYFLUOROALKYL SUBSTANCES

Per- and polyfluoroalkyl substances (PFAS) are a class of compounds used in a wide range of industrial processes and consumer products, including carpets, clothing, fabrics for furniture, packaging for food and cookware, and firefighting foam. PFAS are known as "forever chemicals" as the substances are highly recalcitrant in the environment. Common land uses associated with PFAS include sites where firefighting foam was used or stored; wastewater treatment plants utilizing biosolids spreading; chemical and electronics manufacturing facilities; landfills; and other industrial manufacturing facilities. In 2024, the USEPA announced its final rule designating two PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 40 CFR 302 (USEPA, 2024a) and published the Final PFAS National Primary Drinking Water Regulation for six PFAS (USEPA, 2024b).

We reviewed the EDR Radius Map Report for PFAS database listings as well as the GeoTracker PFAS map (SWRCB, n.d.) for records of investigative orders, locations with PFAS data, or water system wells on the Property and within 1 mile of the Property. Neither the Property nor nearby

sites were identified on PFAS database listings. Two water wells were mapped on the GeoTracker PFAS map within 1 mile (approximately 0.6 mile north-northwest of) the Property; neither of the wells reported detectable concentrations of PFAS compounds. Based on the historical use of the Property and nearby sites, we did not identify any on-site or off-site sources of PFAS that would be likely to impact soil or groundwater beneath the Property.

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY

We conducted a reconnaissance of the Property on June 3, 2025. The reconnaissance was performed by Jenna Keith, a Project Engineer of ENGEO. We looked for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. We also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or pre-existing USTs. Finally, we viewed adjoining properties from the Property and public thoroughfares to determine features, activities, uses, and conditions at adjoining properties that may indicate RECs at the Property. Photographs taken during the site reconnaissance are presented in Figures 4A through 4C.

We did not view the interior of any of the active or vacant commercial tenant spaces.

5.2 SITE AND ADJOINING PROPERTIES SETTING

The Property can be accessed through both Stevens Creek Boulevard and East Estates Drive. The commercial structure on the Property is situated along the western edge with an alley behind (west of) the building and parking in the northern and eastern areas. The SVE trailer and piping are located behind the former One-Hour Cleaners tenant space, near the northwestern corner of the building. The Property is bounded to the north by Stevens Creek Boulevard and the former Vallco shopping center; to the south by a single-family residential neighborhood; to the east by East Estates Drive, a gasoline service station/tire repair shop, a restaurant, and medical offices; and to the west by a commercial shopping center.

5.3 SITE CONDITIONS

The following table summarizes our observations during the reconnaissance.

TABLE 5.3-1: Site Conditions

FEATURE TYPE	OBSERVATIONS
Structures or Other Improvements	An approximately 41,000-square-foot commercial building is located in the western portion of the Property. The building is a one-story wooden frame structure with concrete flooring. Some units were occupied with commercial businesses and some were vacant. The exterior of the commercial building is finished with shingles on the rooftops and stone columns.
Roads	The Property is accessed via East Estates Drive and Stevens Creek Boulevard.
Potable Water Supply/ Source	Drinking water is supplied to the Property by Valley Water.
Sewage Disposal, Septic Systems, or Cesspools	Sewage disposal connections to the Property are provided by the municipal wastewater system.

FEATURE TYPE	OBSERVATIONS
Wastewater Treatment System	No wastewater treatment systems were observed at the Property during the reconnaissance.
Stormwater Conveyance System	Stormwater drains were observed throughout the parking lot during the reconnaissance.
Wells	No groundwater wells were observed on the Property at the time of the reconnaissance. Soil vapor extraction and monitoring wells were observed at the Property and at the adjacent 19620 Stevens Creek Boulevard site associated with SVE operation.
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No hazardous substances or petroleum products in connection with identified uses were observed within the Property during the site reconnaissance.
Hazardous Substance and Petroleum Product Containers Not in Connection With Identified Uses	No hazardous substances or petroleum products not in connection with identified uses were observed within the Property during the site reconnaissance.
Unidentified Substance Containers	No unidentified substance containers were observed on the Property.
Storage Tanks (underground and above-ground)	No above-ground storage tanks or evidence of existing USTs were observed during the site reconnaissance.
Strong, Pungent, or Noxious Odors and Their Sources	No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.
Standing Surface Water and Pools or Sumps Containing Liquids	No pools of potentially hazardous liquid were observed within the Property at the time of our reconnaissance.
Drums, Totes, and Intermediate Bulk Containers	Nine 55-gallon drums associated with previous environmental investigations were observed on the Property at the time of the reconnaissance.
Polychlorinated Biphenyl (PCB)-Containing Equipment	No potential PCB-containing equipment, including transformers, were observed within the Property during our site reconnaissance.
Pits, Ponds, and Lagoons	No pits, ponds, or lagoons were observed within the Property at the time of our reconnaissance.
Stained Soil/Pavement	No stained soil or pavement was observed within the Property at the time of our reconnaissance.
Stressed Vegetation	No signs of stressed vegetation were observed on the Property at the time of our reconnaissance.
Solid Waste/Debris	A waste collection area was observed in the southwest corner of the Property. The debris primarily consisted of furniture and cardboard boxes.
Stockpiles/Fill Material	No stockpiles or fill material were observed on the Property during the reconnaissance.

5.4 INTERIOR OBSERVATIONS

We did not enter any onsite structures during the reconnaissance. From the outside, the commercial building is a one-story, wood-frame building with concrete flooring. The frame was observed to be in good condition. The southwestern corner of the building consisted of a storage space. Most of the former tenants have vacated the building.

5.5 ASBESTOS, LEAD, AND PCB-CONTAINING BUILDING MATERIALS

Common asbestos-containing building materials (ACBMs) include flooring and associated adhesive; baseboard and baseboard adhesive; carpet adhesive; leveling compound; drywall, joint and/or texturing compounds; ceiling tiles; roofing felts; roof patching compounds; and mechanical/boiler system insulation. Federal regulations (40 CFR Part 61, Subpart M) require that potential ACBMs be sampled and analyzed for the presence of asbestos prior to any renovation or demolition activities that disturb such materials (USEPA, 2021b). Common lead-containing building materials include lead-based paint; roofing and pipework; and glazing and leaded glass. Common PCB-containing building materials include caulk, grout, and joint material; hydraulic fluid in elevators; fluorescent light ballasts; mastic used in tile and carpet; oil-based paints, sealants, coatings, varnishes, and lacquers; and asphaltic roofing. Hazardous building materials are generally found in buildings constructed prior to 1980.

An asbestos, lead, and PCB-containing building material survey is considered an ASTM non-scope item and was not conducted by ENGEO as part of this assessment. However, we were provided an Asbestos Inspection report prepared by Stockton Environmental Inc., dated October 25, 2023. The report identified both non-friable and friable ACBMs. The report recommended preparation of an asbestos abatement plan and engagement of a registered asbestos abatement contractor to remove ACBMs prior to demolition.

6.0 INTERVIEWS

We requested written and/or oral interviews with the User; the present owners of the Property; and the SCCDEH case worker for the Former One-Hour Dry Cleaners case to obtain information regarding RECs in connection with the Property. The SCCDEH case worker declined our request for interview and referred us to GeoTracker. The questionnaires are presented in Appendix C.

6.1 USER INTERVIEW

Mr. Robert Connolly of Toll Brothers, Inc. completed a User-based environmental site questionnaire pertaining to applicable environmental information regarding the Property on May 12, 2025. In the questionnaire, Mr. Connolly identified the current Property owner as the Castello family. Mr. Connolly identified potential environmental issues with the Property as discussed in ENGEO's 2023 phase I ESA. Mr. Connolly is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. Mr. Connolly has indicated that the purchase price of the Property is reflective of fair market value of the Property.

6.2 KEY SITE MANAGER INTERVIEW

A Key Site Manager is defined as the current Property owner or owner representative, leasing agent, or other person having good knowledge of the uses and physical characteristics of the Property. Mr. Jeffrey Raines of Terraphase completed a Key Site Manager-related environmental site questionnaire on behalf of the Property owner on June 2, 2025. The questionnaire pertains to applicable environmental information regarding the Property and adjoining properties. In the questionnaire, Mr. Raines indicated that the Property was formerly used for agriculture; has been occupied by the current shopping center since 1960; and that the current Property owner, Idlewild TIC, assumed title of the Property in 2021. Mr. Raines indicated that the Property was formerly used for dry cleaning which released PCE into the subsurface.

The questionnaire references the gasoline service station located at 19550 Stevens Creek Boulevard (APN 369-06-007) as part of the Property. We note that this site is not part of the Property.

7.0 FINDINGS AND OPINIONS

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps, and physical setting sources. We conducted a reconnaissance of the Property to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and conducted written/oral interviews with persons knowledgeable about current and past site use.

7.1 FINDINGS

A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and in general, did not identify contaminated facilities within the appropriate ASTM search distances that would reasonably be expected to impact the Property. However, the site reconnaissance and records review found documentation and physical evidence of soil and soil gas impairments associated with the past use of the Property.

Based on the findings of this assessment, one REC, no Historical RECs, and one (future) Controlled REC were identified for the Property.

- **REC: Former One-Hour Cleaners PCE Releases**
  - Discharges of PCE from former dry cleaning operations have impacted the Property and off-site property to the west. PCE is present in soil gas and, to a lesser degree, soil, at concentrations exceeding residential and/or commercial ESLs[9,10]. We understand that Idlewild TIC is responsible for site cleanup prior to transfer of the Property. We recommend continued remediation-related activities of the PCE plume at the Property as appropriate with regulatory oversight.

- **Future Controlled REC: Institutional Controls/Deed Restriction**
  - ICs will be required following successful completion of SVE. ICs will likely include an access agreement to allow SCCDEH personnel on Site at any time; funding for SCCDEH oversight; restriction of uses of the Property, restriction of modifications to the Property development without SCCDEH approval, and OM&M and reporting for the VIMS that is expected to be installed under the planned residential units. A corresponding deed restriction would be recorded for the Property to ensure the systems remain operational. When approved, the ICs/deed restriction will represent a controlled REC for the Property.

Based on our review of regulatory databases and observations during the site reconnaissance, we identified the following BERs, PECs, and/or de minimis conditions. While not considered to be RECs, these features may pose an environmental concern to the Property. We briefly discuss each feature below.

[9] SFBRWQCB; Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Residential; January 2019 (Rev. 1).
[10] SFBRWQCB; Subslab/Soil Gas Vapor Intrusion: Human Health Risk Levels (Table SG-1); Commercial/Industrial; January 2019 (Rev. 1)

- A hazardous building materials survey performed in 2023 identified asbestos-containing materials in the onsite commercial building. The cost of asbestos abatement and disposal is considered a BER.

7.2 DATA GAPS AND DATA FAILURES

As defined in the ASTM Standard Practice E1527-21, a data gap is:

> *A lack or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.*

A significant data gap is:

> *A data gap that affects the ability of the environmental professional to identify a recognized environmental condition.*

The following data gaps were identified during this assessment.

- At the time of report publication, we had not received a response from the SCCFD.

The data gaps identified during this assessment do not affect our conclusions as to the presence of RECs at the Property.

As defined in the ASTM Standard Practice E1527-21, a data failure is:

> *Failure to achieve the historical research objective even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. A data failure is one type of data gap.*

Data failures are common when attempting to identify the use of the Property at 5-year intervals back to the first developed use or back to 1940, whichever is earlier. While gaps in the historical record information of greater than 5 years were identified, these data failures are not considered significant given the aggregate information available.

7.3 SIGNIFICANT DEVIATIONS FROM ASTM STANDARD PRACTICE

There were no significant deviations from ASTM Standard Practice E1527-21 in the preparation of this report.

8.0 CONCLUSIONS

We have performed a phase I environmental site assessment of the Property in general conformance with the scope and limitations of ASTM E1527-21 and the standards and practices of the AAI Final Rule (40 CFR Part 312). Any exceptions to, or deletions from this practice are described in Sections 7.0 and 9.0 of the report.

We believe that sufficient information has been obtained during our contracted scope of services to evaluate the presence of RECs at the Property. This assessment has revealed evidence of one REC, no Historical RECs, and one (future) Controlled REC, and no evidence of significant data gaps, in connection with the Property. We recommend the following.

- The remedial program should be continued under the oversight of SCCDEH.
- SVE wells should be destroyed under SCCDEH oversight prior to Property redevelopment.
- We recommend engaging a licensed asbestos abatement contractor to develop an asbestos abatement plan and remove asbestos-containing materials prior to building demolition.

9.0 LIMITATIONS

9.1 ASSUMPTIONS, LIMITATIONS, AND EXCEPTIONS OF ASSESSMENT

We strive to perform our professional services in accordance with generally accepted principles and practices currently employed in the area; there is no warranty, express or implied. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports, and personal communications. Our opinions formed are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. We assume no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without our written authorization. Such authorization is essential because it requires us to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after from the earliest date of the following components: records review, site reconnaissance, interviews, declaration by environmental professional. Updates of portions of the assessment may be necessary after a period of 180 days of the earliest date of the four components.

This phase I environmental site assessment is not intended to represent a complete soil, soil gas, or groundwater characterization, nor define the depth or extent of soil, soil gas, or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. Laboratory testing of soil, soil gas, or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for PCBs, or a mold survey. A radon evaluation was not performed.

This report is based upon field and other conditions discovered at the time of preparation of our assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. We would not be aware of site contamination, such as dumping and/or accidental spillage, which occurred subsequent to our site reconnaissance.

A more extensive assessment that would include a subsurface exploration with laboratory testing of soil, soil gas, and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for the Property and if other entities are retained to provide such services, we cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies, or other changes necessary to reflect changed field or other conditions.

9.2 SPECIAL TERMS AND CONDITIONS

We have prepared this report for the exclusive use of Toll Brothers, Inc., the User. It is recognized and agreed that we have assumed responsibility only for undertaking the study for the User. The responsibility for disclosures including but not limited to this report and for remedial or mitigative action shall be solely that of the User.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PANASONIC Cerclis ID:: 901325 EPA Id: CAD041472341	***10900 N TANTAU AVENU***	***NE 1/2 - 1 (0.948 mi.)***	***0***	***9***

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

ONE HOUR CLEANERS BY EPA ID:: CAD981579311	***10045 E ESTATES DR***	***0 - 1/8 (0.000 mi.)***	***A5***	***47***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAFEWAY STORE 767 Database: RESPONSE, Date of Government Version: 01/21/2025 Status: Certified O&M - Land Use Restrictions Only Facility Id: 43280131	***6150 BOLLINGER RD***	***SSE 1/2 - 1 (0.852 mi.)***	***142***	***684***

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 14 LUST sites within

approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 54 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/11/2024 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 30 CUPA Listings sites within approximately 0.25 miles of the target property.

HEWLETT PACKARD COSA EPA ID: CAD049231319	***5301 STEVENS CREEK B***	***E 1/2 - 1 (0.942 mi.)***	***143***	***698***

Cleanup Status: PROTECTIVE FILER

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

ONE HOUR CLEANERS BY	***10045 E ESTATES DR***	***0 - 1/8 (0.000 mi.)***	***A5***	***47***

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2024 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/12/2025 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

SHELL AUTOMOTIVE	19480 STEVENS CK BD	E 0 - 1/8 (0.077 mi.)	D37	167

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal June 24, 1988): Intersil, Inc., and Siemens Components have manufactured semiconductors for several years on two locations near one another covering 15 acres in Cupertino, Santa Clara County, California. The facilities are surrounded by residential, industrial, and business areas. Investigations conducted in 1982 as part of the California Regional Water Quality Control Board s underground tank leak detection program found organic solvents, including trichloroethylene, 1,1,1-trichloroethane, tetrachloroethylene, trichlorofluoroethane, and 1,1-dichloroethylene, in soils on the site and in ground water on and off the site. Contamination is believed to have resulted from locali ed spills and from leaking underground storage tanks, piping, and other equipment involving the two companies. More than 300,000 people obtain drinking water from public wells within 3 miles of the site. Siemens and Intersil began remedial investigations at the site in 1982 and 1983, respectively, under State supervision. The underground storage tanks were removed, and in 1983 a system was installed to extract gases from soil; the system was expanded in 1985. In June 1986, the California Regional Water Quality Control Board issued Waste Discharge Requirements under the California Water Code requiring both companies to determine the extent of contamination in ground water and soils. In July 1986, a system was installedto pump contaminated ground water in the uppermost aquifer to the surface and treat it. Since April 1988, a pump and treat system for the two uppermost aquifers has been in full-scale operation. Intersil stopped operations in 1988, and all remaining underground equipment was removed. Status August 30, 1990): In February 1990, the two companies released draft reports of remedial investigations/feasibility studies for the site and off-site downgradient areas. Interim off-site remedial activities are scheduled to begin in June 1990. Also in June 1990, the State plans to issue tentative site cleanup requirements and hear public comments on the proposed remedial action plan.

Background Info:	A manufacturer of microwave electronic equipment has been in operation at the site since 1963. Manufacturing processes include the use of acids and solvents. Contamination at the site appears to be primarily associated with a neutralization sump and a chemical storage shed. The facility is located within the Hillview-Porter region. Detected soil contaminants include trichloroethene (TCE), dichloroethene (DCE), trichloroethane (TCA), and chlorobenzenes. Groundwater contaminants include TCE at 910 parts per billion (ppb), 1,1-DCE at 92 ppb, chloroform at 100 ppb, and Freon at 63 ppb. There are seven private wells and a creek downgradient of the site. There are two backup municipal supply wells within

PANASONIC (Continued) **1000218337**

1.5 miles of the site. Inhabitants of the residential area downgradient from the site are potential receptors for groundwater and surface water contamination.

Environmental Interest/Information System:
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.
Registry ID: 110071753956

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste2:	Contaminated Ground Water
Primary Waste Type:	Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs

PANASONIC (Continued) **1000218337**

may have local pretreatment programs that have not been approved by the regional board and/or EPA.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Site History:	The property with the APN 369-06-002 is currently being regulated by Santa Clara County Department of Environmental Health (DEH), and what DEH considers to be "the Site". The Site is currently owned by Idlewild TIC (tenants in common). Idlewild TIC intends to sell the Site, along with several other adjacent properties, to a housing developer to redevelop the properties for residential purposes. The Site is bounded by East Estates Drive to the east, the Market Place retail center to the west, Richwood Drive to the south, and Stevens Creek Boulevard to the north. Groundwater flow at the gasoline station was generally found to be to the northeast, away from the Site. The Site appears to have been developed since at least 1897 when a residential structure was noted. From at least 1939 until the 1950s, the Site was used for agricultural purposes, including a farmstead and orchards. The Site was redeveloped for commercial retail use in 1960. Additional details are presented in the Phase I Environmental Site Assessment report, which noted the following environmental conditions: A dry cleaner operated on the Site since at least the early 1960s. Dry cleaning operations included the use of tetrachloroethylene (PCE) from the 1960s until 2010 when the operations converted to a hydrocarbon-based solvent. Elevated concentrations of PCE in soil gas have been reported beneath the Site and adjacent properties. A Soil Vapor Extraction (SVE) System has operated at the Site since June 2024 to remediate subsurface PCE.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE

ONE HOUR CLEANERS BY LEE (Continued) **1000118162**

STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Site History:	A previous Fuel Leak Investigation Case (07S1W18L01f) was open at this site. In 1985 a loss of 1,800 gallons of product was identified through inventory reconciliation. The underground storage tanks (USTs) were removed in 1985 and soil investigations were completed in the UST area to 120 feet below the ground surface (ft bgs). Very low levels of contamination were detected and groundwater was not encountered. The case was closed on March 15, 1996. This case closure is included as Attachment 5. 2000 In September, product piping was replaced. 4 soil samples were collected beneath the dispensers and 6 soil samples were collected along the product lines at depths of 1-1.5 feet below the ground surface (ft bgs). The samples were reported to have low to non-detectable concentrations of Total Petroleum Hydrocarbons as Gasoline (TPHg), Toluene, Ethylbenzene, Xylenes and Methyl tert-Butyl Ether (MtBE). Benzene was not reported to be present in any of the samples above the laboratory reporting limit. 2001 In April, 2 soil borings (SB1 and SB2) were advanced to 75 ft bgs onsite. Groundwater was encountered and boring SB2 was completed as well MW1. Approximately +-inch of free product (FP) was measured in SB1; which was not completed as a well due to its high traffic location and lack of well supplies. 14 soil samples were collected and were reported to have maximum concentrations of 8,940 parts per million (ppm) TPHg, 99.3 ppm Benzene, 459 ppm Toluene, 157 ppm Ethylbenzene, 816 ppm Xylenes and 0.468 ppm MtBE. A grab groundwater sample was collected from boring SB1 and was reported to

MOBIL (Continued) **S103992302**

contain 248,000 parts per billion (ppb) TPHg, 14,700 ppb Benzene, 22,700 ppb Toluene, 4,860 ppb Ethylbenzene, and 25,600 ppb Xylenes. Additionally, a sample of the product (SB1-W PRODUCT) was analyzed and reported to contain 273,000 ppb TPHg, 16,700 ppb Benzene, 27,700 ppb Toluene, 5,210 ppb Ethylbenzene, 27,000 ppb Xylenes, 1,400,000 ppb Jet Fuel A, and 1,470,000 ppb TPH as Diesel (TPHd). It was reported that the presence of TPHjf and TPHd in the sample was indicative of an older fuel leak. 2002 In April, 6 wells (MW2 through MW7) were installed to 90 ft bgs. 48 soil samples were collected and reported to have maximum concentrations of 33,000 ppm TPHg, 12 ppm Benzene, 220 ppm Toluene, 170 ppm Ethylbenzene, 920 ppm Xylenes, 12 ppm MtBE, and 2.5 ppm Tert Butyl Alcohol (TBA). Following well completion, approximately 0.01 ft FP was measured in well MW5. Also at this time, a dual phase extraction (DPE) test was conducted at the site. Approximately 2,300 gallons of groundwater were extracted and disposed of offsite. It is estimated that 746.08 pounds of TPHg, 21.62 pounds of Benzene, and 31.37 pounds of MtBE were removed in the vapor phase. Based on the results of the test, DPE was found to be a good remedial method. 2003 In July and August, 4 wells (MW8 through MW11) were installed offsite to depths of 90-100 ft bgs. 44 soil samples were collected and were not reported to have concentrations of the Constituents of Concern (COCs) above the laboratory reporting limits, except for one detection of 0.015 ppm Xylenes in well MW10 at 8.5 ft bgs. In November, FP was reported to be present again in wells MW2 and MW5. Bailing commenced and continued through March 2005 to remove the FP from these wells. It is estimated that 0.66 gallons of FP was removed by this method. 2004 In July, 6 ozone sparge wells (OS6 through OS11) and 5 ozone sparge/soil vapor extraction wells (OS1/SVE1 through OS/SVE5) were installed onsite between 70 and 108 ft bgs. 15 soil samples were collected and reported to have maximum concentrations of 8,700 ppm TPHg, 90 ppm Benzene, 510 ppm Toluene, 140 ppm Ethylbenzene, 820 ppm Xylenes and 2.1 ppm MtBE. 2005 In June, the soil vapor extraction (SVE) and ozone injection systems were started at the site. 2006 In April, 2 monitoring wells (MW12 and MW13) were completed to 94 ft bgs offsite. 18 soil samples were collected and reported to have very low to non-detectable concentrations of COCs. 2008 In September, the SVE and ozone injection systems were shut down and rebound monitoring began. 2009 In July and August, 6 soil borings (B5 through B10) were advanced to depths of 80-105 ft bgs, except for boring B10, which was only advanced to 30 ft bgs. Groundwater was not encountered in borings B7, B9 and B10. Borings B9 and B10 were advanced for the collection of confirmation soil samples and groundwater was not anticipated to be encountered in these borings. Boring B7 was advanced to 100 ft bgs and left open for an hour and groundwater did not enter the boring. Borings B5, B6 and B8 were advanced an additional 4 feet past 100 ft bgs and groundwater was encountered. 2011 In October, the ozone sparge system was re-started onsite and ran through April 2012. 2012 In May, verification groundwater monitoring commenced. 2013 In February, the final groundwater monitoring event was conducted and reported maximum concentrations of 680 ppb TPHg, 36 ppb Benzene, 5.2 ppb Toluene, 10 ppb Ethylbenzene, 52 ppb Xylenes, 12 ppb MtBE, 27 ppb TBA, and 0.84 ppb 1,2-DCA. In September, 5 soil borings (B11 through B15) were advanced onsite to depths of 7-9 ft bgs. 11 shallow soil samples were collected and were not reported to have concentrations of constituents tested for present above the laboratory reporting limits.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110055838580

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Site Name:	Boyett Petroleum BP 18
Violation Date:	06-05-2024
Citation:	HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description:	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes:	REPEAT VIOLATION: The fill pipe for the used oil UST does not have secondary containment or an approved method of overfill prevention.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	02-10-2016
Citation:	HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description:	Failure to meet any of the following consolidated manifest requirements: 1) Legible receipts for each quantity of hazardous waste that is received from a generator, 2) The generator's information (name, address, identification number, contact person, telephone number of the generator, the signature of the generator or the generator's representative), 3) Date of the shipment, 4) The manifest number, 5) The volume or quantity of each waste stream received, 6) The name, address, and identification number of the authorized facility to which the hazardous waste will be transported, 7) The transporter's information (name, address, and identification number, the driver's signature), 8) A statement, signed by the generator, certifying that the generator has established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree economically practicable. 9) The generator shall retain each receipt for at least three years.
Violation Notes:	Returned to compliance on 03/07/2016. Multiple consolidated manifests were missing the EPA ID#, complete facility address, waste code, quantities of waste being shipped and the units for the amount of waste. Ensure that employees review the consolidated manifest for completeness before signing it.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	07-13-2022
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements:

BOYETT PETROLEUM BP 18 (Continued) **S101594442**

	Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 07/13/2022. The MLLD for the 89 product line failed to detect a leak, was adjusted twice, then functioned as required.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	07-13-2022
Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 07/13/2022. Two of twelve float and chain mechanisms failed to stop the flow of product at the dispenser. Following cleaning and adjustment, both functioned as required.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	06-28-2023
Citation:	HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description:	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes:	Fill piping for used oil UST does not have secondary containment or an approved method of overfill prevention.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	02-10-2016
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 03/07/2016. The violations observed during the inspection suggest that employees have not had adequate hazardous waste management training.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	144128
Site Name:	Boyett Petroleum BP 18
Violation Date:	06-28-2023

BOYETT PETROLEUM BP 18 (Continued) **S101594442**

Citation: 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description: Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes: Returned to compliance on 06/28/2023. Positive shut down of pumps was not observed when testing leak detection sensors in piping sumps. Service technicians restored functionality of positive shutdown during this inspection on 6/28/2023.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 144128
Site Name: Boyett Petroleum BP 18
Violation Date: 07-13-2022
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description: Failure to submit or maintain a current facility plot plan.
Violation Notes: Returned to compliance on 02/20/2023. Plot plan does not show where the waste oil tank and associated monitoring equipment is located. CERS submittal 2/20/2023 corrects this violation.
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 144128
Site Name: Boyett Petroleum BP 18
Violation Date: 02-10-2016
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 03/07/2016. Observed various pans and automotive parts on top of the waste coolant and used oil filter drums. Relocate items away from the drums to promote better inspections of drums for leaks and container condition.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Inspection conducted with Richard Owens. 2 Fire extinguishers serviced in October 2015. Battery cores are picked up by Interstate. Rags are laundered by Aramark. Container areas are inspected every other day. Absorbent present on site. Emergency posting is posted at facility. EPA ID# CAL000191947 is active. Observed the following wastes on site: 1 x 500 gallon used oil tank 1 x 55 gallon waste coolant drum 1 x 55 gallon used oil filter drum 2 x 20 gallon used oil rollers G020C: 1 x 55 gallon drum of waste coolant was missing hazardous waste markings. Markings were added during inspection. G023C: 1 x 55 gallon drum of waste coolant was open during inspection. Cap was found and placed on the drum. G412C: 1 x 55 gallon drum of used oil filters was missing the start date. Start date was marked on the container.

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 03/08/2017. EPA ID number CAL000143852 is currently inactive. Ms. Yamamoto was given DTSC form 1358 at the time of inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-20-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility uses sporox cold sterile and steam autoclave. Birex spray is used for surface disinfecting and ultrasonic bath uses non-hazardous enzymatic tables. Facility does not do any tooth whitening and does not dispense pharmaceuticals. Alginate trays are cleaned by hand scrubbing with water and facility does not use tartar and stain remover. Lidocaine is disposed of in accordance with medical waste management regulations. First aid kits are exchanged with HealthFirst before expiration. Amalgam scrap, chair traps, and separator waster are mailed back annually to Solmatex. Facility only uses digital x-ray. Fire extinguishers are annually serviced, spill kit is adequate, and emergency posting is up-to-date. NOTES: 1.) Ms. Yamamoto was given information on how to dispose of waste with the county's small business program. 2.) Facility has one bottle of orange solvent with lanolin that is no longer used. Ms. Yamamoto was advised that when they dispose of this material, it [Truncated]

Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 02/28/2017. Facility did not respond to the Notice of Violation issued in 2011. Return original report with current report to address this violation.

ANNE E MURRAY DDS (Continued) **S107147979**

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 5972
Site Name: ANNE E MURRAY DDS
Violation Date: 01-25-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 02/28/2017. Facility dilutes Patterson Ultra Concentrated Stain Remover for cleaning retainers, then disposes of the material to the drain (as noted in a repeat violation in 2011.) When tested, the material had a pH of approximately 2 according to inspector's pH strips. Collect this material as a hazardous waste, or use a pH meter to test each batch to determine if the pH is 2 or below. Batches with a pH equal to or below 2, the liquid must be managed as hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 5972
Site Name: ANNE E MURRAY DDS
Violation Date: 01-25-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 02/28/2017. Facility personnel have not been adequately trained to recognize and manage hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-25-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility no longer generates waste photographic fixer and developer from x-ray processing, and all x-ray waste was disposed of in may of 2015 (receipt reveiwed). Facility uses cold sterile gluteraldehyde, and previously collected and disposed of this material as hazardous waste (receipts reviewed) but will begin neutralizing it in the future. Ultrasonic bath uses a general purpose cleaner that had a pH of approximately 10 according to inspector's pH strips. Surfaces are disinfected with non-saturated wipes. Facility also uses disinfecting spray and manages inventory closely so this material is used before expiration. Facility does not generate hazardous waste from tray cleaning or tooth whitening. Tartar and stain removal and retainer cleaning uses patterson super concentrated stain remover. Amalgam is mailed back annually and lead bite wings are recycled (receipts reviewed). Facility does not dispense pharmaceuticals, exchanges first aid kits before expiration with [Truncated]

Violations:

Site ID:	39878
Site Name:	JIFFY LUBE #2355
Violation Date:	11-19-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.
Violation Notes:	Returned to compliance on 11/19/2018. Emergency contact list in plan was incomplete, with no names listed. PLAN WAS UPDATED BY FILLING IN TABLE IN EMERGENCY PLAN DURING INSPECTION. NO CORRECTIVE ACTION REQUIRED.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA

Eval Notes: Review of SPCC plan. Plan dated 8/3/15, signed and stamped by PE. Plan is signed as to management approval by district manager, Gilbert Martinez All sources of oil were accounted for in the plan. Plan structured with cross reference (as allowed) not in sequence with regulations. Tanks larger than 500 gallons are fitted with audible overfill alarms. Those less are visual confirmation for overfill. All overfill alarms were installed and tested during the inspection. All alarms functioned. Steel tanks are double walled manufactured. Poly tanks (totes) are single walled, rely on floor for containment. Plan calls for visual inspection of containment of each tank, but location where to check on each tank is not clear. RECOMMEND MARKING EACH TANK WITH LOCATION TO BE CHECKED TO ENSURE CONTAINMENT IS FREE OF LIQUID. Plan has reference to loading and unloading from bulk delivery. No storm drains in parking lot, and slope renders long run offsite to nearest gutter/offsite [Truncated]

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110019006332

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP

SEARS, #1468 (Continued) **1008153180**

IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

TSD EPA ID: CAD044429835
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.0105

Year: 2021
Gepaid: CAR000266254
TSD EPA ID: CAD059494310
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.0295

Year: 2021
Gepaid: CAR000266254
TSD EPA ID: UTD981552177
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.3755

Year: 2021
Gepaid: CAR000266254
TSD EPA ID: CAD059494310
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.044

Year: 2021
Gepaid: CAR000266254
TSD EPA ID: UTD981552177
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 0.0915

Violations:

Site ID:	75403
Site Name:	THEODORE A FLOOR DDS
Violation Date:	01-20-2017
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Returned to compliance on 01/26/2017. EPA ID number CAL000099046 is currently inactive. Ms. DeLosReyes was given DTSC form 1358 at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	75403
Site Name:	THEODORE A FLOOR DDS
Violation Date:	01-20-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the

THEODORE A FLOOR DDS (Continued) **S112346990**

designated facility which received the waste.
Violation Notes: Returned to compliance on 02/14/2017. Manifests for disposal of tartar and stain remover were not available for inspection. Forward all receipts for disposal of this material for the past 3 years to the HMCD office for review.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-20-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates waste corrosive tartar and stain remover and disposes of material in closed, labeled containers. Facility uses only digital x-ray. Amalgam scrap, chair traps, and separator waste is picked up by Stericycle (receipts reviewed). Facility disposes on non-rcra pharmaceuticals and lidocaine in accordance with medical waste management regulations. Surfaces are disinfected with cavicide and ultrasonic bath uses non-hazardous enzymatic liquid. Facility uses only steam autoclave for sterilizing and uses non-hazardous cleaners to clean impression trays. Tooth whitener is used completely during treatments. Fire extinguishers are annually serviced, spill kit is adequate, and emergency posting is up-to-date.

Description:	Caller states substance released due to a fire. Caller states a sprinkler fused which resulted in the tank filling and overflowing. Caller states substance released to grease traps and possibly into a sanitary sewer. Caller states a contractor is enroute for clean-up. Caller states this occurred at the Vallco Shopping Mall and approximately 20 people were evacuated from the mall and theater. Caller also states no waterways were impacted. Caller states the fire is out with minor flame damage and moderate water damage.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 04/23/1987
Comments: Completed Site Screening. PA recommended due to incomplete file information; inadequate information to assess public health risks.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/27/1991
Comments: Completed PEA review. Further action is required. Information provided in the PEA report is inadequate. Review of PEA and other documents show several carcinogens are present in soil & groundwater of site. Although levels of contaminants in the soil and groundwater were substantially reduced after remediation, still need to determine the public health risk based on remaining contaminants at the site. It is further determined that the Small Site Removal Fee is necessary in order to address the administrative oversight of completion of the above response action. Should additional information suggest otherwise, the small site removal fee may change. Therefore, the Department recommends prompt action.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/06/2017
Comments: DTSC performed a site screening to determine whether any release of hazardous substances have occurred at the site that may require investigation and cleanup. Previous occupants performed research into and manufacturing of battery systems, as well as manufacturing of electronic components. Soil vapor samples collected in 2007 as part of a Phase I and subsurface investigation indicated trichloroethylene (TCE), tetrachloroethylene, and Freon 113 were present in sub-slab soil vapor. TCE concentrations in sub-slab soil vapor were above the Regional Water Quality Control Board (RWQCB) Environmental Screening Level. The site is currently under redevelopment as part of the Apple Campus 2 Project. An Environmental Site Management Plan (ESMP) was prepared in March 2012 for the site and approved by RWQCB on July 20, 2012. The ESMP identifies vapor intrusion as a potentially complete exposure pathway at the site. The ESMP outlines mitigation measures for the buildings overlaying areas of concern within the Apple Campus 2 Project area, including the site, RWQCB is still involved in regulatory activities at the site and a status recommendation of Refer to RWQCB was made in the site screening document.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/04/1989
Comments: Completed Site Screening. SS recommended further sampling. Vallco Park and its consultants have requested review by DHS, RWQCB, and the Santa Clara County Health Dept. Listed on Cortese.

Description:	****POTENTIAL RELEASE**** RP States: San Jose City Environmental Enforcement during a routine site inspection at Safeway noticed, a cooling tower was draining into the storm drain instead of the sanitary drain, this has been on going for approximately 3 weeks. The storm drain flows into the Saratoga Creek. San Jose City Fire HazMat entered the Saratoga Creek that is currently dry and found a 30 foot puddle at the outlet for the storm drain. The puddle was tested and a PH level of 6 to 7 (neutral/slight Acidic) was detected, no signs of oxidizers, or flammability in the puddle was found. No clean up was necessary as no harmful chemicals were found. AQUCAR DB5 Water Treatment Microbiocide, JUSTEQ07, and Potassium Hydroxide are used to treat the water in the

SAFEWAY STORE 767 (Continued) **S112963736**

cooling tower, unknown if the water that went into the storm drain contained any of the chemicals. ****POTENTIAL RELEASE****

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	01/09/1992
Comments:	The finding of significatnt levels of contamination at depth raises the possibility of groundwater contamination. Site was a former photo mask facility. The report submitted to the Santa Clara Deputy Fire Marshall was intended to begin characterizing the contamination beneath former underground waste pipes associated with the acids and solvents used at this former manufacturing facility. The chemicals found at significant concentrations in soil were 1,2 dichlorobenzene

HEWLETT PACKARD COSANTA CLARA DIV (Continued) **1000281825**

(ca. 100 ppm), ethyl benzene (2400 ppm), xylenes (16,000 ppm), trichloroethylene (900 ppm), toluene (16 ppm), and perchloroethylene (8.6 ppm). Some of these contaminants were found at depts of up to 41 feet below ground surface. During drilling, strong solvent odors were observed and air sampling was undertaken revealing high concentrations of trichloroethylene, toluene, tetrachloroethylene, ethylbenzene, and zylenes. Lower concentrations of 1,2,4-trimethylbenzene and dichlorobenzene were detected.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Installation Workplan
Completed Date: 04/12/2013
Comments: Work Plan outlines procedures for the installation of soil vapor monitoring probes at the Former Cupertino Village Cleaners, located at 10989 North Wolfe Road, Cupertino, California.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 03/03/2014
Comments: The report documents the implementation of the Soil Vapor Extraction (SVE) System Pilot Test Work Plan, and describes the SVE system design and installation, describes the startup monitoring results, describes the pilot testing procedures, and presents the results and conclusions of the pilot testing program . DTSC agreed in its approval letter that soil vapor extraction is a feasible technology for the Site and directed that it be the remedy proposed in a Draft Response Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/26/2013
Comments: The public notice announces the public comment period for the Draft Response Plan, which runs from January 6, 2014 through February 5, 2014. The Draft Response Plan proposes the continued operation of the pilot test soil vapor extraction system as the final response action for the Site. The public notice is scheduled to run in the Cupertino Courier on January 3, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2014
Comments: The Report summarizes the interim results of rebound testing being implemented to determine if the operation of the soil vapor extraction (SVE) system from November 2011 to March 2014 effectively remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

restarted if an increasing concentration trend is observed during the next sampling event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 10/06/2022
Comments: Revised Soil Vapor Extraction System 2022 Rebound Test Report (Report) summarizes results of the rebound testing from December 2020 to March 2022. The Rebound test that is currently being conducted since the shutdown of the soil vapor extraction (SVE) system installed at the Cupertino Village Cleaners site (Site) in December 2020. The Rebound Test is being conducted according to the 2014 Response Plan 2016 SVE System Restart Work Plan, and 2020 Soil Vapor Monitoring Probe Rebound Testing Plan. The Rebound Test will continue with monitoring of soil gas in the shallow soil (4.5 to 22 feet below grade surface). Soil gas sampling will continue on a quarterly basis, with sampling conducted in March, June, September, and December to assess whether seasonal weather changes (e.g., temperature and atmospheric barometric pressure) at the Site induce additional upward migration of soil gas and release to the atmosphere and potentially indoor air.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/29/2021
Comments: Soil Vapor Extraction Extended Pulse Operation Report (Report) summarizes results of sampling and analysis of a soil vapor extraction treatment system installed at the Former Cupertino Village Cleaners site, between January 2019 and December 2020. Report recommends continuing the approved rebound test program in accordance with the March 14, 2014 Reponses Action Plan, the April 11, 2016 Soil Vapor Extraction System Restart Work Plan and the requirement set forth by the Department of Toxic Substances Control (DTSC) on December 9, 2020 regarding the November 16, 2020 Cupertino Village Cleaners Extended Pulse SVE operation Interim Data Submittal

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020
Comments: DTSC concurs with Cupertino Village Cleaners recommendations to shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/08/2020

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Comments: The Technical Memorandum summarizes the accessibility and current condition of existing soil vapor monitoring points (SMPs) at the Site. DTSC concurs with the Technical Memorandum s recommendations of inclusion of SMPs VMW-1A and VMP-1AA as part of the Cupertino Village soil vapor extraction rebound testing program.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2021
Comments: The Technical Memorandum discuss the presence of tetrahydrofuran (THF) in soil vapor samples collected from soil vapor monitoring points and its association with the soil vapor extraction (SVE) system s polyvinyl chloride (PVC) piping off-gassing or a potential subsurface source at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 12/08/2021
Comments: The Revised Final Work Plan provides the sampling methodology of indoor air quality (IAQ) sampling activities to be conducted at two commercial buildings (Buildings) located in the vicinity of the Site. One building is currently occupied by the 99 Ranch Market and the other by Good Samaritan United Methodist Church and associated Pre-School (Church Facility).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 02/22/2008
Comments: Letter sent to adjacent property notifying them of the date, time, and locations of the soil vapor samples planned to be collected along the fence line.

Comments: Project management activities for FY 2022/2023 completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/12/2022
Comments: August 12, 2022, DTSC correspondence provides a review on soil gas sample results collected between December 2020 and March 2022 as part of soil vapor extraction (SVE) system rebound testing that is currently being conducted at the former Cupertino Village Cleaners site. Correspondence provides recommendations to be followed until reported PCE concentrations reach a steady state at the selected soil gas monitoring locations. DTSC will consider the results provided in Annual Monitoring Summary Reports (an Annual Monitoring Summary Reports summarizes the quarterly soil gas sampling efforts from the previous calendar year and results and include appropriate recommendations/conclusions) to determine whether the SVE system will be suitable to be decommissioned and the implemented remedy certified.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	AB 389 Response Plan
Completed Date:	02/24/2014
Comments:	The response action selected in the Response Plan is continued operation of the existing soil vapor extraction system that is on the Site. The system was installed as part of a pilot test. The Response Plan established both residential and commercial cleanup goals for tetrachloroethylene in subsurface and sub-slab soil vapor. PCE in soil vapor will be reduced to the extent practicable. A Land Use Covenant will be put in place to restrict any portion of the Site where the residential or unrestricted use cleanup goals are not achieved.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Implementation Workplan
Completed Date:	04/26/2016
Comments:	Cupertino Village LP plans to restart the soil vapor extraction (SVE) system due to high concentrations of tetrachloroethylene in soil gas after rebound testing. The Work Plan describes the procedures to reconnect and restart the SVE system; the operation, maintenance, and monitoring of the SVE system; and the rebound testing and reporting of results. The SVE system will operate for three months and system monitor will occur monthly. Following 3 months of SVE system operation, the system will be shut down for rebound testing with soil gas sampling at 1, 2, and 3 month intervals.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Installation Workplan
Completed Date: 04/12/2013
Comments: Work Plan outlines procedures for the installation of soil vapor monitoring probes at the Former Cupertino Village Cleaners, located at 10989 North Wolfe Road, Cupertino, California.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 03/03/2014
Comments: The report documents the implementation of the Soil Vapor Extraction (SVE) System Pilot Test Work Plan, and describes the SVE system design and installation, describes the startup monitoring results, describes the pilot testing procedures, and presents the results and conclusions of the pilot testing program . DTSC agreed in its approval letter that soil vapor extraction is a feasible technology for the Site and directed that it be the remedy proposed in a Draft Response Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/26/2013
Comments: The public notice announces the public comment period for the Draft Response Plan, which runs from January 6, 2014 through February 5, 2014. The Draft Response Plan proposes the continued operation of the pilot test soil vapor extraction system as the final response action for the Site. The public notice is scheduled to run in the Cupertino Courier on January 3, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2014
Comments: The Report summarizes the interim results of rebound testing being implemented to determine if the operation of the soil vapor extraction (SVE) system from November 2011 to March 2014 effectively remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be restarted if an increasing concentration trend is observed during the next sampling event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 10/06/2022
Comments: Revised Soil Vapor Extraction System 2022 Rebound Test Report (Report) summarizes results of the rebound testing from December 2020 to March 2022. The Rebound test that is currently being conducted since the shutdown of the soil vapor extraction (SVE) system installed at the Cupertino Village Cleaners site (Site) in December 2020. The Rebound Test is being conducted according to the 2014 Response Plan 2016 SVE System Restart Work Plan, and 2020 Soil Vapor Monitoring Probe Rebound Testing Plan. The Rebound Test will continue with monitoring of soil gas in the shallow soil (4.5 to 22 feet below grade surface). Soil gas sampling will continue on a quarterly basis, with sampling conducted in March, June, September, and December to assess whether seasonal weather changes (e.g., temperature and atmospheric barometric pressure) at the Site induce additional upward migration of soil gas and release to the atmosphere and potentially indoor air.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 04/29/2021
Comments: Soil Vapor Extraction Extended Pulse Operation Report (Report) summarizes results of sampling and analysis of a soil vapor extraction treatment system installed at the Former Cupertino Village Cleaners site, between January 2019 and December 2020. Report recommends continuing the approved rebound test program in accordance with the March 14, 2014 Reponses Action Plan, the April 11, 2016 Soil Vapor Extraction System Restart Work Plan and the requirement set forth by the Department of Toxic Substances Control (DTSC) on December 9, 2020 regarding the November 16, 2020 Cupertino Village Cleaners Extended Pulse SVE operation Interim Data Submittal

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020
Comments: DTSC concurs with Cupertino Village Cleaners recommendations to shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been achieved.

CUPERTINO VILLAGE CLEANERS (Continued) **S108054446**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/08/2020
Comments: The Technical Memorandum summarizes the accessibility and current condition of existing soil vapor monitoring points (SMPs) at the Site. DTSC concurs with the Technical Memorandum s recommendations of inclusion of SMPs VMW-1A and VMP-1AA as part of the Cupertino Village soil vapor extraction rebound testing program.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2021
Comments: The Technical Memorandum discuss the presence of tetrahydrofuran (THF) in soil vapor samples collected from soil vapor monitoring points and its association with the soil vapor extraction (SVE) system s polyvinyl chloride (PVC) piping off-gassing or a potential subsurface source at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 12/08/2021
Comments: The Revised Final Work Plan provides the sampling methodology of indoor air quality (IAQ) sampling activities to be conducted at two commercial buildings (Buildings) located in the vicinity of the Site. One building is currently occupied by the 99 Ranch Market and the other by Good Samaritan United Methodist Church and associated Pre-School (Church Facility).

Completed Area Name: PROJECT WIDE

Completed Date: 06/30/2023
Comments: Project management activities for FY 2022/2023 completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 08/12/2022
Comments: August 12, 2022, DTSC correspondence provides a review on soil gas sample results collected between December 2020 and March 2022 as part of soil vapor extraction (SVE) system rebound testing that is currently being conducted at the former Cupertino Village Cleaners site. Correspondence provides recommendations to be followed until reported PCE concentrations reach a steady state at the selected soil gas monitoring locations. DTSC will consider the results provided in Annual Monitoring Summary Reports (an Annual Monitoring Summary Reports summarizes the quarterly soil gas sampling efforts from the previous calendar year and results and include appropriate recommendations/conclusions) to determine whether the SVE system will be suitable to be decommissioned and the implemented remedy certified.

Completed Document Type: Other Report
Completed Date: 12/05/2006
Comments: As part of the AB 389 Process the appropriate agencies, including the host jurisdiction must be notified DTSC is negotiating a CLRRA Agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: AB 389 Response Plan
Completed Date: 02/24/2014
Comments: The response action selected in the Response Plan is continued operation of the existing soil vapor extraction system that is on the Site. The system was installed as part of a pilot test. The Response Plan established both residential and commercial cleanup goals for tetrachloroethylene in subsurface and sub-slab soil vapor. PCE in soil vapor will be reduced to the extent practicable. A Land Use Covenant will be put in place to restrict any portion of the Site where the residential or unrestricted use cleanup goals are not achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 04/26/2016
Comments: Cupertino Village LP plans to restart the soil vapor extraction (SVE) system due to high concentrations of tetrachloroethylene in soil gas after rebound testing. The Work Plan describes the procedures to reconnect and restart the SVE system; the operation, maintenance, and monitoring of the SVE system; and the rebound testing and reporting of results. The SVE system will operate for three months and system monitor will occur monthly. Following 3 months of SVE system operation, the system will be shut down for rebound testing with soil gas sampling at 1, 2, and 3 month intervals.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/02/2025

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

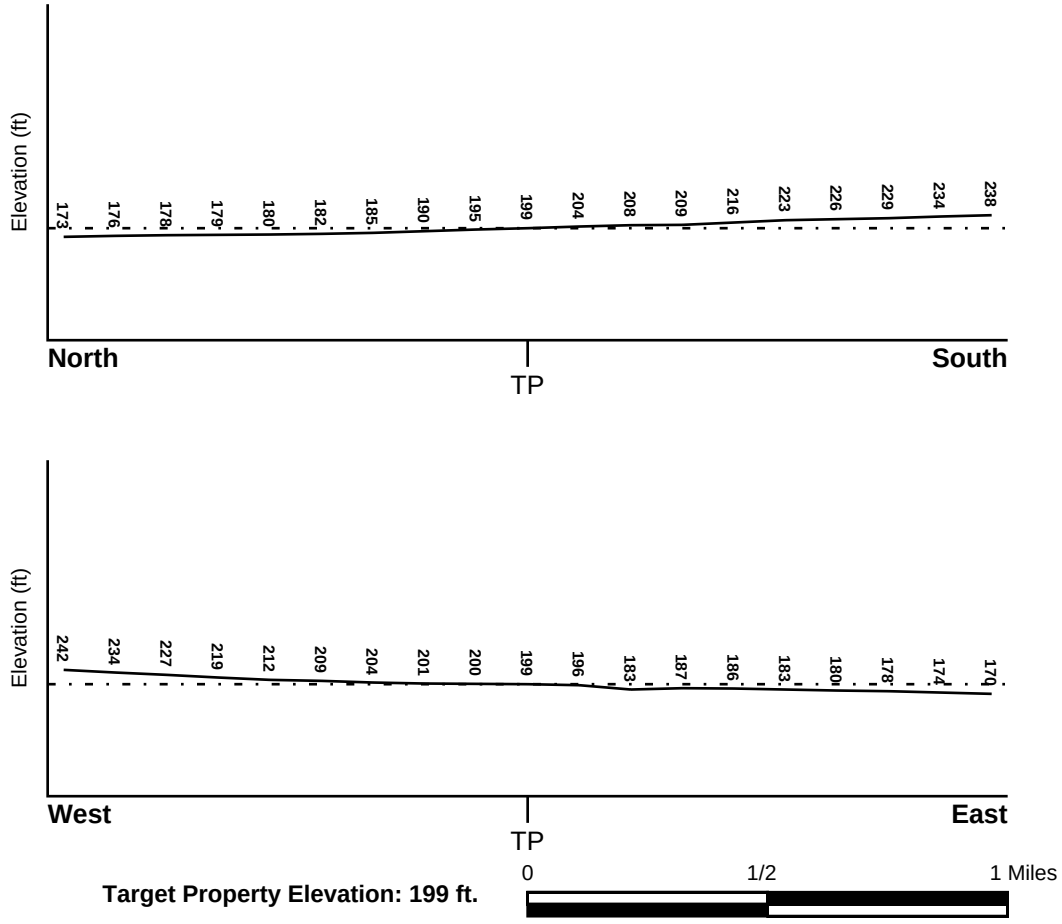
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 199 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0209H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0208H	FEMA FIRM Flood data
06085C0228H	FEMA FIRM Flood data
06085C0217H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ENE
Site Name:	Ampex Cupertino Facility
Site EPA ID Number:	CAD982359333
Groundwater Flow Direction:	Northeast
Measured Depth to Water:	96 feet to potable water.
Hydraulic Connection:	Specific information is not available about the hydraulic connection between aquifer(s) under the site, but on-site well logs indicate that clayey layers that are 3 or more feet thick underlie the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PRELIMINARY REPORT UPDATE K

In response to the application for a policy of title insurance referenced herein, ***Chicago Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Chicago Title Insurance Company, a Florida corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

APN: **369-06-002, 369-06-003, 369-06-004**

EXCEPTIONS

AT THE DATE HEREOF, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN SAID POLICY FORM WOULD BE AS FOLLOWS:

1. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2025-2026.

2. Prior to close of escrow, please contact the Tax Collector's Office to confirm all amounts owing, including current fiscal year taxes, supplemental taxes, escaped assessments and any delinquencies.

3. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.

4. The herein described property lies within the boundaries of a Mello-Roos Community Facilities District (CFD) as follows:

CFD No.:	2013-1
For:	Mello-Roos Community Facilities Act of 1982
Disclosed by:	Notice of Special Tax Lien
Recording Date:	January 22, 2014
Recording No.:	22502535, Official Records

   This property, along with all other parcels in the CFD, is liable for an annual special tax. This special tax is included with and payable with the general property taxes of the City of Cupertino, County of Santa Clara. The tax may not be prepaid.

   Further information may be obtained by contacting:
   Fiscal Agent of the Santa Clara County Library District Joint Powers
   1370 Dell Avenue
   Campbell CA 95008
   408-293-2326 x3004

5. Any liens or other assessments, bonds, or special district liens including without limitation, Community Facility Districts, that arise by reason of any local, City, Municipal or County Project or Special District.

6. Easement(s) for the purpose(s) shown below and rights incidental thereto as delineated or as offered for dedication, on the map of Tract No. 2153 Book 98, Page 28 and 29, of Maps and on the map of Tract No. 2154, Book 101, Page 45 of Maps.

Purpose:	Public utility easements and wire clearance easement
Affects:	As shown on said maps herein referred to

EXCEPTIONS
(Continued)

7. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	Pacific Gas and Electric Company and The Pacific Telephone & Telegraph Company
Purpose:	Electrical facilities and communication facilities
Recording Date:	March 12, 1959
Recording No:	1600720, Book 4351, Page 432, of Official Records
Affects:	As described in said document herein referred to

Said easement was modified by Quitclaim Deed recorded February 5, 1960 in Instrument No. 1763163, Book 4686, Page 287, of Official Records.

7a. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	California Water Service Company, a Corporation
Purpose:	Right of way and easement for constructing, laying, maintaining, operating, using, altering, repairing, inspecting and relocating therein and thereupon and/or remving therefrom a main, or mains, pipe lines or pipe lines, with any and all connections and fixtures necessary or convenient thereto, for the transportation, distribution, sale and/or supply of water.
Recording Date:	January 4, 1960
Recording No:	1747279, Book 4653, Page 645, of Official Records

8. Intentionally Deleted.

9. Intentionally Deleted.

10. An unrecorded lease with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Entitled:	Assignment of Leases
Lessor:	Toro Development Co., a partnership, who acquired title as The Oliver Rousseau Organization, a partnership
Lessee:	Ignazio R. Castello and Rosalia Castello
Recording Date:	February 21, 1962
Recording No:	2145269, Book 5475, Page 8, of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

11. An unrecorded lease with certain terms, covenants, conditions and provisions set forth therein as disclosed by the document

Lessor:	Ignazio R. Castello and Rosalia Castello
Lessee:	Fred and Sharlottie Marburg
Recording Date:	September 10, 1963
Recording No:	2477695, Book 6183, Page 383, of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

EXCEPTIONS
(Continued)

12. Easement(s) for the purpose(s) shown below and rights incidental thereto, as granted in a document:

Granted to:	The Pacific Telephone & Telegraph Company
Purpose:	Communication facilities
Recording Date:	November 16, 1973
Recording No:	4650838, Book 0652, Page 294, of Official Records

13. Intentionally Deleted.

14. Deed as set forth below:

Grantor:	John Kessler, Trustee of the Trust for Nada A. Cavigliano under the 1996 Grace M. Clover Living Trust U/D/T November 5, 1996, as to an undivided 12.5% interest as tenant in common
Grantee:	Cara Clover Borromei, as her sole and separate property, as to an undivided 1/24th interest as tenant in common; Danica Cavigliano, as her sole and separate property, as to an undivided 1/24th interest as tenant in common; and Nicolas Cavigliano, as his sole and separate property, as to an undivided 1/24th interest as tenant in common
Recording Date:	July 30, 2021
Recording No:	25049216, of Official Records

Any defect or invalidity of the title to the estate or interest of the grantee herein arising out of or occasioned by the execution of the above-referenced deed.

For insurance purposes, the Company will require that an affidavit, executed by the above grantor and acknowledged by a notary known to the Company, be submitted to the Company for review and approval in order for the Company to show title vested in the above-named grantee. Said affidavit will be provided by the Company.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

15. Deed as set forth below:

Grantor:	Lisa Ridenour and Gayle D. Reimche, Co-Trustees of "The 1996 Grace M. Clover Living Trust" dated November 5, 1996 as to all of its 25% interest
Grantee:	John Kessler, Trustee of the Trust for Nada A. Cavigliano under the 1996 Grace M. Clover Living Trust U/D/T November 5, 1996 as to an undivided 12.5% interest and Heather Fisher, Trustee of the Trust for Dana E. Clover under the 1996 Grace M. Clover Living Trust U/D/t November 5, 1996 as to undivided 12.5% interest
Recording Date:	December 22, 2021
Recording No:	25201609, of Official Records

Any defect or invalidity of the title to the estate or interest of the grantee herein arising out of or occasioned by the execution of the above-referenced deed.

EXCEPTIONS
(Continued)

For insurance purposes, the Company will require that an affidavit, executed by the above grantor and acknowledged by a notary known to the Company, be submitted to the Company for review and approval in order for the Company to show title vested in the above-named grantee. Said affidavit will be provided by the Company.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

15a. Matters contained in that certain document

Entitled:	Memorandum of Purchase Agreement
Dated:	August 17, 2023
Executed by:	Toll Bros, Inc, Joseph Nacy Castello, Rosalie Castello Flores, Tamara M. Foglesong, Jennifer Castello, Rick Costello II, Victor M. Castello, Gina C. Wagner, and Geno I. Castello
Recording Date:	December 15, 2023
Recording No:	25575946, of Official Records

Reference is hereby made to said document for full particulars.

16. The search did not disclose any open mortgages or deeds of trust of record, therefore the Company reserves the right to require further evidence to confirm that the property is unencumbered, and further reserves the right to make additional requirements or add additional items or exceptions upon receipt of the requested evidence.

17. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

EXCEPTIONS
(Continued)

18. Any rights, interests, or claims which may exist or arise by reason of the following matters disclosed by survey,

Job No.: 3819-000
Dated: November 2, 2023
Prepared by: cbg
Matters shown:

A) The fact that there exists a 0.1' encroachment of a sidewalk onto the property from the street right of way of Stevens Creek Boulevard.
B) The fact that there exists 3 PG&E vaults not residing in easement of record.
C) The fact that there exists 3 monitoring wells with no recorded agreement(s).
D) The fact that there exists an encroachment of concrete and a wall onto the property from the land adjoining to the west, to undisclosed amounts.
E) The fact that there exists an encroachment of a building over easements for public utility and wire clearance purposes, as shown in Exception No. 6.
F) The fact that there exists an encroachment of a building into the PG&E and PT&T easement as shown in Exception No. 7.

19. The Company will require that an Owner's Affidavit be completed by the party(s) named below before the issuance of any policy of title insurance.

Party(s): Vestee(s) herein

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

20. Any invalidity or defect in the title of the vestees in the event that the trust referred to herein is invalid or fails to grant sufficient powers to the trustee(s) or in the event there is a lack of compliance with the terms and provisions of the trust instrument.

If title is to be insured in the trustee(s) of a trust, (or if their act is to be insured), this Company will require a Trust Certification pursuant to California Probate Code Section 18100.5.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

EXCEPTIONS
(Continued)

20a. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below:

Limited Liability Company: Toll West Coast LLC, a Delaware limited liability company

a) A copy of its operating agreement, if any, and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.

b) If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendments thereto with the appropriate filing stamps.

c) If the Limited Liability Company is member-managed, a full and complete current list of members certified by the appropriate manager or member.

d) A current dated certificate of good standing from the proper governmental authority of the state in which the entity is currently domiciled.

e) If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

f) If Limited Liability Company is a Single Member Entity, a Statement of Information for the Single Member will be required.

g) Each member and manager of the LLC without an Operating Agreement must execute in the presence of a notary public the Certificate of California LLC (Without an Operating Agreement) Status and Authority form.

21. Intentionally Deleted.

22. The transaction contemplated in connection with this Report is subject to the review and approval of the Company's Corporate Underwriting Department. The Company reserves the right to add additional items or make further requirements after such review.

23. We find various Liens and Judgments that are of record against persons with similar or the same name as that of the vestee(s) shown herein. In order to complete this report, the Company requires a Statement of Information to be provided for the following vestee(s), which may allow and assist in the elimination of some or all of the said liens and judgments. After review of the requested Statement of Information, the Company reserves the right to add additional items or make further requirements prior to the issuance of any Policy of Title Insurance.

Vestee(s): Rick Patrick Castello, Rick Castello II, Rosalie Castello Flores and Rosalyn J Castello

NOTE: The Statement of Information is necessary to complete the search and examination of title under this order. Any title search includes matters that are indexed by name only, and having a completed Statement of Information assists the Company in the elimination of certain matters which appear to involve the parties but in fact affect another party with the same or similar name. Be assured that the Statement of Information is essential and will be kept strictly confidential to this file.

END OF EXCEPTIONS

NOTES

1. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a Commercial Property, known as 10065 and 10075 East Estates Drive, Cupertino, CA, to an Extended Coverage Loan Policy.

2. Note: The name(s) of the proposed insured(s) furnished with this application for title insurance is/are:

   Name(s) furnished: Toll West Coast LLC, a Delaware limited liability company

   If these name(s) are incorrect, incomplete or misspelled, please notify the Company.

3. Note: The only conveyance(s) affecting said Land, which recorded within 24 months of the date of this report, are as follows:

Grantor:	Joseph Nacy Castello, Trustee under Declaration of Trust executed May 11, 1989 by Joseph S. Castello as Trustee and by Joseph S. Castello as Trustee
Grantee:	Joseph Nacy Castello, an unmarried man, as to an undivided 6.25%, Rosalie Castello Flores, a married woman, as her sole and separate property, as to an undivided 6.25%; Tamara M. Foglesong, an unmarried woman, as to an undivided 6.25% and Jennifer Castello and Rick Castello II as Trustees of the 1992 Rick Patrick Castello Living Trust, as to an undivided 6.25%
Recording Date:	November 16, 2022
Recording No:	25400860, of Official Records

Grantor:	Michael A. Aguon, spouse of the grantee herein
Grantee:	Rosalie Castello Flores, a married woman, as to her sole and separate property
Recording Date:	November 16, 2022
Recording No:	25400861, of Official Records

Grantor:	Jennifer Castello and Rick Castello II, Trustees of the 1992 Rick Patrick Castello Trust
Grantee:	Jennifer Castello, a married woman, as her sole and separate property, as to an undivided 3.125% and Rick Castello II, a married man, as his sole and separate property, as to an undivided 3.125%
Recording Date:	November 16, 2022
Recording No:	25400862, of Official Records

Grantor:	Nirupa Fenn, spouse of the grantee herein
Grantee:	Jennifer Castello, a married woman, as her sole and separate property
Recording Date:	November 16, 2022
Recording No:	25400863, of Official Records

Grantor:	Natalie Castello, spouse of the grantee herein
Grantee:	Rick Castello II, a married man as his sole and separate property
Recording Date:	November 16, 2022
Recording No:	25400864, of Official Records

Fiscal Year:	2023-2024
1st Installment:	$28,683.49
2nd Installment:	$28,683.49
Land:	$4,731,984.00
Improvements:	$18,139.00
Bill No.:	369-06-004-00

8. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

9. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

10. Note: If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

NOTES
(Continued)

11. Note: Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of a Company agent, an authorized employee of the insured lender, or by using Bancserv or other Company-approved third-party service. If the above requirement cannot be met, please call the Company at the number provided in this report.

12. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

13. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

14. Due to the special requirements of SB 50 (California Public Resources Code Section 8560 et seq.), any transaction that includes the conveyance of title by an agency of the United States must be approved in advance by the Company's State Counsel, Regional Counsel, or one of their designees.

END OF NOTES

Jeff Martin/613

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

Effective August 1, 2021

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;

Copyright © 2021. Fidelity National Financial, Inc. All Rights Reserved

- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information
We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information
If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.
For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children
The FNF Websites are not intended or designed to attract persons under the age of eighteen (18).We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users
FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans
Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, visit FNF's Opt Out Page or contact us by phone at (888) 714-2710 or by mail to:

ATTACHMENT ONE (Revised 05-06-16)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

c. that result in no loss to You; or
d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.

5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

{Except as provided in Schedule B - Part II,{ t{or T}his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

{PART I

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.}

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:}

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records. }
7. {Variable exceptions such as taxes, easements, CC&R's, etc. shown here.}

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY – ASSESSMENTS PRIORITY (04-02-15)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

APPENDIX C

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRES (2)

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR CLIENT

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

PART I

1. Property address and Assessor's Parcel Number (APN):
   10065-10075 E. Estates Dr. Cupertino

2. Current property owner (name, address, voice/fax number):
   Victoria & Geno Castello

3. Date current property owner assumed title of property:
   11/16/22

4. Current property development/improvements:
   Demolition, land improvemtns, 55 residential row townhomes

5. Past property use, development/improvements:
   Commerical Shopping center

6. Neighboring property uses:
   Residential & commercial

ADDITIONAL INFORMATION

(Provide any additional information from Part I)

PART II

1.	Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law?	☐ Yes	☑ No	
2.	Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes	☑ No	
3.	Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes	☑ No	
4.	If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*?	☑ Yes	☐ No	☐ N/A
5.	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*	☐ Yes	☐ No	☐ N/A
6.	Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) do you know of specific chemicals that are present or once were present at the *property*? (b) do you know of spills or other chemical releases that have taken place at the *property*? (c) do you know of any environmental cleanups that have taken place at the *property*?	☑ Yes	☐ No	
7.	Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?	☑ Yes	☐ No	

If a "Yes" response was provided to any of the above questions, please provide details below.

The applicant is requesting an updated Phase 1 for entitlement approvals with City. Previous ESA executed in 2023 identifies and highlights all questions in Part II survey of this form.

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR KEY SITE MANAGER

To evaluate the potential for possible environmentally related impacts and site contamination at the property, we request the following information. This questionnaire is to be preferably completed by the current property owner, or owner representative, leasing agent, or other person having good knowledge of the uses and physical characteristics of the property (Key Site Manager).

PART I

1. Property address/location and Assessor's Parcel Number (APN):

   10025-10075 East Estates Drive and 19590-19610 Stevens Creek Boulevard, Cupertino, California
   369-06-002,003,004,007

2. Current property owner (name, address, phone number):

   Idlewild Tenants in Common
   Post Office Box 254
   Saratoga, California 95071

3. Date current property owner assumed title of property:

   Idlewild TIC was formed in 2021

4. Current property development/improvements:

   Shopping Center and a gasoline station

5. Past property use, development/improvements:

   Shopping center was developed in 1960. Prior to then it was used for agricultural purposes.

6. Neighboring property uses:

   Residential and commercial

Please use Page 2 if additional space is required.

ADDITIONAL INFORMATION

(Provide any additional information from Part I)

PART II - The following questions should be answered to the best of your knowledge.

1.	Is/has the Property or any adjoining property used/been used for industrial purposes?	☐ Yes	☑ None Known
2.	Has the Property or any adjoining property been used as a gasoline service station, oil and gas extraction facility, automotive repair facility, commercial printing facility, dry cleaner, photo developing laboratory, firefighting training facility, manufacturing facility, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	☑ Yes	☐ No
3.	Are you aware of any environmental cleanup liens against the Property that are filed under federal, tribal, local or state law?	☐ Yes	☑ No
4.	Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal in volume or 50 gal in the aggregate, stored on or used at the Property or at the facility?	☐ Yes	☑ None Known
5.	Has soil been brought onto the property, either from a known or unknown source? If yes, estimated quantity is _____ cubic yards.	☐ Yes	☑ None Known
6.	Has waste been brought onto the Property?	☐ Yes	☑ None Known
7.	Are there currently, or have there been previously, any pits, ponds, or lagoons located on the Property in connection with waste treatment or waste disposal?	☐ Yes	☑ None Known
8.	Is there currently, or has there been previously, any stained soil on the Property?	☐ Yes	☑ None Known
9.	Are there currently, or have there been previously, any registered or unregistered storage tanks (above or underground) located on the Property?	☑ Yes	☐ No
10.	Are there currently, or have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property?	☑ Yes	☐ No
11.	Are there currently, or have there been previously, any flooring, drains, or walls located within the Property that are stained by substances other than water or are emitting foul odors?	☐ Yes	☑ None Known
12.	Are there any domestic, irrigation, or monitoring wells on the Property?	☐ Yes	☑ None Known
13.	If the Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?	☐ Yes	☑ None Known
14.	Have you been informed of the past or current existence of *hazardous substances* or *petroleum products* or environmental violations with respect to the Property or any facility located on the Property?	☑ Yes	☐ No
15.	Are you aware of any environmental cleanup liens against the Property that are filed under federal, tribal, local or state law?	☐ Yes	☑ No
16.	Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the Property and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes	☑ No
17.	Have there been any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance* or *petroleum products* involving the Property?	☐ Yes	☑ None Known
18.	Has there been any past agricultural use of the Property, such as orchards or seed crop cultivation?	☑ Yes	☐ No

19. Have any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Property? ☐ Yes ☑ None Known

20. Is there a transformer, capacitor, or any hydraulic equipment on the Property for which there are any records indicating the presence of polychlorinated biphenyls (PCBs)? ☐ Yes ☑ None Known

21. Has there ever been a fire on the Property? ☐ Yes ☑ None Known

If a "Yes" response was provided to any of the above questions, please provide details below.

There is an active gasoline service station on the eastern parcel.
A dry cleaner operated on the western parcel.

The gasoline station is equipped with underground storage tanks, vents, dispensers, piping et cet.

The dry cleaner is known to have released perchloroethylene (PCE) into the subsurface.

Review of aerial photographs indicate the site was used as an orchard between at least 1939 and 1956.

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

EDR Aerial Photo Decade Package

05/09/25

Site Name:

Idlewild Shopping Center
Stevens Creek Boulevard & E I
Cupertino, CA 95014
EDR Inquiry # 7984167.8

Client Name:

Engeo Inc.
2633 Camino Ramon, Suite 250,
San Ramon, CA 94583
Contact: Jenna Keith

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0962-4CCB-B4BE

PO # 22934.000.001

Project Idlewild Shopping Center

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0962-4CCB-B4BE

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Engeo Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

NADINE E. PERIAT, PG
Associate

EDUCATION
BS Earth Sciences, University of California, Santa Cruz, 2008

EXPERIENCE
Years with ENGEO: 5
Years with Other Firms: 10

REGISTRATIONS & CERTIFICATIONS
Professional Geologist, CA 9139
OSHA 30, CO 18532410
HAZWOPER 40 Hour Training, CA
HAZWOPER 8 Hour Training, CA
CPR/AED/First Aid Training, CA
GWTEZB

SPECIALIZATIONS
- Naturally Occurring Asbestos Surveys
- Environmental Assessments and Remediation
- Geologic Hazard Evaluation
- Hydrology
- Phase 1 Environmental Audits

Nadine joined ENGEO in 2018 and has 15 years of experience in due diligence site assessment, contaminated site characterization and remediation. Nadine's focus has been in the San Francisco Bay Area, particularly in the South Bay area, and also has wider experience managing cleanup sites across California. Nadine's expertise is in historically industrial site development, petroleum and chlorinated site cleanups, vapor intrusion assessment and mitigation, due diligence for new property acquisition, and construction related environmental assistance including soil offhaul/reuse characterization, site management plans, and emergency response for uncovered relic facilities.

SELECT PROJECT EXPERIENCE

Google Downtown West Development—San Jose, CA
Project Manager. Nadine manages both the site wide environmental and geotechnical work at the San Jose Downtown West Campus. Nadine's team has performed approximately 30 Phase I Environmental Site Assessments for properties in Downtown San Jose along the Caltrain railroad alignment, typically on 3 or 5 day turnaround times to meet the project's aggressive timeline. A preliminary geotechnical assessment was performed in 2020, and currently, a site wide Phase II investigation is underway which will include approximately 300 soil, groundwater, and soil gas samples across the site. Nadine's geotechnical and environmental teams work together to ensure that proposed remediation and ground improvements are compatible and suite the development plan. A transit oriented district situated in the heart of Silicon Valley, the San Jose GOOGLE Village project includes approximately 50 acres of land with proposed development of approximately 10 million square feet of retail and commercial space along with residential units.

Office High Rise Building, 3655 Kifer Road—Santa Clara, CA
Project Manager. This development is located adjacent to the former National Semiconductor (NCS) superfund site, and required dewatering to install a subterranean parking garage. The developer had to ensure that their dewatering operations did not cause significant drawdown up to the edge of the superfund plume, which would then cause migration of the controlled plume. ENGEO wrote a groundwater management plan and installed three groundwater monitoring wells and nine vibrating wire piezometer points around the site. ENGEO established threshold drawdown levels (in tenths of inches)

which would trigger a call to turn down or shut off dewatering. ENGEO also collected groundwater quality samples weekly and graphed concentrations to evaluate any trends in concentration indicative of migration. During dewatering, hydrologic connections were studied between dewatering wells and monitoring points, and pump rates on individual dewatering wells were fine tuned to meet the drawdown requirements. Piezometer readings were collected daily by ENGEO, compared to a background monitoring point, and processed to show drawdown curves which were distributed by end of each day to the Superfund management team and the Regional Water Quality Control Board. ENGEO and the development team completed the job successfully without affecting the Superfund plume after roughly 6 months of intensive daily monitoring.

Mora Estancia—Mountain View, CA
Project Manager. Provides project management and serves as technical lead for the Mora Estancia multi-family residential development vapor intrusion mitigation system (VIMS) implementation. Nadine was responsible for coordination between construction field crews, developer, Bay Area Air Quality Management District, and the Department of Toxic Substances Control (DTSC) during initial VIMS construction and certification. Nadine directs regular sampling and inspection of VIMS systems, makes recommendations and designs sampling strategy for VIMS system operation, prepares sampling reports, annual land use covenant inspection reports, five-year review reports, and is the primary point of contact with the DTSC. The VIMS system at Mora Estancia is required due to historical semi-conduct manufacturing operations which impacted soil, groundwater and soil gas with chlorinated solvents, particularly tetrachloroethylene (PCE) and trichloroethylene (TCE). The VIMS system was constructed during a tumultuous time in vapor intrusion regulation, and Nadine utilizes her understanding of the most current guidance, regulation and industry research to aid in decision making and human health and safety.

3655 Kifer Road—Santa Clara, CA
Project Manager. Nadine wrote and implemented the project's complex dewatering plan, attended OAC meetings and coordinated sub-grade design and construction activities with the design and construction team. The development is located adjacent to the former National Semiconductor (NCS) superfund site, and the developer is subject to high frequency monitoring of drawdown effects on the former NCS site, for concerns of plume migration. This includes daily monitoring of nine piezometers, weekly sampling of seven wells, daily reporting to the Regional Board and superfund responsible parties, and third party oversight by Langan Engineering. The project also involves daily communication of drawdown status to construction crew, dewatering pump analysis, and adjustment to meet drawdown limits.

San Luis Reservoir Maintenance Facility—Los Banos, CA
Project Manager: Nadine leads the environmental assessment and remediation of a former diesel and gasoline release at a California Department of Parks and Recreation facility located between the San Luis Reservoir and O'Neill Forebay which are each drinking water resources. The release of petroleum occurred prior to the first investigation in 1996, and despite previous efforts to remediate the site, multiple feet of free phase gasoline persist in groundwater monitoring wells. Nadine replaced the prior environmental consultant and provided an in-depth review of site conditions, previous explorations, and details of a failed Soil Vapor Extraction (SVE) operation. Nadine's team outlined reasons why previous remedial efforts failed, citing well and system design errors and improperly screened wells which have only exasperated the extent of groundwater contamination. Nadine's team conducted investigation to delineate the petroleum plume toward the O'Neill Forebay and will conduct a SVE pilot test in 2023 utilizing an optimized design, coupled with free phase product removal.

County of San Mateo Building—Redwood City, CA
Technical Lead: Nadine provides on-call environmental consultation to the County of San Mateo and their contractors during development of the new County Buildings. Nadine completed phase I and phase II environmental site assessments, prepared a soil management plan, vapor intrusion study, led discussions with the County's Department of Environmental Health and provided third-party review for Vapor Intrusion Mitigation Systems. Nadine has also regularly reviewed import soil for site suitability from an environmental standpoint, consulted with contractors on health and safety measures for contaminants of concern, directed lead impacted soil removal, and provided opinions on handling and disposal of creosote preserved tinder piles uncovered during demolition.

Former Marine Corps Air Station (MCAS)—Tustin, CA
Project Manager. Nadine was the project manager and technical lead on this vapor intrusion assessment of over 100 acres of the former MCAS Tustin base. The assessment was conducted prior to the City of Tustin assuming ownership of the site for redevelopment into a mixed-use development. Contaminants at the site included 1,2,3-trichloropropene and other volatile organic compounds. The work plan involved a dynamic scope consisting of multi-level soil gas and groundwater sampling, and a risk assessment to recommend mitigation measures in areas of the site. Nadine's management duties included contractual review and change letters, daily communications with the Navy, regulatory agencies and/or stakeholders on progress/ scope collaboration, and coordination of subcontractors and staff.

State Parks On-Call Projects—Various Sites, CA
Project Manager. Nadine is the project manager and technical lead for an on-call contract consisting of multiple State Parks projects in California. Sites are typically maintenance facilities or State Parks buildings where a release of contamination has required State-oversight cleanup. These locations are typically sensitive drinking water or habitat locations, and Nadine coordinates work with involved agencies including the Department of Water Resources, Regional Water Quality Control Board, Department of Fish and Wildlife, Bureau of Reclamation, and local government agencies for site access, biological surveys, and general site compliance.

Harbor Pointe—Newark, CA
Senior Geologist. Nadine performed a third party review of previous environmental reports for portions of the site for the prospective buyer, provided opinion on data gaps and potential future issues, and interpreted property use limitation and operating needs per the deed restriction. The site is located on former industrial lands, totaling approximately 40 acres. Former site uses included operation of a lime plant and EDB manufacturer. The site has undergone remediation over many years and is slated for residential redevelopment.

PCE/ Petroleum Vapor Intrusion Investigation – LUFT Site—San Mateo, CA
Project Manager: This site is a retail gas station with a large, undefined petroleum hydrocarbon plume which comingled with a regional tetrachloroethylene (PCE) plume. The San Mateo County Groundwater Protection Program (GPP) could not rule out the possibility that the gas station onsite had contributed to the PCE plume and named the client as a responsible party for the regional PCE plume. Sub-slab vapor probes in neighboring businesses and homes indicated that PCE, not petroleum, was present at levels exceeding regulatory screening levels. My team used an analysis of local groundwater hydrology, vertical and lateral contaminant distribution, utility maps, and historical regulatory documents from upgradient dry cleaner sites to prove that the PCE source was not on the gas station site, but upgradient from a historical dry cleaner. The regulator accepted the argument, assigned a separate responsible party for the PCE plume.

APPENDIX B

TRANSPORTATION ANALYSIS

Hexagon Transportation Consultants, Inc.

Memorandum

Date: September 24, 2025

To: Rob Connolly, Toll Brothers

From: Gary Black
Daniel Choi

Subject: Transportation Analysis for the Proposed Residential Development at 10065-10075 East Estates Drive in Cupertino, CA

Hexagon Transportation Consultants, Inc. has completed a transportation analysis for the proposed residential development at 10065-10075 East Estates Drive in Cupertino, CA (see Figure 1). The project includes removing 13,560 square feet (s.f.) of retail uses currently on the 2.72-acre Idlewild Shopping Center site and constructing 55 townhomes and 10 accessory dwelling units (ADUs). A single driveway on East Estates Drive would provide access to the residential project. All 55 single-family homes would have two-car garages, providing a total of 110 parking spaces. Nine guest parking spaces are proposed throughout the site. The project site plan is shown on Figure 2.

This study was conducted for the purpose of identifying the potential transportation impacts and operational issues related to the proposed development. This transportation analysis consists of a California Environmental Quality Act (CEQA) level Vehicle-Miles-Traveled (VMT) analysis and a Local Transportation Analysis (LTA) per the City of Cupertino's Transportation Analysis Guidelines.

Existing Conditions

The existing transportation system in the project study area is described below. Included are descriptions of the existing roadway network, transit service, and pedestrian and bicycle facilities.

Existing Roadway Network

Regional access to the project site is provided via SR 85 and I-280. Local access to the site is provided via Stevens Creek Boulevard and East Estates Drive. These facilities are described below.

Stevens Creek Boulevard is an east-west six-lane roadway classified as a boulevard (arterial) in the City's General Plan. It extends past Ridgeway Drive in the west to Bascom Avenue in the east. In the vicinity of the project site, Stevens Creek Boulevard has left turn/U-turn pockets at intersections, a landscaped median, buffered bike lanes in each direction, and sidewalks along both sides of the roadway. On-street parking is prohibited on both sides of the roadway, and the posted speed limit is 35 mph

East Estates Drive is a two-lane north-south roadway connecting Stevens Creek Boulevard in the north to Bolling Road in the south. While the stretch just south of Stevens Creek Boulevard accommodates commercial developments on both sides, the remainder of the street primarily serves single-family residences. The road has sidewalks on both sides, a 25 mph speed limit, and provides direct access to the project site.

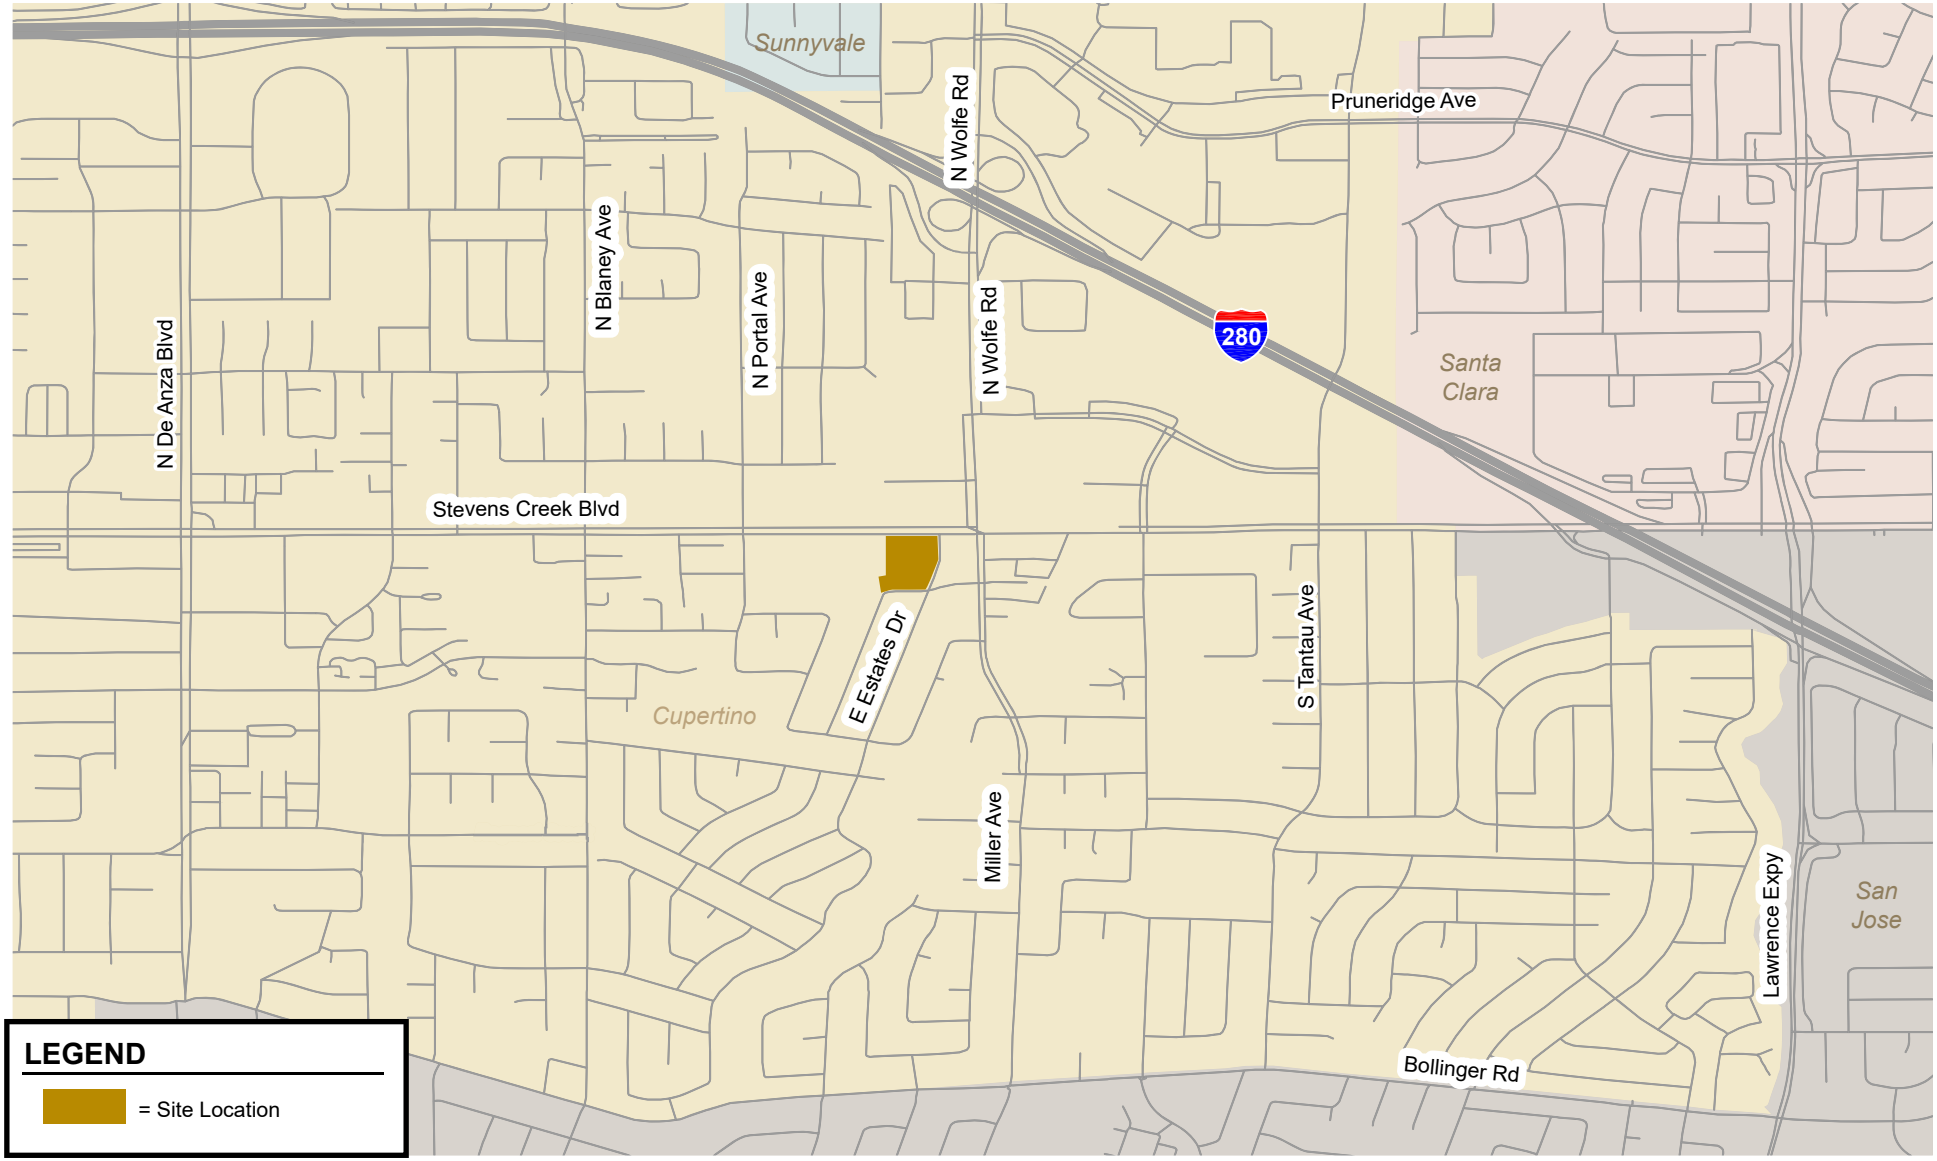

Figure 1
Site Location

NORTH
Not to Scale

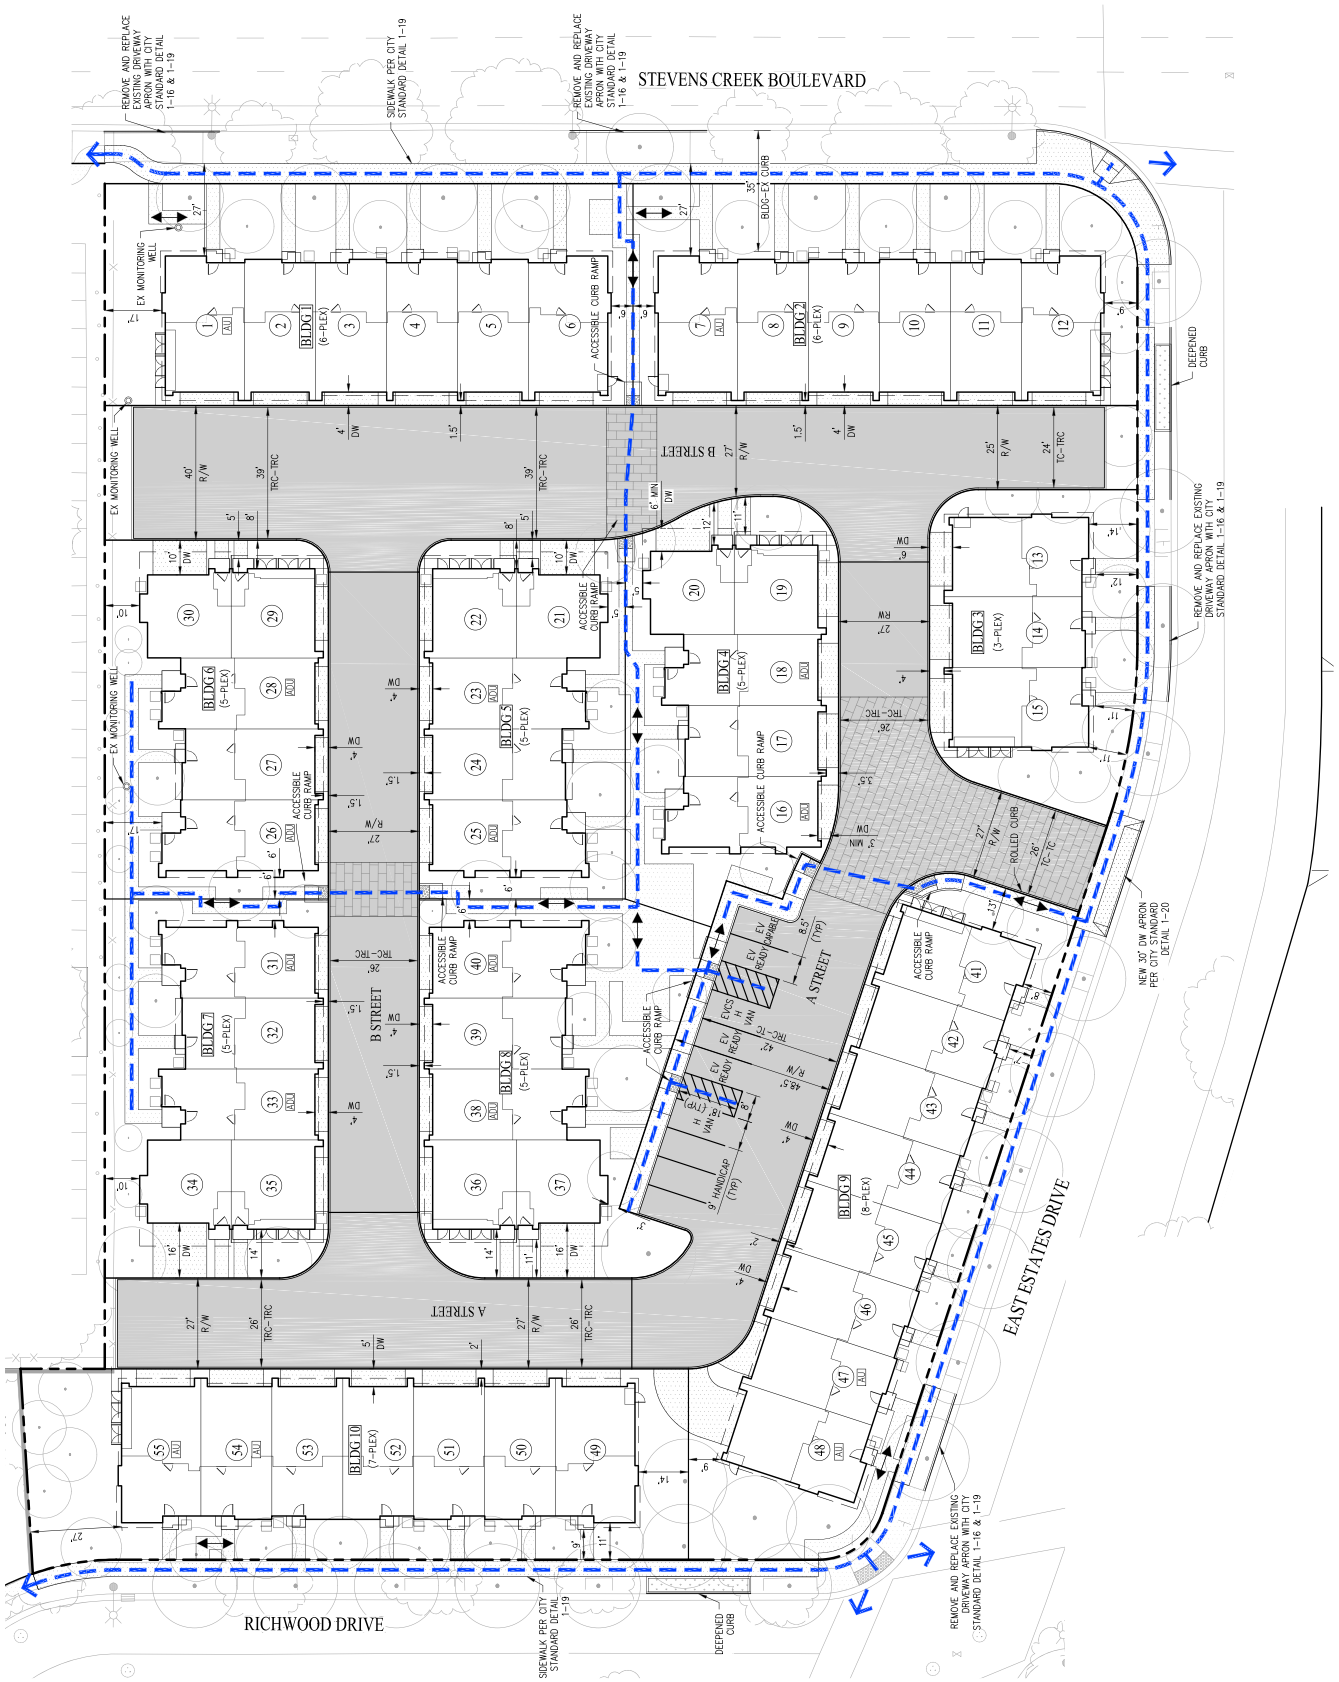

Figure 2
Site Plan

NORTH
Not to Scale

Existing Pedestrian and Bicycle Facilities

Pedestrian facilities consist of sidewalks, ADA compliant curb ramps, and crosswalks at many of the nearby unsignalized intersections. In the vicinity of the project site, standard width continuous sidewalks exist along East Estates Drive, Richwood Drive, Miller Avenue and Stevens Creek Boulevard. High-visibility piano key style crosswalks are provided at the intersection of Miller Avenue/Wolfe Road/Stevens Creek Boulevard.

In the project vicinity, a Class IV protected bike lane is present along Stevens Creek Boulevard, between Miller Avenue and Tantau Avenue. Class II bike lanes are present along Wolfe Road, north of Stevens Creek Boulevard, and along Stevens Creek Boulevard, west of Miller Avenue/Wolfe Road. A Class III bike route is present along Miller Avenue, between Stevens Creek Boulevard and Calle De Barcelona.

Existing Transit Services

Existing transit service to the City of Cupertino is provided by the Santa Clara Valley Transportation Authority (VTA). Routes 23 and Rapid 523 operate along Stevens Creek Boulevard. Route 23 provides service between De Anza College and Alum Rock Station, operating on an approximate 15-minute headway during peak commute hours. Rapid 523 provides service between San Jose State University and Lockheed Martin, operating on an approximate 15-minute headway during peak commute hours. The closest bus stops are located about 500 feet away near the intersection of Miller Avenue/Wolfe Road/Stevens Creek Boulevard.

CEQA Transportation Analysis

All projects in the City of Cupertino are required to evaluate Vehicle-Miles-Traveled (VMT) per CEQA. The City of Cupertino adopted their VMT Policy on February 16, 2021, based on the Senate Bill (SB) 743. VMT measures the total miles of travel by personal motorized vehicles a project is expected to generate in a day.

The CEQA VMT analysis was prepared in accordance with the City's Ordinance No. 21-2223, which outlines the methodology for analyzing a project's VMT impact. The City is processing this project's application under Senate Bill 330, which vests the applicable regulations at the time of the application (2024). Therefore, the City's 2021 Transportation Study Guidelines and the Cupertino Municipal Code (CMC) Chapter 17.08 were used to determine whether a project would result in CEQA transportation impacts related to VMT.

A project may be screened out from a VMT analysis based on its location, characteristics, or a combination of the two. Per Section 17.08.030(B)(1) of the CMC, a project can be screened out from further VMT analysis if it is located within a ¼-mile of a high-quality transit corridor or transit stop as defined by CEQA. The project is located along Stevens Creek Boulevard, which is defined as a high-quality transit corridor by CEQA Guidelines Section 21155.

A project relying on the CMC screening must be consistent with applicable General Plan policies and supported by substantial evidence demonstrating cumulative VMT is declining. According to Chapter 3 of Cupertino's General Plan, the project site is located in a Priority Development Area (PDA), which is a neighborhood within walking distance of frequent transit service, housing options, and local amenities. According to the City's 2021 Transportation Study Guidelines, the project site is located in a Transit Priority Area (TPA), which is an area located within a ¼-mile walkshed around an existing major transit corridor or a major transit stop (i.e. along Stevens Creek Boulevard in Cupertino). Due to the nature of development in a PDA/TPA, cumulative VMT would decline as a result of the proposed project.

In addition to the screening criteria in the CMC, the City's 2021 Transportation Study Guidelines also provides screening criteria for Transit Priority Areas (TPA). However, TPA screening will **not** apply if the project meets *any* of the following criteria:

- The project has a Floor Area Ratio (FAR) of 0.75 or less;
- The proposed parking exceeds the minimum required by the Zoning Code or applicable plan;
- The Project is inconsistent with the City's General Plan, applicable Specific Plan, or applicable Sustainable Communities Strategy (as determined by the lead agency, with input from ABAG and MTC);
- The Project removes or reduces the number of existing on-site affordable residential units; or,
- Significant levels of VMT generation are anticipated due to project-specific or location-specific information.

The project is located within a ¼-mile walkshed around an existing major transit corridor due to its northern frontage located along Stevens Creek Boulevard. The project would have a FAR greater than 0.75 and is consistent with the City's General Plan. Based on Table 19.124.040(A) in the CMC, the City's parking requirement for small-lot single-family townhomes ("Small Lot Cluster Development") is 2.8 parking spaces per dwelling unit. Each townhome would provide two parking spaces in each garage and a total of nine surface parking spaces for visitors, which is less than the requirement. The project would not replace any affordable housing and is not expected to generate significant levels of VMT. Therefore, the project qualifies for the Transit Priority Area screening criteria.

Local Transportation Analysis

The non-CEQA Local Transportation Analysis (LTA) describes the method by which project generated traffic is estimated and includes an evaluation of site access, on-site circulation, and parking. Since the project would generate fewer than 110 net new daily trips, an off-site LOS analysis is not required. The effects of the project on bicycle, pedestrian and transit facilities in the study area are also described in this section.

Trip Generation

Trips generated by any new development are typically estimated based on counts of existing developments of the same land use type. A compilation of typical trip generation rates can be found in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual.* Project trip generation was estimated by applying to the size and use of the proposed development the appropriate trip generation rates obtained from the ITE *Trip Generation Manual, 11th Edition* (2021).

Trips that would be generated by the residential project were estimated using the ITE average trip rates for "Single-Family *Attached* Housing" (ITE Land Use 215) located in a General Urban/ Suburban setting for the townhome units and "Multifamily Housing (Mid-Rise)" (ITE Land Use 221) located in a General Urban/ Suburban setting for the ADU units.

Existing Trip Credits

Trips that are generated by existing occupied uses can be subtracted from the gross project trip generation estimates. Driveway counts conducted in November 2024 were used to estimate existing trip generation.

Net Project Trips

After applying the appropriate ITE trip rates and existing trip credits, the proposed residential project is estimated to generate 100 net new daily vehicle trips, with 15 new trips (-1 inbound trips

and 16 outbound trips) occurring during the AM peak hour and 0 new trips (4 inbound trips and -4 outbound trips) occurring during the PM peak hour (see Table 2).

Table 1
Project Trip Generation Estimates

Land Use	Size	Daily Rate	Daily Trips	AM Peak Hour Pk-Hr Rate	AM In	AM Out	AM Total	PM Peak Hour Pk-Hr Rate	PM In	PM Out	PM Total
Proposed Uses											
Single Family Attached Housing[1]	55 DU	7.20	396	0.48	8	18	26	0.57	18	13	31
Accessory Dwelling Unit (ADU) [2]	10 DU	5.44	54	0.36	1	3	4	0.44	2	2	4
Project Trips:			**450**		**9**	**21**	**30**		**20**	**15**	**35**
Existing Uses (To Be Removed)											
Shopping Center [3]	13.6 ksf		(350)		(10)	(5)	(15)		(16)	(19)	(35)
Net New Trips:			**100**		**-1**	**16**	**15**		**4**	**-4**	**0**

Notes:
[1] Project trip generation estimates based on average rates contained in the *ITE Trip Generation Manual, 11th Edition* , for Single-Family Attached Housing (Land Use 215) located in a General Urban/Suburban setting. Rates are expressed in trips per dwelling
[2] Project trip generation estimates based on average rates contained in the *ITE Trip Generation Manual, 11th Edition* , for Multifamily Housing Mid-Rise (Land Use 221) located in a General Urban/Suburban setting. Rates expressed in trips per dwelling unit (DU).
[3] Counts conducted for the exisiting site on 11/21/2024. Daily trips estimated as 10 times PM peak hour trips.

Site Access and On-Site Circulation

The site access evaluation is based on the April 10, 2025 preliminary site plan prepared by CBG Civil Engineers (see Figure 2). Site access was evaluated to determine the adequacy of the site plan with regard to geometric design, sight distance, and general operations. On-site vehicular circulation and parking layout were reviewed in accordance with generally accepted traffic engineering standards and transportation planning principles. Truck access and on-site circulation were also evaluated.

Driveway Design and Operations

The project would construct a single driveway along East Estates Drive. The driveway measures 26 feet in width, which is adequate for two-way operations. The project-generated trips that would use the driveway are 9 inbound and 21 outbound during the AM peak hour and 20 inbound and 15 outbound during the PM peak hour. This equates to one vehicle entering or exiting approximately every three minutes. Due to the low number of AM and PM peak hour project-generated trips and the low traffic volumes along East Estates Drive, operational issues related to vehicle queueing or delays would be minimal at the project driveway. Some minor on-street queuing may occur while vehicles wait to turn left into the project driveway. Similarly, some minor on-site queuing may occur while vehicles wait for a gap in traffic to turn out of the project site.

Sight Distance

The project driveway should be free and clear of any obstructions to provide adequate sight distance, thereby ensuring that exiting vehicles can see pedestrians on the sidewalk and vehicles and bicycles traveling along East Estates Drive. Any landscaping and signage should be located in such a way to ensure an unobstructed view for drivers exiting the site and turning onto East Estates Drive. Providing the appropriate sight distance reduces the likelihood of a collision at a driveway or intersection and provides drivers with the ability to locate sufficient gaps in traffic.

The minimum acceptable sight distance is considered the Caltrans stopping sight distance. Sight distance requirements vary depending on roadway speeds. East Estates Drive is presumed to have a speed limit of 25 mph, so the Caltrans stopping sight distance is 200 feet (based on a design speed of 30 mph). Accordingly, a driver must be able to see 200 feet along East Estates Drive in order to stop and avoid a collision. Some minor roadway curvature is present along East Estates Drive. However, a clear line of sight is available in both directions for at least 200 feet so that exiting vehicles can see along both directions of East Estates Drive. Figure 3 shows a clear line of sight from the project driveway along both directions of East Estates Drive. The preliminary site plan shows trees that would be planted along East Estates Drive. The canopies of the trees should be maintained so that they are at least 10 feet in height so that they do not impede the view of exiting drivers. Street parking is permitted along East Estates Drive. Red curb should be striped equal to one car length south of the driveway and all the way to Stevens Creek Boulevard north of the proposed driveway. If additional frontage improvements, such as signage or additional landscaping, are proposed, they should be located so that the view of exiting drivers is not impeded.

On-Site Vehicular Circulation and Parking Layout

On-site vehicular circulation was reviewed in accordance with generally accepted traffic engineering standards. Internal drive aisles would provide access to each townhome garage. The on-site drive aisles measure between 24 and 39 feet, which is adequate for two-way circulation. The site plan shows nine on-street 90-degree parking spaces. The street measures 24 feet in width, providing adequate space for vehicles to back out.

Emergency Vehicle Access

The City of Cupertino Fire Department requires a minimum driveway width of 20 feet, requires turnarounds for driveways more than 150 feet in length, and requires a minimum of 13.5 feet of vertical clearance. The project driveways and all internal streets are shown to be at least 20 feet wide and would all be less than 150 feet in length. Therefore, the project would meet the City's fire access requirements.

Garbage Collection

Trash bins would be stored within each individual townhome unit. Trash bins would need to be wheeled out to the driveways on garbage collection days. All garbage collection activities would occur on-site. Garbage trucks may need to either pull in/back out or back in/pull out of the three dead-end streets. Each street would be less than 50 feet from the nearest intersection of internal streets.

Parking Supply

Based on Table 19.124.040(A) in the CMC, the City of Cupertino minimum parking requirement for small-lot single-family townhomes ("Small Lot Cluster Development") is 2.8 parking spaces per dwelling unit, including 2 garage spaces and 0.8 open spaces. The City does not specify a minimum parking requirement for ADUs. Therefore, the project would be required to provide at least 154 parking spaces. According to the site plan, the project is proposing to provide two garage parking spaces per unit. The project also proposes nine on-site surface parking spaces. This equates to a total of 119 parking spaces, which does not meet the City's minimum parking requirement. ADU residents and guests could park on the nine on-site surface parking spaces or along East Estates Drive or Richwood Drive.

> **Recommendation:** The applicant should either increase the number of open parking spaces or obtain a parking variance.

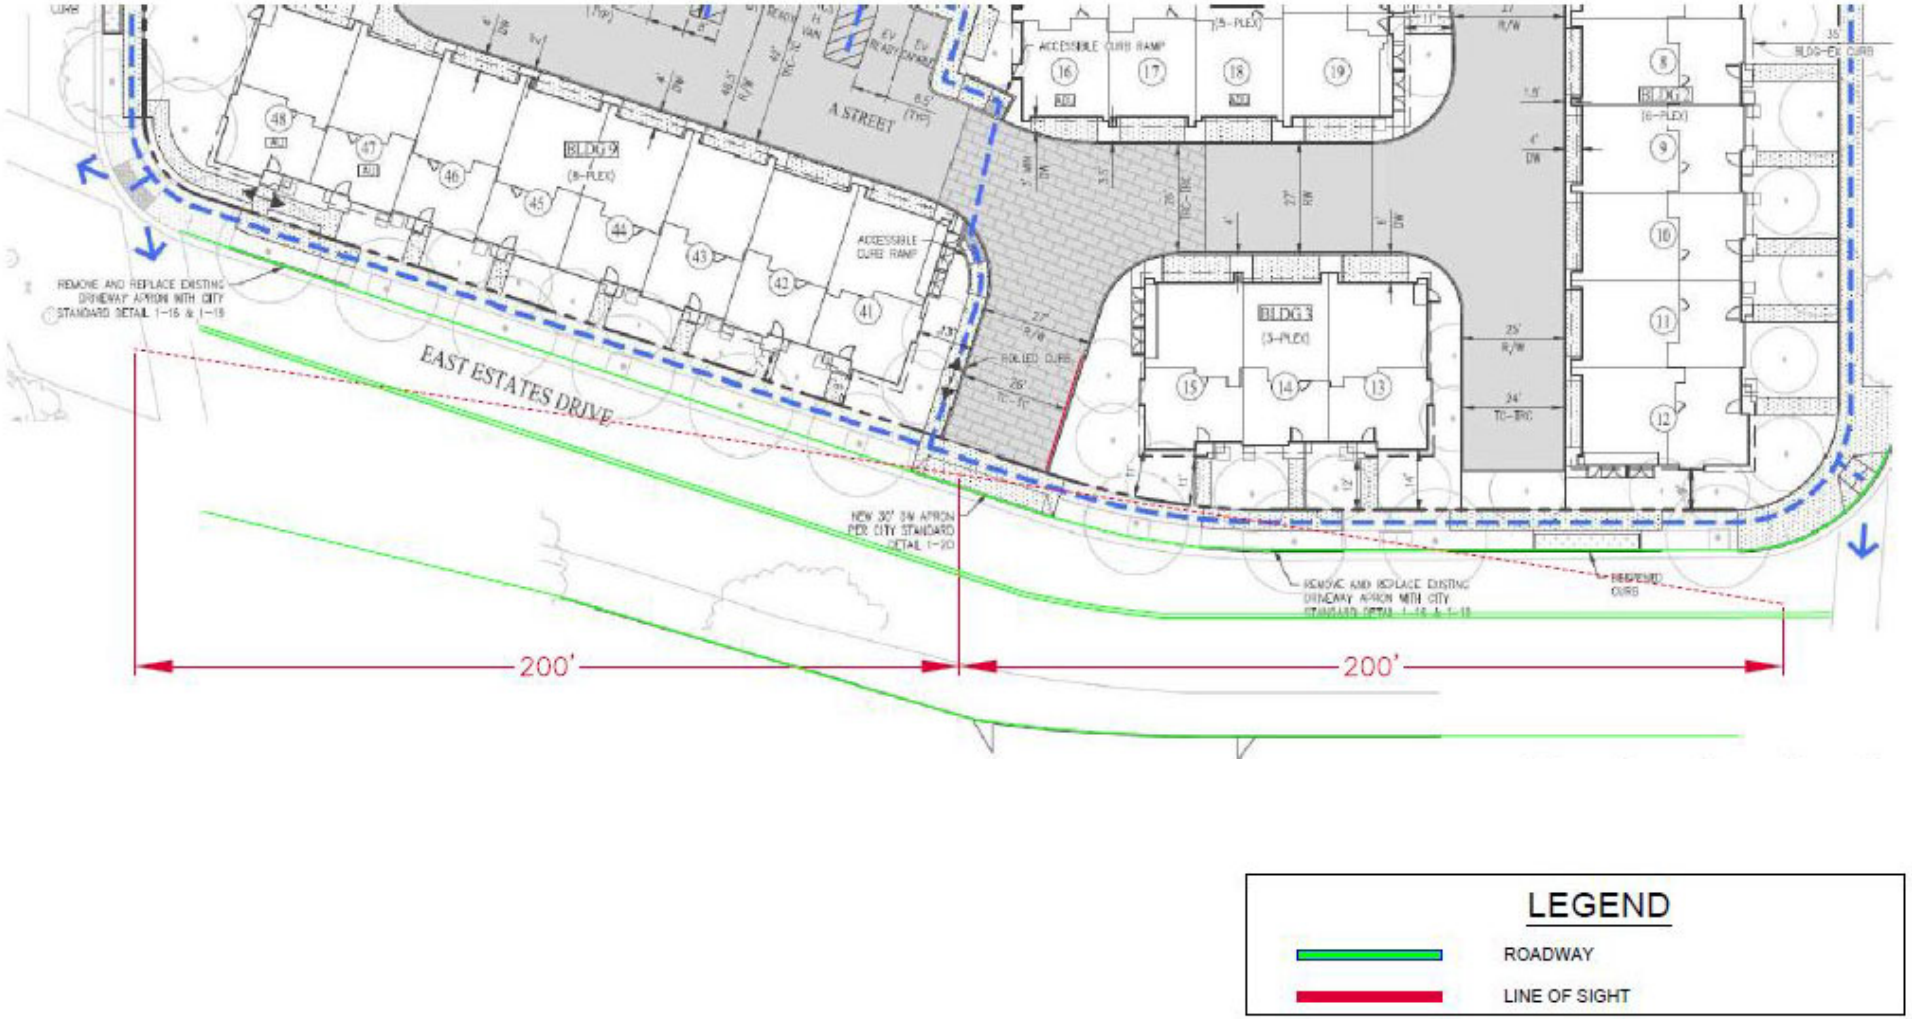

Figure 3
Sight Distance Exhibit

NORTH
Not to Scale

Pedestrian, Bicycle and Transit Evaluation

This section presents a qualitative analysis of the project's effect on bicycle and pedestrian circulation as well as transit service in the study area.

Pedestrian Facilities

Pedestrian facilities consist of sidewalks, ADA compliant curb ramps, and crosswalks at many of the nearby unsignalized intersections. In the vicinity of the project site, standard width continuous sidewalks exist along East Estates Drive, Richwood Drive, Miller Avenue and Stevens Creek Boulevard. High-visibility piano key style crosswalks are provided at the intersection of Miller Avenue/Stevens Creek Boulevard. The existing pedestrian facilities in the project vicinity provide good connectivity from the project site to nearby points of interest, including bus stops and retail centers.

The project would reconstruct the existing sidewalks along its frontages on East Estates Drive, Stevens Creek Boulevard, and Richwood Drive. Walkways from each street frontage would provide direct access to the townhomes. An internal walkway network would provide both north-south and east-west connections from East Estates Drive and Stevens Creek Boulevard to the townhomes located in the center of the project site. Accessible curb ramps would be provided on-site at each crossing of an internal drive aisle.

Bicycle Facilities

In the project vicinity, a Class IV protected bike lane is present along Stevens Creek Boulevard, between Miller Avenue and Tantau Avenue. Class II bike lanes are present along Miller Avenue, north of Stevens Creek Boulevard and along Stevens Creek Boulevard, west of Miller Avenue. A Class III bike route is present along Miller Avenue, between Stevens Creek Boulevard and Calle De Barcelona. The City's Bicycle and Pedestrian Transportation Plan identifies a Class IV bike lane along Stevens Creek Boulevard, west of Wolfe Road/Miller Avenue

The project does not propose to alter any existing bicycle facilities or conflict with any planned facilities in the vicinity. The project would not provide any on-site bicycle parking. Residents could store bicycles within each townhome garage.

Existing Transit Services

Existing transit service to the City of Cupertino is provided by the Santa Clara Valley Transportation Authority (VTA). Routes 23 and Rapid 523 operate along Stevens Creek Boulevard. Route 23 provides service between De Anza College and Alum Rock Station, operating on an approximate 15-minute headway during peak commute hours. Rapid 523 provides service between San Jose State University and Lockheed Martin, operating on an approximate 15-minute headway during peak commute hours.

The closest bus stops are located less than 500 feet from the project site at the intersection of Miller Avenue/Wolfe Road/Stevens Creek Boulevard. The bus stops in both directions can be accessed via the existing pedestrian network. Any small increase in transit trips is expected to be accommodated by the existing transit capacity.

Conclusions

The project would remove 13,560 square feet (s.f.) of retail uses currently on the 2.72-acre Idlewild Shopping Center site and construct 55 townhomes and 10 accessory dwelling units (ADUs). Since the project site is located within a ¼-mile of a high-quality transit corridor as defined by CEQA and is located in a PDA/TPA, it can be presumed to have a less-than-significant VMT impact. The project is estimated to generate 100 net new daily vehicle trips, with 15 new trips (-1 inbound trips

and 16 outbound trips) occurring during the AM peak hour and 0 new trips (4 inbound trips and -4 outbound trips) occurring during the PM peak hour. The site plan shows adequate access and circulation for cars, trucks, and pedestrians. Since street trees are proposed along East Estates Drive, their canopies should be maintained to at least 10 feet so that they do not impede the view of exiting drivers. Red curb should be striped equal to one car length south of the proposed driveway and all the way to Stevens Creek Boulevard north of the driveway. As proposed, the project would not meet the City's parking requirement. Therefore, the project should either increase the number of open parking spaces or obtain a variance.

APPENDIX C

NOISE ANALYSIS

DATE	August 6, 2025
TO	City of Cupertino Planning Division
ADDRESS	10300 Torre Ave Cupertino, CA 95014
CONTACT	Gian Martire, Senior Planner
FROM	Chris Shields, INCE-USA, Senior Associate, Noise and Vibration
SUBJECT	Noise Technical Memorandum for Idlewild Townhomes Project
PROJECT NUMBER	COCU-34

PlaceWorks technical staff has prepared a community noise assessment memorandum to support the Notice of Exemption under Class 32 of the California Environmental Quality Act (CEQA) Guidelines for the proposed residential townhome project.

Project Location

The 2.72-acre project site at 10065 East Estates Drive in the central region of the city near the intersection of Stevens Creek Boulevard and Saich Way. The project site is bounded by Stevens Creek Boulevard to the north, East Estates Drive to the east, Richwood Drive to the south, a daycare/residence to the southwest, and commercial buildings and surface parking lot to the west.

Project Description

The proposed project includes the demolition of the existing commercial building (approximately 35,170 square feet) and the construction of 55 townhome units and 10 accessory dwelling units (ADUs). The proposed townhomes include 43 market-rate units and 12 below-market-rate units ranging from 1,442 square feet to 2,295 square feet. The proposed project includes 110 off-street garage residential parking spaces and 9 guest uncovered parking spaces. 1,140 square feet of common area open space would also be provided. The proposed project demolition, grading, and construction is assumed to take place starting in summer 2026 and ending in 2028.

Noise Fundamentals

Noise is defined as unwanted sound. Although sound can be easily measured, the perception of noise and the physical response to sound complicate the analysis of its impact on people. People judge the relative magnitude of sound sensation in subjective terms such as “noisiness” or “loudness.” Based on these known adverse effects of noise, the federal government, the State of California, and many local governments have established criteria to protect public health and safety and to prevent disruption of certain human activities.

NOISE TERMINOLOGY AND DESCRIPTORS

The following are brief definitions of terminology used in this study.

- **Sound.** A disturbance created by a vibrating object, which, when transmitted by pressure waves through a medium such as air, is capable of being detected by a receiving mechanism, such as the human ear or a microphone.

- **Noise.** Sound that is loud, unpleasant, unexpected, or otherwise undesirable.

- **Decibel (dB).** A unitless measure of sound on a logarithmic scale.

- **A-Weighted Decibel (dBA).** An overall frequency-weighted sound level in decibels that approximates the frequency response of the human ear.

- **Equivalent Continuous Noise Level (Leq).** The mean of the noise level, energy-averaged over the measurement period.

- **Community Noise Equivalent Level (CNEL).** The energy-average of the A-weighted sound levels occurring during a 24-hour period with 5 dB added during the period from 7:00 p.m. to 10:00 p.m. and 10 dB added during the period from 10:00 p.m. to 7:00 a.m.

SOUND FUNDAMENTALS

Sound is a pressure wave transmitted through the air. It is described in terms of loudness or amplitude (measured in decibels), frequency or pitch (measured in Hertz [Hz] or cycles per second), and duration (measured in seconds or minutes). The standard unit of measurement of the loudness of sound is the decibel (dB). Changes of 1 to 3 dBA are detectable under quiet, controlled conditions, and changes of less than 1 dBA are usually indiscernible. A 3 dBA change in noise levels is considered the minimum change that is detectable with human hearing in outside environments. A change of 5 dBA is readily discernable to most people in an exterior environment, and a 10 dBA change is perceived as a doubling (or halving) of the sound.

The human ear is not equally sensitive to all frequencies. Sound waves below 16 Hz are not heard at all and are "felt" more as a vibration. Similarly, while people with extremely sensitive hearing can hear sounds as high as 20,000 Hz, most people cannot hear above 15,000 Hz. In all cases, hearing acuity falls off rapidly above about 10,000 Hz and below about 200 Hz. The common human ear detects sound frequencies between 200 and 15,000 Hz. Since the human ear is not equally sensitive to sound at all frequencies, a special frequency-dependent rating scale is usually used to relate noise to human sensitivity. The A-weighted decibel scale (dBA) performs this compensation by discriminating against frequencies in a manner approximating the sensitivity of the human ear.

SOUND MEASUREMENT

Sound intensity is measured through the A-weighted scale to correct for the relative frequency response of the human ear. That is, an A-weighted noise level de-emphasizes low and very high frequencies of sound similar to the human ear's de-emphasis of these frequencies.

Unlike linear units such as inches or pounds, decibels are measured on a logarithmic scale, representing points on a sharply rising curve. On a logarithmic scale, an increase of 10 dBA is 10 times more intense than 1 dBA, while 20 dBA is 100 times more intense, and 30 dBA is 1,000 times more intense. A sound as soft as human breathing is about 10 times greater than 0 dBA. The decibel system of measuring sound gives a rough connection between the physical intensity of sound and its perceived loudness to the human ear. Ambient

sounds, or background noise that could include traffic, noise, ocean waves, air conditioning, of rustling leaves, generally range from 30 dBA (very quiet) to 100 dBA (very loud).

Sound levels are generated from a source and their decibel level decreases as the distance from that source increases. Sound dissipates exponentially with distance from the noise source. This phenomenon is known as "spreading loss." For a single point source, sound levels decrease by approximately 6 dBA for each doubling of distance from the source. This drop-off rate is appropriate for noise generated by on-site operations from stationary equipment or activity at a project site. If noise is produced by a line source, such as highway traffic, the sound decreases by 3 dBA for each doubling of distance in a hard site environment. Line source noise in a relatively flat environment with absorptive vegetation decreases by 4.5 dBA for each doubling of distance.

Time variation in noise exposure is typically expressed in terms of a steady-state energy level equal to the energy content of the time varying period (called Leq), or alternately, as a statistical description of the sound level that is exceeded over some fraction of a given observation period. For example, the L50 noise level represents the noise level that is exceeded 50 percent of the time. Half the time the noise level exceeds this level and half the time the noise level is less than this level. This level is also representative of the level that is exceeded 30 minutes in an hour. Similarly, the L2, L8, and L25 values represent the noise levels that are exceeded 2, 8, and 25 percent of the time or 1, 5, and 15 minutes per hour. These "L" values are typically used to demonstrate compliance for stationary noise sources with a City's noise ordinance, as discussed below. Other values typically noted during a noise survey are the Lmin and Lmax. These values represent the minimum and maximum root-mean-square noise levels obtained over the measurement period.

Because community receptors are more sensitive to unwanted noise intrusion during the evening and at night, an artificial dB increment is added to quiet-time noise levels in a 24-hour noise descriptor called the Community Noise Equivalent Level (CNEL) or Day-Night Noise Level (Ldn). The CNEL descriptor requires that an artificial increment of 5 dBA be added to the actual noise level for the hours from 7:00 a.m. to 10:00 p.m. and 10 dBA for the hours from 10:00 p.m. to 7:00 a.m. The Ldn descriptor uses the same methodology except that there is no artificial increment added to the hours between 7:00 p.m. and 10:00 p.m. Both descriptors give roughly the same 24-hour level with the CNEL being only slightly more restrictive (i.e., higher).

PSYCHOLOGICAL AND PHYSIOLOGICAL EFFECTS OF NOISE

Physical damage to human hearing begins at prolonged exposure to noise levels higher than 85 dBA. Exposure to high noise levels affects our entire system, with prolonged noise exposure in excess of 75 dBA increasing body tensions, and thereby affecting blood pressure, functions of the heart, and the nervous system. In comparison, extended periods of noise exposure above 90 dBA could result in permanent hearing damage. When the noise level reaches 120 dBA, a tickling sensation occurs in the human ear even with short-term exposure. This level of noise is called the threshold of feeling. As the sound reaches 140 dBA, the tickling sensation is replaced by the feeling of pain in the ear. This is called the threshold of pain. A sound level of 190 dBA will rupture the eardrum and permanently damage the inner ear.

Existing Noise Conditions

NOISE SOURCES

The project site fronts Stevens Creek Boulevard and is approximately 0.47 feet southwest of Interstate 280 (I-280). The entirety of project site is within the 60 dBA CNEL noise contour of the City of Cupertino General

Plan Future Noise Contour Map[1], primarily attributable to traffic noise from Stevens Creek Boulevard and North Wolfe Road/Miller Avenue. A northern portion of the site closest to Stevens Creek Boulevard is also within the 65 and 70 dBA CNEL noise contours due to the proximity to Steven Creek Boulevard.

The baseline roadway noise levels modeled for the General Plan Environmental Assessment (Appendix G to the General Plan) indicate that noise levels between Tantau Avenue and Portal Avenue on Stevens Creek Boulevard are 68.8 dBA CNEL at 50 feet, while noise levels north and south of Stevens Creek Boulevard along Wolfe Road/Miller Avenue are 69.1 dBA CNEL and 65.0 dBA CNEL at 50 feet, respectively. Existing ambient noise levels measured at Wolfe Road/Miller Avenue and Stevens Creek Boulevard in 2014 for the City's General Plan were 69.1 dBA Ldn.[2]

SENSITIVE RECEPTORS

The nearest sensitive receptors to the project site are the single-family residences south and southwest of the site along Richwood Drive. The nearest of these residences, which also hosts a daycare, is adjacent to the southwest boundary of the site and is approximately 40 feet west, when measuring from the project boundary to the property line of the residence. Other nearby residences are approximately 60 feet south of the site, measuring from the project boundary to the property line of the nearest residence. Commercial, retail, office buildings and parking lot uses are located to the east and west of the site . The closest of these uses (retail shopping center to the west) is approximately 60 feet west of the project boundary.

Applicable Standards

STATE NOISE REGULATIONS

California Building Code

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards, and provides guidance for local land use compatibility. State law requires that each county and city adopt a general plan that includes a noise element which is to be prepared according to guidelines adopted by the Governor's Office of Planning and Research. The purpose of the noise element is to "limit the exposure of the community to excessive noise levels."

The California Building Code (CBC), Title 24, Part 2, Volume 1, Chapter 12, Section 1207.11.2, Allowable Interior Noise Levels, requires that interior noise levels attributable to exterior sources shall not exceed 45 dBA in any habitable room. The noise metric is evaluated as either the day-night average sound level (Ldn) or the community noise equivalent level (CNEL), consistent with the noise element of the local general plan.

[2] Cupertino, City of. 2024. Cupertino General Plan Community Vision 2015-2040, Table D-1, Noise Monitoring Summary, Appendix D, Community Noise Fundamentals. https://files.ceqanet.lci.ca.gov/282380-1/attachment/wlOf61Lt1HjIfDkLywtKWvScCds4CyJC9H_4ON3dqT0jmtZXX9BPBRJvJGfsF2Sv68hpAM2t_7YxXffT0

The California Green Building Standards Code (CALGreen) has requirements for insulation that affects exterior-interior noise transmission for nonresidential structures. Pursuant to CALGreen Section 5.507.4.1, Exterior Noise Transmission, an architectural acoustics study may be required when a project site is within a 65 dBA CNEL or L_{dn} noise contour of an airport, freeway or expressway, railroad, industrial source or fixed-guideway source. Where noise contours are not readily available, if buildings are exposed to a noise level of 65 dBA L_{eq} during any hour of operation, specific wall and ceiling assembly and sound-rated windows may be necessary to reduce interior noise to acceptable levels.

LOCAL NOISE REGULATIONS

City of Cupertino Municipal Code

The Cupertino Municipal Code (CMC) includes various directives to minimize adverse noise impacts in Cupertino. The CMC is organized by title, chapter, and section. Most provisions related to noise are included in Title 10, Public Peace, Safety and Morals, and Title 17, Environmental Regulations, as follows:

» Chapter 10.48, Community Noise Control. This chapter includes provisions for the noise control program and provides procedures to implement and enforce the program. It also provides the City's maximum allowable noise levels, as shown in Table 1, *Daytime and Nighttime Maximum Noise Levels*, unless stated otherwise.

Table 1 Daytime and Nighttime Maximum Noise Levels

Land Use at Point of Origin	Maximum Noise Level at Complaint Site of Receiving Property	
	Nighttime	Daytime
Residential	50 dBA	60 dBA
Non-residential	55 dBA	65 dBA

Source: City of Cupertino Municipal Code, Section 10.48.40

Note: 'Nighttime' is defined as periods of weekdays from 8:00 p.m. to 12:00 midnight, and from midnight to 7:00 a.m., and periods on weekends from 6:00 p.m. to midnight and from midnight to 9:00 a.m. 'Daytime' is defined as the period from 7:00 a.m. to 8:00 p.m. on weekdays, and the period from 9:00 a.m. to 6:00 p.m. on weekends.

Chapter 10.48 of the Municipal Code also addresses construction noise, stating that grading, construction, and demolition activities are allowed to exceed the noise limits identified in Table 1 during daytime hours, provided that the equipment utilized has high-quality noise muffler and abatement devices installed and in good condition, and the activity meets one of the following two criteria:

1. No individual device produces a noise level more than 87 dBA at a distance of 25 feet (7.5 meters); or
2. The noise level on any nearby property does not exceed 80 dBA.

Section 10.48.045, Interior Noise in Multiple-Family Dwellings, provides additional requirements for noise from multiple-family units. This includes requirements for not producing noise levels exceeding 45 dBA five feet from any wall in any adjoining unit during the period between seven a.m. and ten p.m. or exceeding 40 dBA during hours from ten p.m. to seven a.m. the following day. In addition to the requirement to achieve these two criteria; grading, street construction, demolition, or underground utility work within 750 feet of a residential area is prohibited within the city on Saturdays, Sundays, and holidays, and during the nighttime period unless it meets the nighttime standards identified in Table 1.

» Chapter 17.04, Standard Environmental Protection Requirements. The purpose of Chapter 17.04 of the Municipal Code is to identify standard environmental protection requirements that all construction projects must meet, including but not limited to environmental mitigation measures identified in any environmental documents required as part of a General Plan update. Chapter 17.04 includes specific requirements for noise and vibration.

» Section 17.04.040(D)(1). Vibration Technical Report Requirements. Section 17.04.040(D)(1) requires that the project applicant provide a vibration study to determine vibration levels due to construction to the City, prior to approval of the project, when the following activities would occur within the screening distance to buildings or structures: pile driving within 100 feet, vibratory roller within 25 feet, or other heavy equipment (e.g., bulldozer) within 15 feet; and for historical structures: pile driving within 135 feet, vibratory roller within 40 feet, or other heavy equipment within 20 feet. If vibration levels due to construction activities exceeds 0.2 inches per second peak particle velocity (in/sec PPV) at nearby buildings or structures, or 0.12 in/sec PPV at historical structures, the project shall implement the following alternative methods/equipment:

a. For pile driving, one of the following options shall be used: caisson drilling (drilled piles), vibratory pile drivers, oscillating or rotating pile installation methods, or jetting or partial jetting of piles into place using a water injection at the tip of the pile.

b. For paving, use a static roller in lieu of a vibratory roller.

c. For grading and earthwork activities, off-road equipment must be limited to 100 horsepower or less.

» Section 17.04.050(G)(1). Notice and Signage. Section 17.04.050(G)(1) provides the requirements for notice and signage for noise and vibration permits, as follows:

a. At least 10 days prior to the start of any demolition, ground disturbing, or construction activities, the project applicant must send notices of the planned activity by first class mail as follows:

   i. For projects on sites that are more than 0.5 acres or four or more residential units the notices must be sent to off-site businesses and residents within 500 feet of the project site;

   ii. For projects on sites between 0.25 to 0.5 acres, or two or three residential units (not including Accessory Dwelling Units) notices are required to be sent to off-site businesses and residents within 250 feet of the project site; or

   iii. For projects on sites less than 0.25 acres or one residential unit, the notices must be sent to off-site businesses and residents within 100 feet of the project site.

The notification must include a brief description of the project, the activities that would occur, the hours when activity would occur, and the construction period's overall duration. The notification should include the telephone numbers of the contractor's authorized representatives that are assigned to respond in the event of a noise or vibration complaint. The project applicant is required to provide the City with evidence of mailing of the notice, upon request.

b. At least 10 days prior to the start of construction activities, a sign must be posted at the entrance(s) to the job site, clearly visible to the public, which includes permitted construction days and hours, as well as the telephone numbers of the City's and contractor's authorized representatives that are assigned to respond in the event of a noise or vibration complaint. If the authorized contractor's representative receives a complaint, they are required to investigate, take appropriate corrective action, and report the action to the City within three business days of receiving the complaint.

» **Section 17.04.050(G)(2). Manage Noise During Construction.** Projects must implement the following measures to reduce noise during construction and demolition activity:

a. The project applicant and contractors are required to prepare and submit a Construction Noise Control Plan to the City's Planning Department for review and approval prior to issuance of the first permit. The Construction Noise Plan must demonstrate compliance with daytime and nighttime decibel limits pursuant to Chapter 10.48 (Community Noise Control). The details of the Construction Noise Control Plan are required to be included in the applicable construction documents and implemented by the on-site Construction Manager. Noise reduction measures selected and implemented must be based on the type of construction equipment used on the site, distance of construction activities from sensitive receptor(s), site terrain, and other features on and surrounding the site (e.g., trees, built environment) and may include, but not be limited to, temporary construction noise attenuation walls, high quality mufflers. During the entire active construction period, the Construction Noise Control Plan is required to demonstrate that compliance with the specified noise control requirements for construction equipment and tools will reduce construction noise in compliance with the City's daytime and nighttime decibel limits.

b. Select haul routes that avoid the greatest amount of sensitive use areas and submit to the City of Cupertino Public Works Department for approval prior to the start of the construction phase.

c. Signs will be posted at the job site entrance(s), within the on-site construction zones, and along queueing lanes (if any) to reinforce the prohibition of unnecessary engine idling. All other equipment will be turned off if not in use for more than 5 minutes.

d. During the entire active construction period and to the extent feasible, the use of noise producing signals, including horns, whistles, alarms, and bells will be for safety warning purposes only. The construction manager will use smart back-up alarms, which automatically adjust the alarm level based on the background noise level or switch off back-up alarms and replace with human spotters in compliance with all safety requirements and law.

» **Section 17.04.050(G)(3). Manage Vibrations During Construction.** In the event pile driving is required, the project applicant is required to:

a. Notify all vibration-sensitive receptors within 300 feet of the project site of the schedule 10 days prior to its commencement and include the contact information for the person responsible for responding to complaints on site.

b. The project applicant is required to retain a qualified acoustical consultant or structural engineer to prepare and implement a Construction Vibration Monitoring Plan, which is subject to third-party peer review under the direction of the City at the applicant's cost, for areas within 100 feet for pile driving, 25 feet for vibratory roller, or 15 feet for other heavy equipment (e.g., bulldozer); and for historical structures: within 135 feet for pile driving, 40 feet for vibratory roller, or 20 feet for other heavy equipment. The plan has to include surveying the condition of existing structures; and determining the number, type, and location of vibration sensors and establish a vibration velocity limit (as determined based on a detailed review of the proposed building), method (including locations and instrumentation) for monitoring vibrations during construction, location of notices displaying the contact information for on-site coordination and complaints on site, and method for alerting responsible persons who have the authority to halt construction should limits be exceeded or damaged observed.

c. Submit final monitoring reports to the City upon completion of vibration related construction activities.
d. Conduct a post-survey on any structure where either monitoring has indicated high vibration levels or complaints that damage has occurred are received. e. The project applicant shall be responsible for appropriate repairs as determined by the qualified acoustical consultant or structural engineer where damage has occurred as a result of construction activities.

City of Cupertino General Plan

The City of Cupertino adopted an update to its General Plan in 2024 (known as the "community vision 2015 – 2040") which contains the following policies in the Health and Safety Element relevant to noise:

- Policy HS-8.1: Land Use Decision Evaluation. Use the Land Use Compatibility for Community Noise Environments chart, the Future Noise Contour Map (see Figure D-1 in Appendix D of the General Plan) and the City Municipal Code to evaluate land use decisions.
- Policy HS-8.2: Building And Site Design. Minimize noise impacts through appropriate building and site design.
- HS-8.2.2: Noise Control Techniques. Require analysis and implementation of techniques to control the effects of noise from industrial equipment and processes for projects near low-intensity residential uses.
- HS-8.2.3: Sound Wall Requirements. Exercise discretion in requiring sound walls to be sure that all other measures of noise control have been explored and that the sound wall blends with the neighborhood. Sound walls should be designed and landscaped to fit into the environment.
- Policy HS-8.3: Construction And Maintenance Activities. Regulate construction and maintenance activities. Establish and enforce reasonable allowable periods of the day, during weekdays, weekends and holidays for construction activities. Require construction contractors to use the best available technology to minimize excessive noise and vibration from construction equipment such as pile drivers, jack hammers, and vibratory rollers.
- Policy HS-8.4: Freeway Design And Neighborhood Noise. Ensure that roads and development along Highway 85 and Interstate 280 are designed and improved in a way that minimizes neighborhood noise.

Thresholds of Significance

CONSTRUCTION NOISE

According to CMC Section 10.48.053, Grading, Construction and Demolition, construction is allowed during "daytime hours" (7:00 a.m. to 8:00 p.m. Monday through Friday, and 9:00 a.m. to 6:00 p.m. on weekends) and exempt from the City's daytime and nighttime maximum noise level limits, provided that such construction activities do not exceed 80 dBA at the nearest affected property or individual equipment items do not exceed 87 dBA at 25 feet. Only one of these two criteria must be met. Construction is prohibited on holidays and within 750 feet of residential areas on weekends, holidays, and during the nighttime, unless a special exception has been granted, and during nighttime hours unless it meets the nighttime noise level standards. The following analysis shall construction activities do not exceed 80 dBA at the nearest affected property threshold when assessing construction noise impacts of the proposed project.

TRAFFIC NOISE

A project will normally have a significant effect on the environment related to traffic noise if it substantially increases the ambient noise levels for adjoining areas. Most people can detect changes in sound levels of approximately 3 dBA under normal, quiet conditions, and changes of 1 to 3 dBA under quiet, controlled conditions. Changes of less than 1 dBA are usually indiscernible. A change of 5 dBA is readily discernible to most people in an outdoor environment. Noise levels above 65 dBA CNEL are normally unacceptable at sensitive receptor locations such as residences, and noise environments in these areas would be considered degraded. Based on this, a significant impact would occur if the following traffic noise increases occur relative to the existing noise environment:

» 1.5 dBA in ambient noise environments of 65 dBA CNEL and higher
» 3 dBA in ambient noise environments of 60 to 64 dBA CNEL
» 5 dBA in ambient noise environments of less than 60 dBA CNEL

Based on existing traffic noise modeling, a significant traffic noise impact occurs when the thresholds above are exceeded under cumulative conditions (with project) and the contribution of the proposed project to future traffic is calculated to be greater than 3 dBA CNEL for Stevens Creek Boulevard or surrounding project roadways.

STATIONARY NOISE

The CMC Section 10.48.040 contains the City's standards for maximum noise levels received at residential and non-residential zoned properties. These are shown in Table 1 above. Therefore, if stationary operational noise associated with the proposed project exceeds 50 dBA in residential areas or 60 dBA in nonresidential areas during nighttime hours or the 55 dBA for in residential areas or 65 dBA in non-residential areas during daytime hours, the proposed project would have potentially significant impacts.

VIBRATION

The City's standards for vibration impacts are outlined in Section 17.04.040(D)(1) of the CMC. This section requires that project applicants provide a vibration study to determine vibration levels due to construction to the City, prior to approval of the project, if project activities include pile driving within 100 feet, vibratory roller within 25 feet, or other heavy equipment (e.g., bulldozer) within 15 feet of existing buildings or structures; and if pile driving occurs within 135 feet, vibratory roller within 40 feet, or other heavy equipment within 20 feet of historic structures. This section also requires that projects implement alternative methods/equipment if vibration levels due to construction activities exceeds 0.2 inches per second peak particle velocity (in/sec PPV) at nearby buildings or structures, or 0.12 in/sec PPV at historical structures.

Therefore, the proposed project is considered to have potentially significant impacts with respect to vibration if it would cause vibration levels to exceed 0.2 PPV at nearby buildings or structures, or 0.12 in/sec PPV at historical structures.

Environmental Impacts

Would the project result in:

a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

PROJECT CONSTRUCTION NOISE

Noise generated by on-site construction equipment is based on the type of equipment used, its location relative to sensitive receptors, and the timing and duration of noise-generating activities. Each stage of construction involves different kinds of equipment and has distinct noise characteristics. Noise levels from construction activities are typically dominated by the loudest pieces of equipment. The dominant noise source of construction equipment is typically the engine, although work-piece noise (such as dropping of materials) can also be noticeable.

The noise produced at each construction stage is determined by combining the contributions from each piece of equipment used at a given time, while accounting for the on-going time-variations of noise emissions (commonly referred to as the usage factor) to determine the L_{eq} noise levels. However, overall noise emissions vary considerably, depending on what specific activity is being performed at any given moment. Noise attenuation due to distance, the number and type of equipment, and the load and power requirements to accomplish tasks at each construction phase would result in different noise levels from construction activities at a given receptor.

Since noise from construction equipment is intermittent and diminishes at a rate of at least 6 dBA per doubling of distance (conservatively ignoring other attenuation effects from air absorption, ground effects, and/or shielding/scattering effects), the average noise levels at noise-sensitive receptors could vary considerably, because mobile construction equipment would move around the site with different loads and power requirements.

Noise levels from project-related construction activities were calculated from the simultaneous use of all applicable construction equipment at spatially averaged distances (i.e., from the acoustical center of the general construction site or phase) to the property line of the nearest receptors. Although construction may occur across the entire phase area, the center of construction activities best represents the potential construction-related noise levels from multiple pieces of equipment at the various receptors. This is represented by the center of the entire construction site for activities such as paving, demolition, site preparation, and grading, which are expected to take place across the entire site. Other activities, such as building construction and architectural coating are expected to occur in a focused area of the construction site. Distances for these activities were measured from the property line of the receptors to the center of the nearest focused construction activity.

The expected construction equipment mix was estimated and categorized by construction activity and the three loudest equipment per activity phase using the Federal Highway Administration Roadway Construction Noise Model (RCNM). The associated, aggregate noise levels, grouped by construction activity, are summarized in Table 3, *Project-Related Construction Noise, dBA L_{eq} Noise Levels*, dBA.

Table 3 Project-Related Construction Noise, DBA L_{eq} Noise Levels

Construction Activity	Reference Noise Level	Residential/Daycare Receptor to the West	Residential Receptor to the South	Commercial Uses to the West
Distance	**50 feet**	**250 feet**	**280 feet**	**180 feet**
Demolition	84	73	69	73
Site Prep	84	73	69	73
Grading	83	72	68	72
Paving	79	67	64	68
Distance	**50 feet**	**60 feet**	**90 feet**	**60 feet**
Building Construction	79	77	74	77
Architectural Coating	74	72	69	72
Maximum dBA Leq		**77**	**74**	**77**
Exceeds 80 dBA Leq Threshold?		**No**	**No**	**No**

Source: FHWA's RCNM software.
Distances were measured using Google Earth (2025).

As shown in Table 3, noise levels from construction equipment would not exceed the City's 80 dBA threshold at the nearest affected noise sensitive receptors (the residential/daycare receptor to the southwest) or at the commercial use west of the project site. Additionally, CMC Chapter 17.04 requires that projects implement standard environmental protections to reduce impacts. Specifically, the project applicant will be required to comply with CMC Sections 17.04.050(G)(1) and 17.04.050(G)(2), detailed in the *Cupertino Municipal Code* section above, which will minimize impacts related to construction noise. Pursuant to CMC Section 17.04.050(G)(2), the proposed project would be required to prepare and implement a noise control plan to ensure compliance with daytime and nighttime decibel limits in the CMC. Therefore, the proposed project would not exceed standards established in the CMC during the construction phase.

PROJECT OPERATIONAL NOISE

Stationary-Source Noise

Noise from sources such as people talking and using outdoor common areas or property maintenance may contribute to the total noise environment within the direct vicinity of the proposed project site. However, these types of noise are commonly associated with uses that already exist on the project site and surrounding uses. Noise associated with landscape maintenance activities is exempt from the provisions of the CMC, provided said activities take place between the hours of 8:00 a.m. to 8:00 p.m. on weekdays, and 9:00 a.m. to 6:00 p.m. on weekends and holidays. Therefore, impacts from occasional property maintenance activities associated with the proposed project would be less than significant.

The project's common space area is in the center of the proposed project, approximately 170 feet north of the nearest residence on Richwood Drive. A typical conversation between two people 3 feet apart is 60 dBA.[3]

[3] Engineering ToolBox, 2005. Voice Level at Distance. Accessed June 6, 2025. https://www.engineeringtoolbox.com/voice-level-d_938.html

At a distance of 170 feet, noise levels would attenuate to approximately 25 dBA. Therefore, noise from typical use of the open space area would result in noise levels less than the CMC Section 10.48.040 nighttime 50 dBA limit for residential uses. Therefore, impacts from the proposed common outdoor use area would be less than significant.

The proposed townhomes are anticipated to have mechanical HVAC equipment on the ground next to units or on the on the rooftop. The exterior mechanical and HVAC equipment associated with the proposed townhomes are expected to be similar to the existing commercial uses on the site or quieter. Because mechanical specifications for these proposed units are not yet available, it is conservatively assumed that noise from these units would be up to 72 dBA L_{eq} at a distance of 3 feet and that they could be located within approximately 45 feet from the nearest residential property lines to the west. At this distance, the sound pressure level associated with a common HVAC unit would be approximately 48 dBA at the nearest noise sensitive receptor. Therefore, the noise level associated with HVAC in the backyards of the future residential units could exceed the CMC Section 10.48.040 standards, which limit nighttime noise to 50 dBA at nearby residential uses. Therefore, this impact would be less than significant.

Traffic Noise

The proposed project would generate an increase of 100 new net trips per day with 15 new AM peak hour trips and no net addition of PM peak hour trips compared to existing daily trips attributed to the existing shopping center at the project site. A project will normally have a significant effect on the environment related to traffic noise if it substantially increases the ambient noise levels for adjoining areas. Most people can detect changes in sound levels of approximately 3 dBA under normal, quiet conditions, and changes of 1 to 3 dBA under quiet, controlled conditions. Changes of less than 1 dBA are usually indiscernible. A change of 5 dBA is readily discernible to most people in an outdoor environment. Noise levels above 65 dBA CNEL are normally unacceptable at sensitive receptor locations such as residences, schools, and noise environments in these areas would be considered degraded. Based on this, a significant impact would occur if traffic noise increases by 3 dBA.

Traffic noise increases were calculated using a version of the FHWA RD-77-108 Traffic Noise Prediction Model. The traffic noise prediction model takes into account the following inputs: average daily traffic (ADT) volumes; vehicle mix; speeds; number of lanes; and day, evening, and night traffic splits. Existing traffic noise estimates are based on the City of Cupertino's baseline roadway volumes modeled for the General Plan 2040 and Zoning Code Amendments Environmental Assessment in April 2024[4]. Project trips were provided by Hexagon Transportation Consultants Inc. (2025). Traffic noise modeling does not account for existing masonry walls at adjacent residential property lines. Table 6, *Project-Related Increases in Traffic Noise, dBA CNEL at 50 Feet,* shows that the addition of proposed project trips would result in an increase of less than 1 dBA over existing conditions. Project traffic noise impacts would be less than significant.

See Attachment B

b. Generation of excessive groundborne vibration or groundborne noise levels?

The Federal Transit Administration (FTA) vibration limits vibration level to a peak particle velocity of 0.20 in/sec PPV for nonengineered timber and masonry buildings (which would apply to the off-site surrounding residential). A vibration impact would be considered significant if construction activities or operational activities generate vibration levels exceeding 0.20 in/sec PPV at adjacent residential uses. The City's municipal code standard for vibration (as seen in Section 17.04.050[G][3]) is based on this FTA standard and further requires that projects implement alternative methods/equipment if vibration levels exceed 0.2 in/sec PPV at any nearby buildings or if levels exceed 0.12 in/sec PPV at historical structures. Table 7, *Vibration Levels for Typical Construction Equipment,* summarizes vibration levels for typical construction equipment at a reference distance of 25 feet.

Table 7 Vibration Levels for Typical Construction Equipment

Equipment	PPV (in/sec) at 25 feet
Vibratory Roller	0.21
Hoe Ram	0.089
Large Bulldozer	0.089
Caisson Drilling	0.089
Loaded Trucks	0.076
Small Bulldozer	0.035
Jackhammer	0.003

Source: Federal Transit Administration (FTA). 2018, September. Transit Noise and Vibration Impact Assessment Manual. https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/research-innovation/118131/transit-noise-and-vibration-impact-assessment-manual-fta-report-no-0123_0.pdf.

CONSTRUCTION VIBRATION

Potential vibration impacts associated with construction projects are usually related to the use of heavy construction equipment during the demolition phase of construction. Construction can generate varying degrees of ground vibration depending on the construction procedures and equipment. Construction equipment generates vibration that spreads through the ground and diminishes with distance from the source. The effect on buildings in the vicinity of the construction site varies depending on soil type, ground

strata, and receptor-building construction. The effects from vibration can range from no perceptible effects at the lowest vibration levels, to low rumbling sounds and perceptible vibrations at moderate levels, to slight structural damage at the highest levels. Vibration from construction activities rarely reaches the levels that can damage structures. Table 8, *Vibration Impact Levels at Nearby Buildings/Structures,* summarizes vibration levels for typical construction equipment at the nearest buildings/structures to the project site. As noted in Table 7, the vibratory roller, which would be used during paving activities on project streets, would produce the highest levels of vibration. Therefore, the distances shown in Table 8 reflect the distance from the nearest off-site buildings to the nearest paved street area shown on the project site plan.

Table 8 Vibration Impact Levels at Nearby Buildings/Structures

	in/sec PPV		
Equipment	Residential/Daycare Receptor to the West (80 Feet)	Residential Receptor to the South (130 Feet)	Commercial Uses to the West (145 Feet)
Vibratory Roller	0.037	0.018	0.015
Hoe Ram	0.016	0.008	0.006
Large Bulldozer	0.016	0.008	0.006
Caisson Drilling	0.016	0.008	0.006
Loaded Trucks	0.013	0.006	0.005
Small Bulldozer	0.006	0.003	0.003
Jackhammer	0.001	0.000	0.000

Notes:

As measured from the center of the nearest street on the project site to the nearest off-site building.

Source: Federal Transit Administration (FTA). 2018, September. Transit Noise and Vibration Impact Assessment Manual. https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/research-innovation/118131/transit-noise-and-vibration-impact-assessment-manual-fta-report-no-0123_0.pdf.

See Attachment A for calculations

The nearest structure to the site's construction activities, the residential/daycare building to the southwest, is approximately 80 feet from the nearest proposed project construction activities. At this distance, construction vibration would attenuate to 0.037 in/sec PPV or less. Vibration levels at the other nearby residence 130 feet south of the project site and the commercial uses to the west would also attenuate to 0.018 in/sec PPV or less. Therefore, proposed construction activities would not exceed the City's vibration standard of 0.2 in/sec PPV or 0.12 in/sec PPV (for historic structures) at nearby off-site structures. Therefore, impacts from construction vibration would be less than significant.

OPERATIONAL VIBRATION

Project operations would not include the use of any stationary equipment that would result in excessive vibration levels. The proposed project would not accommodate heavy-duty trucks or equipment. Operational activities under the proposed project would be similar to existing conditions. Therefore, the proposed project would result in negligible groundborne vibration during operations, and no impact would occur.

c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

The project site is approximately 5.15 miles southwest of the San Jose International Airport. As shown in Figure 5, San Jose International Aircraft Noise Contours, of San Jose International Airport Land Use

Compatibility Plan, the proposed project is not within the noise contours of the airport.[5] Therefore, the proposed project would not expose people residing or working on the project site to excessive noise levels, and no impact would occur.

Paving	79	65	68	64
Distance in feet	*50*	*60*	*60*	*90*
Building Construction	79	77	77	74
Architectural Coating	74	72	72	69

Attenuation calculated through Inverse Square Law: Lp(R2) = Lp(R1) - 20Log(R2/R1)

COCU-34 Idewild Residential Project - Vibration Damage Attenuation Calculations

	Levels, PPV (in/sec)			
	Vibration Reference Level at	**Residential/Daycare Receptor to the West**	**Commercial Uses to the West**	**Residential Receptor to the South**
Distance in feet	***25 feet***	*80*	*145*	*130*
Vibratory Roller	0.21	0.037	0.015	0.018
Hoe Ram	0.089	0.016	0.006	0.008
Large Bulldozer	0.089	0.016	0.006	0.008
Caisson Drilling	0.089	0.016	0.006	0.008
Loaded Trucks	0.076	0.013	0.005	0.006
Small Bulldozer	0.035	0.006	0.003	0.003
Jackhammer	0.003	0.001	0.000	0.000
