**To:** Victoria Morin; City Clerk  
**Subject:** Today's sustainability commission meeting

Hi Victoria,

I need a couple minutes in today's sustainability commission meeting (in oral communications) to communicate the below on behalf of Rotary and CCL. I will be there in person. I am sending this because I don't know the exact process.

**Earthday @Cupertino:**

1. We were very impressed by the sticker board where people could add stickers for different home electrification improvements they've made. Very popular, always busy. See att. photo. Our booth was just around the corner.
2. The Sustainability staff referred people to our booth and we vice versa for help.
3. Victoria Morin visited our booth; we met informally with Susan Hansen and Jasmin Lu at the Sustainability booth.
4. We were very pleased that our booth had been relocated from the periphery into the Sustainability "mainstream".
5. We very appreciate the young people who assisted moving our tabling gear and helping us get set up.

**Home Electrification Tours:**

Attendees: 248 signed up  
Home Visits: 225

Post Event Survey

- 86% left the event feeling more prepared to "add green features to their home."
- >50% will consider replacing their gas appliances before their "burn out,"

Thank you,  
Nazeem Noordeen
