Section 1 | Economic Update

Economic Update

- Recent economic data continues to suggest positive but below trend growth this year. Although the pace of job growth is moderating, labor markets remain solid, and the U.S. consumer has demonstrated resiliency. Inflationary trends are subsiding, but core levels remain well above the Fed's target. Given the cumulative effects of restrictive monetary policy and tighter financial conditions, we believe the economy will gradually soften and the Fed will remain data dependent as they tread cautiously going forward.
- At the June meeting, the Federal Open Market Committee paused in their rate hiking campaign after ten straight rate increases and left the target Federal Funds rate in the current range of 5.00 - 5.25%. Market participants viewed the FOMC's decision as a 'hawkish' pause, expecting further tightening in the future, primarily based on the updated release of the FOMC's Summary of Economic Projections (SEP) forecast which reflected a stronger economic outlook and higher rates compared to the March forecast. We believe the resiliency of future economic data will determine if the Federal Reserve can stay on hold for a period of time or will be forced to tighten policy further to bring inflation back down towards their 2% policy objective.
- The yield curve remained inverted in June. The 2-year Treasury yield surged 50 basis points to 4.90%, the 5-year Treasury yield rose 40 basis points to 4.16%, and the 10-year Treasury yield increased 19 basis points to 3.84%. The inversion between the 2-year Treasury yield and 10-year Treasury yield widened to -106 basis points at June month-end versus -76 basis points at May month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was +6 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -146 basis points in June from -176 basis points in May. The shape of the yield curve indicates that the probability of recession is increasing.

Employment

The latest US jobs report showed mixed signals regarding the state of the labor market in May. The U.S. economy added 339,000 jobs in May, following an upward revision of 41,000 to 294,000 jobs for the month of April. The pace of job growth remains healthy with the three-month moving average payrolls at 283,000 and the six-month moving average at 302,000. The unemployment rate increased to 3.7% on a decline in household employment, while the labor force participation rate remained at 62.6% in May. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, increased to 6.7% from the prior month at 6.6%. Average hourly earnings decelerated to 4.3% year-over-year in May, down from a 4.4% increase in March. Job Openings in April edged up to 10.1 million and separations decreased to 5.7 million, indicating continuing demand for labor. While the longer-term trend of hiring is slowing, levels remain consistent with a solid labor market.

Inflation

Consumer Price Index (CPI)

Personal Consumption Expenditures (PCE)

The Consumer Price Index (CPI) increased in May by 0.1% month-over-month and 4.0% year-over-year, down from 4.9% in April. The Core CPI, which excludes volatile food and energy components, remained firm at 0.4% month-over-month and 5.3% year-over-year, decelerating modestly from 5.5% in April. The Personal Consumption Expenditures (PCE) index rose 3.8% year-over-year in May, down from a 4.3% gain in April. Core PCE, the Federal Reserve’s preferred inflation gauge, increased 4.6% year-over-year in May, down slightly from a 4.7% increase in April. Core inflation remains stubbornly elevated above the Fed's 2% target, with service-sector inflation and strong wage growth as headwinds.

Effective Federal Funds Rate

At the June meeting, the Federal Open Market Committee paused in their rate hiking campaign after ten straight rate increases and left the target Federal Funds rate in the current range of 5.00 - 5.25%. Market participants viewed the FOMC's decision as a 'hawkish' pause, expecting further tightening in the future, primarily based on the updated release of the FOMC's Summary of Economic Projections (SEP) forecast. The SEP is forecasting higher GDP, a lower unemployment rate, and higher PCE inflation compared to the March 2023 forecast. The median forecast for the Fed Funds rate was also increased to 5.6% in June, compared to the prior forecast of 5.1% in March, suggesting another 50 basis points of tightening in 2023. We believe the resiliency of future economic data will determine if the Federal Reserve can stay on hold for a period of time or will be forced to tighten policy further to bring inflation back down towards their 2% policy objective.

US Treasury Yield Curve

At the end of June, the 2-year Treasury yield was 194 basis points higher, and the 10-Year Treasury yield was about 82 basis points higher, year-over-year. The inversion between the 2-year Treasury yield and 10-year Treasury yield widened to -106 basis points at June month-end versus -76 basis points at May month-end. The average historical spread (since 2003) is about +130 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -146 basis points in June from -176 basis points in May. The shape of the yield curve indicates that the probability of recession is increasing.

Important Disclosures

As of June 30, 2023

2023 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

Your qualified custodian bank maintains control of all assets reflected in this statement and we urge you to compare this statement to the one you receive from your qualified custodian. Chandler does not have any authority to withdraw or deposit funds from/to the custodian account.

ICE BofA 1-3 Yr US Treasury & Agency Index

The ICE BofA 1-3 Year US Treasury & Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than three years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for sovereigns and \$250 million for agencies.
