

DRAFT PRIORITIZATION RESULTS - PROJECT LIST

These prioritization results present the draft project list using the scoring adjustments recommended by the City Council and Commissions in fall 2025. The "W/Changes" column shows the new rank after applying the additional scoring adjustment recommendations made by the Commissions in winter 2026. This removes 10 points from the max score for Schools (a change from 20 to 10) and adds points to the High Injury Network, so the new max increases from 20 to 30. These changes do not affect the Transportation Technology Corridors, which were evaluated using a separate set of criteria. Rank changes for those projects were not included in this review and should be assumed to remain generally similar. As a result, Column "W/Changes" includes rankings for 198 projects rather than 202.

For bicycle projects made up of multiple segments, scores were averaged using a length-weighted approach. Each segment's score was scaled based on its share of the total project length. For example, if a segment makes up 33% of the overall project length, it contributes 33% of the total project score. These grouped projects are bracketed at the top and bottom in the spreadsheet for easier review.

Because each project type used different evaluation criteria, all projects were normalized to a 1–100 scale. Projects are grouped by type to make clear which scoring criteria were applied. Shared-use paths were scored using the bicycle criteria in response to repeated community requests to support all-ages-and-abilities design and strengthen off-street route options.

Scores are rounded to the nearest whole number may not sum exactly to the final score.
