TABLE OF CONTENTS

This page is intentionally left blank.

1. INTRODUCTION

This section describes the standards for determining a significant effect on the environment from construction and operation of the proposed 20883 Stevens Creek Boulevard Residential Development (proposed project) pursuant to the requirements of the California Environmental Quality Act (CEQA). The City of Cupertino (City) is the lead agency for the proposed project.

1.1 STATUTORY EXEMPTIONS

Once it is determined that an activity is a project subject to CEQA, it is then determined whether the project is exempt from CEQA. Pursuant to State CEQA Guidelines Section 15061(b), a project is exempt from CEQA if:

1. The project is exempt by statute (see, e.g., Article 18, commencing with Section 15260).
2. The project is exempt pursuant to a categorical exemption (see Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in Section 15300.2.
3. The activity is covered by the common-sense exemption that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.
4. The project will be rejected or disapproved by a public agency (see Section 15270(b)).
5. The project is exempt pursuant to the provisions of Article 12.5 of Chapter 3.

The proposed project would be exempt as a "statutory" exemption under State CEQA Guidelines Section 15061(b)(1) because the proposed project would meet the requirements of the Public Resources Code (PRC) Section 21080.66(a), as further discussed in Section 3, *Findings Concerning CEQA Exemption*.

This document has been prepared to demonstrate CEQA compliance as it pertains to the proposed project. This document also provides information to decision makers regarding a finding that the proposed project is exempt under CEQA.

This page is intentionally left blank.

2. PROJECT DESCRIPTION

2.1 REGIONAL LOCATION

The project site is in the city of Cupertino, approximately 38 miles southeast of the city and county of San Francisco. Cupertino is on the western edge of Santa Clara County and north of the city of Saratoga, east of unincorporated Santa Clara County, south of the city of Sunnyvale, and west of the city of San José. Regional access to the project site is provided by Interstate 280 (I-280) via North Wolfe Road or North De Anza Boulevard to the north, and by Highway 85 via Stevens Creek Boulevard to the west. The City is also supported by Santa Clara Valley Transportation Authority (VTA) bus service and Caltrain via the Sunnyvale, Lawrence, and Santa Clara Caltrain stations.

2.2 PROJECT SITE

The 6.93-acre project is at 20807, 20813, 20823, and 20883 Stevens Creek Boulevard, between Saich Way and North Stelling Road, in an urbanized area. The project site is developed with commercial buildings and a surface parking lot with ornamental landscaping. The site is bounded by Alves Drive with single-family residences to the north; commercial development to the east; Stevens Creek Boulevard to the south; and commercial (Whole Foods), residential, institutional (church) development to the west.

According to *Plan Bay Area*, the project site is within a Santa Clara VTA City Cores, Corridors & Station Areas Priority Development Area (PDA) and a Transit Priority Area (TPA). The project site is on Stevens Creek Boulevard, which is a high transit corridor, and within a quarter mile walking distance from the VTA Bus Routes 23, 25, 51, 55, and Rapid 523, which are considered major transit stops.

2.3 LAND USE AND ZONING DESIGNATIONS

The project site is assigned Assessor's Parcel Numbers (APNs) 326-32-050, 326-32-051, 326-32-052, and 326-32-053. While the City was in the process of obtaining certification of its 2023-2031 Housing Element from the California Department of Housing and Community Development (HCD), the developer submitted a preliminary application pursuant to the Housing Crisis Act of 2019, commonly referred to by its legislative number, Senate Bill (SB) 330. This act vests the standards that are in place at the time a "preliminary application" for a housing

project is submitted and prevents jurisdictions from imposing or enforcing new design standards on housing projects that are not objective. As such, the proposed project is subject to the regulations in place at the time the project's preliminary application was submitted, on April 1, 2024, which are:

- **General Plan Land Use.** Commercial/Office/Residential General Plan within the Heart of the City Special Area (HOC).
- **Specific Plan.** Heart of the City Specific Plan.
- **Zoning District.** Planned Development with General Commercial Residential (P(CG, Res)) within the Heart of the City Specific Plan, North Crossroads Area.
- **Density.** 25 dwelling units per acre (maximum).
- **Height.** 45 feet for HOC P(CG, Res).

Pursuant to the State Density Bonus Law and the City's Density Bonus ordinance (Cupertino Municipal Code [CMC] Chapter 19.56, *Density Bonus)*, the project applicant has requested the following, to the extent needed to comply with applicable objective standards:

- A waiver or reduction of development standards to reduce the front, side, and rear setbacks for portions of the project.
- A waiver or reduction of development standards of private open space pursuant to CMC Section 19.36.070(D).
- A waiver from HOC Section 1.01.030(A)(1) and General Plan Figure LU-2 45-foot height maximum.
- A waiver from CMC Table 19.36.060(C) requiring a 70-foot minimum lot width at the front building line.
- A waiver from Lot Coverage under previous CMC Table 19.36.070(A), pursuant to the project vesting date.
- A waiver from minimum 20 foot by 20 foot interior garage parking space requirement from private garages found in CMC Table 19.124.040(A).
- A waiver from CMC Section 19.124 vehicle parking standards pursuant to Government Code Section 65915(p).

2.4 PROPOSED PROJECT

The project applicant, Harvest Properties, Inc., is proposing a residential development that would involve the demolition of the existing office and commercial buildings and the construction of 66 new single-family homes and 56 townhomes in 7 eight-plex structures. The proposed project would include 122 units with a total of 351,338 gross square feet.

The single-family homes would have three stories and range in size from 2,328 to 2,668 square feet, with private front yards, second-floor decks, rooftop decks, and two-car garages. The townhomes would have three stories and range in size from 1,380 to 2,269 square feet, with second-floor decks and two-car garages. The proposed project would provide a total of 31,711 square feet of private open space for an average of 260 square feet per unit. Each building would be on average 42 feet tall at the highest point as measured from the finished floor. The proposed project would provide 272 on-site vehicle parking spaces, with each unit's 2-car garage and 28 additional guest spaces.

This page is intentionally left blank.

3. FINDINGS CONCERNING CEQA EXEMPTION

3.1 PUBLIC RESOURCES CODE SECTION 21080.66

Assembly Bill (AB) 130, signed into law on June 30, 2025, and codified in Public Resources Code (PRC) Section 21080.66, exempts qualifying infill housing development from CEQA review, creating a new statutory exemption. This exemption applies to any required permits, entitlements, or other discretionary approvals for a broad range of housing types. This section demonstrates that the proposed project meets the requirements of PRC Section 21080.66 and is organized as follows:

- **Infill Requirements.** This section describes the project's consistency with the allowed housing development type defined in PRC Section 21080.66(a), subdivisions (1) through (5) and (8).
- **Environmental Criteria.** This section describes the individual environmental requirements pursuant to PRC Section 21080.66(a), subdivisions (6) and (7).
- **Tribal Cultural Resources.** This section describes the tribal notification and outreach requirements pursuant to PRC Section 21080.66(b).
- **Environmental Assessment (Hazardous Materials).** This section describes the requirements for the identification and treatment of hazardous materials pursuant to PRC Section 21080.66(c).
- **Other Requirements.** This section describes the Labor Code requirements and eligibility of a housing development project for a density bonus, incentives or concessions, waivers or reductions of development standards, and reduced parking ratios pursuant to PRC Section 21080.66(d) and (e), respectively.

3.2 ANALYSIS IN SUPPORT OF FINDINGS

Infill Requirements

Table 1, *Infill Requirements and Project Consistency*, demonstrates that the project meets the requirements of PRC Section 21080.66(a), which specifically defines a "housing development project" in Government Code Sections 65905.5(b) and 65589.5(h)(2).

3. FINDINGS CONCERNING CEQA EXEMPTION

Table 1 Infill Requirements and Project Consistency

Infill Requirements	Consistency Determination
PRC Section 21080.66(a). Use Type. The project meets the definition of a "housing development project" pursuant to Government Code Sections 65905.5(b) and 65589.5(h)(2). The project meets any of the following criteria for a housing development: ▪ Residential units only ▪ Mixed-use development which includes residential and non-residential uses that meet any of the following criteria: o At least two-thirds of the project's new or converted square footage is designated for residential use o At least 50 percent of the project's new or converted square footage is designated for residential use and the project meets both of the following: - The project includes at least 500 net new residential units - No portion of the project is designated for use as a hotel, motel, bed and breakfast inn, or other transient lodging[1] o At least 50 percent of the net new or converted square footage is designated for residential use and the project meets all of the following: - The project includes at least 500 net new residential units - The project includes the demolition or conversion of at least 100,000 square feet of non-residential use - The project includes the demolition of at least 50 percent of the existing non-residential uses on the site - No portion of the project is designated for transient lodging, except a portion of the project may be designated for use as a residential hotel (as described above) ▪ Transitional housing or supportive housing; or ▪ Farmworker housing, as defined in California Health and Safety Code Section 50199.7(h)	**Consistent.** The proposed project includes the construction of 122 residential units only.

Table 1 Infill Requirements and Project Consistency

Infill Requirements	Consistency Determination
PRC Section 21080.66(a)(1): Size. A project site does not exceed 20 acres or four acres for a builder's remedy project as defined in Government Code Section 65589.5(h)(11), or a housing development project or emergency shelter that meets the criteria in Government Code Section 65589.5(d)(5) as it read before January 1, 2025.	**Consistent.** The project site is 6.93 acres.
PRC Section 21080.66(a)(2): Location. The project site is within the boundaries of an incorporated municipality or an urban area, as defined by the United States Census Bureau. Based on the U.S. Census Bureau's criteria for urban areas, an area must encompass at least 5,000 people or at least 2,000 housing units to be considered an urban area. In addition, an area must have 425 housing units per square mile, which defines the initial urban core. Two hundred (200) units per square mile shall fill in the remainder of the urban area. Each urban area shall contain at least one high-density nucleus, with 1,275 housing units per square mile.[2]	**Consistent.** The site is within the city of Cupertino, an incorporated city.
PRC Section 21080.66(a)(3): Urban Development. The project site meets any of the following criteria: ▪ The site has been previously developed with an urban use; ▪ At least 75 percent of the perimeter of the site adjoins parcels developed with urban uses; ▪ At least 75 percent of the area within a one-quarter mile radius of the site is developed with urban uses; ▪ At least three sides of the site are developed with urban uses and at least two-thirds of the site's perimeter adjoins parcels that are developed with urban uses (for sites with four sides)	**Consistent.** The project site is developed with existing commercial buildings and a paved surface parking lot. The site is surrounded by urban uses and paved public streets, including commercial and residential uses that adjoin the northern, eastern, and western boundaries of the site, and Stevens Creek Boulevard, which adjoins the southern boundary of the site. In addition, surrounding land uses within one-quarter mile of the site are developed with urban uses.

Table 1 Infill Requirements and Project Consistency

Infill Requirements	Consistency Determination
PRC Section 21080.66(a)(4): General Plan or Zoning Consistency. The project is consistent with the applicable general plan or zoning ordinance, and any local coastal program as applicable. If the zoning and general plan are not consistent with one another, the project would satisfy this requirement if it were consistent with one. The approval of a density bonus, incentives or concessions, waivers or reductions of development standards, and reduced parking ratios shall not be the basis for determining that the project is inconsistent with this requirement.	**Consistent.** The project site is within the General Plan Heart of the City Special Area and the General Plan land use designation is Commercial/Office/Residential. The zoning district is Planned Development with General Commercial and Residential (P(CG, Res)). The General Plan land use designation allows residential development and an established residential density of up to 25 dwelling units per acre. The Heart of the City Specific Plan, which is consistent with the General Plan assumptions for the site, includes residential as a supporting use and allows for fully residential development through the approval of a Conditional Use Permit. In addition, the project site's zoning district allows for residential development on the property. The proposed project would provide a residential density of 17.6 dwelling units per acre, which is within the density allowed for the project site under the General Plan. The proposed maximum building height of 42 feet is consistent with the General Plan's 45-foot height limit allowed for the site.
PRC Section 21080.66(a)(5): Density. The project will be at least one-half of the following applicable density specified in Government Code Section 65583.2(c)(3)(B), to accommodate housing for lower income households[3] ▪ At least 15 units per acre allowed for sites within an incorporated city within a non-metropolitan county and for a non-metropolitan county that has a micropolitan area ▪ At least 10 units per acre allowed for sites within an unincorporated area in a non-metropolitan county not included in the above requirement ▪ At least 20 units per acre allowed for sites within suburban jurisdictions ▪ At least 30 units per acre allowed for sites within a jurisdiction in a metropolitan county.	**Consistent.** The project site is in a metropolitan county (i.e., Santa Clara County). Therefore, the minimum density requirement under PRC Section 21080.66(a)(5) is at least one-half of 30 dwelling units per acre. The project would have a residential density of 17.6 dwelling units per acre.

Table 1 Infill Requirements and Project Consistency

Infill Requirements	Consistency Determination
PRC Section 21080.66(a)(8): Lodging Uses. For a project that was deemed complete pursuant Government Code Section 65589.5(h)(5) on or after January 1, 2025, no portion of the project is designated for use as a hotel, motel, bed and breakfast inn, or other transient lodging. For the purposes of this section, "other transient lodging" does not include either of the following: ▪ A residential hotel, as defined in Section 50519 of the Health and Safety Code. ▪ After the issuance of a certificate of occupancy, a resident's use or marketing of a unit as short-term lodging, as defined in Section 17568.8 of the Business and Professions Code, in a manner consistent with local law.	**Consistent.** The proposed project would not include hotel, motel, bed and breakfast inn, or other transient lodging uses.

Notes:

1 For a project that was deemed complete pursuant to Government Code Section 65589.5(h)(5) on or after January 1, 2025, no portion of the project is designated for use as a hotel, motel, bed and breakfast inn, or other transient lodging. Other transient lodging does not include either of the following: a residential hotel, as defined in Section 50519 of the Health and Safety Code, or a resident's use or marketing of a unit as short-term lodging, as defined in Section 17568.8 of the Business and Professions Code.

3 California Legislative Information, 2025, July 11 (accessed), Government Code – GOV: ARTICLE 10.6. Housing Elements [65580 - 65589.11], https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?sectionNum=65583.2.&nodeTreePath=12.1.10.10&lawCode=GOV.

Environmental Criteria

Pursuant to PRC Section 21080.66(a), the project site must meet the environmental criteria identified in Government Code Section 65913.4(a)(6). These environmental criteria and the proposed project's consistency are detailed in Table 2, *Environmental Criteria and Project Consistency*. As shown in Table 2, the project site would meet the environmental criteria.

Table 2 Environmental Criteria and Project Consistency

Environmental Criteria	Consistency Determination
PRC Section 21080.66(a)(6)	
Coastal Zone. The project site cannot be located in a coastal zone, as defined in the Public Resources Code (PRC) Division 20.	**Consistent.** The project site is not in a coastal zone. It is approximately 20 miles east of the Pacific Ocean. The California Coastal Commission designates the boundary of coastal zones to extend 3 nautical miles offshore and does not include the project site.[1]
Farmland. The project site cannot be located on either prime farmland or farmland of statewide importance, as defined pursuant to United States Department of Agriculture land inventory and monitoring criteria, as modified for California, and designated on the maps prepared by the Farmland Mapping and Monitoring Program of the Department of Conservation, or land zoned or designated for agricultural protection or preservation by a local ballot measure that was approved by the voters of that jurisdiction.	**Consistent.** The project site is not on prime farmland or farmland of statewide importance. The California Department of Conservation designates the city of Cupertino as Urban and Built-Up Land.[2] Additionally, as discussed in Section 2.3, *Land Use and Zoning Designations*, the project site is not zoned for agricultural uses.
Wetlands. The project site cannot be located on wetlands, as defined in the United States Fish and Wildlife Service Manual, Part 660 FW 2.	**Consistent.** The United States Fish and Wildlife Service does not identify any wetlands on or near the project site.[3]
Fire Hazard Severity Zone. The project site cannot be within a very high fire hazard severity zone (FHSZ), as determined by the Department of Forestry and Fire Protection (CAL FIRE) pursuant to Government Code Section 51178, or within a high or very high FHSZ as indicated on maps adopted by CAL FIRE pursuant to PRC Section 4202. This requirement does not apply to sites that have adopted fire hazard mitigation measures pursuant to existing building standards or state fire	**Consistent.** The project site is not within a very high FHSZ as designated by CAL FIRE. It is approximately 1.5 miles northeast of a very high FHSZ in a Local Responsibility Area, and 2.5 miles northeast of lands that CAL FIRE designates as a very high FHSZ in a State Responsibility Area.[4]

Table 2 Environmental Criteria and Project Consistency

Environmental Criteria	Consistency Determination
mitigation measures applicable to the development.	
Hazardous Waste Site. The project site cannot be on a hazardous waste site that is listed pursuant to Government Code Section 65962.5 (Cortese List) or a hazardous waste site designated by the Department of Toxic Substances Control (DTSC) pursuant to Health and Safety Code Section 25356 (EnviroStor online database), unless DTSC has cleared the site for residential use or residential mixed uses.	**Consistent.** The project site is not included on the Hazardous Waste and Substances Site List (Cortese) pursuant to Government Code Section 65962.5.[5] Additionally, the project site is not listed on any of the following California Environmental Protection Agency's (CalEPA) Cortese List Data Resources:[6] ▪ List of Hazardous Waste and Substances sites from DTSC EnviroStor database[5] ▪ List of Leaking Underground Storage Tank (LUST) sites from the State Water Resource Control Board's (SWRCB's) GeoTracker[7] ▪ List of solid waste disposal sites identified by SWRCB with waste constituents above hazardous waste levels outside the waste management unit[8] ▪ List of "active" Cease and Desist Orders and Cleanup and Abatement Orders from SWRCB[9] ▪ List of hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code, identified by DTSC[10]
Earthquake Fault Zone. The project site cannot be within a delineated earthquake fault zone as determined by the State Geologist in any official maps published by the State Geologist, unless the development complies with applicable seismic protection building code standards adopted by the California Building Standards Commission under the California Building Standards Law of Health and Safety Code Division 13, and by any local building department under Title 2 of the Government Code, Division 1, Chapter 12.2.	**Consistent.** The California Geological Survey does not map an earthquake fault zone in or near the project site. [11]
Federal Emergency Management Agency (FEMA) Designations. The project site cannot be within a special flood hazard area subject to inundation by	**Consistent.** FEMA's Flood Insurance Rate Map (FIRM) designates the project site as Zone X, which is defined as areas with 0.2% annual

Table 2 Environmental Criteria and Project Consistency

Environmental Criteria	Consistency Determination
the 1 percent annual chance flood (100-year flood) as determined by FEMA in any official maps published by FEMA, unless either of the following are met: ▪ The site has been subject to a Letter of Map Revision prepared by FEMA and issued to the local jurisdiction. ▪ The site meets FEMA requirements necessary to meet minimum flood plain management criteria of the National Flood Insurance Program. The project site also cannot be within a regulatory floodway as determined by FEMA in any official maps published by FEMA, unless the development has received a no-rise certification in accordance with Title 44 of the Code of Federal Regulations, Section 60.3(d)(3).	chance of flood. The project site is also not within a regulatory floodway.[12]
Conservation Plan. The project site cannot be on lands identified for conservation in an adopted natural community conservation plan pursuant to the Natural Community Conservation Planning Act, habitat conservation plan pursuant to the federal Endangered Species Act of 1973, or other adopted natural resource protection plan.	**Consistent.** The Santa Clara Valley Habitat Plan boundaries covers a small portion of Cupertino; however, the project site is approximately 0.8 miles north of the boundaries of the plan.[13]
Special Status Species Habitat. The project site cannot be located in a habitat for protected species identified as candidate, sensitive, or species of special status by state or federal agencies, fully protected species, or species protected by the federal Endangered Species Act of 1973, the California Endangered Species Act, or the Native Plant Protection Act.	**Consistent.** The Classification and Assessment with Landsat of Visible Ecological Groupings habitat mapping program classifies the project site as an "urban area," which tends to have low to poor wildlife habitat value due to replacement of natural communities, fragmentation of remaining open space areas and parks, and intensive human disturbance. The California Natural Diversity Database has no record of special-status plant and animal species on the project site or urbanized areas within a one-mile area surrounding the site.[14] There are no natural lands within a one-mile area of the project site. Accordingly, the

Table 2 Environmental Criteria and Project Consistency

Environmental Criteria	Consistency Determination
	project site has no value as habitat for endangered, rare, or threatened species.
Lands under Conservation Easement. The project site cannot be on lands under conservation easement.	**Consistent.** The project site is not within a conservation easement.
PRC Section 21080.66(a)(7),	
Historic Structure. Pursuant to PRC Section 21080.66(a)(7), the project cannot require the demolition of historic structure that was placed on a national, state, or local historic register before the date a preliminary application was submitted for the project.	**Consistent.** The project would include the demolition of the site's existing commercial building. The existing building on the project site is not currently listed on the National Register of Historic Places[15] or the list of California Register of Historical Resources,[16] or the most recent list of Cupertino historically significant resources.[17]

Tribal Cultural Resources

TRIBAL OUTREACH AND CONSULTATION

PRC Section 21080.66(b) requires local government to provide formal notification via certified mail and email to each California Native American tribe that is traditionally and culturally affiliated with the project site as an invitation to consult on the proposed project, its location, and the potential for the project to impact tribal cultural resources pursuant to one of the following deadlines:

- Within 14 days of the application for the project being deemed complete pursuant to Government Code Section 65589.5(h)(5).
- Within 14 days of notifying the local government that the project is eligible to be exempt from this division pursuant to this section for projects whose applications were deemed complete before July 1, 2026.

Tribal Notification

The City received a request to be notified about projects in the city of Cupertino from the Tamien Nation on May 28, 2021, as the city is within the geographic area with which they are traditionally and culturally affiliated. The City routinely notifies the Tamien Nation of all applicable projects pursuant to the Native American Historic Resource Protection Act, commonly referred to as it's legislative bill number AB 52. In addition, the City sent a request to the Native American Heritage Commission (NAHC) for a Tribal Contacts List on August 4, 2025.

The NAHC provided a consultation list with a total of 23 contacts for 9 tribes that are traditionally and culturally affiliated with the geographic area of the city of Cupertino on August 5, 2025, as listed.

- Amah Mutsun Tribal Band
- Amah Mutsun Tribal Band of Mission San Juan Bautista
- Costanoan Rumsen Carmel Tribe
- Indian Canyon Mutsun Band of Costanoan
- Muwekma Ohlone Tribe of the SF Bay Area
- Northern Valley Yokut / Ohlone Tribe
- Tamien Nation
- The Ohlone Indian Tribe
- Wuksachi Indian Tribe/Eshom Valley Band

On August 14, 2025, the City sent outreach request letters via certified mail and email for each tribal contact provided. Table 3, *Tribal Notification, Outreach, and Consultation Initiation*, shows the contacts that requested consultation.

Table 3 Tribal Notification, Outreach, and Consultation Initiation

Tribe Name	Tribe Contact	Date of Response	Date of Consultation Initiation
Amah Mutsun Tribal Band	Ed Ketchum, Vice-Chairperson	--	--
Amah Mutsun Tribal Band	Valentin Lopez, Chairperson	--	--
Amah Mutsun Tribal Band of Mission San Juan Bautista	Garry Zimmer, Senior Cultural Monitor and Consultant	--	--

Note. Where no dates are identified, no response was received so consultation was not initiated.

Sacred Lands File Search

Concurrently with the tribal contact list request on August 4, 2025, the City also requested a Sacred Lands File (SLF) search. There are no known cultural resources on the project site and the results of the SLF search conducted by Mathew Lin, MPP, Cultural Resources Analyst, of the NAHC, on August 5, 2025, were negative.

PROTECTION OF TRIBAL CULTURAL RESOURCES

Pursuant to PRC Section 21080.66(b)(4)(A), the project applicant is required to comply with any enforceable agreements reached during the project consultation. Because no agreements, enforceable or otherwise, were requested during project consultation, no requirements were added to the proposed project. Further, pursuant to PRC Section 21080.66(b)(4)(B), a mutual agreement between the California Native American tribes that consulted, and the project applicant was made; thus, none of the measures pursuant to PRC Section 21080.66(b)(4)(B) are required.

TRIBAL CULTURAL RESOURCES CONSISTENCY SUMMARY

The City completed the tribal outreach requirements pursuant to PRC Section 21080.66(b)(1) through (3) and the requirements of PRC Section 21080.66(b)(4) do not need to be included as a binding condition. As such, the project is consistent with the tribal outreach and consultation and protection of tribal cultural resources requirements described in PRC Section 21080.66(b).

Environmental Assessment (Hazardous Materials)

PHASE I ENVIRONMENTAL SITE ASSESSMENT

PRC Section 21080.66(c)(1)(A) states that local government shall require the project applicant to complete a Phase I Environmental Site Assessment (ESA) as a condition of approval for the development, as defined in Section 78090 of the Health and Safety Code. Based on PRC Section 21080.66(c)(1)(B), if a recognized environmental condition (REC) is found, the project applicant shall complete a preliminary endangerment assessment[1] (in accordance with the California Health and Safety Code Section 78095), prepared by an environmental assessor to determine the existence of any release of a hazardous substance on the site and to determine the potential for exposure of future occupants to significant health hazards from any nearby property or activity. Pursuant to PRC Section 21080.66(c)(1)(C), if a release of a hazardous substance is found to exist on the site, the release shall be removed, or any effects of the release shall be mitigated to levels required by current federal and State statutory and regulatory standards before the local government issues a certificate of occupancy. Pursuant to PRC Section 21080.66(c)(1)(D), if a potential for exposure to significant hazards from surrounding properties or activities is found to exist, the effects of the potential exposure shall

1 Based on the California Health and Safety Code Section 78095, preliminary endangerment assessment includes the following activities: Sampling and analysis of a site; A preliminary determination of the type and extent of hazardous material contamination of a site; and A preliminary evaluation of the risks the hazardous materials contamination of a site may pose to public health or the environment.

be mitigated to levels required by current federal and State statutory and regulatory standards before the local government issues a certificate of occupancy.

HAZARDOUS MATERIALS CONSISTENCY REQUIRMENTS

A Phase I ESA was prepared and third-party peer reviewed as part of the City's requirements in Cupertino Municipal Code Chapter 17.04, Standard Environmental Protection Requirements, that identifies standard environmental protection requirements that all construction projects must meet. The results of the Phase I ESA did not find any RECs. Accordingly, the project is consistent with the PRC Section 21080.66(c)(1) criteria regarding hazardous materials.

PROXIMITY TO FREEWAYS

For projects within 500 feet of a freeway, PRC Section 21080.66(c)(2) requires:

- The building shall have a centralized heating, ventilation, and air-conditioning (HVAC) system.
- The outdoor air intakes for the HVAC system shall face away from the freeway.
- The building shall provide air filtration media for outside and return air that provides a minimum efficiency reporting value of 16.
- The air filtration media shall be replaced at the manufacturer's designated interval.
- The building shall not have any balconies facing the freeway

Project Consistency. The project site is approximately 0.5 miles (2,700 feet) away from the freeway; therefore, the proposed project is not subject to PRC Section 21080.66(c)(2) criteria.

Other Requirements

LABOR CODE

PRC Section 21080.66(d) includes additional labor requirements for housing development projects, including:

- The payment of at least the general prevailing rate of per diem wages for the type of work and geographic area, as determined by the Director of Industrial Relations, to construction workers employed in the execution of a 100 percent affordable housing development project.
- Compliance with the labor standards outlined in Government Code Section 65913.4(a)(8) for buildings over 85 feet in height above grade.

- Compliance with the labor standards of Government Code Section 65912.130 for projects of 50 units or greater in the city and county of San Francisco, for any construction craft where at least 50 percent of the units in market-rate multifamily housing projects that received their certificate of occupancy between 2022 and 2024, inclusive, were built by workers that were paid not less than the general prevailing rate of per diem wages.
- Extension of Labor Code Section 218.8 to the project applicant in addition to the direct contractor or subcontractor.
- Allowance of a joint labor-management cooperation committee to undertake specific actions to court.

Project Consistency. The proposed project is not a 100 percent affordable housing development, over 85 feet in height above grade, or in the city or county of San Francsico. The proposed project would comply with the Labor Code and the Business and Professions Code described previously.

ELIGIBILITY FOR MODIFICATIONS OF DEVELOPMENT STANDARDS

As stated in PRC Section 21080.66(e), this PRC section does not affect the eligibility of a housing development project for a density bonus, incentives or concessions, waivers or reductions of development standards, and reduced parking ratios pursuant to Government Code Section 65915. Therefore, the applicability of this statutory exemption does not prohibit the proposed project from requesting the waivers, exception, and reduction described in Section 2.3, *Land Use and Zoning Designations.*

3.3 CONCLUSION

As analyzed in Section 3.1, *Public Resources Code Section 21080.66,* the proposed project meets the criteria for statutory exemption. Accordingly, this document finds that a Notice of Exemption is appropriate for the proposed project pursuant to CEQA Guidelines Section 15062.

EXECUTIVE SUMMARY

Langan CA, Inc. (Langan) completed this Phase I Environmental Site Assessment (ESA) for the property located at 20807 and 20813-20883 Stevens Creek Boulevard in Cupertino, Santa Clara County, California (the "subject property") under the authorization of Harvest Properties, Inc. (Harvest, "Client" and the "user").

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (U.S. EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence related to a potential transaction involving the subject property.

Subject Property Layout

The subject property is approximately 6.99 acres and is generally rectangular. The subject property consists of six one- and two-story commercial buildings with associated driveways, parking, and landscaping areas. The subject property is identified by assessor's parcel numbers (APNs) 326-32-053, 326-32-050, 326-32-052, and 326-32-051.

Subject Property Current Use

The subject property is developed and consists of six one- and two-story commercial buildings with associated driveways, parking, and landscaping areas. The southeast corner of the subject property is developed with a one-story retail space (Building 20807). North of Building 20807 along the eastern boundary of the subject property is a two-story office building with subgrade parking (Building 20813) followed by a one-story garden-style office cluster (Building 20823) consisting of four wings connected by inner courtyards and walking paths. The northeast corner of the subject property is developed with a two-story office building (Building 20833). The southwest corner of the subject property is developed with a two-story office building with subgrade parking (Building 20883). The northeast of the subject property is developed with a one-story garden-style office cluster (Building 20823) consisting of five wings connected by inner courtyards and walking paths.

Subject Property History

The subject property was used as agricultural land and rural residences between 1939 and 1968. By the early 1970s, the crops and rural residences were removed and the existing buildings at 20823 and 20863 Stevens Creek Boulevard and associated asphalt parking were constructed,

and an additional commercial building and associated asphalt parking was constructed on the southeast corner of the subject property. By the early 1980s, the existing building located at 20883 Stevens Creek Boulevard was constructed in the southwest corner of the subject property. By the early 1990s, the existing building located at 20833 Stevens Creek Boulevard was constructed in the northeast corner of the subject property. By 2006, the existing building located at 20807 Stevens Creek Boulevard was constructed in the southeast corner of the subject property.

Adjoining Properties and Surrounding Area

The adjoining properties and surrounding area consisted of agricultural land and rural residences until the early 1960s. By the late 1930s, Stevens Creek Boulevard was apparent. By the mid-1950s, residential homes and a portion of Alves Drive were constructed to the northwest of the subject property. By the early 1960s, Saich Way was constructed to the east of the subject property and commercial structures and associated asphalt parking were constructed to the east, south, and west of the subject property, and additional residential homes were constructed to the northeast of the subject property. By the late 1960s, a residential home was constructed to the west of the subject property. By the mid-1970s, Alves Drive was extended across the northern border of the subject property and additional commercial buildings were constructed to the west, and additional residential housing and a hexagonal shaped building were constructed to the north of the subject property. The adjoining and surrounding properties have consisted primarily of commercial business and neighborhoods from the mid-1970s to present.

Conclusions

Langan completed a Phase I ESA of the subject property using the scope guidelines and inherent limitations of ASTM E1527-21. Table ES-1 presents the conclusions of the Phase I ESA.

TABLE ES-1
Conclusions, Findings and Opinions

ASTM E1527-21 Scope Items
Recognized Environmental Conditions (RECs)
Langan did not identify any RECs.
Controlled Recognized Environmental Conditions (CRECs)
Langan did not identify CRECs.
Historical Recognized Environmental Conditions (HRECs)
Langan did not identify any HRECs
De Minimis Conditions
Langan did not observe any de minimis conditions.
Significant Data Gaps
Langan did not identify any significant data gaps.
Non-ASTM E1527-21 Scope Items
Business Environmental Risks (BERs)
The following BERs were identified in association with the site: Aerial photographs show the site was a part of larger agricultural fields from 1939 through at least 1960 on which agricultural chemicals such as pesticides, herbicides, and heavy metals may have been applied. Based on this history, it is possible that pesticide and herbicide compounds and heavy metals are present in shallow soil beneath the site. Based on the age of the buildings on-site, it is possible that asbestos and/or lead-based paint were used in building materials. Prior to any demolition activities, an asbestos, lead-based paint, and universal waste survey should be conducted.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
20807 and 20813-20883 Stevens Creek Boulevard
Cupertino, California

1.0 INTRODUCTION

Langan CA, Inc. (Langan) completed a Phase I Environmental Site Assessment (ESA) for the property located at 20807 and 20813–20883 Stevens Creek Boulevard, Santa Clara County, Cupertino, California (the "subject property") under the authorization of Harvest Properties, Inc. (Harvest, "Client" and the "user"). A Subject Property Location Map is provided in Appendix A (Figure 1).

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (U.S. EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence related to a potential transaction involving the subject property.

1.1 Purpose

The purpose of this Phase I ESA is to identify recognized environmental conditions (REC) associated with the subject property. This purpose also includes identifying controlled recognized environmental conditions (CREC), historical recognized environmental conditions (HREC), de minimis conditions, and significant data gaps. The definitions of REC, CREC, HREC, de minimis condition and other select ASTM terms used in this report are in Section 8.

1.2 Scope of Services

Langan's scope of services consisted of the completion of a Phase I ESA following the guidelines of ASTM E1527-21. Langan's scope of services as it pertains to the elements of a Phase I ESA as specified in ASTM E1527-21 is described below.

On 8 July 2024, the US EPA final rule designating two per- and polyfluoroalkyl substances (PFAS) – perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) including their salts and structural isomers – as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) became effective. Because of the complex and varied historical use of PFAS in various industries; limited prior disclosures of PFAS content on product specification sheets, Material Safety Data Sheets (MSDS), and Safety Data Sheets (SDS); the complex chemistry and chemical transformations associated with some PFAS; and

the ever-growing and varied list of state regulations, it is not feasible to evaluate PFOA and PFOS without also considering other PFAS. As such, absent analytical data, Langan incorporated a review of PFAS as a general class into this Phase I ESA.

PFAS and other CERCLA hazardous substances and petroleum products have been detected in background environmental samples across the globe, including in areas removed from specific recognized sources. This Phase I ESA was not intended to evaluate background concentrations of CERCLA hazardous substances or petroleum products, regardless of whether the source is naturally occurring or anthropogenic. The objective of Langan's scope of services was to identify the presence, likely presence, and/or material threat of a release of CERCLA hazardous substances and petroleum products related to specific property uses that are generally recognized as known or potential sources of such substances and products.

1.2.1 Records Review and Local Government Interviews

Langan contracted a third-party provider to search environmental regulatory databases and provide historical records. The database search included select federal, state, local and tribal standard source environmental databases within the approximate search radii specified by ASTM E1527-21.

Langan submitted Freedom of Information Act (FOIA) requests to supplement environmental database listing information. The FOIA requests were submitted to the Santa Clara County Department of Environmental Health (SCCDEH), City of Cupertino, the California Department of Forestry and Fire Protection (CAL FIRE), the California Department of Toxic Substances Control (DTSC), and the State of California Water Resources Control Board (SWRCB). Langan also searched for available records on the EnviroStor and GeoTracker online databases, operated by DTSC and the SWRCB, respectively, as well as United States Geological Survey (USGS) mapping and US EPA databases. Agency FOIA-requested information, where received, is discussed in relevant sections of this report, and referenced in Section 7. Pertinent documents are provided in Appendix B.

1.2.2 Site Reconnaissance and Owner/Operator/Occupant Interviews

Langan completed the site reconnaissance on 18 April 2025. Francisco Ramos (Building Engineer of Harvest Properties; the "key site manager") and Casidy Chen (Assistant Property Manager of Harvest Properties) accompanied Daniel Wood and Wilma Wei of Langan during the site reconnaissance. Francisco Ramos has been associated with the subject property since 2018. Casidy Chen has been with the subject property since 2023. Mr. Ramous and Ms. Chen provided

information on current occupants and operations, site history, maintenance, and their knowledge of chemical use and hazardous waste generation at the Subject Property.

Langan walked the periphery of the subject property, observed the subject property from adjoining public thoroughfares, and walked the accessible interiors of structures at the subject property. Langan observed the adjoining properties and the surrounding area from the periphery of the subject property and from public thoroughfares adjoining to or traveled on to access the subject property. The weather at the time of the site reconnaissance was approximately 60°F and sunny. Photographs from the site reconnaissance are provided in Appendix C.

Langan also interviewed Mr. Ramos by phone prior to the site reconnaissance on 16 April 2025. Ms. Casidy Chen also assisted with outstanding interview questions following the site reconnaissance on 18 April 2025. Mr. Kevin Choy of Harvest Properties also completed the site Used Questionnaire (included in Appendix D).

1.2.3 Evaluation, Report and Parts Used in Concert

Langan evaluated the information obtained from the records reviews, site reconnaissance and interviews described above, and from the user as described in Section 1.3 in concert with each other. Langan's findings, opinions, and conclusions are discussed throughout this report. Significant assumptions, or deletions, deviations, or exceptions to ASTM E1527-21 are noted in Section 1.4.

1.2.4 Non-ASTM Scope Services

The scope of services for the Phase I ESA did not include non-scope ASTM considerations.

1.3 User Responsibilities

Langan requested that the user provide the results of tasks the user is responsible for completing to satisfy the requirements of AAI. The tasks include: searching for known environmental liens and activity and use limitations (AULs) filed or recorded against the subject property, and provision of information related to specialized knowledge or experience of the user or the degree of obviousness relative to conditions indicative of releases or threatened releases; actual knowledge of the user regarding environmental liens or AULs related to the subject property; specialized knowledge or experience of the user; reasons for significantly lower purchase prices, and commonly known or reasonably ascertainable information within the local community about the subject property. Langan also requested that the user state the reason the Phase I ESA was

requested. Relevant information provided by the user is discussed in applicable sections of this report.

Unless specifically included in the scope of services, Langan did not complete a title search or a search for environmental liens or AULs, as that is the responsibility of the user. The user provided a Title Report (Appendix D) and no environmental liens or AULs were identified.

1.4 Limiting Conditions/Deviations

Langan was unable to access the interiors of some of the buildings at the subject property. Specifically, access was limited in Building 20833, the second floor of Building 20883, and some of the suites in Building 20823. Full access was granted in Buildings 20807, 20813, 20863, and the first floor of 20883. With the exception of Building 20833 and the second floor of Building 20883, access was granted to the electrical rooms, janitor's closets, boiler rooms, and elevator maintenance rooms of each of the buildings.

Langan did not delete or deviate from the ASTM E1527-21 guidelines during this Phase I ESA.

1.5 Data Gaps

Data gaps, if encountered, are discussed throughout the report. Significant data gaps, if any, are summarized in Section 5.0.

2.0 SUBJECT PROPERTY DESCRIPTION AND CURRENT USE

The following sections describe the subject property location, ownership, physical setting, and current layout and operations.

2.1 Location, Legal Description, and Ownership

The approximately 6.99-acre subject property is bound by Alves Drive to the north, commercial buildings and Saich Way to the east, Stevens Creek Boulevard to the south, and various commercial properties and residential homes to the west. The subject property is described by the Santa Clara County Tax Assessor by accessor parcel numbers (APNs) 326-32-053, 326-32-050, 326-32-052, and 326-32-051.

A legal description of the subject property is provided on the property title report presented in Appendix D. The subject property is owned by Stevens Creek OCA Owner, LLC.

2.2 Physical Setting

The physical setting that includes the geologic, hydrogeologic, hydrologic, and topographic characteristics of the subject property and surrounding area is discussed below.

2.2.1 Topography

The 2021 United States Geological Survey (USGS) 7.5-minute quadrangle topographic map for Cupertino depicts the subject property at an elevation of approximately 260 feet above mean sea level (amsl) and generally flat. The regional topography slopes downward toward the east northeast and the San Francisco Bay, which is located approximately seven miles north of the subject property.

2.2.2 Geology

According to the U.S. Department of Agriculture's (USDA) Natural Cooperative Soil Survey Service (NCSS) Soil Survey Geographic (SSURGO) data for Cupertino, soils at the subject property consist primarily of fine-grained silts and clays and coarse-grained sands with fines.

According to USGS information, the subject property consists surficial sediments of alluvial sand, silt, clay, and gravel.

2.2.3 Hydrogeology

Surface water bodies are not present within the boundary of the subject property. The nearest surface water bodies are the Junipero Serra Channel approximately 3,200 feet north of the subject property (measured from the northernmost subject property boundary) and the Regnart Creek approximately 3,300 feet southeast of the subject property (measured from the south easternmost subject property boundary). The San Francisco Bay is approximately seven miles to the north of the subject property. Information regarding subject property-specific groundwater flow direction is unavailable. Groundwater flow can be influenced by several factors such as surface water bodies, wetlands, hydrogeologic and anthropogenic variables. However, based on topographic gradient and proximity to the San Francisco Bay, it is expected that groundwater generally flows to the east northeast.

A review of the Geocheck section of the LightBox Environmental Data Resources (EDR) Regulatory Database Report (Appendix F) and site reconnaissance observations identified no groundwater wells on the subject property. The EDR report identified ten wells within approximately 0.5-miles of the subject property. Six of the 10 wells are within 0.25 miles of the

subject property. Three of wells identified in the EDR report as A1, A2, and A3, (EDR Well ID: CAEDF0000071038, CAEDF0000045365, and CAEDF0000120713, respectively. Geotracker Well ID: T0608574700-MW-2, T0608574700-MW-1, and T0608574700-MW-3, respectively) are located approximately 470 feet to 520 feet to the east southeast of the subject property. The three "A" wells are associated with the 20755 Stevens Creek Blvd. property, as described in Section 4.3.2. Three of the wells identified in the EDR report as B4, B5, and B6, (EDR Well ID: CAEDF0000108296, CAEDF0000115303, and CAEDF0000108688, respectively. Geotracker Well ID: 14442-MW-2, 14442-MW-1, 14442-MW-3, respectively) are located approximately 724 feet to 776 feet west southwest of the subject property. The three "B" wells are associated with the Shell Service Station located at 20999 Stevens Creek Blvd. property, as described in Section 4.3.2.

2.3 Subject Property Description

The subject property is developed and consists of six one- and two-story commercial buildings with associated driveways, parking, and landscaping areas. The southeast corner of the subject property is developed with a one-story retail space (Building 20807). North of Building 20807 along the eastern boundary of the subject property is a two-story office building with subgrade parking (Building 20813) along the eastern boundary of the subject property is a two-story office building with subgrade parking (Building 20813) followed by a one-story garden-style office cluster (Building 20823) consisting of four wings connected by inner courtyards and walking paths. The northeast corner of the subject property is developed with a two-story office building (Building 20833). The southwest corner of the subject property is developed with a two-story office building with subgrade parking (Building 20883). The northeast of the subject property is developed with a one-story garden-style office cluster (Building 20823) consisting of five wings connected by inner courtyards and walking paths. In total, the subject property is developed with approximately 118,000 square feet (sf) of commercial space. The subject property is accessible from Stevens Creek Boulevard, Saich Way, and Alves Drive.

A Subject Property Layout Map is provided in Figure 2 of Appendix A. Photographs of the subject property and a checklist documenting Langan's observations relative to the features, activities, uses, and conditions outlined in Section 9.4 of ASTM E1527-21 are in Appendix C.

2.4 Current Subject Property Use

The subject property is developed and consists of six one- and two-story commercial buildings with associated driveways, parking, and landscaping areas.

The following table summarizes subject property occupants/tenants.

TABLE 2-1
Current Occupants/Tenants

Building	Suite	Occupant	Description
20807	100	Panera Bread	Restaurant
	200	Voyager Craft Coffee	Coffee Shop
20813	100	Apple	Office Space
	150	Apple	Office Space
	200	Mobileum, Inc	Office Space
	250	Ventana Micro Systems	Office Space
20823	100	Apple	Office Space
	110	Apple	Office Space
	200	Quinn Orthopedic Physical Therapy	Office Space
	300	Apple	Office Space
	400	story health	Office Space
20833	100	Apple	Office Space
20863	100	Mark Thomas & Company	Office Space
	250	Apple Reprographics	Office Space
	260	Ventana Micro Systems	Office Space
	275	LeptonAI	Office Space
	300	Apple	Office Space
	400	Freyer & Laureta Civil Engineers	Office Space
	410	Anritsu Americas Sales Company	Office Space
	450	Rongcheer LLC	Office Space
	456	Ventana Micro Systems	Office Space
	480	J. Volckmann & Associates	Office Space
	500	Fitness Center	Fitness Center
	510	Luster Inc.	Office Space
	530	Nichia America	Office Space
	540	OptoFidelity, Inc.	Office Space
	560	CloudMosa, Inc.	Office Space
	580	Affiliated Psychologists	Office Space
20883	100	Foxlink International Inc.	Office Space
	150	Human MSY Holdings	Office Space
	200	Apple	Office Space

The following table summarizes subject property utility providers.

TABLE 2-2
Utility Providers

Utility	Providers
Electricity	Pacific Gas & Electric
Natural gas (used for heating)	Pacific Gas & Electric
Water	City of Cupertino
Sewer	City of Cupertino

2.5 Hazardous Substances and Petroleum Products

Langan did not observe hazardous substances and petroleum products at the subject property during the site reconnaissance.

2.5.1 Underground Storage Tanks (USTs)

Langan did not observe USTs at the subject property during the site reconnaissance.

2.5.2 Aboveground Storage Tanks (ASTs)

Langan did not observe ASTs during the site reconnaissance, with the exception of one inactive diesel backup generator on the eastern perimeter of the subject property. Langan did not observe indications of leaks or releases from the inactive diesel generator. Langan also observed a second inactive natural gas generator in the parking garage of Building 208883. This generator did not appear to contain a fuel tank. However, a small, top-loaded tank of liquid was observed. It is believed that this liquid was coolant.

2.5.3 Drums, Totes, and Intermediate Bulk Containers

Langan did not observe drums, totes, or intermediate bulk containers at the subject property during the site reconnaissance.

2.5.4 Other Chemical Storage, Containers, or Equipment

Langan observed shelves and storage cabinets containing retail-size containers of maintenance-related products and janitorial products in the maintenance and storage rooms throughout the subject property.

Langan observed the following compressed gas containers:

- One large carbon dioxide beverage carbonation tank for located in Suite 100 of Building 20807.

- One small carbon dioxide beverage carbonation tank for located in Suite 100 of Building 20883.

Langan observed the following fluid-containing equipment:

- Four pad-mounted transformers were identified and shown on Figure 2. One located at the northeast corner of Building 20883. One located at the southeast corner of Building 20813. One located on the western exterior of Building 20863. One located at the northeast corner of Building 20833. Langan did not observe labels on the transformers; however, the key site manager stated the transformers are non-PCB containing units. Langan did not observe indications of leaks or releases from the transformers.

- Two vaulted transformers. One located within the asphalt parking lot at the southeastern corner of Suite 100 at Building 20863. One located within landscaping at the northeast corner of Suite 400 at Building 20823. Langan did not observe indications of leaks or releases from the transformers. Langan did not observe labels on the transformers; however, the key site manager stated the transformers are non-PCB containing units. Langan did not observe indications of leaks or releases from the transformers.

2.6 Air Emissions

Langan did not observe air emissions at the subject property during the site reconnaissance.

2.7 Waste Management

The following sections describe current hazardous and non-hazardous waste streams, and observations of fill areas or other solid waste throughout the subject property.

2.7.1 Hazardous Waste

Langan did not observe hazardous waste at the subject property during our site reconnaissance. The EDR database report indicates that the subject property has been previously listed in databases for the use of hazardous waste between 1989 and 2019, handling but not generating hazardous waste between 2014 and 2020 and has disposed of both organic waste and asbestos containing materials (ACMs) at instances ranging from 2008 to 2017 and 2012 to 2016, respectively.

However, based on the age of the buildings on-site, it is possible that asbestos and/or lead-based paint were used in building materials. Prior to any demolition activities, an asbestos, lead-based paint, and universal waste survey should be conducted. Langan considers this a BER.

Historical hazardous waste generation is discussed further in Section 3.2.

2.7.2 Non-Hazardous Waste

Langan did not observe non-hazardous waste or non-hazardous waste containers at the subject property during the site reconnaissance.

2.7.3 Fill Areas or Solid Waste

Langan did not observe areas that were apparently filled or graded by non-natural causes (or filled with material of unknown origin) that suggest the presence of garbage, construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting solid waste disposal.

2.8 Wastewater

Sanitary and process wastewater are discharged to the Cupertino Sanitary District municipal sanitary sewer system. Langan observed floor drains in the restrooms and in the janitorial closet.

Langan did not observe or identify evidence of septic systems or cesspools at the subject property.

2.9 Storm Water

Storm water at the subject property percolates through pervious areas or sheet flows to the adjoining roadways into the municipal storm sewer system. Langan did not observe evidence of impact (e.g., sheens, staining) to storm water pathways.

3.0 SUBJECT PROPERTY HISTORY AND RECORDS REVIEW

The following sections provide summaries of the historical uses of the subject property, and available information regarding documented environmental conditions associated with the historical uses.

3.1 Historical Summary

Langan compiled the following summary of the subject property history based on a review of readily available and reasonably ascertainable sources and interviews. Historical resources are provided in Appendix E.

TABLE 3-1
Subject Property History

Time Period	Historical Discussion
1897-1960s	The subject property is depicted with three structures on the 1897 through 1948 topographic maps. In the 1953 topographic map, only one building is depicted on the southern portion of the subject property. In the 1939 through 1968 aerial photographs, the subject property appears as agricultural land with two farm buildings on the southeastern portion. The subject property remains relatively unchanged through 1968.
1960s- Present	In the 1974 aerial photograph, it appears that the crops and farm buildings were removed and the existing buildings at 20823 Stevens Creek Boulevard and 20863 Stevens Creek Boulevard and associated asphalt parking were constructed, and an additional commercial building and associated asphalt parking was constructed on the southeast corner of the subject property. In the 1982 aerial photograph, it appears the existing building located at 20883 Stevens Creek Boulevard was constructed in the southwest corner of the subject property. In the 1991 aerial photograph, it appears the existing building located at 20833 Stevens Creek Boulevard was constructed in the northeast corner of the subject property. In the 2006 aerial photograph, it appears the existing building located at 20807 Stevens Creek Boulevard was constructed in the southeast corner of the subject property and that the subject property appears as it does present day.

No Sanborn Maps were available for the subject property.

Historical information was not readily available to characterize the subject property to its initial developed use or 1939. A 1939 aerial photograph indicates the subject property was already developed for agricultural uses and earlier historical resources identifying the use of the subject property were not available. Based on knowledge of the area, it is unlikely that the subject property was used for developed purposes other than agricultural prior to 1939 and the data gap is not considered significant.

Environmental concerns related to historical operations are discussed further in Section 3.3.

3.2 Regulatory Database Review

The subject property is subject property was identified on the FINDS, ENF, ECHO, RCRA NonGen/NLR, CERS, HWTS, HAZNET, CIWQS, and E MANIFESTS, databases searched by the environmental database report. The database listings are discussed below.

Panera Bread Café 4471 – 20807 Stevens Creek Boulevard

This facility was listed on the CERS database for having a hazardous materials business plan (HMBP). This database listing is likely not an environmental concern for the subject property.

J. Volckman Associates – 20813 Stevens Creek Boulevard

This facility was listed on the HWTS database for having hazardous waste that was being tracked on-site from 1989 to 2000. This database listing is likely not an environmental concern for the subject property.

Stevens Creek Office Center Associates, LP – 20813, 20823, 20863 Stevens Creek Boulevard Suites 480 and 300

These facilities at the subject property were listed on the ECHO databases. No further information was available on the database listing. The facilities were also listed on the FINDS database under the RCRA Information System, and on the RCRA NonGen database for handling but not generating hazardous waste in 2018 and 2020. The facilities were listed on the HAZNET and E MANIFEST databases for disposing of 5.2 tons of asbestos containing waste at a landfill in 2012, and on the HWTS database for having hazardous waste that was being tracked on-site from 2012 to 2013 and in 2018. No additional information was available for this database listing. None of the database listings indicated unauthorized releases. These database listings are likely not an environmental concern for the subject property.

Cupertino SD CS – 20833 Stevens Creek Boulevard Suite 104

This facility at the subject property was listed on the CERS and ENF databases for a 2007 sewage spill, and on the FINDS and CIWQS databases for a storm water discharge to the municipal storm system. These database listings are likely not an environmental concern for the subject property.

In response to our FOIA request Langan received records from CAL FIRE on a gas leak at Building 20833 on 10 October 2012. The response by the local fire department is summarized as follows: At approximately 9:22 AM Truck 1, Engine 1, Engine 9, Engine 16, and Battalion 2 crews responded to a gas investigation. Upon arrival the Truck 1 crew found a two-story office building with nothing showing. The Engine 1 Captain established Stevens Creek Incident Command.

The Truck 1 crew met with the contractor on site who stated his crew had hit a 1" gas line and had clamped it off. The Truck 1 crew investigated and found that the gas line had been clamped and was not actively leaking. The Truck 1 crew cancelled the balance of the response and terminated command. The Truck 1 crew used a four-gas detector in the building and there were no detected levels of gas inside the structure. The scene was turned over to the contractor and a Pacific Gas & Electric (PG&E) representative. This incident is likely not an environmental concern for the subject property.

Apple Inc. – Stevens Creek 03A – 20833 Stevens Creek Boulevard

This facility was listed on the HAZNET database for storing and off-site incineration of several tons of organic solids and laboratory waste chemicals from 2015 to 2017. The subject property was listed on the HWTS database for having hazardous waste that was being tracked on-site from 2014 to 2019, and on the RCRA NonGen/NLR database for handling but not generating hazardous waste in 2014. The subject property was also listed on the ECHO and FINDS databases. No further information was available on the database listings. No violations were reported for these database listings. These database listings are likely not an environmental concern for the subject property.

Stevens Creek Office Center – 20833 Stevens Creek Boulevard

This facility was listed on the HAZNET and HWTS databases for disposing one ton of organic solid waste in a landfill in 2012. No organic solid wase was observed during the site reconnaissance. These database listings are likely not an environmental concern for the subject property.

Burbank SD CS – 20833 Stevens Creek Boulevard Suite 104

This facility was listed on the CIWQS database for having a minor violation of the water quality standards in their collection system in May 2007, likely associated with storm water runoff from the building. The subject property was listed on the CERS database for a minor violation related to the subject property's water quality in December 2004. This facility was also listed on the FINDS and ENF databases. No additional information was provided. These database listings are likely not an environmental concern for the subject property.

Apple – 20863 Stevens Creek Boulevard Suite 300

This facility was listed on the HAZNET and HWTS databases for disposing of 4.8 tons of asbestos containing waste in a landfill in 2016. These database listings are likely not an environmental concern for the subject property.

However, based on the age of the buildings on-site, it is possible that asbestos and/or lead-based paint were used in building materials. Prior to any demolition activities, an asbestos, lead-based paint, and universal waste survey should be conducted. Langan considers this a BER.

The environmental database report is attached as Appendix F. The subject property was also not identified on the GeoTracker, PFAS exchange, or Environmental Working Group (EWG) PFAS Interactive Map.

3.3 Prior Report Review

Langan was provided with a 2020 Phase I Environmental Site Assessment by Ninyo & Moore for the subject property. Ninyo & Moore's Phase I ESA indicated that the subject property was developed in the early 1900s as an orchard with a few farm buildings located on the southern portion of the property.

In the early 1970s, the orchard and the farm buildings were removed, and the subject property was developed to the present state by 2005. In general, interior construction materials within the observed tenant spaces included a variety of carpeting, ceramic floor tiles, painted and textured walls, and ceilings.

Ninyo & Moore did not observe quantities of hazardous substances or petroleum products used or stored at the subject property during their reconnaissance of the subject property with the exception of a reportedly small amount (approximately 150-gallons) of diesel fuel contained within an integrated belly tank of one of the emergency backup generators located on the subject property. Indications of aboveground storage tanks (ASTs), underground storage tanks (USTs), or hazardous material spills or leaks, were not observed during the reconnaissance of the subject property. Ninyo & Moore identified no wells on the subject property.

Ninyo and Moore's review of an environmental database report obtained for this project indicated that the subject property was listed on several of the regulatory databases researched by EDR, including the CERS, FINDS, CIWQS, ENF, ECHO, FINDS, HWTS, HAZNET, and RCRA NonGen databases. The subject property was listed on the CERS, HWTS, HAZNET, and RCRA NonGen

databases for previously having small quantities of hazardous wastes on-site. The subject property was also listed on the CIWQS database for having a minor storm water violation. Indications of releases, spills, or mitigation were not indicated on reviewed regulatory agency files. None of the agency database listings are indicative of a REC.

Ninyo and Moore indicated several off-site facilities were located within the EDR search radius from the subject property. None of the listed facilities were considered to be a REC to the subject property at this time based on several factors, including distance from the subject property, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the subject property), database listing type, and/or affected media (soil only). The 2020 Phase I ESA by Ninyo & Moore did not identify any RECs in connection with the subject property.

Ninyo & Moore's Phase I ESA also included Phase I ESA for Stevens Creek Office Center prepared by EMG dated 27 July 2014. EMG identified no RECs, HRECs, CRECs, or Business Environmental Risks (BERs), except for asbestos-containing materials in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics, were identified. EMG reported that these materials were observed to be in good condition. These materials were not considered a REC.

Based on the age of the buildings on-site, it is possible that asbestos and/or lead-based paint were used in building materials. Prior to any demolition activities, an asbestos, lead-based paint, and universal waste survey should be conducted. Langan considers this a BER.

4.0 ADJOINING PROPERTIES AND SURROUNDING AREA

The following sections describe current and historical uses of and database listings for adjoining properties and the surrounding area.

4.1 Current Use of Adjoining Properties and Surrounding Area

The current use of adjoining and surrounding properties is summarized in Table 4-1.

TABLE 4-1
Current Use of Adjoining Properties and Surrounding Area

Direction	Adjoining Properties	Surrounding Area
North	Alves Drive followed by a fitness center and residential properties.	A fitness center and residential properties.
East	A daycare and various commercial properties followed by Saich Way.	Commercial properties.
South	Stevens Creek Boulevard followed by a church and various commercial property.	Residential and commercial properties.
West	A church and a grocery store.	Residential and commercial properties, including a Shell Service Station

Langan did not observe obvious conditions likely to represent environmental concerns for the subject property from current uses of adjoining or surrounding properties.

4.2 Adjoining Properties and Surrounding Area History

Langan compiled the following summaries of the adjoining properties and surrounding area history based on a review of historical resources and interviews. Historical resources are provided in Appendix E.

TABLE 4-2
Historical Use of Adjoining Properties

Direction	Adjoining Properties
North	The northern adjoining property is depicted as undeveloped on topographic maps in the late 1800s and early 1900s. The property appears as agricultural land on aerial photographs beginning in 1939 through 1968. In the 1968 aerial photograph, the northern adjoining property appears to have been cleared of crops and the construction of Alves Drive appears to be underway. In the 1974 aerial photograph, Alves Drive is present followed by a fitness center and residential homes as they appear to this day. Langan does not consider the historical use of the northern adjoining property an environmental concern for the subject property.
East	The eastern adjoining property is depicted as undeveloped on topographic maps from the late 1800s to early 1900s. The property appears as agricultural land with two buildings in the 1939 through 1956 aerial photographs. Beginning in 1963, aerial photographs show the property was developed with Saich Way followed by a large commercial building and asphalt parking as it appears to this day. Langan does not consider the historical use of the eastern adjoining property an environmental concern for the subject property.

Direction	Adjoining Properties
South	The southern adjoining property is depicted Stevens Creek Boulevard followed by undeveloped land on topographic maps in the late 1800s to early 1900s. In the 1939 through 1950 aerial photographs, Stevens Creek Boulevard appears as a two-lane dirt or paved road. By 1956, the aerial photograph shows Stevens Creek Boulevard has been expanded to a four-lane road. By 1963, Stevens Creek Boulevard has been expanded to a six-lane road followed by commercial properties as they appear to this day. Langan does not consider the historical use of the southern adjoining property an environmental concern for the subject property.
West	The western adjoining property is depicted as largely undeveloped land with one structure on topographic maps in the late 1800s to early 1900s. By 1956, aerial photographs show residential homes on the northern border of the property. By 1963, aerial photographs show that the crops and previous buildings have been removed and a residential home has been constructed on the southern portion of the property, while a church and associated parking has been constructed on the northern portion of the property. By 1974, aerial photographs show the residential home has been removed and two commercia buildings and associated parking have been constructed on the southern portion of the property, while a residential home has been built east of the church on the northern portion of the property. By 2006, aerial photographs show the commercial buildings and associated parking on the southern portion of the property have been removed and the property appears to be under construction. By 2009, aerial photographs show the construction on the southern portion of the property is complete with a large commercial building and associated parking as it appears to this day. The previous tenants included the Anderson Chevrolet Dealership from as early as 1992 to 2005, where total petroleum hydrocarbons as motor oil (TPHmo) was detected in soils surrounding hydraulic lifts during their removal in 2006. Database listings associated with the western adjoining property are discussed in Section 4.3. Langan does not consider the historical use of the western adjoining property an environmental concern for the subject property.

The surrounding area was depicted as undeveloped or agricultural land in the topographic maps in the late 1800s and early 1900s. Limited commercial development and rural residences were observed on aerial photographs in the early 1900s. Stevens Creek Boulevard was depicted in the 1897 topographic map and Saich Way was present in the aerial photographs by 1948, and Alves Drive was present in the aerial photographs by 1982. The large commercial building to the east of the subject property was constructed in the early 1960s. The residential homes and fitness center to the north of the subject property were constructed in the early 1970s. The residential homes, church, and large commercial building to the west of the subject property were constructed in the mid-1950s, mid-1960s and early 2000s, respectively. The church and commercial buildings to the south of the subject property were constructed in the early 1960s and mid-1990s, respectively. The surrounding area appears in similar configuration from 2009 to present.

Langan does not consider the historical uses of the surrounding area properties an environmental concern for the subject property.

4.3 Regulatory Database Review

Langan reviewed the environmental database report to evaluate if adjoining or surrounding area properties identified in the database report are suspected to represent an environmental concern for the subject property (see Section 8.2). Langan did not consider request and review of the associated regulatory agency files necessary to evaluate potential RECs for the subject property unless discussed in Section 4.3.1 or 4.3.2 below.

4.3.1 Adjoining Properties

Database listings for adjoining properties are summarized as follows.

The Vitamin Shoppe #648 – 20803 Stevens Creek Boulevard (south-southeastern adjoining, inferred crossgradient)

This property was identified on the RCRA NonGen/NLR database for handling but not generating hazardous waste in 2019. This database listing is likely not an environmental concern for the subject property.

Saich Way Station, LLC – 20803 Stevens Creek Boulevard (south-southeastern adjoining, inferred crossgradient)

This property was identified on the HAZNET and HWTS databases for disposing of 0.8 tons of asbestos containing waste in a landfill in 2014. This database listing is likely not an environmental concern for the subject property.

Anderson Chevrolet Dealership – 20955 Stevens Creek Boulevard (west-southwestern adjoining, inferred crossgradient)

This property was identified on the LUST, CERS, CORTESE, HIST CORTESE, and HIST LUST Santa Clara databases for potential soil contamination from a waste/motor/hydraulic/lubricating oil leak. The case was opened in May 1998 and after remediation activities were completed, Santa Clara Valley Water District (SCVWD) issued case closure for the property in July 1998. The property was also listed on the SWEEPS UST database for having a waste oil tank installed on the property in February 1988. This database listing is likely not an environmental concern for the subject property due to case closure.

This property was also listed on the ENVIROSTOR database as an open case due to the detection of TPHmo in soils surrounding several hydraulic lifts during removal. As a result, approximately 560 cubic yards of soil were removed from the property between March and June 2006. On July 10, 2006, EFI Global collected soil samples adjacent to the former hydraulic lifts. EFI Global collected 12 samples at depths ranging from seven to 16 feet below the ground surface (bgs). Diesel (TPHd) and motor oil (TPHmo) were detected above the laboratory reporting limit at concentrations of 7.8 milligrams per kilogram (mg/kg) and 14 mg/kg, respectively, at the CS-5 sample location. None of the TPHd or TPHmo detected exceeded the residential environmental screening levels (ESLs) in any of the samples analyzed.

This database listing is likely not an environmental concern for the subject property due to the age of the case and the media affected.

4.3.2 Surrounding Area

Langan evaluated each of the database listings for surrounding area properties (see Section 8.2). Those warranting further discussion in the context of potential to represent an environmental concern for the subject property are discussed below.

Unocal Station #7000 – 20755 Stevens Creek Boulevard (approximately 126 feet east-southeast, inferred crossgradient)

This property was identified on the LUST database for a gasoline leak that potentially contaminated the nearby drinking water aquifer. The case was opened in June 2003 and after remediation and cleanup activities were completed to the satisfaction of the SCCDEH, the case was closed in December 2006. This property was also identified on the SWEEPS, UST, HIST CORTESE, and HIST UST databases for having several USTs containing petroleum hydrocarbons since 1988. This database listing is likely not an environmental concern for the subject property due to the case closure and crossgradient direction in relation to the subject property.

De Anza Shell – 20999 Stevens Creek Boulevard (approximately 548 feet east-southeast, inferred crossgradient)

This property was identified on the LUST database for a gasoline leak that contaminated the soil surrounding gasoline USTs and associated piping removed and replaced in August 1988. Soil samples were collected from the exposed soils beneath the removed tanks and were analyzed for petroleum hydrocarbons as TPHg, TPHd, BTEX compounds, and methyl tert-butyl ether (MTBE). TPHg was detected in the samples analyzed at concentrations as high as 740 mg/kg while TPHd was detected in the samples analyzed at concentrations as high as 15,000 mg/kg.

Impacts to groundwater were not detected. The case was opened in November 1988 and after remediation and cleanup activities were completed to the satisfaction of the SCCDEH's Leaking Underground Storage Tank Oversight Program, the case was closed in June 2000.

This property was also identified on the SWEEPS, UST, CA FID UST, CERS TANKS, HIST CORTESE, and HIST UST databases for having several USTs containing petroleum hydrocarbons since 1983. This property was also identified on the RCRA NONGEN / NLR, RCRA-SQG, FINDS, ECHO, HWST, HAZNET, CERS HAZ WASTE, CUPA LISTINGS, EMI, and CERS for generating small quantities of hazardous waste. A number of hazardous waste storage, management, monitoring, and disposal violations were recorded.

This database listing is likely not an environmental concern for the subject property due to the age of the case, case closure, and the media affected.

5.0 CONCLUSIONS, FINDINGS AND OPINIONS

Langan completed a Phase I ESA consistent with the scope and limitations of ASTM E1527-21 for the subject property at 20807 and 20813-20883 Stevens Creek Boulevard, Cupertino, California. Exceptions to, or deletions from, ASTM E1527-21 are described in Section 8 of this report.

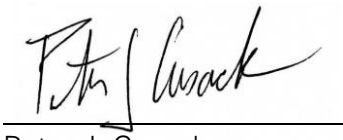
No RECs, CRECs, HRECs, de minimis conditions, or significant data gaps were identified during this assessment. This assessment has revealed the following BERs connection with the subject property as presented in Table 5-1.

TABLE 5-1
Conclusions, Findings and Opinions

ASTM E1527-21 Scope Items
Recognized Environmental Conditions (RECs)
Langan did not identify any RECs.
Controlled Recognized Environmental Conditions (CRECs)
Langan did not identify CRECs.
Historical Recognized Environmental Conditions (HRECs)
Langan did not identify any HRECs.
De Minimis Conditions
Langan did not identify any de minimis conditions.
Significant Data Gaps
Langan did not identify and significant data gaps.
Non-ASTM E1527-21 Scope Items
Business Environmental Risks (BERs)
The following BERs were identified in association with the site: Aerial photographs show the site was a part of larger agricultural fields from 1939 through at least 1960 on which agricultural chemicals such as pesticides, herbicides, and heavy metals may have been applied. Based on this history, it is possible that pesticide and herbicide compounds and heavy metals are present in shallow soil beneath the site. Based on the age of the buildings on-site, it is possible that asbestos and/or lead-based paint were used in building materials. Prior to any demolition activities, an asbestos, lead-based paint, and universal waste survey should be conducted.

6.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and I have the specific qualifications based on my education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Peter J. Cusack
Associate Principal (Environmental Professional)

Resumes outlining the qualifications of the project team, and the Environmental Professional are included in Appendix G.

8.0 LIMITATIONS AND DEFINITIONS

This Phase I ESA report was prepared for Client and is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. The Client is the sole intended beneficiary of the report. The user requested no special terms or conditions regarding this Phase I ESA.

Langan's scope of services, which is described in Section 1.2 and in the contract executed between Langan and the Client, was limited to that agreed to with the Client/user and no other services beyond those explicitly stated are implied. To the extent possible, the services performed and agreed upon for this Phase I ESA are consistent with the guidelines of ASTM E1527-21.

This report is not intended to be an exhaustive assessment of the subject property. The purpose of the Phase I ESA is to reduce uncertainty about unknown conditions at the subject property. No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Therefore, Langan cannot "verify," "insure," "certify," or "guarantee" that the subject property is free of environmental concerns.

No expressed or implied representation or warranty is included or intended in this report, except that our services were completed using the care and skill ordinarily followed by professionals providing similar services under similar circumstances in similar locations at the same point in time.

The conclusions provided in this report are based solely on information obtained through completing the standard activities required by ASTM E1527-21 and are intended exclusively for the purpose stated herein, at the specified subject property, as it existed at the point in time the assessment was completed. The conclusions provided in this report do not apply to conditions and features of which Langan was not made aware of through good faith efforts to complete the activities required by ASTM E1527-21 and did not have the opportunity to evaluate.

8.1 ASTM Definitions

The following definitions are provided in ASTM E1527-21 and presented below for reference. This section is not a comprehensive list of definitions provided in ASTM E1527-21 and is intended to summarize those pertinent to this Phase I ESA report.

Activity and use limitations (AULs): legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effective-ness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

Adjoining properties: any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

All Appropriate Inquiries: that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C.§ 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the

LLPs to CERCLA liability (42U.S.C. §§ 9601(35)(A) & (B), § 9607(b)(3), § 9607(q), and§ 9607(r)), assuming compliance with other elements of the defense.

Approximate minimum search distance: the area for which records must be obtained and reviewed pursuant to ASTM E1527-21 Section 8 subject to the limitations provided in that section. This may include areas outside the subject property and shall be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

Business environmental risk (BER): a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

Controlled recognized environmental condition (CREC): recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Data gap: a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

De minimis condition: a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

Engineering controls: physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of activity and use limitation (AUL).

Environment: environment shall have the same meaning as the definition of environment in CERCLA 42 U.S.C. § 9601(8).

Historical recognized environmental condition (HREC): previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Institutional controls (IC): a legal or administrative mechanism (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of activity and use limitation (AUL).

Key site manager: the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Material threat: obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment.

Obvious: that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

Property use limitation: limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous sub-stances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

Reasonably ascertainable: information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized environmental conditions: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat

of a future release to the environment. For the purposes of this definition, "likely" is that which is neither certain nor proved but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.

Release: a release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22). There are a number of statutory exclusions from the definition of release that may impact the environmental professional's opinions and conclusions, such as the normal application of fertilizer.

Significant data gap: a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Site reconnaissance: that part that is contained in Section 9 of ASTM E1527-21 and addresses what should be done in connection with the site visit. The site reconnaissance includes, but is not limited to, the site visit done in connection with such a Phase I Environmental Site Assessment.

Site visit: the visit of the subject property during which observations are made constituting the site reconnaissance section of this practice.

Subject property: the property that is the subject of the environmental site assessment described in this practice.

User: the party seeking to use ASTM E1527-21 to complete an environmental site assessment of the subject property.

8.2 Standard Environmental Record Sources

Langan reviewed an environmental database search report prepared by an environmental database search provider for the subject property and surrounding area. The database search report includes a listing of properties identified on select federal, state, local and tribal standard source environmental databases within the approximate minimum search radii outlined in ASTM E1527-21. This information was supplied to Langan by the environmental database search provider, and to the environmental database search provider by government sources; therefore, neither Langan nor the environmental database search provider can verify the completeness and accuracy of the database information. Appendix F contains a copy of the report, with specific source and property descriptions, and the dates of the last update for each database searched.

Langan reviewed the database search report on a record-by-record basis to evaluate if certain properties identified in the database report are likely to represent an environmental concern for the subject property. The evaluation criteria included factors such as distance, groundwater gradient, nature of the listing, and regulatory status. Unless specifically discussed in the body of this report, the facilities listed on the database do not appear to represent an environmental concern to the subject property.

RE: Senate Bill 1248 written notification – Local cleanup agreement

This is a written notification as required by section 512.3 of SB1248. All the required information is given below:

1. Site name and location:
   Anderson Chevrolet Dealership
   20955 Stevens Creek Boulevard
   Cupertino, CA 95014

2. Name and address of the responsible party:
   Mr. Peter Pau, Manager
   SHP-Cupertino, LLC
   30 East Fourth Avenue
   San Mateo, CA 94401

This site consists of a parcel of 5.3 acres and is a former car dealership and service facility that went through site facility closure. Future site proposal include construction of a retail food store. On January 20, 2006 and March 29, 2006, in the course of removal of several hydraulic lifts, Total Petroleum Hydrocarbons (TPH) as Motor Oil was encountered. Levels of TPH from 79 to 5500 milligrams per kilogram (mg/kg) were detected at depth of 8 feet bgs. Clean base samples were found at depths between 10 and 14 feet. An estimated 560 cubic yards of soil has been excavated. The planned involvement by the County of Santa Clara is to oversee the remedial and sampling activities as requested by the responsible party.

If you need any further information about this site, please contact the undersigned at (408) 918-1984.

Sincerely,

Nicole Pullman

RE: RESULTS OF LIMITED SUBSURFACE SOILS INVESTIGATION AT THE FORMER ANDERSON CHEVROLET CAR DEALERSHIP AS REQUESTED BY THE SANTA CLARA COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH – 20955 STEVENS CREEK BOULEVARD, CUPERTINO, CALIFORNIA
EFI JOB NO. 98360-00092

Dear Ms. Pullman:

EFI Global, Inc. (EFI) is pleased to submit this report documenting the findings of our investigation conducted at the property located at 20955 Stevens Creek Boulevard, Cupertino, California (Subject Property). The sampling was conducted in accordance with our workplan dated June 29, 2006 (Proposal No, 98360-06-048).

The purpose of this investigation was to provide confirmation sampling data to supplement Kleinfelder's Facility Closure Soil remediation activities conducted at the Site during the hydraulic lift and clarifier removal activities. These activities were overseen by the by the Santa Clara County Fire Protection District (SCCFPD) as part of the facility closure. The over excavation soil removal of impacted soils, however, were not reviewed/overseen by the SCCFPD or the Santa Clara County Department of Environmental Health (SCCDEH).

According to Kleinfelder, soils with concentrations exceeding the Regional Water Quality Control Board's 2003 Residential Environmental Screening Levels (ESLs) for total petroleum hydro carbons as motor oil also referred to as residual fuels (TPH-mo) were excavated and disposed offsite at an approved landfill. Each excavation was terminated and then sampled when native non-impacted soil was noted in the field. The depths of the over-excavation ranged from 12 to 14 feet below ground surface.

Imported clean fill (Class IIB crushed gravel) was then used as backfill by Kleinfelder in the excavation pits. Since the backfill was not compacted, EFI Global re-excavated each of the over-excavation pits to total depth and re-compacted each pit with the oversight of United Soils Engineering (USE). USE was onsite to ensure that the proper compaction limits were met for the redevelopment of the property as a retail grocery store. During the re-excavation of the pits, EFI did not observe any petroleum impacted soils.

PROJECT INFORMATION

Topography and Hydrogeology

The 7.5 minute Cupertino, California, USGS topographic quadrangle dated 1991 shows the Subject Property at an elevation of approximately 260 feet above mean sea level. Regional topography in the vicinity of the Subject Property slopes downward in a north-east direction toward the San Francisco Bay. The nearest surface water is Stevens Creek which flows to the

north toward the San Francisco Bay and is located approximately 1.5 miles to the west of the Subject Property.

Based on a review of the United States Geological Survey data and Santa Clara Valley Water District file information for the Shell Service station adjacent to the Subject Property at 20999 Stevens Creek Boulevard, the groundwater at the Subject Property is located at depths of 140 to 150 feet below ground surface (bgs) and flows to the north-northeast toward the San Francisco Bay.

Former Site Usage

The Subject Property, which is currently under redevelopment consists of an approximately 5.6-acre parcel of land formerly occupied by Anderson Chevrolet, an automobile dealership. It was developed as an automobile service and dealership with the following former structures: one large building consisting of a two-story sales room area and offices, a service bay area, parts room, and a storage area; the body shop building consisting of two interior offices, a paint spray booth and service areas; and one smaller detached storage building and interior service/detail area. A three-stage clarifier was present on the northwest corner of the body shop building. A 550-gallon used oil underground storage tank (UST) was formerly located on the north side of the larger building, and was removed in 1998. The Santa Clara Valley Water District granted a "no further action" status for this tank in their tank closure letter dated July 30, 1998.

Field and Laboratory Methodology

The following sections discuss activities that were conducted as part of the subsurface investigation conducted on July 10, 2006

Pre-field Activities

The purpose of the pre-field activities was to appropriately plan the work and to ensure that onsite personnel were prepared for potential safety hazards at the property. The pre-field activities included the following:

- EFI prepared a site specific Health and Safety Plan (HASP) for the work proposed in accordance with the requirements of the State of California General Industry Safety Order (GISO) 5192 and Title 29 Code of Federal Regulations, Section 1910.120 (29 CFR 1910.120). The HASP detailed the work to be performed, safety precautions, emergency response procedures, nearest hospital information, and onsite personnel responsible for managing emergency situations.
- Prior to starting work, a "tailgate" safety meeting including discussion of the safety hazards and precautions relevant to the particular job was held with all personnel working on the job. A copy of the HASP was kept onsite during field activities.

Sampling Rationale

The confirmation soil sample locations (CS samples) were located adjacent to selected former hydraulic lift locations where petroleum hydrocarbon concentrations as TPH-mo exceeded the residential ESLs. EFI confirmation soil samples were paired with the former lift locations as follows:

- CS-1 for HL-15,
- CS-2 for HL-14/15
- CS-3 for HL13

- CS-4 and CS-5 for HL-8
- CS-6 and CS-7 for HL-11
- CS-8 for HL-6
- CS-9 for HL-5
- CS-10 for HL-4
- CS-11 for HL-19, and
- CS-12 for HL-17/18

Due to the construction and redevelopment of the site, the clarifier/drain line, previous concrete stained areas, and the hazardous materials storage area could not be sampled as part of this confirmation sampling effort. The SCCFPD was on site to observe these features being removed during the facility closure, and EFI and USE were onsite during the over excavation of any visibly impacted soils by Kleinfelder, as well as the re-excavation and re-compaction efforts by EFI and USE. It should be noted that the petroleum hydrocarbon concentrations detected in the soil samples collected from below, adjacent to and along the drain line did not exceed the ESLs. Furthermore, no volatile organic compounds were detected from these samples collected by Kleinfelder.

Selected portions of the facility closure report and summary analytical tables prepared Kleinfelder and submitted to the SCCFPD are include as an attachment.

Field Investigation

On July 10, 2006, Mr. Mark Williams, District Manager with EFI Global collected soil samples from twelve locations at the Site. Ecology Control Associates (ECA), under subcontract with EFI Global performed the concrete borehole cutting prior to the soil sample collection. The borehole locations are depicted on the attached figures.

All boreholes were inspected for physical characteristics indicative of adverse impacts, such as unusual odors, colors/hues, and chemical sheens. Each borehole was continuously cored to 16 feet below the former ground surface of the car dealership. At the time of the sampling 5 feet of imported fill had been brought onto the Site in the areas sampled. The soil sampling began at a depth of 5 feet below the current fill pad surface (former ground surface) and extended to a depth of 16 feet. The total depth of each boring was 21 feet (16+5 feet). The total depth of the former excavations by Kleinfelder were 12 to 14 feet below the former ground surface or 17 to 19 feet below the existing fill pad.

No odors were noted in the soil boreholes, and no groundwater was encountered. Each continuous soil core was inspected for petroleum hydrocarbons. Of the borings sampled, only one (CS-5 at 7 feet bgs) contained visible petroleum hydrocarbon impacted soils. No other boring had any visible impact.

It should be noted that in soil boring CS-7 no visible petroleum hydrocarbons were observed in the soil core or soil samples. However, in either transit to the laboratory from the field or in the lab courier drop off location, samples from CS-7 were inadvertently misplaced. No analytical data is available from this location. It should be noted that Kleinfelder had collected samples from this located at both the base and side wall of the excavation, and no petroleum hydrocarbons were detected in their confirmation samples.

EFI Global
Complex Issues • Solid Solutions

Analytical Methodology

Soil samples were submitted to a California state-certified laboratory, and analyzed in accordance with procedures referenced in EPA SW 846 "Test Methods for Evaluating Solid Waste; Physical/Chemical Methods" as amended. Analysis included

- total petroleum hydrocarbons as diesel (TPH-d) and motor oil (TPH-mo) using EPA Method 8015M; and,
- Leaking Underground Fuel Tank (LUFT)[1] metal list using EPA Methods 6010B/7470

The samples were sent in a cooler maintained at 4 degrees Celsius or lower and sent to McCampbell Analytical, Inc., a State of California certified hazardous waste testing laboratory, under chain of custody documentation and chain of custody seal by the SCCDEH. Laboratory analytical data sheets and chain of custody record are included as an attachment.

Findings

No petroleum hydrocarbons were detected in any of the soil samples except for samples CS-5 at 7 feet bgs. In this sample TPH-d was detected at a concentration of 7.8 milligrams per kilogram (mg/kg), and TPH-mo was detected at a concentration of 14 mg/kg. The gray colored soil that was observed in the soil core from this sample was noted at depths of approximately 6.9 feet to 7.3 feet bgs. The other soil in the soil core collected from boring CS-5 did not appear impacted. A soil sample collected at 16 feet bgs contained no TPH-d or TPH-mo. Confirmation boring CS-4 was also located in the vicinity of boring CS-5. No TPH-d or TPH-mo was detected in boring CS-4.

The soil samples were analyzed for cadmium (Cd), chromium (Cr), lead, (Pb), nickel (Ni) and zinc (Zn) using the LUFT metal list. The Cr concentrations ranged from 16 mg/kg to 88 mg/kg, the Pb concentrations ranged from 2 to 7.9 mg/kg, the Ni concentrations ranged from 12 to 95 mg/kg, and the zinc concentrations ranged from 35 to 100 mg/kg. Cd was not detected in any of the soil samples.

Discussion

The petroleum hydrocarbon concentrations were compared to the Residential California Regional Water Quality Control Board's July 2003 Environmental Screening Levels (ESLs) for shallow soils (<3 meters, 9.8 feet) and for deeper soils (>3m, 9.8 ft) for sites where groundwater is considered a source or potential source of drinking water. The petroleum hydrocarbon concentrations detected in the CS-5 were well below the ESLs as noted in Table 1.

The metals selected for analysis were compared to several published guidance and reference documents. The data was compared to the ESLs, the California Environmental Protection Agency Health Screening Levels (CHHSLs), average concentrations found in the United States (US averages), average concentrations found in California (Cal averages), and to the three background soil samples collected by Kleinfelder during the site facility closure activities. The average soil concentrations as listed in the table are reported from samples collected from native undisturbed soil samples found in both soils around the United States and in California outside industrialized and cultivated areas. Table 2 presents a summary of the data and comparison concentrations.

None of the metal concentrations detected exceeded the ESLs, except in four soil samples as noted below:

[1] LUFT metal list includes: lead, nickel, zinc, cadmium, and total chromium.

- CS-2 at 16 feet, Cr was detected at 87 mg/kg,
- CS-5 at 7 feet, Cr was detected at a concentration of 64 mg/kg,
- CS-5 at 16 feet, Cr was detected at a concentration of 61 mg/kg,
- CS-12 at 16 feet, Cr was detected at a concentration of 88 mg/kg.

The ESL for Cr is 58 mg/kg, however, in the background soil samples collected by Kleinfelder, Cr was detected at concentrations ranging from 44 to 94 mg/kg. Therefore, it appears the that Cr detected in the confirmation samples appears to fall within the background levels for the site.

The purpose of using the ESLs is for the protection of groundwater with respect to impacted soil, and the EPAs CHHSLs to protect human health upon contact from the soil. It should be noted that the Site is covered by either 5 feet of clean fill, the building or asphalt parking lot and that contact with the soil is not applicable in this case once the construction is completed. The presentation of the CHHSLs is used for comparison purposes only.

Recommendations

Based on the field data and analytical results, the soil samples collected in July 2006 appear to confirm the results obtained during Kleinfelder's over excavation activities at former hydraulic lift locations HL-4, HL-5, HL-6, HL-8, HL-11, HL-13, HL-15, HL-17, HL-18, and HL-19 in which no TPH-mo was detected from the base and sidewall samples.

EFI does not recommend any further sampling at this time.

Limitations

This report has been prepared to aid Sand Hill Property Company and the SCCDEH, regarding the subsurface conditions on the Subject Property.

The subsurface evaluation was intended to evaluate the results of the confirmation soil sampling conducted by Kleinfelder, and is based on limited and selected sampling locations.

This report and all field data and notes were gathered and/or prepared by EFI Global in accordance with the agreed upon scope of work and generally accepted engineering and scientific practices in effect at the time of EFI Global's assessment of the sites. The statements, conclusions, and opinions contained in this report are only intended to give approximations of the environmental conditions at the site. Moreover, there are several points to note, as follows:

1. Environmental regulations continually change, as do the enforcement priorities of the applicable government agencies involved.
2. It is often difficult and sometimes impossible to accurately estimate the cost that may be involved in remedying the issues. The legal and technological standard initially applied at the agency level for evaluating and remedying environmental issues can be dependent upon the agency official involved.
3. There is always a possibility that sources of future environmental liability have yet to manifest themselves to the point where they are reasonably identifiable through a reasonable external investigation such as the one conducted herein.

CS-9	16'	7/10/2006	<1	<5
CS-10	16'	7/10/2006	<1	<5
CS-11	16'	7/10/2006	<1	<5
CS-12	16'	7/10/2006	<1	<5
Residential ESLs for Middle Distillates (diesel) and Residual Fuels (motor oil) [4]			100	500
Residential ESLs for Middle Distillates (diesel) and Residual Fuels (motor oil) [5]			100	1,000

NOTES:

1 bgs indicates depth below ground surface in feet where sample was obtained

2 mg/Kg indicates milligrams of analyte per kilogram, synonymous with parts per million

3 "<" indicates analyte not detected at or above referenced laboratory detection limit

4 California Regional Water Quality Control Board's Environmental Screening Level, July 2003 (ESLs) for shallow soils <3m (9.8 feet). Groundwater is current/potential source of drinking water.

5 RWQCB's ESLs for Deeper Soils >3meters (9.8 feet). Groundwater is current/potential source of drinking water

Table 2
Luft Metal Confirmation Soil Sample Analytical Results
20955 Stevens Creek Boulevard, Cupertino, CA

Sample Location	Depth (feet bgs)	LUFT Metals (mg/kg)

MS = Matrix Spike; MSD = Matrix Spike Duplicate; LCS = Laboratory Control Sample; LCSD = Laboratory Control Sample Duplicate; RPD = Relative Percent Deviation.

% Recovery = 100 * (MS-Sample) / (Amount Spiked); RPD = 100 * (MS - MSD) / ((MS + MSD) / 2).

MS / MSD spike recoveries and / or %RPD may fall outside of laboratory acceptance criteria due to one or more of the following reasons: a) the sample is inhomogenous AND contains significant concentrations of analyte relative to the amount spiked, or b) the spiked sample's matrix interferes with the spike recovery.

N/A = not applicable to this method.

NR = analyte concentration in sample exceeds spike amount for soil matrix or exceeds 2x spike amount for water matrix or sample diluted due to high matrix or analyte content.

1.0 INTRODUCTION AND BACKGROUND

1.1 INTRODUCTION

On behalf of Anderson Cupertino, Inc. (Anderson Cupertino), Kleinfelder Inc., (Kleinfelder), has prepared this Facility Closure Report (closure report) for the former Anderson Chevrolet Dealership located at 20955 Stevens Creek Boulevard in Cupertino, California (site) (Plate 1). This closure report outlines closure activities performed by Kleinfelder and its subcontractor, Marcor Environmental. Closure activities were performed based on the strategy presented in Kleinfelder's Facility Closure Plan (closure plan) dated November 16, 2005 (Kleinfelder, 2005). The closure plan was reviewed and accepted by the Santa Clara County Fire Department (SCCFD) on November 29, 2005. Work was performed under SCCFD permit number 05-3439. A copy of the permit is included in Appendix A.

This closure report is intended to address closure of below-grade hydraulic lifts, a three-stage clarifier, and associated piping. Closure of aboveground storage tanks, a hazardous material storage area and an area previously believed to be a service pit, are addressed in separate closure reports. Section 2 of this closure report describes closure activities. Section 3 presents analytical sampling results. Section 4 describes wastewater and soil disposal activities performed.

It is our understanding that Anderson Cupertino will no longer lease the site. It is assumed that the site's property owner plans to demolish and rebuild the site, which eliminates the need for the hydraulic lifts, clarifier, and the service pit area.

1.2 REGULATORY BACKGROUND

Anderson Cupertino submitted a closure application for aboveground hazardous materials storage facilities on April 26, 2005 to the SCCFD. The application includes an itemized matrix of all hazardous materials used at the Site. A closure plan was submitted on November 16, 2005. The SCCFD is the lead regulatory agency for the closure activities. Richard Baker is the SCCFD contact for this facility closure.

Copyright 2006 Kleinfelder, Inc.

1.3 DESCRIPTION OF SYSTEMS PERTAINING TO SITE CLOSURE

This report addresses underground closure activities.

1.3.1 Hydraulic Lifts

There were seventeen in-ground hydraulic lifts (HL-1 through HL-16) and one hydraulic tank (HL-14 consisted of dual hydraulic lifts with a hydraulic tank in between) in the various service bays (see Plate 2) as described in the Closure Plan (Kleinfelder, 2005). All of the lifts were removed since the property owner is planning on redeveloping the site. Removal of the hydraulic lifts followed the guidelines for permanent closure of underground hazardous materials storage tank systems. Closure activities for the hydraulic lifts are described in Section 2 of this closure report.

Following completion of activities in the work plan, three additional hydraulic lifts were identified during building demolition (HL-17, HL-18, and HL-19). These lifts were removed in general accordance with the methods outlined in the work plan for the removal of the initial lifts.

1.3.2 Three-Stage Clarifier

There was a concrete three-stage clarifier located northwest of the body shop building (Plate 2) that serviced wastewater from that building and the storage/detail building. Closure followed the guidelines established in the SCCFD Guidelines for Permanent Closure of Underground Hazardous Materials Storage Tank Systems and Sumps. Closure activities for the Three-Stage Clarifier are described in Section 2 of this closure report.

1.3.3 Piping Associated with the 3-Stage Clarifier

Underground piping connecting to the three-stage clarifier consisted of pipe running to the body shop, storage/detail building and northeast corner of the site. The piping was decontaminated as discussed in Section 2 of this closure report.

Copyright 2006 Kleinfelder, Inc.

2.0 FIELD ACTIVITIES

The objective of hazardous materials facility closure activities was to remove hazardous materials from the facility in accordance with SCCFD requirements. The scope of field activities generally consisted of (a) removal of liquids from the 3-stage clarifier and hydraulic lifts, (b) removal of residues from the 3-stage clarifier and piping, (c) removal of the hydraulic lifts, (d) removal of contaminated soil in the vicinity of the hydraulic lifts, (e) removal of the 3-stage clarifier and, (d) rendering the piping associated with the 3-stage clarifier unusable. Area-specific activities and general field activities for facility closure are described below.

2.1 ACTIVITIES

Closure activities were performed by Kleinfelder and it's subcontractor, Marcor Environmental. Kleinfelder provided site observation and sampling services. Field activities were performed beginning January 16, 2006 and terminating on March 29, 2006. Field activities were performed in conjunction with the aboveground closure and aboveground tank closure activities.

2.1.1 Hydraulic Lifts

The hydraulic lifts, tank and the associated attached hydraulic piping were vacuumed of all fluids, excavated, and removed from the site. The initial excavation dimensions for each hydraulic lift were approximately 4 by 4 feet to a depth of 8 feet. Following hydraulic lift removal, one soil sample was collected from the bottom of each excavation. Analytical results from several samples indicated levels of Total Petroleum Hydrocarbons (TPH) greater than residential Environmental Screening Levels (ESLs) published by the California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) (RWQCB, 2005) in hydraulic lifts HL-4, HL-5, HL-6, HL-8, HL-11, HL-13, and HL-15. Soil in these areas was further excavated, to remove contamination. A 4- by 4-foot area at each of hydraulic lifts HL-4, HL-5, HL-6, HL-8 and HL-15 was excavated to a depth of 12 feet. A 4- by 4-foot area at each of hydraulic lifts HL-11 and HL-13 was excavated to a depth of 14 feet. Excavations were backfilled with clean, imported material. Excavation of contaminated soil was an approved variation from the closure plan.

Copyright 2006 Kleinfelder, Inc.

For the additional 3 lifts discovered during building demolition (HL-17, HL-18, and HL-19), the hydraulic lifts, tank and the attached hydraulic piping were vacuumed of all fluids, excavated, and removed. Following hydraulic lift removal, one soil sample was collected from the bottom of each excavation. Based on the confirmation samples, additional excavation was performed on each hydraulic lift. For lifts HL-17 and HL-18, the additional excavation was near the surface only. HL-19 was excavated to a depth of 14 feet. The excavations were backfilled with soil from other areas of the site.

Hydraulic fluid was collected and disposed as outlined in Section 2.1.5. Excavated soil was collected and disposed as outlined in Section 2.1.6.

2.1.2 Three-Stage Clarifier

The Three-Stage Clarifier was vacuumed of all fluids, triple rinsed with non-phosphate soap, steam cleaned, excavated, and disposed as construction debris. This was an approved variation by Richard Baker of the SCCFD from the closure plan, which called for the clarifier to be steam cleaned and filled with sand to render it unusable. Wastewater was collected and disposed as outlined in Section 2.1.5.

2.1.3 Piping Associated with the Three-Stage Clarifier

The underground piping was decontaminated prior to capping in place. Decontamination included draining the contents, and triple rinsing with three 2-gallon slugs (10% of the pipe's capacity) of non-phosphate soap. The soap was collected within the three-stage clarifier and disposed as outlined in Section 2.1.5. After triple rinsing, the piping was capped at both ends. Piping will be removed as part of the building demolition activities.

2.1.4 Sampling Along Removed Piping and Three-Stage Clarifier

Soil samples were collected from the clarifier pit and every 20 feet along the surface of the pipe excavation. The total length of piping associated with the clarifier (on the property) was approximately 300 feet. The sample locations, labeled B1 through B19, are depicted on Plate 3.

2.1.5 Aqueous Waste Disposal

The wastewater generated during closure activities was containerized. Prior to disposal, samples were collected and analyzed for TPH, metals and volatile organic

Copyright 2006 Kleinfelder, Inc.

compounds (VOCs) for characterization as hazardous or non-hazardous waste. The wastewater was disposed of as Non-RCRA Hazardous Liquid Waste at Evergreen Oil, Inc., a licensed disposal facility. Wastewater from the three-stage clarifier and piping was combined with wastewater from four aboveground storage tanks (ASTs) prior to sampling and disposal. Closure activities for the ASTs are included in another closure report. Sampling for VOCs was not included in the closure plan, but was required for waste disposal.

2.1.6 Hydraulic Fluid Disposal

The hydraulic fluid from the hydraulic lifts was containerized. Prior to disposal, samples were collected and analyzed for polychlorinated biphenyls (PCBs) for characterization as hazardous or non-hazardous waste. The waste fluid was disposed of as non-RCRA hazardous liquid waste at Evergreen Oil, Inc.

2.1.7 Soil Disposal

Excavated soil was sampled and analyzed for TPH motor oil, PCB's, VOCs, semi-volatile organic compounds (SVOCs), cadmium, chromium, lead, nickel and zinc for characterization as hazardous or non-hazardous waste. The soil from HL-4, HL-5, HL-6, HL-8, HL-11, HL-13, and HL-15 was removed from the site between February 23, and February 27, 2006, and was disposed of as Class II Cover Soil at Altamont Landfill, a licensed disposal facility.

2.2 Fire Department Site Inspections

SCCFD representative Richard Baker was on site January 20, January 25, January 31, February 17, February 23 and March 29, 2006. The January 20, 2006 inspection was in conjunction with sampling for hydraulic lift removal. Mr. Baker noted that HL-7 and the tank between the dual lift HL-14 showed evidence of staining on the bottom and sides respectively, indicating the potential for leakage of hydraulic fluid. Mr. Baker also observed sample locations. The January 25, 2006 inspection included observation of the sampling sites for the three-stage clarifier and piping. Additional notes for these dates address topics related to aboveground closure and are further discussed in Kleinfelder's report titled Facility Closure Report – Aboveground Closure Activities. Copies of the Inspection Notices are included in Appendix B. The January 31 and February 17, 2006 inspections addressed aboveground tank removal and aboveground closure respectively and are further addressed in Kleinfelder's additional closure

Copyright 2006 Kleinfelder, Inc.

reports. The February 23, 2006 inspection documented completion of closure activities. The March 29, 2006 inspection included observation of sampling after the removal of the three additional hydraulic lifts identified during building demolition.

Copyright 2006 Kleinfelder, Inc.

3.1.3 Soil Sampling

Soil samples were collected directly from the excavation areas in glass jars and Encore sample containers. The soil samples were labeled with a unique identification number and placed in an iced chest for transport to SPL, Inc. in Houston, Texas, which is certified under California's Environmental Laboratory Accreditation Program (ELAP). Soil samples from the hydraulic lift excavations were analyzed for TPH as motor oil by EPA Method 8015M. Soil samples from the three-stage clarifier excavations and associated piping were analyzed for the following:

- VOCs, including oxygenates, ethylene dichloride, and ethylene dibromide, by EPA Method 8260;
- SVOCs by EPA Method 8270C;
- CAM 17 metals by EPA Method 6010, 7470 or 7471; and
- TPH as motor oil by EPA Method 8015M;

The results of these samples were used to assess the extent of contamination in soil and for hazardous waste classification purposes and are discussed in Section 3.2.

3.2 RESULTS

The following sections describe the results of the sampling activities.

3.2.1 Hydraulic Fluid Sampling

On January 16, 2006, one sample was collected from the hydraulic fluid as previously discussed. The laboratory did not report levels above the analytical limit of detection for the PCBs analyzed. Results are included in Appendix C. Based on the analytical results, Evergreen Oil, Inc. was able to accept the water for disposal as Non-RCRA Hazardous Waste (See Section 4.0).

3.2.2 Water Sampling

On January 16 and January 26, 2006, samples of water from the clarifier and piping and from wastewater generated during closure activities were collected as previously discussed. These samples were identified as Service Pit Water, Clarifier Water, W-1, W-2, and W-3 on the laboratory chain-of-custody. Sample results are presented in Table 1 and included in Appendix C.

Copyright 2006 Kleinfelder, Inc.

3.2.3 Soil Sampling

The following sections describe the soil sampling activities.

3.2.3.1 Three-Stage Clarifier and Piping

On January 25 and January 26, 2006, a total of nineteen soil samples (B-1 through B-19) were collected along the three-stage clarifier excavations and associated piping at the approximate depth of the clarifier or piping. Samples from the piping were collected every 20-feet at the approximate depth of the piping for that location. Three "background" soil samples, BG-1, BG-2, and BG-3, were subsequently collected on February 2, 2006, at depths of approximately three feet bgs in different areas of the site in order to evaluate concentrations in the site soil. These sample locations are shown on Plate 3. Sample results are presented in Table 2 and included in Appendix D. Although some metals concentrations detected in the samples are above the ESLs, they are within the range of background sample results. This suggests that the concentrations detected are due to naturally occurring metals, rather than activities at the facility.

3.2.3.2 Hydraulic Lifts

On January 20, 2006, a total of eighteen soil samples (HL-1 through HL-18) were collected from the hydraulic lift excavations for the lifts identified in the work plan. Samples from excavated areas were collected from approximately 6 inches below the surface of the excavation floor. Based on the results of the initial sampling, over-excavation was performed on HL-4, HL-5, HL-6, HL-8, HL-11, HL-13, and HL-15. Following additional excavation, samples were collected from the bottom of each excavation and from the sidewall at one half the depth of the excavation on February 2, 2006. Sample results are presented in Table 3 and included in Appendix D.

Following removal of HL-17, HL-18, and HL-19 on March 29, 2006, one soil sample was collected from the base of each excavation. Each lift was further excavated following the initial sampling because contamination was present above ESLs. For HL-18 and HL-19, the additional excavation consisted of extending the excavation vertically to an additional depth of 2 feet and 4 feet, respectively. An additional sample was collected from the depths of the over excavation. For HL-17, the soil was excavated to a depth of 14 feet, and the width of the excavation was increased. One sample was collected

Copyright 2006 Kleinfelder, Inc.

from the base of the excavation and one from the sidewall at one-half the depth of the excavation. Sample results are presented in Table 4 and included in Appendix D.

3.2.3.3 Soil Stockpile

One sample of stockpiled soil from the first hydraulic lift excavation was collected on February 2, 2006, and analyzed for TPH motor oil, PCB's, VOCs, SVOCs, cadmium, chromium, lead, nickel and zinc. Sample results are presented in Table 5 and included in Appendix D.

Soil from the excavations performed on HL-17, HL-18, and HL-19 was segregated by hydraulic lift and stockpiled. Three soil stockpile samples, SP-1, SP-2, and SP-3 (collected from the stockpiled soil excavated from HL-17, HL-18, and HL-19, respectively) were collected on March 29, 2006. The results are presented in Table 4 and are included in Appendix D. The classification, transport, and disposal of this stockpile will be reported as an addendum to this closure report. The stockpiled soil was removed from the site during the week of April 24, 2006.

Copyright 2006 Kleinfelder, Inc.

4.0 WASTE DISPOSAL

The disposal of wastewater, hydraulic fluid, and soil is described below.

4.1 WASTEWATER DISPOSAL

Wastewater (1,160 gallons) was removed from the site and disposed of as Non-RCRA Hazardous Liquid Waste, at Evergreen Oil, Inc. Copies of the waste manifests are included in Appendix E.

4.2 HYDRAULIC FLUID DISPOSAL

The hydraulic fluid from the hydraulic lifts (645 gallons) was removed from site and disposed of as Non-RCRA Hazardous Waste, Liquid at Evergreen Oil, Inc. A copy of the waste manifest is included in Appendix E.

4.3 SOIL DISPOSAL

Approximately 448 tons of soil was removed from the site and disposed of as Class II Cover Soil at Altamont Landfill during the week of February 20, 2006. An additional 112 tons of soil was stockpiled from the excavation of HL-17 , HL-18, and HL-19; and was removed during the week of April 24, 2006. Copies of the waste manifests are included in Appendix E.

Copyright 2006 Kleinfelder, Inc.

5.0 CONCLUSIONS

All requirements outlined in the closure permits were satisfied. TPH-impacted soil was detected above residential Environmental Screening Levels (ESLs) in several soil samples. Suspected TPH-impacted soil was excavated and disposed at a landfill. Confirmation samples were collected from the bottom and side of the excavations prior to backfilling. TPH was not detected above ESLS in the confirmation samples.

Based on the removal of all known hazardous materials, decontamination of areas with visible staining, and the sampling results, Kleinfelder recommends no further action at the Former Anderson Chevrolet Dealership facility.

6.0 LIMITATIONS

This report was prepared in general accordance with accepted standards of care that exist in California at the time the work was completed. It should be recognized that definition and evaluation of environmental conditions are a difficult and inexact science. The scope of services described here is not intended to be inclusive, to identify all potential concerns, or to eliminate the possibility of environmental problems. With current technology, no level of assessment can show conclusively that a property or its structures are completely free of contaminated and/or hazardous substances. Therefore, Kleinfelder cannot offer a certification that the recommendations made in this report will clear any property of environmental liability.

This report may be used only by the client and only for the purposes stated, within a reasonable time from its issuance. Land use, site conditions (both on- and off-site) or other factors may change over time, and additional work may be required. Based on the intended use of the report, Kleinfelder may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements, unless specifically agreed to in advance by Kleinfelder in writing, will release Kleinfelder from any liability resulting from the use of this report by any unauthorized party. Non-commercial, educational and scientific use of this report by regulatory agencies is regarded as a "fair use" and not a violation of copyright. Regulatory agencies may make additional copies of this document for internal use. Copies may also be made available to the public as required by law.

Conclusions and recommendations presented in this report are based on the results of the scope of work presented in Kleinfelder's proposal. Only work described herein was performed. As such, Kleinfelder cannot render opinions on issues not resulting directly from the work performed.

Mr. Paul Weiss
10130 Byrd Lane
Los Altos Hills, CA 94022

Dear Mr. Weiss:

Subject: Fuel Leak Site Case Closure—Anderson of Cupertino, 20955 Stevens Creek Boulevard, Cupertino, CA; Case No. 07S2W13E03f

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

If you have any questions, please call Ms. Christine Tulloch at the Camden Office, (408) 927-0710, extension 2636. Thank you.

Sincerely,

July 30, 1998

Mr. Paul Weiss
10130 Byrd Lane
Los Altos Hills, CA 94022

Dear Mr. Weiss:

Subject: Fuel Leak Site Case Closure—Anderson of Cupertino, 20955 Stevens Creek Boulevard, Cupertino, CA; Case No. 07S2W13E03f

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground tank release is required.

This notice is issued pursuant to a regulation contained in Section 2721(e) of Title 23 of the California Code of Regulations.

Please contact our office if you have any questions regarding this matter.

Sincerely,

ORIGINAL SIGNED BY

James S. Crowley, P.E.

1	550	Waste oil	Removed	02/20/98
Piping			—	—

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: No holes, corrosion, or pitting observed.		
Site characterization complete? Yes	Date Approved By Oversight Agency: N/A	
Monitoring wells installed? No	Number: —	Proper screened interval? —
Highest GW Depth Below Ground Surface: —	Lowest Depth: —	Flow Direction: —
Most Sensitive Current Use: Potential drinking water		

Summary of Production Wells in Vicinity: Three wells fall within ¼ mile of the site. Well 07S2W14H001 is a 300-foot deep agricultural well that was administratively destroyed in 1964 and is approximately 1,000 feet west of the site. Well 07S2W14J014 is approximately 1,000 feet southwest of the site. Well 07S2W14J099 is approximately 860 feet northeast of the site. No other information is available on Wells 07S2W14J099 and 07S2W14J014.

Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Basin
Is surface water affected? No	Nearest SW Name: Junipero Serra Channel and Regnart Creek
Off-Site Beneficial Use Impacts (Addresses/Locations): None reported	
Reports on file? Yes	Where are reports filed? Santa Clara Valley Water District

Description of Interim Remediation Activities: —

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None required		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: —	Number Retained: —
List Enforcement Actions Taken: None taken		
List Enforcement Actions Rescinded: None rescinded		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances: The 550-gallon waste oil tank was found to be in good condition with no holes observed upon excavation. One soil sample was collected approximately 10 feet below grade at the eastern and western ends of the tank excavation. Four soil samples were taken from the excavated soil stockpile, where motor oil was found to be 140 parts per million.

The most significant level of oil and grease and metals were detected in the native soil. However, due to the relatively low mobility of oil and metals and the good condition of the tank, it does not appear that a significant release occurred.

Conclusion: Santa Clara Valley Water District staff has concluded that the relatively small amount of residual soil contamination does not pose a threat to the beneficial uses of water.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Christine A. Tulloch	Title: Water Quality Specialist
Signature:	Date: July 10, 1998
Approved by: James S. Crowley, P.E.	Title: Special Programs Engineer (acting)
Signature:	Date: 7/14/98

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

NFIRS Remarks

Remarks

1. Truck 1, Engine 1, Engine 9, Engine 16 and Battalion 2 crews responded to a gas investigation. 2. Upon arrival Truck 1 crew found a 2 story office building with nothing showing. Engine 1 Captain established Stevens Creek Incident Command. 3. Truck 1 crew met with the contractor who stated his crew had hit a 1" gas line and had clamped it off. Truck 1 crew investigated and found the gas line had been clamped and was not actively leaking. Truck 1 crew cancelled the balance of the response and terminated command. Truck 1 crew used a 4 gas detector in the building and there were no detected levels of gas inside the structure. 4. The scene was turned over to the contractor and Pacific Gas & Electric representative.

APPENDIX D

USER PROVIDED INFORMATION

ASTM E1527-21 User Questionnaire

Please complete the below form and return to Langan.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the Landowner Liability Protections (LLP) offered under CERCLA. Missing or incomplete information for questions 1 through 6 could result in a determination that "all appropriate inquiry" is not complete. Additional information should be provided for "Yes" answers where relevant.

General Information

User/Client Names: STEVENS CREEK OCA OWNER, LLC

Reason for the Phase I ESA: Entitlement

Type of property: Commercial Office & Retail

Type of property transaction (e.g. sale, purchase, exchange): N/A

Subject property address (provide documentation of subject property boundary):
20807, 20813, 20823, 20833 Stevens Creek Blvd, Cupertino, CA 95014

Site Contact and Contact Information: Kevin Choy, kchoy@harvestproperties.com

Relying Party(ies):

Required Information

(1.) Environmental liens that are filed or recorded against the subject property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

Yes	No
○	◉

(2.) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

Yes	No
○	◉

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes	No
○	◉

(4.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).

	Yes	No	
Does the purchase price being paid for this subject property reasonably reflect the fair market value of the subject property?	○	○	N/A ●
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?	○	○	●

(5.) Commonly known or reasonably ascertainable information about the subject property (40 CFR 312.30).

	Yes	No
Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	●	○
For example,		
(a.) Do you know the past uses of the subject property?	●	○
(b.) Do you know of specific chemicals that are present or once were present at the subject property?	○	●
(c.) Do you know of spills or other chemical releases that have taken place at the subject property?	○	●
(d.) Do you know of any environmental cleanups that have taken place at the subject property?	○	●

(6.) The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

	Yes	No
Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?	○	●
Do you have knowledge or experience with the subject property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition)?	○	●

Signature

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of March 21, 2024 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

Prelim

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Stevens Creek OCA Owner, LLC, a Delaware limited liability company

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A Fee as to Parcels One, Two, Three and Four; easements as to Parcels Three-A, Five and Six

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2024-2025, a lien not yet due or payable.

2. The lien of special tax assessed pursuant to Chapter 2.5 commencing with Section 53311 of the California Government Code for Community Facilities District No. 2013-1, as disclosed by Notice of Special Tax Lien recorded January 22, 2014 as Document No. 22502535 of Official Records, a lien not yet due or payable.

   (Affects all Parcels)

3. The lien of supplemental taxes, if any, to the extent resulting from changes in ownership or commencement of construction on or after the Date of Policy assessed pursuant to Chapter 3.5 (commencing with Section 75) of the Revenue and Taxation Code of the State of California.

4. An easement for public utilities, storm drainage and sanitary sewer construction and maintenance and incidental purposes, recorded July 01, 1968 as Document No. 3441950 and Book 8176, Page 95 of Official Records.

In Favor of:	City of Cupertino, a municipal corporation
Affects:	as described therein

   (Affects Parcel One)

5. An easement for utilities and incidental purposes, recorded July 17, 1973 as Document No. 4563944 and Book 0473, Page 551 of Official Records.

   In Favor of: Pacific Gas and Electric Company, a California corporation
   Affects: as described therein

   (Affects Parcels Three and Four)

6. An easement for 20' wide water line and incidental purposes in the document recorded November 07, 1973 as Document No. 4644993, Book 0640, Page 205 of Official Records.

   (Affects Parcels One and Two)

7. An easement for utilities and incidental purposes, recorded January 23, 1974 as Document No. 4690926, Book 0736, Page 412 of Official Records.

   In Favor of: Pacific Gas and Electric Company, a California corporation
   Affects: as described therein

   (Affects Parcel One)

   The location of the easement cannot be determined from record information.

   The terms and provisions contained in the document entitled "Notice of Final Description" recorded December 26, 1980 as Document No. 6936802 and Book F812, Page 204 of Official Records.

   The effect of a document entitled "Quitclaim Deed", recorded June 21, 1984 as Document No. 8446655, Book J380, Page 289 of Official Records.

8. The terms and provisions contained in the document entitled "Declaration of Covenants Running with the Land" recorded August 11, 1980 as Document No. 6801243, Book F496, Page 692 of Official Records.

   (Affects all Parcels)

   Document(s) declaring modifications thereof recorded December 27, 2004 as Document No. 18162144 of Official Records.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 20807, 20813, 20823 and 20883 Stevens Creek Boulevard, Cupertino, CA.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

4. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:

   A. WITH RESPECT TO A CORPORATION:
      1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
      2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
      3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
      4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
   B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
      1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
      2. A full copy of the partnership agreement and any amendments;
      3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
      4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
      5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
   C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:
      1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) to be recorded in the public records;
      2. A full copy of the partnership agreement and any amendment;
      3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;

4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

D. WITH RESPECT TO A GENERAL PARTNERSHIP:
1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;
2. A full copy of the partnership agreement and any amendments;
3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.

E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:
1. A copy of its operating agreement and any amendments thereto;
2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
   (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
   (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

F. WITH RESPECT TO A TRUST:
1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
2. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.

G. WITH RESPECT TO INDIVIDUALS:
1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

APN:

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   (a) building; (d) improvements on the Land;
   (b) zoning; (e) land division; and
   (c) land use; (f) environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   (c) that result in no loss to You; or
   (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   (b) in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

	Your Deductible Amount	**Our Maximum Dollar Limit of Liability**
Covered Risk 16:	1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   (a) and use
   (b) improvements on the land
   (c) and division
   (d) environmental protection
   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date
   (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking
3. Title Risks:

(a) that are created, allowed, or agreed to by you
(b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
(c) that result in no loss to you
(d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an

accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b.Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   a. a fraudulent conveyance or fraudulent transfer; or
   b. a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

2021 ALTA LOAN POLICY (7-1-21)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered

Risk 11, 13, or 14); or
e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser or encumbrancer had been given for the Insured Mortgage at the Date of Policy.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business law.
5. Invalidity or unenforceability of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury law or Consumer Protection Law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction creating the lien of the Insured Mortgage is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the Insured Mortgage is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 13.b.
7. Any claim of a PACA-PSA Trust. Exclusion 7 does not modify or limit the coverage provided under Covered Risk 8.
8. Any lien on the Title for real estate taxes or assessments imposed by a governmental authority and created or attaching between the Date of Policy and the date of recording of the Insured Mortgage in the Public Records. Exclusion 8 does not modify or limit the coverage provided under Covered Risk 2.b. or 11.b.
9. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, geothermal resources, uranium, clay, rock, sand and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2021 ALTA OWNER'S POLICY (7-1-21)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, geothermal resources, uranium, clay, rock, sand and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

Subject: Reliance Letter
Phase I Environmental Site Assessment
Stevens Creek Office Center
20807, 20813-20883 Stevens Creek Blvd., Cupertino, California
Investment No. 758507

Dear Ms. Bryant,

This letter is written with respect to a proposed loan origination by Principal Real Estate Investors, LLC, which is to secure a mortgage on the above-described property (the "Property"). Ninyo & Moore, the undersigned Consultant, have been retained by Principal Real Estate Investors, LLC to provide a Phase I Environmental Site Assessment (the "Report) on the Property. The undersigned further understands and acknowledges that providing the Report in a form and substance acceptable to Principal Real Estate Investors, LLC is a condition to the closing of the subject transaction. Please be advised that Principal Real Estate Investors, LLC and any affiliates, successors, and/or assigns, can rely on the Report entitled *Phase I Environmental Site Assessment, Stevens Creek Office Center*, dated July 21, 2020, subject to the limitations and qualifications contained therein. In addition, this letter states that the Report was completed incorporating the guidelines for scope and format set forth in Principal Real Estate Investors, LLC's guidance documents and that the Report satisfies such requirements set forth therein, subject to any qualifications identified in the Report.

The undersigned further hereby acknowledges that Principal Life Insurance Company, any successors, and/or assigns, may reply on the Report to the same extent that Principal Real Estate Investors, LLC is able to rely on the Report.

Respectfully submitted,
NINYO & MOORE

APPENDICES

A: RESUMES
B: SITE PHOTOGRAPHS
C: ENVIRONMENTAL DATA RESOURCES (EDR) RADIUS MAP REPORT
D: SITE DOCUMENTATION AND REGULATORY RECORDS
E: HISTORICAL RESEARCH DOCUMENTATION

EXECUTIVE SUMMARY

Ninyo & Moore was retained by Principal Real Estate Investors to perform a Phase I Environmental Site Assessment (ESA) on the Stevens Creek Office Center property addressed as 20807, 20813, 20823, 20833, 20863, and 20883 Stevens Creek Boulevard in Cupertino, California (site). The site is also identified as Santa Clara County Assessor's Parcel Numbers 326-32-053, 326-32-050, 326-32-052, and 326-32-051.

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM E1527-13, recognized environmental conditions (RECs), which are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The results of this ESA are summarized below:

- Historical research revealed that the site was developed in the early 1900s as an orchard with a few farm buildings located on the southern portion of the property. In the early 1970s, the orchard and the farm buildings were removed and several commercial buildings (Buildings 100 through 500 at 20863, and Buildings 100 through 400 at 20823) were constructed. An additional commercial building (20883) was added to the site in the 1980s, and two buildings (20813 and 20833) in the 1990s. In 2005, a building on the southern portion of the site was removed and replaced with an approximate 7,100 sf commercial building (20807). The site currently consists of 13 commercial buildings and associated parking lots.
- On July 14, 2020, Mr.Luke Swickard of Ninyo & Moore conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Ms. Aileen Phanmaha with Harvest Properties (property management company) escorted Mr. Swickard around the property during the site reconnaissance. At the time of the reconnaissance, the approximate 6.99-acre site consisted of the Stevens Creek Office Center. The site was arranged in two garden-style office clusters (Building 20863 and Buildings 20813, 20823, and 20833) with attractive inner courtyards and walking paths, and two stand-alone buildings (20807 and 20883). The site was improved with 12 one- and two-story commercial buildings totaling approximately 109,312 square-feet (sf) of net rentable sf, plus an approximate 1,032-sf shared fitness room. The approximate 7,100 sf retail building located at 20807 on the southern portion of the site was occupied by Panera Bread and a vacant unit. Three underground parking garages were also located on-site. A distinguished gateway served as the entrance from Steven Creek Boulevard, and there was also ingress/egress on Alves Drive that were connected the two by a private drive.
- Individual buildings housed a variety of tenants, with the largest tenant, Apple, Inc. occupying approximately 61,050 sf of space within buildings 20813, 20823, 20863, and

20883. A copy of the most recent rent roll, which was provided to Ninyo & Moore and details the remainder of the current site tenants, is included in Appendix D.

- In general, the observed tenant suites consisted of office space that included individual offices, break rooms, conference rooms, etc. Indications of hazardous materials usage were not observed. The suites occupied by Apple, Inc. were not visually inspected during the site visit due to access limitation imposed by Apple (no interior inspections or observations were allowed). In general, interior construction materials within the observed tenant spaces included a variety of carpeting, ceramic floor tiles, painted and textured walls, and ceilings. Interior finishes appeared to be in good condition. The interiors of Buildings 20883 and 20813 were undergoing tenant improvements at the time of the site reconnaissance. The exterior of the buildings consisted of asphalt parking areas.
- The areas surrounding the site consist primarily of retail/commercial buildings to the east (Happy Days Child Development Center, UBREAKIFIX, Site for Sore Eyes, H&R Block, The Coder School, Sizzling Lunch, Sleep Number, and T-Mobile), to the west by Whole Foods Market, to the south by Staples, Dish N' Dash, and the Union Church of Cupertino, and to the north by residential and commercial development (Northwest YMCA).
- Based on our site visit, there are currently no wells on the site.
- Ninyo & Moore did not observe quantities of hazardous substances or petroleum products used or stored on site during our site reconnaissance with the exception of a reportedly small amount (approximately 150-gallons) of diesel fuel contained within an integrated belly tank of one of the emergency backup generators located on the site.
- Indications of aboveground storage tanks (ASTs), underground storage tanks (USTs), or hazardous material spills or leaks, were not observed during the site reconnaissance.
- Review of an environmental database report obtained for this project indicated that the site is listed on several of the regulatory databases researched by Environmental Data Resources Inc. (EDR), including the CERS, FINDS, CIWQS, ENF, ECHO, FINDS, HWTS, HAZNET, and RCRA NonGen databases. The site was listed on the CERS, HWTS, HAZNET, and RCRA NonGen databases for previously having small quantities of hazardous wastes on-site. The site was also listed on the CIWQS database for having a minor storm water violation. Indications of releases, spills, or mitigation were not indicated on reviewed regulatory agency files. None of the agency database listings are indicative of a REC.
- Several off-site facilities were located within the EDR search radius from the site. None of the listed facilities are considered to be a REC to the site at this time based on several factors, including distance from the site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the site), database listing type, and/or affected media (soil only). Refer to Section 5.1.2 for additional information regarding potential off site facilities of concern.

CONCLUSIONS

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Stevens Creek Office Center property addressed as 20807, 20813, 20823, 20833, 20863, and 20883 Stevens Creek Boulevard in Cupertino, California. Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of RECs in connection with the site at this time.

RECOMMENDATIONS

Based on the findings of this ESA, no further investigation is recommended at this time.

1. INTRODUCTION

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Stevens Creek Office Center property located at 20807 and 20813-20883 Stevens Creek Boulevard in Cupertino, California (site). This ESA was conducted for Principal Real Estate Investors. The following sections identify the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with this ESA.

1.1. Purpose

In accordance with ASTM E1527-13, the objective of the ESA is to identify recognized environmental conditions. The term recognized environmental conditions (RECs) means "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions."

Identification of RECs will fall into three categories: existing REC (as defined above), Historical REC (HREC), or Controlled REC (CREC).

- HREC - An HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls)."
- CREC - A CREC is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the

issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls)."

1.2. Involved Parties

Mr. Randy Wheeler, Senior Geologist with Ninyo & Moore, was the Environmental Professional assigned to this project. Mr. Luke Swickard, Staff Environmental Scientist with Ninyo & Moore, conducted the site visit and performed agency records review. Mr. Duane Blamer, Principal Geologist with Ninyo & Moore, performed project oversight and quality review. Resumes of these individuals are included in Appendix A.

1.3. Scope of Services

Ninyo & Moore's scope of services for this ESA included the following:

- Perform a site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the site as well as visible exterior features of adjoining properties to identify areas of possibly contaminated surface soil or surface water, improperly stored hazardous materials, and possible risks of contamination from activities at the site and adjoining properties. Photographs of relevant site features are provided in Appendix B.
- Review of reasonably ascertainable standard environmental record sources including federal, state, and tribal regulatory agency databases for the site and for properties located within a specified radius of the site (Appendix C). The purpose of this review was to evaluate possible environmental impacts to the site and site vicinity activities. These databases list locations of known hazardous waste sites, leaking underground storage tanks (LUSTs), permitted facilities that utilize USTs, and facilities that use, store, or dispose of hazardous substances, hazardous wastes, and/or petroleum products.
- Review reasonably ascertainable additional environmental record sources, including local records and/or additional state or tribal records for the site and for properties located within a specified radius of the site. The purpose of the review was to evaluate possible environmental impacts to the site and site vicinity activities.
- Provide supporting documentation, when available (Appendix D).
- Review reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) 7.5-minute topographic map, and possibly including USGS and/or state groundwater and geologic maps, and soil maps. The purpose of this review was to note information about the geologic, hydrologic, and/or topographic characteristics of the site and site vicinity.
- Review reasonably ascertainable historical documents that may include aerial photographs, historical fire insurance maps, and/or city directories. The purpose of this review was to review obvious uses of the site from the present, back to the site's first developed use, or back to 1940, whichever is earlier (Appendix E).

- Perform interviews with present owners, operators, and occupants of the site as well as other knowledgeable parties as appropriate/available. The purpose of these interviews was to obtain information regarding potential RECs in connection with the site.
- Prepare this ESA report documenting the methodology, reporting findings, significant data gaps, and conclusions, and providing opinions of the impact on the site of conditions noted in the findings section regarding RECs at the site.

1.4. Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report. This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document. The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the subject site or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5. Special Terms and Conditions

Ninyo & Moore was not made aware of any special terms and conditions associated with the site.

1.6. User Reliance

This report may be relied upon by, and is intended exclusively for, Principal Real Estate Investors. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the client is undertaken at said parties' sole risk.

1.7. Physical Limitations

Physical limitations were encountered during the site reconnaissance. Access to the interior of Building 20833, was not permitted from the building tenant, Apple, Inc., during site

reconnaissance. Additionally, access to several Apple-occupied units in Building 20823 was also not permitted.

1.8. Data Gaps

A data gap is a "lack of or inability to obtain data required by this practice despite good faith efforts to gather such data." In completing this ESA, Ninyo & Moore encountered no significant data gaps that affect the ability of the EP to identify RECs on the site.

2. SUBJECT SITE

The following sections provide a general description of the site and adjacent properties. Photographs taken during the site reconnaissance are provided in Appendix B.

2.1. Site Description

At the time of the site reconnaissance, the site was developed with 12 commercial buildings used as office and retail space, and occupied by eighteen tenants and one retail building occupied by Panera Bread. The site is addressed as 20807, 20813, 20823, 20833, 20863, and 20883 Stevens Creek Boulevard in Cupertino, California, and is situated on four parcels totaling approximately 6.99 acres of land designated by Santa Clara County Assessor's Parcel Numbers 326-32-053, 326-32-050, 326-32-052, and 326-32-051. The Site Location is presented on Figure 1 and the Site Vicinity with additional information concerning the site and surrounding properties is presented on Figure 2.

2.2. Site Reconnaissance

On July 14, 2020, Mr. Luke Swickard, Staff Environmental Scientist with Ninyo & Moore, conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Ms. Aileen Phanmaha with Harvest Properties (property management company) escorted Mr. Swickard around the property during the site reconnaissance.

2.2.1. Site Improvements

At the time of the reconnaissance, the approximate 6.99-acre site consisted of the Stevens Creek Office Center. The site was arranged in two garden-style office clusters (Building 20863 and Buildings 20813, 20823, and 20833) with attractive inner courtyards and walking paths, and two stand-alone buildings (20807 and 20883). The site was improved with 12 one- and two-story commercial buildings totaling approximately 109,312 square-feet (sf) of net rentable sf, plus an approximate 1,032 sf shared fitness room. The approximate 7,100 sf retail building located at 20807 on the southern portion of the site was occupied by Panera Bread and a vacant unit. Three underground parking garages were also located on-site.

A distinguished gateway served as the entrance from Steven Creek Boulevard, and there was also ingress/egress on Alves Drive that connected the two by a private drive.

Individual buildings housed a variety of tenants, with the largest tenant, Apple, Inc. occupying approximately 61,050 sf of space within buildings 20813, 20823, 20863, and 20883. A copy of the most recent rent roll, which was provided to Ninyo & Moore and details the remainder of the current site tenants, is included in Appendix D.

In general, the observed tenant suites consisted of office space that generally included individual offices, break rooms, conference rooms, etc. Indications of hazardous materials usage were not observed. The suites occupied by Apple, Inc. were not visually inspected during the site visit due to access limitation imposed by Apple (no interior inspections or observations were allowed).In general, interior construction materials within the observed tenant spaces included a variety of carpeting, ceramic floor tiles, painted and textured walls, and ceilings. Interior finishes appeared to be in good condition. The interiors of Buildings 20883 and 20813 were undergoing tenant improvements at the time of the site reconnaissance. The exterior of the buildings consisted of asphalt parking areas.

The following summarizes key on-site observations for indications of the following potential environmental concerns:

On-Site Observations		
Conditions	**Observed**	**Comments**
Hazardous Substances/Petroleum Products	Yes	A reportedly small amount (approximately 150-gallons) of diesel fuel contained within an integrated belly tank of one of the emergency backup generators is located on the site.
Waste Generation/Storage/Disposal	No	
Unidentified Substance Containers	No	
Storage Tanks (ASTs and/or USTs)	No	
Potential PCB-Containing Equipment	Yes	Four pad-mounted electrical transformers were located throughout site.
Chemical/Petroleum Odors	No	
Concrete Patches/Pads	No	
Pools of Liquid		
Sewage Discharge Pipes	No	
Floor Drains/Sumps	Yes	Five storm water collection sumps were located throughout the site. Four sumps were located adjacent to several of the buildings in order to collect and pump storm water runoff into the municipal storm water system. One of the sumps was located in one of the three underground parking garages and was used to collect and pump storm water runoff into the municipal storm water system.
Elevator	Yes	Three elevators were located on-site, one in each of the multi-story buildings.
Wells	No	
Drums	No	
Indications of Staining	No	
Stressed Vegetation	No	
Pits, Ponds, or Lagoons	No	
Waste Water Discharges/Disposal Systems	No	
Storm Water Systems	Yes	Stormwater drains were located throughout the parking lots of the site.

Conditions	Observed	Comments
Septic Systems/Cesspools	No	
Municipal Solid Waste Disposal Areas	No	
Other Environmental Concerns or Conditions	No	

2.2.2. Roads

As shown on Figure 2, the site is accessible from Alves Drive to the north, Saich Way to the east, and Stevens Creek Boulevard to the south.

2.2.3. Site Occupants

At the time of our site reconnaissance, the site buildings were occupied by multiple tenants including:

- Mobileum Inc.
- SGK
- Quinn Orthopedic Physical Therapy
- Movius
- Apple
- Mark Thomas & Company
- Apple Retrographics
- Sihua Technologies Inc.
- Anritsu Americas Sales Company
- Protein Metrics Inc.
- Ventana Micro Systems
- J Volckmann & Associates
- Frank LaHaye
- NavInfo
- ShoCard Inc.
- CloudMosa Inc.
- Affiliated Psychologists, and
- FlexLink Systems Inc.

2.2.4. Source of Potable Water

The California Water Service provides potable water to the site and site vicinity.

2.2.5. Sewage Disposal System

The site is reportedly connected to municipal sewer services.

2.2.6. Source of Fuel for Heating and Cooling

The fuel source for the on-site heating and cooling systems was provided by PG&E.

2.3. Adjoining Properties

The following table lists the properties adjoining the site and associated land use. Based on the nature of the adjoining properties, information available in agency databases, and observations made during our site reconnaissance, it is not likely that these properties have impacted the environmental integrity of the site at this time.

Adjoining Properties	
Location	**Description**
North	Across Alves Drive are several residential houses and the Northwest YMCA.
South	Across Stevens Creek Boulevard are several commercial buildings including a Staples and a Dish N' Dash, and the Union Church of Cupertino.
East	Several commercial buildings including Happy Days Child Development Center, UBREAKIFIX, Site for Sore Eyes, H&R Block, The Coder School, Sizzling Lunch, Sleep Number, and T-Mobile.
West	Whole Foods Market (20955 Stevens Creek Blvd.)

3. USER PROVIDED INFORMATION

The following sections summarize information provided by the user to assist the environmental professional in identifying the possibility of RECs in connection with the site and to fulfill the user's responsibilities in accordance with Section 6 of ASTM E1527-13. The User Questionnaire was completed by Ms. Aileen Phanmaha. A copy of the User Questionnaire is included in Appendix D.

3.1. Title Records

A Preliminary Title Report was not provided to Ninyo & Moore.

3.2. Environmental Liens or AULs

Ninyo & Moore was not informed of the existence of environmental liens or AULs associated with the site.

3.3. Specialized Knowledge

Ninyo & Moore was not informed of the existence of specialized knowledge regarding the site.

3.4. Commonly Known or Reasonably Ascertainable Information

Ninyo & Moore was not informed of the existence of commonly known or reasonably ascertainable information pertaining to the site that is material to the identification of RECs in connection with the site.

3.5. Valuation Reduction for Environmental Issues

According to information provided in the AAI User Questionnaire, which was completed by (name and title), the property value and purchase price are representative of current market value.

3.6. Owner, Property Manager, and Occupant Information

The site is currently owned by Stevens Creek Office Center Associates, LP.

3.7. Reason for Performing Phase I

This ESA has been completed for the exclusive use of Principal Real Estate Investors in contemplation of a new loan on the property.

4. PHYSICAL SETTING

The following sections include discussions of topographic, geologic, and hydrologic conditions.

4.1. Topographic Conditions

Based on a review of the United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Map Series of the Cupertino CA 2012 Quadrangle, the site is situated at an elevation of approximately 258 feet above mean sea level. The topography of the site generally slopes towards the east-northeast.

4.2. Geology and Soil Conditions

The site is located in the Coast Range geomorphic province of California. The Coast Ranges are northwest-trending mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level), and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. Strata dip beneath alluvium of the Great Valley. To the west is the Pacific Ocean. The coastline is uplifted, terraced and wave-cut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The Coast Ranges are subparallel to the active San Andreas Fault. The San Andreas is more than 600 miles long, extending from Pt. Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to the north of the Farallon Islands (CGS, 2002). The 1977 California Division of Mines and Geology, *Geologic Map of California*: (Jennings C.W.) shows the site to be underlain by Quaternary older alluvium, lake, playa, and terrace deposits (Qoa). Based on our review of the EDR Radius Map report, the primary soil type beneath the site is mapped as Botella clay loam (EDR, 2020).

4.3. Site Hydrology

The following sections discuss the site hydrology in terms of surface water and groundwater.

4.3.1. Surface Waters

Surface waters, including ponds, streams, creeks, lagoons and other naturally-occurring bodies of water, were not observed on the site at the time of our reconnaissance.

4.3.2. Groundwater

Groundwater information for the site was not available. Ninyo & Moore reviewed the State Water Resources Control Board's GeoTracker website (GeoTracker) for groundwater information in the site vicinity. According to GeoTracker, groundwater information reported in a First Quarter 2013 groundwater monitoring report for the 76-branded service station located at 19550 Stevens Creek Boulevard (approximately 1.3 miles east of the site), the groundwater flow direction in the site vicinity was reported to be towards the northeast and the depth to groundwater was reported to be approximately 77 to 81 feet below ground surface. Groundwater depths and flow directions can vary due to seasonal variations, groundwater withdrawal or injection, and other factors.

5. RECORDS REVIEW

The following sections summarize records reviewed for the site.

5.1. Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a computerized environmental information database search for the site and site vicinity. The EDR report included federal, state, and local databases. The review was conducted to evaluate whether or not the site or properties within the vicinity of the site have been listed as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects for the site. A summary of the environmental databases searched, their corresponding search distance, and the number of listed off-site properties of potential environmental concern to the site are presented in the following table. A copy of the EDR Radius Map Report is presented in Appendix C.

Map Findings Summary								
Database	**Target Property**	**Search Distance (Miles)**	**< 1/8**	**1/8 - 1/4**	**1/4 - 1/2**	**1/2 - 1**	**> 1**	**Total Plotted**

5.1.1. Regulatory Database Listings for the Site

The following table summarizes the database listings related to the site:

On-Site Database Listings	
Site Name	CUPERTINO SD CS
Site Address	20833 STEVENS CREEK 104
Database	CERS, FINDS, CIWQS, ENF
Comments	The site was listed on the CERS and ENF databases for a 2007 sewage spill, and on the FINDS and CIWQS databases for storm water discharge to the municipal storm system. Based on the database listing types, these listings are not indicative of a REC.

Site Name	STEVENS CREEK OFFICE CENTER ASSOCIATES, LP
Site Address	20813, 20823, 20863 STEVENS CREEK BLVD SUITE 480 and 300
Database	ECHO, FINDS, HWTS, HAZNET, RCRA NonGen / NLR
Comments	The site is currently listed on the ECHO database. No further information was available on the database listing. The site was also listed on the FINDS database under the RCRA Information System, and on the RCRA NonGen database for handling but not generating hazardous waste in 2018 and 2020. The site was listed on the HAZNET database for disposing of 5.2-tons of

Comments	asbestos containing waste in a landfill in 2012, and on the HWTS database for having hazardous waste that was being tracked on-site from 2012 to 2013 and in 2018. No additional information was available for this database listing. None of the database listings indicated unauthorized releases. Based on the database listing types, these listings are not indicative of a REC.

Site Name	PANERA BREAD-CAFE 4471
Site Address	20807 STEVENS CREEK BLVD
Database	CERS
Comments	The site was listed on the CERS database for having a hazardous materials business plan (HMBP). This is not considered a REC.

Site Name	APPLE INC - STEVENS CREEK 03A
Site Address	20833 STEVENS CREEK BLVD
Database	HWTS, HAZNET, FINDS, ECHO, RCRA NonGen / NLR
Comments	The site was listed on the HAZNET database for storing and off-site incinerating of several tons of organic solids and laboratory waste chemicals from 2015 to 2017. The site was listed on the HWTS database for having hazardous waste that was being tracked on-site from 2014 to 2019, and on the RCRA NonGen/NLR database for handling but not generating hazardous waste in 2014. The site was also listed on the ECHO and FINDS databases. No further information was available on the database listings. No violations were reported for these database listings. Based on the database listing types, these listings are not indicative of a release, and therefore are not considered a REC.

Site Name	STEVENS CREEK OFFICE CENTER
Site Address	20833 STEVENS CREEK BLVD
Database	HWTS, HAZNET
Comments	The site was listed on the HAZNET and HWTS databases for depositing 1-ton of organic solid waste in a landfill in 2012. Based on the database listing types, these listings are not indicative of a REC.

Site Name	J. VOLCKMAN ASSOCIATES
Site Address	20813 STEVENS CREEK BLVD
Database	HWTS
Comments	The site was listed on the HWTS database for having hazardous waste that was being tracked on-site from 1989 to 2000. This is not considered a REC.

Site Name	BURBANK SD CS
Site Address	20833 STEVENS CREEK BOULEVARD 104
Database	CIWQS, FINDS, CERS
Comments	The site was listed on the CIWQS database for having a minor violation of the water quality standards in their collection system in May 2007, likely associated with storm water runoff from the buildings. The site was listed on the CERS database for a minor violation pertaining the site's water quality in December 2004. No additional information was provided. These database listings are not considered a REC.

Site Name	APNEON INC
Site Address	20813 STEVENS CREEK BLVD STE 100
Database	HAZNET
Comments	The site was listed on the HAZNET database for disposing of 0.1-ton of waste oil and mixed oil in 2008. This is not considered a REC.

Site Name	APPLE, (STEVENS CREEK 3E)
Site Address	20863 STEVENS CREEK BLVD STE 300
Database	HWTS, HAZNET
Comments	The site was listed on the HAZNET and HWTS databases for disposing of 4.8-tons of asbestos-containing waste in a landfill in 2016. This is not considered a REC.

5.1.2. Regulatory Database Listings for Off-Site Properties

Off-site properties/facilities listed in the **Map Findings Summary** table above were evaluated as to their potential to impact soil, soil vapor, and/or groundwater at the site. The following table presents the properties/facilities that were interpreted to represent a potential environmental concern to the site, based on their proximity to the site, the nature of the database on which they are listed, and/or the assumed direction of groundwater flow in the site vicinity. It is our opinion that there is a low likelihood that the off-site properties listed in the Facilities of Potential Concern table below (or other facilities listing in the Map Findings Summary table above) represent a REC to the site. This opinion is based on one or more of the following factors:

- The nature of the database(s) on which the property is listed, and/or because the property was not listed on a database that reports unauthorized releases of hazardous substances;
- Reported regulatory agency status (i.e., case closed);
- Reported nature of the case (i.e., soil contamination only);
- Reported distance of the property from the site; and/or
- Location of the property in relation to the site with respect to topography or expected groundwater flow direction (northeast).

Facilities of Potential Concern	
Site Name	THE VITAMIN SHOPPE #648
Site Address	20803 STEVENS CREEK BLVD
Distance from Site	0 feet
Direction from Site	SSE and crossgradient
Database	RCRA NonGen / NLR
Comments	This property was listed on the RCRA NonGen/NLR database for handling but not generating hazardous waste in 2019. This is not considered a REC.

Site Name	SAICH WAY STATION, LLC
Site Address	20803 STEVENS CREEK BLVD
Distance from Site	Adjacent
Direction from Site	SSE and crossgradient
Database	HWTS, HAZNET
Comments	This property was listed on the HAZNET and HWTS databases for disposing of 0.8-tons of asbestos containing waste in a landfill in 2014. These database listings are not considered a REC.

Site Name	UNOCAL STATION #7000, CONOCOPHILLIPS
Site Address	20755 STEVENS CREEK BLVD
Distance from Site	126 feet
Direction from Site	ESE and crossgradient
Database	LUST, SWEEPS UST, HIST CORTESE, HIST UST
Comments	This facility was listed on the LUST database for a gasoline leak that potentially contaminated the nearby drinking water aquifer. The case was opened in June 2003 and after remediation and cleanup activities were completed to the satisfaction of the regulatory agency, the case was closed in December 2006. The facility was also listed on the SWEEPS UST, HIST CORTESE, and HIST UST databases for having several USTs containing gasoline and motor vehicle fuel. The earliest tanks were installed in 1988. Based on the crossgradient direction of this facility to the site and the case closure, this facility is not considered a REC..

Site Name	ANDERSON CHEVROLET DEALERSHIP
Site Address	20955 STEVENS CREEK BLVD
Distance from Site	221 feet
Direction from Site	WSW and upgradient
Database	LUST, CORTESE, HIST LUST SANTA CLARA, SWEEPS UST, CERS, ENVIROSTOR, HIST CORTESE
Comments	This property was listed on the LUST, CERS, CORTESE, HIST CORTESE, and HIST LUST SANTA CLARA databases for a waste/motor/hydraulic/lubricating oil leak potentially contaminating the soil. The case was opened in May 1998 and after remediation and cleanup activities were completed to the satisfaction of the regulatory agency, the case was closed in July 1998. This property was listed on the SWEEPS UST database for having a waste oil tank installed on the property in February 1988. Based on the case closure, this facility is not considered a REC. This property was listed on the ENVIROSTOR database because in the course of removing several hydraulic lifts, the soil surrounding the lifts was found to be contaminated with total petroleum hydrocarbons (TPH) as motor oil. Approximately 560-cubic yards of soil were removed from the facility between March and June 2006. The ENVIROSTOR case remains open as the last update to the case indicated that "the planned involvement by the County of Santa Clara is to oversee the remedial and sampling activities as requested by the responsible party." Due to the age of the case and the media affected (soil), this is not considered a REC to the site.

5.2. Additional Environmental Record Sources

To enhance and supplement the standard environmental record sources identified in Section 5.1, additional local and/or federal, state, or tribal records shall be checked when, in the judgement of the EP, such additional records (1) are reasonably ascertainable, (2) and sufficiently useful, accurate, and complete in light of the objective of the records review. Examples of additional record sources include department of health/environmental division, fire department, planning/building department, or local/regional water quality agencies. Ninyo & Moore contacted the following additional record sources:

- Santa Clara County Department of Environmental Health (SCCDEH)
- Santa Clara Valley Water District (SCVWD)
- California Regional Water Quality Control Board (RWQCB)
- California Department of Toxic Substances Control (DTSC)
- State of California, Geologic Energy Management Division (CalGEM)

Descriptions of these agencies are provided in Sections 5.2.1 through 5.2.3 below.

5.2.1. State/County Environmental Record Sources

The SCCDEH was contacted regarding hazardous materials or hazardous wastes records associated with the site addresses. Files or records were not available for the site address. Copies of the file review requests are included in Appendix D. The RWQCB and DTSC had no records on file for the site.

5.2.2. Local Record Sources

The SCVWD was contacted regarding hazardous materials or hazardous wastes records associated with the site addresses. The SCVWD responded in an email that hazardous records and oversight had been transferred to the Santa Clara County Department of Environmental Health in 2004, and therefore the SCVWD had no records pertaining to the site addresses.

5.2.3. Gas & Oil Maps

According to the CalGEM Online Mapping System, the site does not lie within the administrative boundaries of an oil field and no oil or gas wells are located on the site.

5.3. Historical Use Information

Ninyo & Moore conducted a historical record search for the site. This included a review of one or more of the following resources that were found to be both reasonably ascertainable and useful for the purposes of this ESA: historical aerial photographs, historical fire insurance maps, historical topographic maps, land use records, and interviews with property representatives. Although one or more of the sources listed above provided limited information regarding the historical use of the site, the information gathered from the sources reviewed as a whole is adequate to develop a history of the previous uses of the site and the surrounding area in accordance with Section 8.3 of ASTM E1527-13. The following sections summarize information obtained from the historical sources utilized for this assessment. The following table provides a list of historical sources reviewed for this ESA. Copies of historical research documentation, such as fire insurance maps, historical aerial photographs, and topographic maps, are provided in Appendix E.

Historical Use Information		
Data Type	**Year(s)**	**Data Limitations**
EDR Sanborn Map Search/Print (Inquiry Number 6110033.3S) Ship Date: July 02nd, 2020		Map coverage not available.
EDR Aerial Photo Decade Package (Inquiry Number 6110033.8S) Ship Date: July 02nd, 2020	1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1991, 1998, 2006, 2009, 2012, 2016	None
EDR City Directory Abstract (Inquiry Number 6110033.5S) Ship Date: July 06th, 2020	1968, 1971, 1976, 1981, 1985, 1992, 1995, 2000, 2005, 2010, 2014, 2017	None
EDR Historical Topo Map (Inquiry Number 6110033.4S) Ship Date: July 02nd, 2020	1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, 2012	None

5.3.1. Sanborn Fire Insurance Maps

Ninyo & Moore requested historic fire insurance rate maps (Sanborn Maps) of the site through EDR. Sanborn Map coverage was not available for the site and surrounding areas. A copy of the Sanborn Map Report is included in Appendix E.

5.3.2. Historical Aerial Photographs

Ninyo & Moore reviewed historical aerial photographs of the site provided by EDR. A listing of the photographs reviewed is presented in the following table. Copies of the historical aerial photographs are provided in Appendix E.

Summary of Aerial Photographs			
Year(s)	**Source**	**Site Comments**	**Adjoining Area Comments**
1939	EDR	The site was noted to be developed with orchards with two farm buildings on the southern portion of the site.	The areas surrounding the site were noted to be developed with orchards and scattered farm buildings. A road was noted to the south of the site.
1948	EDR	No significant changes noted.	An additional farm building was noted adjacent to the east of the site.
1950	EDR	No significant changes noted.	No significant changes noted.
1956	EDR	No significant changes noted.	Residential development was noted to the northwest and southeast of the site, and the road to the south of the site was noted to be expanded.
1963	EDR	No significant changes noted.	The orchards and farm buildings to the east, south, and west of the site were noted to be removed and replaced by commercial buildings and parking lots. Additional residential development was noted to the northeast and south of the site. Vacant areas were noted to the west and southeast of the site. A road was noted to the east of the site.
1968	EDR	No significant changes noted.	The orchard to the north of the site was noted to be removed and the land became vacant. Additional commercial development was noted to the west and south east of the site. The road to the south of the site was noted to be expanded. Several of the farm buildings adjacent to the east site were removed and a new farm building was noted adjacent to the east of the site.
1974	EDR	The farm buildings and orchards were noted to be removed and replaced with ten commercial buildings and parking lots.	The farm buildings and orchards adjacent to the east of the site were noted to be replaced by three commercial buildings. Additional commercial development was noted to the west, south, and south east of the site. The area of the north of the site was noted to be residential development. A road was noted to the north of the site.
1982	EDR	A new commercial building was noted in the southwest corner of the site.	Additional commercial development was noted to the east of the site.
1991	EDR	Two new commercial buildings were noted on the northern and central portions of the site.	No significant changes noted.
1998	EDR	No significant changes noted.	No significant changes noted.
2006	EDR	A commercial building on the southern portion of the site was removed and replaced with a newer commercial building.	Several commercial buildings to the west of the site were noted to be removed. A commercial building adjacent to the east of the site was replaced by a newer commercial building.
2009	EDR	No significant changes noted.	A commercial building and parking lot were noted to the west of the site.
2012	EDR	No significant changes noted.	No significant changes noted.

Year(s)	Source	Site Comments	Adjoining Area Comments
2016	EDR	No significant changes noted.	Two of the commercial buildings adjacent to the east of the site were noted to be removed and replaced with newer commercial buildings.

5.3.3. City Directories

Ninyo & Moore reviewed historical city directory listings for the site addresses to evaluate facilities of potential concern, which may have been historically located on the site. A summary of notable city directory listings is presented in the following table, and the EDR City Directory abstract is provided in Appendix E.

Summary of City Directory Listings	
Year(s)	**Notable Listings in Address Range of Site**
1968	20807 Stevens Creek Blvd: address not listed 20813 Stevens Creek Blvd: address not listed 20823 Stevens Creek Blvd: address not listed 20833 Stevens Creek Blvd: address not listed 20863 Stevens Creek Blvd: address not listed 20883 Stevens Creek Blvd: address not listed

5.3.4. Historical Topographic Maps

Ninyo & Moore reviewed historical topographic maps of the site provided by EDR. A listing of the maps reviewed is presented in the following table. Copies of the historical topographic maps are provided in Appendix E.

Summary of Topographic Maps		
Year(s)	**Quadrangle**	**Site Comments**
1897	Palo Alto	Three buildings were mapped on the southern portion of the site. A road was mapped to the south of the site.
1899	Palo Alto	No significant changes noted.
1902	Santa Cruz	No significant changes noted.
1943	Palo Alto	No significant changes noted.
1947	Palo Alto	An additional building was mapped on the southern portion of the site.
1948	Palo Alto	No significant changes noted.
1953	Cupertino	Only one building was mapped on the southern portion of the site.
1961	Cupertino	No significant changes noted.
1968	Cupertino	No significant changes noted.
1973	Cupertino	No significant changes noted.
1980	Cupertino	A driveway was mapped on the middle of the site. The site was no longer mapped as orchards.
1995	Cupertino	The site was mapped as urban land. No buildings were mapped on the site.
2012	Cupertino	No site features were depicted on the 2012 topographic map.

5.3.5. Title Records

A historical chain-of-title report was not requested by the Client for review by Ninyo & Moore during the completion of this report.

5.3.6. Recorded Environmental Liens and AULs

An environmental lien search report was not requested by the Client for review by Ninyo & Moore during the completion of this report.

5.3.7. Previous Investigations

Ninyo & Moore was provided a copy of a prior report completed for the site. The report is summarized below and a copy of the report is included in Appendix D.

Summary of Previous Investigations		
Report Name	**Year(s)**	**Findings**
Phase 1 Environmental Site Assessment Stevens Creek Office Center June 27, 2014 EMG	2014	EMG performed a Phase I Environmental Site Assessment on June 16, 2014. According to EMG, the Project (EMG's reference to the site) was located at 20813-20883 Stevens Creek Boulevard in Cupertino, California 95014, and consisted of approximately 6.35 acres originally constructed between 1973 and 1985 as a commercial office facility. Prior to the current use, the Project was developed for agricultural and residential use. According to EMG, no evidence of environmental impacts was associated with the Project. EMG observed no environmental concern associated with the operational activities at the Project. Diesel fuel was reportedly used in a backup generator. The Project generated non-hazardous solid and liquid wastes. EMG identified utility-owned electrical transformer equipment at the Project. This equipment appeared to be in good condition with no evidence of leaks at that time. The transformers were designated as the property of PG&E and were not classified with regards to their polychlorinated biphenyl (PCB) content. EMG noted that PG&E was the financially responsible party for maintenance of this equipment. The Project contained hydraulic elevator equipment. No indication of leakage was observed in the area of this equipment. EMG indicated that this equipment should be periodically inspected for leakage, and if leakage was identified, the unit should be repaired, and any fluid or fluid-soaked waste disposed of in accordance with applicable federal, state, and local regulations. Suspect non-friable ACM in the form of roofing materials, vinyl floor tile, wallboard/joint com-pound, stucco, and various mastics identified as part of the assessment were not sampled. EMG noted that these materials were reportedly in good condition and recommended that they be maintained under an Operations and Maintenance (O&M) Program. According to EMG, considering the date of construction (1973, 1981 and 1985), there was a potential that the paint at the Project was lead-based. However, the painted surfaces were observed to be in generally good condition, and the Project was not a residential use. EMG did not collect samples and no further action or investigation was recommended regarding suspected LBP at the Project. No evidence of underground storage tanks or pipelines was identified. A 150-gallon diesel fuel belly tank was associated with one of the diesel emergency generators. There was no visual indication of releases from the tank and it appeared to be operated in accordance with current regulatory requirements.

Report Name	Year(s)	Findings
		EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. EMG did not note obvious visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Project. Based on review of the regulatory database report, the Project was listed on the HAZNET and ENF databases; however, none of these listings were noted to be of significant environmental concern according to EMG. Based on review of the regulatory database report, none of the off-site facilities represented a REC. EMG identified no current adjacent property uses that represented a REC. The only recommendation given by EMG was to develop and implement an Asbestos O&M plan.
Asbestos Abatement 20863 Stevens Creek Boulevard, 1st Floor February 3, 2017 Synergy Enterprises Inc.	2017	In February 2017 Synergy Enterprises Inc. conducted an asbestos abatement on the bathroom of the 1st floor of 20863 Stevens Creek Boulevard. The asbestos abatement report is included in Appendix D.
Asbestos Operations & Maintenance Plan Stevens Creek Office Center September 15, 2014 EMG	2014	EMG created an Asbestos O&M Plan for the Stevens Creek Office Center in September 2014. This plan was created in response to the recommendation from the June 2014 Phase 1 ESA completed by EMG, which stated that; due to the age of the site buildings and the likelihood of asbestos containing material, an Asbestos O&M Plan was recommended. The O&M program was designed to minimize the potential release of asbestos fibers during general work activities, scheduled maintenance and renovation of the building. The Asbestos O&M Plan is included in Appendix D.

5.4. Adjoining Property Use Information

Adjoining properties were described in Section 2.3. Based on our site visit and review of agency files, none of the adjoining properties are considered to have impacted the site at this time.

6. PRELIMINARY VAPOR ENCROACHMENT SCREENING

An assessment of vapor intrusion per ASTM E2600-15 was beyond the scope of the requested investigation

7. INTERVIEWS

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential environmental concerns in connection with the site.

7.1. Owner or Key Site Manager

Ms. Aileen Phanmaha with Harvest Properties (property management company) was interviewed during the site reconnaissance. According to Ms. Phanmaha, the site buildings were constructed throughout the 1970s, 1980s, and 1990s, with one building being demolished and replaced in the 2000s. Ms. Phanmaha was not aware of any hazardous materials incidents, spills, leaks or violations related to the site.

7.2. Past Owners

Past ownership entities were not made available to Ninyo & Moore during the preparation of this report. Therefore, interviews with past site owners was not conducted.

7.3. Environmental Regulatory Agency Inquiries

Ninyo & Moore submitted Public Records Requests for the site address to County, State and Local environmental regulatory agencies. The following sections describe the agencies contacted and whether or not representatives from the agencies were interviewed.

7.3.1. State/County Environmental Agencies

According to the SCCDEH, files and/or records of hazardous materials, hazardous wastes, USTs, ASTs were not available for the site.

Ninyo & Moore reviewed the California Department of Toxic Substances Control (DTSC) EnviroStor website for hazardous substances or hazardous materials files for the site addressed. No records were available for the site addresses. Based on this information, interviews were not conducted with DTSC representatives.

Ninyo & Moore reviewed the Regional Water Quality Control Board (RWQCB) Geotracker website for hazardous substances or hazardous materials files for the site addressed. No records were available for the site addresses. Based on this information, interviews were not conducted with RWQCB representatives.

7.3.2. Local Environmental Agencies

Local regulatory agencies were contacted during the preparation of this report.

According to the SCVWD, no files were available for the site addresses and therefore no interviews were conducted with agency representatives.

8. ASTM NON-SCOPE CONSIDERATIONS

The following non-scope considerations were addressed as part of this report:

Mold:

No evidence of microbial growth was observed within the buildings at the time of the site reconnaissance.

Asbestos Containing Materials (ACM)/Lead-Based Paint (LBP):

Based on the condition of existing interior finishes, Ninyo & Moore did not identify areas of damaged friable, damaged nonfriable, or other large quantity suspect ACMs, and no suspect lead-based paint was noted, and therefore, samples were not collected for laboratory analysis.

Radon:

Radon is a naturally occurring colorless, odorless, tasteless radioactive gas resulting from the natural decay of uranium- and thorium-bearing minerals in rocks and soil. The USEPA Action Level for radon gas is 4.0 pico curies per liter of air (pCi/l). Review of the USEPA's Radon Map indicated that the site is located in Zone 2, areas with predicted average indoor radon screening levels between 2 and 4 pCi/L. According to information presented in the EDR Radius Map report, the average reported radon level for the site's zip code is 0.267 pCi/L.

Wetlands:
Based on our review of the EDR Report, there are no mapped wetlands on the site.

9. FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

The following findings, opinions, conclusions and recommendations are provided.

9.1. Findings

- Historical research revealed that the site was developed in the early 1900s as an orchard with a few farm buildings located on the southern portion of the property. In the early 1970s, the orchard and the farm buildings were removed and several commercial buildings (Buildings 100 through 500 at 20863, and Buildings 100 through 400 at 20823) were constructed. An additional commercial building (20883) was added to the site in the 1980s, and two buildings (20813 and 20833) in the 1990s. In 2005, a building on the southern portion of the site was removed and replaced with an approximate 7,100 sf commercial building (20807). The site currently consists of 13 commercial buildings and associated parking lots.
- On July 14, 2020, Mr.Luke Swickard of Ninyo & Moore conducted a site reconnaissance of the property. The reconnaissance involved a visual inspection of the site, and observations of adjoining properties. Ms. Aileen Phanmaha with Harvest Properties (property management company) escorted Mr. Swickard around the property during the site reconnaissance. At the time of the reconnaissance, the approximate 6.99-acre site consisted of the Stevens Creek Office Center. The site was arranged in two garden-style office clusters (Building 20863 and Buildings 20813, 20823, and 20833) with attractive inner courtyards and walking paths, and two stand-alone buildings (20807 and 20883). The site was improved with 12 one- and two-story commercial buildings totaling approximately 109,312 square-feet (sf) of net rentable sf, plus an approximate 1,032-sf shared fitness room. The approximate 7,100 sf retail building located at 20807 on the southern portion of the site was occupied by Panera Bread and a vacant unit. Three underground parking garages were also located on-site. A distinguished gateway served as the entrance from Steven Creek Boulevard, and there was also ingress/egress on Alves Drive that were connected the two by a private drive.
- Individual buildings housed a variety of tenants, with the largest tenant, Apple, Inc. occupying approximately 61,050 sf of space within buildings 20813, 20823, 20863, and

20883. A copy of the most recent rent roll, which was provided to Ninyo & Moore and details the remainder of the current site tenants, is included in Appendix D.

- In general, the observed tenant suites consisted of office space that included individual offices, break rooms, conference rooms, etc. Indications of hazardous materials usage were not observed. The suites occupied by Apple, Inc. were not visually inspected during the site visit due to access limitation imposed by Apple (no interior inspections or observations were allowed). In general, interior construction materials within the observed tenant spaces included a variety of carpeting, ceramic floor tiles, painted and textured walls, and ceilings. Interior finishes appeared to be in good condition. The interiors of Buildings 20883 and 20813 were undergoing tenant improvements at the time of the site reconnaissance. The exterior of the buildings consisted of asphalt parking areas.
- The areas surrounding the site consist primarily of retail/commercial buildings to the east (Happy Days Child Development Center, UBREAKIFIX, Site for Sore Eyes, H&R Block, The Coder School, Sizzling Lunch, Sleep Number, and T-Mobile), to the west by Whole Foods Market, to the south by Staples, Dish N' Dash, and the Union Church of Cupertino, and to the north by residential and commercial development (Northwest YMCA).
- Based on our site visit, there are currently no wells on the site.
- Ninyo & Moore did not observe quantities of hazardous substances or petroleum products used or stored on site during our site reconnaissance with the exception of a reportedly small amount (approximately 150-gallons) of diesel fuel contained within an integrated belly tank of one of the emergency backup generators located on the site.
- Indications of aboveground storage tanks (ASTs), underground storage tanks (USTs), or hazardous material spills or leaks, were not observed during the site reconnaissance.
- Review of an environmental database report obtained for this project indicated that the site is listed on several of the regulatory databases researched by Environmental Data Resources Inc. (EDR), including the CERS, FINDS, CIWQS, ENF, ECHO, FINDS, HWTS, HAZNET, and RCRA NonGen databases. The site was listed on the CERS, HWTS, HAZNET, and RCRA NonGen databases for previously having small quantities of hazardous wastes on-site. The site was also listed on the CIWQS database for having a minor storm water violation. Indications of releases, spills, or mitigation were not indicated on reviewed regulatory agency files. None of the agency database listings are indicative of a REC.
- Several off-site facilities were located within the EDR search radius from the site. None of the listed facilities are considered to be a REC to the site at this time based on several factors, including distance from the site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the site), database listing type, and/or affected media (soil only). Refer to Section 5.1.2 for additional information regarding potential off site facilities of concern.

9.2. Conclusions

Ninyo & Moore has performed this ESA in conformance with the scope and limitations of ASTM E1527-13 of the Stevens Creek Office Center property addressed as 20807, 20813, 20823, 20833, 20863, and 20883 Stevens Creek Boulevard in Cupertino, California. Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of RECs in connection with the site.

9.2.1. RECs

RECs were not identified during the preparation of this report.

9.2.2. CRECs

CRECs were not identified during the preparation of this report.

9.2.3. HRECs

HRECs were not identified during the preparation of this report.

9.2.4. De Minimis Conditions

De minimis conditions were not identified during the preparation of this report.

9.3. Recommendations

Based on the findings of this ESA, no further investigation is recommended at this time.

9.4. Limiting Conditions/Deviations

This report was prepared in accordance with ASTM E1527-13. No deviations from the standard occurred in this ESA. Based on the information gathered by Ninyo & Moore for the purposes of this ESA, it is Ninyo & Moore's opinion the data obtained from the site reconnaissance, records reviewed, and interviews conducted, is adequate to make a conclusion on the environmental condition of the site with respect to the existence or lack of RECs associated with the site.

10. ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Site Assessor

Randy L. Wheeler
Senior Geologist, CEM 2127

Senior Reviewer

RESUMES

LUKE I. SWICKARD

Staff Environmental Scientist

EDUCATION

B.S., Environmental Science and Management, 2017, University of California, Davis

EXPERIENCE HIGHLIGHTS

Phase I and II Environmental Site Assessments

Storm Water Pollution Prevention Plans (SWPPP)

Underground Telecommunication Vault Sampling

Hazardous waste handling, storage and facility auditing

PROFESSIONAL AFFILIATIONS

As a Staff Environmental Scientist, Mr. Swickard conducts Phase I Environmental Site Assessments and assists with the planning and implementation of Phase II soil, soil gas, and groundwater investigations. Past project types have included single-family residential developments, commercial facilities, city redevelopment areas, and large scale agricultural lands.

REPRESENTATIVE PROJECT EXPERIENCE

Former Richmond Hospital, Richmond, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of the former Richmond Hospital for potential redevelopment. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) on or adjacent to the site. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Floating Photovoltaic (PV) Solar Array, Windsor, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of a proposed floating PV solar array on an existing water treatment facility. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) adjacent to the site so that electrical infrastructure could be installed from the floating PV solar array to a collection system. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Multi-family Housing Project, Mountain View, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) on a multi-family housing complex to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for planned redevelopment of the property. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Agricultural land, Capay Valley, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) on an approximate 310-acre agricultural property that is utilized for cattle grazing and olive orchards. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for on-gong use of the property. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Randy L. Wheeler, CEM

Senior Geologist

EDUCATION

B.A., Geology, 1988, California State University, Sacramento

REGISTRATIONS/CERTIFICATIONS

Certified Environmental Manager #2127 (Nevada)

PROFESSIONAL AFFILIATIONS

Association of Environmental Professionals – Superior California Chapter

American Public Works Association (APWA)

As a Senior Geologist for Ninyo & Moore, Mr. Wheeler conducts Phase I Environmental Site Assessments (ESA) and assists with the planning and implementation of Phase II soil, soil gas, and groundwater investigations. Past project types have included single-family residential developments, large-scale commercial and industrial facilities, city redevelopment areas, and large scale agricultural lands. Mr. Wheeler has successfully authored winning proposals for US EPA Brownfield Assessment Grants, and wrote a Statement of Qualifications for the City of Sacramento that resulted in being selected as one of six consultants of choice for the City's Brownfield Assessment Grant projects.

EXPERIENCE

City of Stockton, Waterfront Brownfield Redevelopment, Stockton, California: Managed the Phase I ESA of a former industrial property for a local developer. The assessment identified several areas of potential contamination. The resulting follow up investigations are being managed by the City of Stockton under the direction of the California Regional Water Quality Control Board. Site assessment and remediation activities are being coordinated under U.S. Environmental Protection Agency grant funding.

City of West Sacramento, Brownfield Assessment Grant Study, West Sacramento, California: Managed and conducted assessments on over 290 parcels located in the City's central corridor, West Capitol Avenue, as part of the City's revitalization efforts of this area. The resulting Area Wide Assessment report has won the praise of both the Client and the US EPA for its format, content, and layout that documented the environmental conditions of these parcels. The City established as a priority updating the current land uses and perceived image of West Capitol Avenue from an outdated and outmoded highway commercial boulevard to a vibrant and modern central business district.

City of West Sacramento, Area-Wide Assessment, Washington District Redevelopment Area, West Sacramento, California: Project Manager for the implementation of the City of West Sacramento's Area Wide Assessment of the Washington District Redevelopment area in the northern part of West Sacramento. Responsible for implementing a US EPA Brownfield Assessment Grant, which included conducting an Area-Wide Assessment of approximately 83 individual parcels on 19 different residential and commercial neighborhood blocks located adjacent to the Sacramento River. The study included evaluating individual properties as well as entire neighborhood blocks for evidence of potential environmental conditions related to historical uses of the area dating back to the early 1900s when the area was referred to as Broderick. Results of the study were documented on block-specific property profile sheets which were used to select properties for additional study. The City of West Sacramento will utilize this information as part of their long-range redevelopment strategy for the area.

City of West Sacramento, West Capitol Avenue Community-Wide Assessment, West Sacramento, California: Project Manager for the implementation of the City of West Sacramento's Community Wide Assessment for West Capitol Avenue. Responsibilities included managing and implementing a US EPA Brownfield Assessment Grant, which included conducting a Community Wide Assessment of approximately 133 individual parcels within the study area. Services included compiling a list of street addresses provided by the City of West Sacramento, cross referencing the provided addresses with their respective Assessor's Parcel Number (APN), and the APN-listed property address for the respective parcel number, in order

to identify which parcels were within the "Study Area" boundary. The parcel inventory database was the basis for conducting the Community Wide Assessment. Based on the parcel inventory, Mr. Wheeler conducted the Community Wide Assessment and performed all site reconnaissance fieldwork, historical research, agency database research, and color photography of each parcel. Site-specific data, along with historical research information was compiled into various data tables. Specific sites were ranked according to redevelopment potential, degree of suspected contamination, and environmental condition.

Yolo County, Esparto Brownfield Redevelopment, Esparto, California: Project Manager for the completion of a Community Wide Assessment (CWA) of approximately 800-900 individual parcels located within the community of Esparto utilizing the same methodologies employed during the Area Wide Assessment of the East End of West Capital Avenue, and the Community Wide Assessment of the west end of West Capital Avenue in West Sacramento (discussed above), Mr. Wheeler compiled a parcel inventory of sites within the study area. The parcel inventory database was the basis for conducting the CWA. Based on the compiled parcel inventory, the study area was narrowed down to approximately 533 individual Yolo County parcels. Site reconnaissance information was documented on standardized forms, allowing for a consistent collection of site information and documentation of key site features. Information compiled through the CWA was used by Yolo County to prioritize site that required follow-up Phase II investigation activities.

Association of Bay Area Governments/City of Oakland, Phase II ESA, Oakland, California: Task Order Manager for a Phase II ESA at a multi-parcel Brownfield Site where the City of Oakland intends to redevelop vacant lots. Designed a grid-based soil sampling and analysis plan to determine if the soil was contaminated. Collected soil samples to evaluate the presence of metals, petroleum hydrocarbons, semi-volatile organic compounds, VOC and asbestos. Evaluated results against RWQCB Tier 1 ESL and background metals concentrations in California soils and prepared report for client. Classified soil and coordinated disposal as hazardous waste to appropriate landfill facility.

City of West Sacramento, 422-424 C Street, West Sacramento, California: Project Manager for the completion of a Phase I ESA/AAI Report (ESL) of the 422-424 C Street property for the City of West Sacramento Grants and Community Development Department. Results of the ESL report revealed the site was initially developed for use as residential property and then re-developed for use as an automobile service station sometime prior to 1950. The ESL also noted that four UST were removed from the site in 1987. Although the site is considered "closed" by Yolo County, no soil or groundwater samples were collected at the time the UST were removed. Given the historical use of the site as an automotive repair facility, a Phase II environmental site assessment was conducted to assess the soil and groundwater from beneath the removed UST, investigate two existing automobile lifts to assess if the soil beneath and around the lifts has been impacted by hydraulic fluid contamination, and, collect soil samples from beneath and around an oil/water separator to evaluate the presence of waste oil contamination. The Phase II sampling was conducted in accordance with an approved SAP. The results of the Phase II investigation indicated detectable levels of petroleum hydrocarbons, and metals below regulatory limits. Based on these findings, no further action was recommended.

Santa Clara Valley Water District (SCVWD), Linear Phase I Environmental Site Assessments, Santa Clara County, California: Ninyo & Moore provided environmental services as a subconsultant to Overland, Pacific & Cutler, Inc. on behalf of the SCVWD. As Senior Project Manager, provided project coordination and implementation, field reconnaissance oversight, report preparation and oversight, project invoicing and client interactions. The project consists of conducting Phase I ESA of approximately 140 properties along Upper Llagas Creek, which the SCVWD is proposed to purchase portions of for implementing flood protection measures.

Former Speckles Sugar Facility, Woodland, California: Project Manager for the completion of a Phase I Environmental Site Assessment of a former sugar processing facility. The investigation was conducted as part of a due diligence to identify environmental liabilities prior to purchasing the property. Planned redevelopment activities included reclaiming several acres of the waste lime fields and demolishing portions of the processing facility. Mr. Wheeler compiled a list of Recognized Environmental Conditions that warranted resolution or further assessment. Two of these issues related to the prior use, and questionable abandonment, of seven previous fuel underground storage tanks. A Phase II subsurface assessment of the former UST area was completed and identified residual petroleum hydrocarbon impacts to soil and groundwater. Further Phase II assessment activities of the former UST areas were completed. A No Further Action Report was submitted to the Regional Water Quality Control Board for closure.

Duane W. Blamer, PG

Principal Geologist

REGISTRATIONS/CERTIFICATIONS

PG 6913 (California)

40-Hour Hazwopper

PROFESSIONAL AFFILIATIONS

American Public Works Association

Construction Management Association of America

Groundwater Resources Association

National Ground Water Association

As Principal Geologist for Ninyo & Moore, Mr. Blamer's environmental consulting experience includes managing, coordinating and directing a wide variety of environmental projects comprising numerous property types. His experience includes soil and groundwater investigations of a wide range of contaminant types, remediation of soil and groundwater, site history research and data compilation, hazardous building materials services, and litigation support and expert witness. Mr. Blamer applies his expertise to properties ranging from residential development to complex, large facilities including operations such as chemical plants and refineries, and represents both public- and private-sector clients. He participates at all levels of project document development associated with environmental issues, and regularly participates in strategic development of large proposal efforts.

EXPERIENCE

Alameda County Public Works Agency On-Call Environmental Services Contract, Alameda County, California: Principal-In-Charge for several projects under ACPWA On-Call Environmental Services contract. The contract extended for four years ending in 2013 and included a wide range of Environmental and Geotechnical Services, including preparation of Phase I and Phase II Environmental Site Assessments (ESA), Remedial Action Plans (RAP), oversight of remediation activities, Hazardous Building Material Surveys (HBMS) and oversight of hazardous material abatement activities.

City of Oakland Public Works Agency, On-Call Environmental Services Contract, Oakland, California: Principal-In-Charge for a number of assignments under this contract. The scope of services for the contract includes conducting Phase I and Phase II Environmental Site Assessments (ESA), preparing Remedial Action Plans (RAP) and Soil Management Plans (SMP), providing underground storage tank (UST) compliance, and remediation oversight. Recently provided construction management for storm water drainage improvements for the City's maintenance yard that involves, subsurface environmental issues, as well as geotechnical evaluations, and civil and structural design.

City of San Pablo, Soil and Groundwater Investigation and Remediation Environmental Services, Rumrill Blvd., San Pablo, California: Technical Advisor for this contract, providing contract management, regulatory interaction and senior technical oversight. Project required initial negotiation of work scope with the California Department of Toxic Substances Control EPA Region 9 (DTSC) to complete a comprehensive investigation of the site, which is a 4-acre former bulk petroleum fuel storage facility. The site had previously been investigated and remediated over a number of years, but previous work was inadequate to meet regulatory requirements for site closure or to identify reasonable remedial alternatives. Ninyo & Moore completed additional assessment of the site and has recently submitted the draft Remedial Action Workplan (RAW) to DTSC. Subsequent to finalization of the RAW, Ninyo & Moore will provide remedial oversight during re-development of the site.

Oakland Unified School District, Various Environmental Services, Life Academy, Oakland, California: The project involved working with the Department of Toxic Substances Control EPA Region 9 (DTSC) in preparing a Preliminary Endangerment Assessment (PEA) for new school site development. The PEA demonstrated that there were no environmental concerns that would prohibit development as a sensitive receptor site. The DTSC reviewed and approved of the PEA. Site development was subsequently initiated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

APPLE INC	20605 LAZANEO DR.	NE 1/8 - 1/4 (0.231 mi.)	L91	237
EPA ID:: CAL000357833				

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within

approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 20 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 17 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Name: TARGET T0323
Violation Date: 12-27-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/26/2018. Janitorial staff generates small quantities of hazardous waste that per Target's internal policy should be containerized in an ESIM bin (with a proper hazardous waste label) located in the janitorial room. Observed hazardous wasste being in this room being stored in a small cardboard box without any hazardous waste markings.

Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-27-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility is a retail store. Hazardous waste is generated in the form of damaged, discarded, returned, or other non-saleable merchandise and is stored in an area of the warehouse designated ESIM (environmentally sensitive item management). At time of inspection the following hazardous waste was observed on-site: -State-regulated waste: 1 x small tote bin -Flammable Aerosol/Toxic: 1 x small tote bin -Corrosive Basic: 1 x small tote bin Non-saleable merchandise is collected from guest services and placed in a sort bin(s) in the ESIM area. Each day staff utilizes a "smart sort" system (scanner linked to an external database) to sort hazardous waste by hazard classification. Additionally, all waste items are placed in individual plastic bags to prevent spills. Ink cartridges are managed through a exchange program with Lexmark. A facilities manager performs minor changes-out of fluorescent tubes with all spent tubes [Truncated]

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	1865
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	355025
Site Name:	Staples the Office Superstore #1478
Violation Date:	10-30-2017
Citation:	40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description:	Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes:	Returned to compliance on 11/30/2017. Facility manager stated that the store is out of spill absorbent and need to get more.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	355025
Site Name:	Staples the Office Superstore #1478
Violation Date:	10-30-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 11/30/2017. Waste fluorescent bulbs, caulk, spackle, Swiffer cleaning solution, and other items that are not corrosive acids were observed in the incompletely labeled, corrosive acids tote. A review of the facility's hazardous waste management packet confirmed that this is not how these items are to be managed and employees are instructed on how to complete a hazardous waste

STAPLES THE OFFICE SUPERSTORE #1478 (Continued) **S121765140**

label. Based on the violations observed during this inspection, employees are not adequately trained to ensure proper hazardous waste handling.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 355025
Site Name: Staples the Office Superstore #1478
Violation Date: 10-30-2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 11/30/2017. Observed two of the three Gaylord boxes overflowing with universal waste-electronic devices, such as printers, TVs, and tablets. Observed printers balancing at such a steep angle that portions of the printers are overhanging the sides of the boxes. Observed three printers, a computer console, and an assortment of small universal waste-electronic devices in the "daily collection" area of the back room. Two printers, the computer console, and the small devices are stacked on top of each other and are not contained in a manner that will prevent breakage.
Violation Division: Santa Clara County Environmental Health

Violation Date:	04-18-2016
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 07/27/2016. Mr. Woo stated that cleaning products have been damaged during transport (e.g. a lid breaking on a cleaning product rendering it un-saleable), and the products were bagged and managed as hazardous waste, but at the time of inspection,

STAPLES THE OFFICE SUPERSTORE #1478 (Continued) **S121765140**

all hazardous waste containers were empty and no manifests have been retained by the facility. A review of the stateG s Hazardous Waste Tracking System indicated that, with the exception of Manifest #008517709FLE (Ship Date: 7/23/2015 - containing broken light bulbs, consumer electronics, and batteries), no hazardous waste pick-ups are known to have occurred. Provide documentation to the inspector in regards to the hazardous waste determination that was made for the products broken in transport and broken on the retail floor, as well as the manner in which they were disposed. Additionally, provide documentation as to how future hazardous waste determinations will be made for un-saleable products and how the facility will ensure that the [Truncated]

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 355025
Site Name: Staples the Office Superstore #1478
Violation Date: 10-30-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/30/2017. Observed one container marked only as "hazardous waste" and "corrosive acids" accumulating hazardous waste at the time of inspection without any other required markings. Observed a number of wastes in the corrosive acids bin that are not accurately represented by the hazardous property "corrosive acids," including: light bulbs, spackle, caulk, and Swiffer aqueous cleaning solution. Ensure that hazardous wastes are properly identified, segregated, and that container labels accurately reflect container contents.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 355025
Site Name: Staples the Office Superstore #1478
Violation Date: 04-18-2016
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post, next to the telephone, Emergency Information (SQG) containing the location of emergency equipment, contact names and numbers.
Violation Notes: Returned to compliance on 07/27/2016. Emergency information, pursuant to the requirements listed below, is not posted at the facility. An Emergency Information template will be provided with this inspection report.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection

STAPLES THE OFFICE SUPERSTORE #1478 (Continued) **S121765140**

Eval Date: 10-30-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Unresolved Issues that Require Follow-Up: 1) Facility manager stated that employee training for hazardous waste and universal waste handling is done annually on the computer, but manager could not provide access to these training records at the time of inspection. Within 30 days, provide a copy of the universal waste training record for the store manager to HMCD for review [22CCR 66273.36]. 2) No hazardous waste manifests or universal waste shipping documents were available at the time of inspection. Ms. Andrade stated that the transporter does not provide her with a copy of the bill of lading/shipping document when the universal waste-electronic devices are picked up every other week. Provide a copy of all Uniform Hazardous Waste Manifests and universal waste off-site shipment documents for the past three years to HMCD for review [22CCR 66273.39] 3) DTSC has notified HMCD that Staples has submitted notification regarding universal waste acceptance activities. [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-18-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection with General Manager, Leo Woo. The facility is a retail store that specializes in office supplies, consumer electronics, and cleaning/housekeeping products. Retail products that meet hazardous waste criteria if they were to become wastes that were observed on the retail floor include, but are not limited to detergents, soaps, glass cleaners, bleach, carpet cleaners, plumbing cleaners, and office products. Mr. Woo stated that hazardous waste is generated when products are damaged on the retail store or in-transport. Hazardous waste determinations are based on employee knowledge of the product and a posted hazardous waste containment guide product is found. The facility utilizes a "tote system" for hazardous waste management. Plastic, Strong Pac bags are used to collect all items that require disposal as hazardous waste. Leaking, liquid products are double-bagged. Employees have been instructed to write the name [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description:	Hazardous Waste Generator

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-19-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Facility uses non- saturated cavicide wipes for surface disinfecting and an enzymatic cleaner for their ultrasonic bath. Facility uses steam autoclave to sterilize non-disposable tools and does not use cold sterile solutions. No chemicals are used for tartar and stain removal or for cleaning impression trays (hand scrub only). Ultrasonic baths use enzymatic tablets that have been determined to be non-hazardous by generator (at the time of inspection, ultrasonic bath has a pH of 7 according to inspector's pH strips). Facility does not do any tooth whitening. Non-empty carpules of lidocaine are disposed of in accordance with medical waste management regulations. Facility does not dispense pharmaceuticals and all first aid kits are exchanged before expiration with HealthFirst. Scrap amalgam is collected in a labeled container which is picked up by stericycle (receipts reviewed). Chair traps and separator waste are mailed back annually to Metasys (receipts reviewed). [Truncated]

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-03-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. Facility is a retail store that generates hazardous waste in the form of non-saleable (returned, damaged, expired/off-spec) merchandise such as cleaning products, fragrances, cosmetics, and toiletries. Performed a facility walk-through and observed the following hazardous waste in the rear stockroom: -Corrosives Bases: 1 x small plastic bin -Aerosol/Flammables: 3 x small plastic bins -Toxics: 1 x large plastic bin NOTES: -Facility is a combined TJ Maxx and Homegoods store. -All potential hazardous waste is staged in the storefront and then taken to the stockroom by a manager where it is then sorted. All items are bagged and then placed in the appropriate hazardous waste bin. -CAL000382939 is active. -Fire extinguishers were observed as maintained. -Spill control was available. -Emergency posting was

TJ MAXX 0628 (Continued) **S118233009**

observed. -Inspections are being conducted at least weekly. -Training is provided via an online [Truncated]

CERS HAZ WASTE:
Name: BEN SHYY PHD DDS
Address: 10118 BANDLEY DR F
City,State,Zip: CUPERTINO, CA 95014
Site ID: 98151
CERS ID: 10343860
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-19-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility uses birex spray and non-saturated wipes for disinfecting floors and counters. Tools are sterilized with steam autoclave and facility does not use cold sterile solutions. Ultrasonic cleaner uses non-hazardous enzymatic tablets. Facility does not use tartar and stain removers for dentures, and uses only disposable impression trays. All whitening trays come preprepared and are used completely during the treatment. Lidocaine and expired albuterol are disposed of in accordance with medical waste management regulations. Facility does not dispense pharmaceuticals and does not keep an EpiPen in first aid

BEN SHYY PHD DDS (Continued) **S112345420**

kits. Amalgam scrap, chair traps, and separator waste is mailed back to metasys (receipts reviewed). X-ray developer, fixer, and lead foil is disposed of with stericycle (receipts reviewed). At the time of inspection, facility had no hazardous waste on hand. Fire extinguishers are annually serviced, spill kit is adequate, and emergency posting is up-to-date.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
TSCA SUBMITTER
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CERS ID: 10349035
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 6247
Site Name: APPLE-LAZANEO
Violation Date: 06-06-2019
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,- evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: Returned to compliance on 06/20/2019. Contingency plan uploaded to CERS is a boiler plate plan that is not specific enough to be used as a contingency plan for this location. If facility continues to use this boiler plate, at a minimum, ensure that plan refers to the emergency response equipment located on-site. Current plan only refers to emergency response equipment located at the Infinite Loop buildings. Plan does not currently list an address for emergency coordinators.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-02-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Occupancy ID: 3156
Eval Division: Santa Clara County Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-06-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection commenced on 6/3/19 and concluded today. Facility is a product realization lab that generates wastes related to 3D printing, machining, and painting. Facility used to generate more RCRA waste (coolant contaminated with lead from machining brass), but significantly reduced their waste by designating all brass and copper cutting to be done on one specific CNC. Currently, facility is generating and average of 130 kg of RCRA waste per month, and approximately 1753 kg per month of all wastes. Facility generates most of this waste from periodic (3-5x/year) clean-outs of coolant containing machines that exceed 1000 kgs per shipment. Facility is a California LQG and RCRA small quantity generator. Inspection included walk-through of the following areas: PR cleanup room and adjoining

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:

Name:	SPROUTS FARMERS MARKET #287
Address:	20558 STEVENS CREEK BLVD
City,State,Zip:	CUPERTINO, CA 95014
Site ID:	416631
CERS ID:	10593064
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	416631
Site Name:	Sprouts Farmers Market #287
Violation Date:	03-12-2018
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 04/24/2018. Based upon the observations today, facility personnel requires additional hazardous waste training on identifying and properly managing non-saleable merchandise that meets hazardous waste criteria (such as non-saleable vitamins, herbal extracts, and other dietary supplements).
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	416631
Site Name:	Sprouts Farmers Market #287

SPROUTS FARMERS MARKET #287 (Continued) **S121779638**

Violation Date:	03-12-2018
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 04/24/2018. Facility generates hazardous waste in the form of non-saleable (returned, expired, or damaged) vitamins, herbal extracts, and other dietary supplements. At time of inspection, the hazardous waste container that would typically be used for this wastestream (labeled "hazardous waste toxics/state-regulated waste") was empty. Additionally, a review of the one hazardous waste manifest stored on-site showed no non-RCRA ("state-regulated") hazardous waste had been disposed of. Based upon these observations it cannot be determined how this store is managing non-saleable vitamins, herbal extracts, and other dietary supplements. Within 30 days make a hazardous waste determination on non-saleable vitamins, herbal extracts, and other dietary supplements sold by this store. If found to meet hazardous waste criteria, ensure that they are managed as fully-regulated hazardous waste. Provide documentation to our agency of your findings.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-12-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. Facility is a grocery store that generates hazardous waste in the form of non-saleable (returned, expired, or damaged) merchandise. Observed the following hazardous waste containers at time of inspection: -Hazardous waste corrosive acidic: 1 x small plastic tote bin (contained 1 x aerosol) -Hazardous waste oxidizers: 1 x small plastic tote bin (empty at time of inspection) -Hazardous waste aerosol, flammable, combustibles: 1 x small plastic tote bin (empty at time of inspection) -Hazardous waste toxic & state-regulated wastes: 1 x small plastic tote bin (empty at time of inspection) -Universal Waste: 1 x small plastic tote bin (empty however1 x battery pack was observed on top of the bin) NOTES: -CAL000423000 is active. -Fire Extinguishers were observed as maintained. -Spill control is available. -Emergency posting is maintained in manager’s office. -Weekly inspections are performed by [Truncated]

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S2W13F02f
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Four 10,000-gallon fuel tanks were removed from the site on May 15, 1998, during a system upgrade. Tested soil samples from around the UST cluster and dispensers documented that some fuel release(s) had occurred, but the reported concentrations were relatively low. An initial deep boring (B-1) was advanced on the south side of the UST area (see Figure 2) in July 1998 and found detectable fuel impacts to soils (higher than the initial tests) to a depth of 75 feet. Construction of the sites first groundwater monitoring well (MW-1) in July 1999 involved sampling and testing of even deeper soil (to 100 feet below grade) along with the encountered groundwater. Over the next two years (2000-2001) another deep exploration boring (EB-1) was advanced, two additional groundwater monitoring were installed (MW-2 and MW-3), MW-1 was deepened/reconstructed as MW-1R, and three vadose-zone wells (VW-1 through VW-3) were installed. The soil analyses from these holes only documented noteworthy fuel impacts at MW-3. On-site groundwater monitoring wells MW-4 and MW-5 were installed in May 2004; neither location exhibits significant impacts. After repeated being denied access to the adjoining property to the north, the first off-site well, MW-6, was installed in July 2007 over 200 feet north of the site, at the corner of De Anza Blvd. and Lazaneo Drive. In February, 2008, two additional off-site wells were

CUPERTINO CLEAN SCENE (Continued) **S101594681**

installed in North De Anza Boulevard on an apparent migration path from the fuel source area through MW-3. Soil and groundwater samples from all three off-site wells showed no apparent impact from fuel-related compounds. Since 2001, groundwater sounding and sample testing have occurred at least twice a year, and usually quarterly. The cumulative data on groundwater level measurements and analyses (through March 2008) are presented in tables in Appendices A and B, respectively. The impacts are a combination of traditional BTEX plus lesser concentrations of oxygenates, mostly TBA. Site remediation activities to date have included removal of shallow soils around the old tanks and dispensers in 1998 and a five-day soil vapor extraction (SVE) test from MW-3 in 2003. Periodic soil vapor extraction began in July 2008. Groundwater elevation has fallen prior to June 2008 and the wells remain dry.

Address: 21250 STEVENS CREEK BOULEVARD
City,State,Zip: CUPERTINO, CA 95014-5793
Region: STATE
Facility Status: **Completed - Case Closed**
Status Date: 02/17/2012
Global Id: T10000003253
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 07S2W14J02s
Latitude: 37.3209258708192
Longitude: -122.046689987183
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil
Potential Contaminants of Concern: Polychlorinated biphenyls (PCBs), DDD / DDE / DDT, Arsenic, Other Metal
Site History: Soil sampling was conducted in association with planned construction

SUNKEN GARDENS PROJECT (Continued) **S103641740**

activities on campus. Arsenic, Vanadium, DDT, and PCBs were reported to be present. They have proposed to excavate and remove the impacted soil.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/08/2014. The following containers were not properly labeled: Biology- 1 unlabeled container of 2- propaniol was unlabeled. (Violation corrected during the inspection.) Auto Technology - 8 x unlabeled used oil drain containers under the 8 transmission tables. 1 x 16 gallon unlabeled Peterson rinse booth waste drum. Woodshop (A-72 workshop) 1 x 5 gallon red can of paint thinner did not have the physical state and the hazardous property marked on the container label. (Violation was corrected during the inspection.)

Violation Description:	Tiered Permitting - Administration/Documentation - General
Violation Notes:	Returned to compliance on 07/20/2018. Violation Text: Facility failed to submit all required information in CERS with submittal of Conditional Exemption onsite treatment notification. Violation Comments: In the CERS Treatment Unit Identification & Details section, add language to the "Specific Waste Type Treated (Narrative)" field that includes wastewater from the pressure washing of engines. Corrective Text: Submit, via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities and a complete Conditional Exemption submittal element. Indicate "YES" to business activities questions asking "Does your facility treat hazardous waste onsite?" and NO to the question "Is your facility's treatment subject to financial assurance requirements?". Ensure that all components of the onsite treatment module are addressed prior to submittal, specifically those items noted below. [HSC 25201.5(d)(7)]

Eval Notes:	A site inspection occurred on March 3, 2014, paperwork occurred on 3/6/2014, and inspection concluded today. Facility has a NOVACHEM Wastewater Batch Treatment System for floor mop water that has a trace amount of metals created from the occasional steam-cleaning of auto parts. Facility operates an oil water separator using flocculants and demulsifiers and gravity separation of solids from non-hazardous liquids that are discharged to a POTW. Facility is properly permitted under the CESW tier. Business Activities Form, Business Owner/Operator Page, Tiered Permitting Facility form, Tiered Permitting: Unit CESW forms have been electronically submitted in CERS account 10199950 and are proper. The following documents were reviewed and were proper: Written Operating Instructions; Inspection log; Record of dates, amounts, and types of wastes treated; San Jose/ Santa Clara WPCP Self Monitoring Report dated 6/21/2013; SJ/SC WPCP Wastewater Discharge permit # CU-033B [Truncated]

Eval Notes: A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. EPA ID number CAD982029837 is "ACTIVE" on the CA State Hazardous Waste Tracking System. Facility is a Non-RCRA large quantity generator with central 90-day storage area located in the plant corporation yard. All other waste accumulation areas at the school are satellite accumulation areas which transfer all hazardous wastes and universal wastes to the central 90-day storage area. All central and satellite accumulation areas are inspected and documented by employees on a weekly basis. The following universal waste and hazardous waste satellite accumulation areas were inspected: Ceramics, Painting, Photography, Kiln Yard & Welding, Sculpture, Woodworking, Mechanic Shop, Microbiology, Med Tech Lab, Manufacturing & Design Technology, Flint Center, Automotive Technology, Biology, and Chemistry. The central 90-day storage [Truncated]

Eval Notes: A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. Tiered Permitting information was last electronically submitted on CERS on 6/18/2018. Unit treats hazardous waste that is not a federal hazardous waste, that discharges effluent to a POTW that operates under a NPDES permit, with residual solids managed as a hazardous waste. Facility keeps an treatment log that records the dates, amounts, and type of waste treated. Treatment system written operating instructions log was reviewed. Facility operates under under permit # CU-033B that expires on 12/15/2018 issued by the SJ/SC Water Pollution Control Plant.

Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the

DE ANZA COLLEGE (Continued) **U001600984**

generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/08/2014. The following containers were not properly labeled: Biology- 1 unlabeled container of 2- propaniol was unlabeled. (Violation corrected during the inspection.) Auto Technology - 8 x unlabeled used oil drain containers under the 8 transmission tables. 1 x 16 gallon unlabeled Peterson rinse booth waste drum. Woodshop (A-72 workshop) 1 x 5 gallon red can of paint thinner did not have the physical state and the hazardous property marked on the container label. (Violation was corrected during the inspection.)

Violation Description: Tiered Permitting - Administration/Documentation - General
Violation Notes: Returned to compliance on 07/20/2018. Violation Text: Facility failed to submit all required information in CERS with submittal of Conditional Exemption onsite treatment notification. Violation Comments: In the CERS Treatment Unit Identification & Details section, add language to the "Specific Waste Type Treated (Narrative)" field that includes wastewater from the pressure washing of engines. Corrective Text: Submit, via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities and a complete Conditional Exemption submittal element. Indicate "YES" to business activities questions asking "Does your facility treat hazardous waste onsite?" and NO to the question "Is your facility's treatment subject to financial assurance requirements?". Ensure that all components of the onsite treatment module are addressed prior to submittal, specifically those items noted below. [HSC 25201.5(d)(7)]

Eval Notes:	A site inspection occurred on March 3, 2014, paperwork occurred on 3/6/2014, and inspection concluded today. Facility has a NOVACHEM Wastewater Batch Treatment System for floor mop water that has a trace amount of metals created from the occasional steam-cleaning of auto parts. Facility operates an oil water separator using flocculants and demulsifiers and gravity separation of solids from non-hazardous liquids that are discharged to a POTW. Facility is properly permitted under the CESW tier. Business Activities Form, Business Owner/Operator Page, Tiered Permitting Facility form, Tiered Permitting: Unit CESW forms have been electronically submitted in CERS account 10199950 and are proper. The following documents were reviewed and were proper: Written Operating Instructions; Inspection log; Record of dates, amounts, and types of wastes treated; San Jose/ Santa Clara WPCP Self Monitoring Report dated 6/21/2013; SJ/SC WPCP Wastewater Discharge permit # CU-033B [Truncated]

Eval Notes:	A physical walk-through inspection occurred on March 3rd, a paperwork review inspection continued on March 6th, and concluded today. The following areas were inspected: Creative Arts-Ceramics, Painting Studio, Photography, Kiln Yard & Welding Area, Woodshop A-72 workshop, Chemistry rooms 2202, 2204,2208, 2210, 2218 preparation room, Biology classrooms & storage room; Auto Technology, Machine Technology, Flint Center paint storage area, Mechanics shop, Hazardous waste storage sheds, Universal Waste storage sheds, and Plant Services. Except where noted under inspection report observations, most areas had fire extinguishers, spill control absorbent, first aid kits, eye wash stations, and posted emergency procedures. In the chemistry classrooms, a sample of sink p-traps were inspected to verify the absence of any accumulation of hazardous wastes. All sink p-traps that were inspected were clear. Satellite accumulation areas in the fume hoods had closed, containers were [Truncated]

Eval Notes:	A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. EPA ID number CAD982029837 is "ACTIVE" on the CA State Hazardous Waste Tracking System. Facility is a Non-RCRA large quantity generator with central 90-day storage area located in the plant corporation yard. All other waste accumulation areas at the school are satellite accumulation areas which transfer all hazardous wastes and universal wastes to the central 90-day storage area. All central and satellite accumulation areas are inspected and documented by employees on a weekly basis. The following universal waste and hazardous waste satellite accumulation areas were inspected: Ceramics, Painting, Photography, Kiln Yard & Welding, Sculpture, Woodworking, Mechanic Shop, Microbiology, Med Tech Lab, Manufacturing & Design Technology, Flint Center, Automotive Technology, Biology, and Chemistry. The central 90-day storage [Truncated]

Eval Notes: A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. Tiered Permitting information was last electronically submitted on CERS on 6/18/2018. Unit treats hazardous waste that is not a federal hazardous waste, that discharges effluent to a POTW that operates under a NPDES permit, with residual solids managed as a hazardous waste. Facility keeps an treatment log that records the dates, amounts, and type of waste treated. Treatment system written operating instructions log was reviewed. Facility operates under under permit # CU-033B that expires on 12/15/2018 issued by the SJ/SC Water Pollution Control Plant.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility has 1 dry cleaning machine that uses petroleum distillates. Filters are changed and managed as hazardous waste and dry lint is disposed of to the garbage. This machine requires that the water in the still be replaced every time filters are cleaned and all contaminated water is managed as hazardous waste. Facility owner manually activates a program that triggers the machine to empty the internal waste container to an external bin and waste is immediately placed into a closed and labeled container. Spotting table has drain tubes that empty to an open container at the bottom and waste containers on the spotting table and machine were empty and dry at the time of inspection. Ms. Tsai trains her employees on hazardous waste management and maintains records of waste pickups every 6 months. Records were reviewed during the course of inspection. Facility has adequate spill response, annually serviced fire extinguishers, and waste containers are inspected weekly. covered [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2020
Date Data Arrived at EDR: 05/06/2020
Date Made Active in Reports: 05/28/2020
Number of Days to Update: 22

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020

Next Scheduled EDR Contact: 10/12/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

HMMD SAN DIEGO: Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 03/02/2020
Date Data Arrived at EDR: 03/03/2020
Date Made Active in Reports: 05/13/2020

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

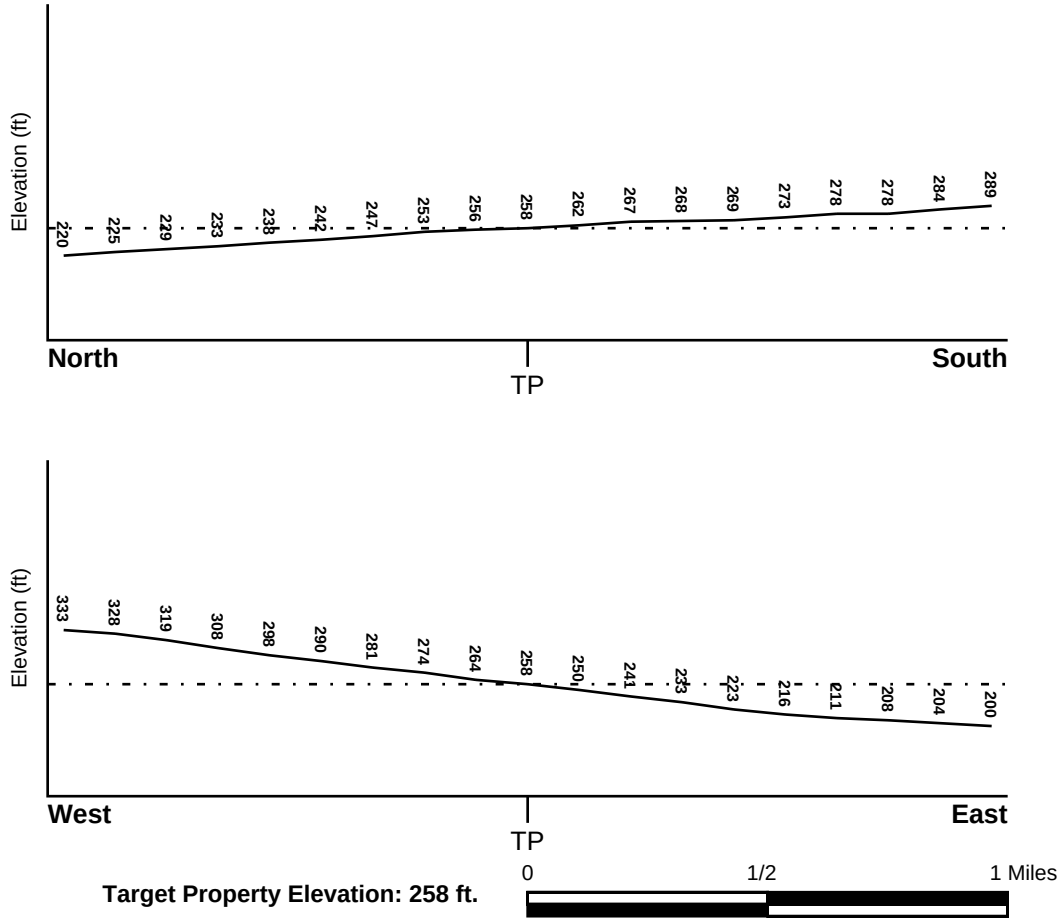
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0208H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CUPERTINO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

PROJECT SUMMARY TABLE

Report Section	Acceptable	Routine Solution	Phase II	REC	Estimated Cost
Historical Review	Yes				
Operational Activities	Yes				
Hazardous Materials / Petroleum Products	Yes				
Wastes	Yes				
Polychlorinated Biphenyls (PCBs)	Yes				
Asbestos-Containing Materials (ACM)	Yes	Yes (1)		No	$495 (1)
Radon Gas	Yes				
Lead-Based Paint (LBP)	Yes				
Lead in Drinking Water	Yes				
Storage Tanks / Pipelines	Yes				
Surface Areas	Yes				
Mold	Yes				
Regulatory Review	Yes				
Adjacent Properties	Yes				

Conditions noted in the Project Summary Table are representative of the overall conditions of the property. There may be more detail on specific assessment components in the report text, therefore the Project Summary Table should not be used as a stand alone document. Costs depicted are for investigation/program development activities. Remediation costs, if required, will be identified as a result of the activities.

Footnotes:

(1) Suspect non-friable ACM in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics identified as part of the assessment were not sampled. These materials are in good condition and can be maintained in place if an Operations and Maintenance (O&M) Program is developed and implemented. A properly designed O&M Program is sufficient to maintain the Project in accordance with current regulatory standards.

1 CERTIFICATION

EMG has completed a Phase I Environmental Site Assessment of the Stevens Creek Office Center (the "Project"), located at 20813-20883 Stevens Creek Boulevard in Cupertino, California 95014. The assessment was performed at the Client's request, using the methods and procedures consistent with good commercial and customary practice designed to conform with acceptable industry standards.

The assessment was performed at the Client's request using methods and procedures consistent with good commercial and customary practice conforming with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Within this Phase I Environmental Site Assessment, EMG's reference to the Client follows the ASTM guide's definition of User, that is, the party that retains EMG for the preparation of a baseline ESA of the Project. A User may include, without limitation, a purchaser, potential tenant, owner, existing or potential mortgagee, lender, or property manager of the subject property.

The opinions EMG expresses in this report were formed utilizing the degree of skill and care ordinarily exercised by any prudent Environmental Professional in the same community under similar circumstances. EMG assumes no responsibility or liability for the accuracy of information contained within this report that has been obtained from the Client or the Client's representatives, from other interested parties, or from the public domain. The conclusions presented represent EMG's professional judgment based on information obtained during the course of this assignment.

Factual information regarding operations, conditions, and test data provided by the Client or the Client's representative has been assumed to be correct and complete. The conclusions presented within this report are based on the data provided, observations made, and conditions that existed specifically on the date of the assessment.

EMG certifies that EMG has no undisclosed interest in the subject property, that EMG's relationship with the Client is at arms-length, and that EMG's employment and compensation are not contingent upon the findings or estimated costs to remedy any noted environmental conditions.

EMG's ESA cannot wholly eliminate the uncertainty regarding the presence of recognized environmental conditions and environmental business risk. The report is limited in budget and scope. The nature of subsurface soil and ground water at the subject property cannot be confirmed, given the limited budget and scope of this ESA. The report is not and should not be considered a warranty or guarantee about the presence or absence of environmental contaminants which might affect the subject property. It should be understood that EMG's suggested remedy may be determined under time constraints or may be formed without the aid of engineering calculations, testing, exploratory probing, the removal of materials, or design. Furthermore, there may be other alternate or more appropriate schemes or methods to remedy the noted environmental conditions.

If you have any questions regarding this report, please contact the Senior Environmental Consultant listed on the Cover Page of this Report.

Reviewed By:

Matthew B. Fox
Senior Engineering Consultant

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Matthew B. Fox - Senior Engineering Consultant

1.1 RELIANCE

This Report may be relied upon by Allstate and its successors and assigns in determining whether to make a loan evidenced by a note ("Property Note") secured by the Property.

This report, or any of the information contained therein, is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of EMG. Any reuse or distribution without such consent shall be at the client's or recipient's sole risk, without liability to EMG.

2.0 EXECUTIVE SUMMARY

EMG performed a Phase I Environmental Site Assessment, that included on-site observations of the accessible areas of the Stevens Creek Office Center (the "Project"), on June 16, 2014. The Project is located at 20813-20883 Stevens Creek Boulevard in Cupertino, California 95014, and consists of approximately 6.35 acres.

The Project, originally constructed between 1973 and 1985, is currently a commercial office facility. Prior to the current use, the Project was developed for agricultural and residential use. Properties in the general vicinity of the Project include commercial and residential land uses.

The following statements summarize the independent conclusions representing EMG's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representatives, has been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report), as they existed at the Project. The assessment was conducted utilizing generally accepted Phase I industry standards, using American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 and the Allstate Scope of Work.

A recognized environmental condition is defined by ASTM E 1527-13 as *The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.*

A historical recognized environmental condition is defined by ASTM E 1527-13 as *A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g. property use restriction, AULS, institutional controls, or engineering controls), at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusion section of the report as a REC.*

A controlled recognized environmental condition is defined by ASTM E 1527-13 as *A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

A business environmental risk is defined by ASTM E 1527-13 as *A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.*

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 20813-20883 Stevens Creek Boulevard in Cupertino, Santa Clara County, California 95014. Any exceptions to, or deletions from, this practice are described in Section 3 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), or significant business environmental risks in connection with the Project, except for the following:

- **Business Environmental Risk -** Suspect asbestos-containing materials were observed. Refer to the **Asbestos-Containing Materials** heading in Section 2.1 for further discussion.

2.1 Findings and Conclusions

Historical Review

The review of the historical data available for the Project and surrounding area revealed no evidence that may have led to an environmental impact to the Project. No further action or investigation is recommended regarding historical uses.

Operational Activities

EMG observed no circumstances of environmental concern associated with the operational activities at the Project. No further action or investigation is recommended regarding operational activities at the Project.

Hazardous Materials / Petroleum Products

The Project is involved in the use of routine janitorial/maintenance supplies. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Project, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of these materials.

The Project is involved in the use of hazardous materials and petroleum products in the form of diesel fuel and janitorial/maintenance supplies. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Project, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of these materials.

Wastes

The Project generates non-hazardous solid and liquid wastes. These materials appear to be stored and disposed of properly. No further action or investigation is recommended regarding these materials.

Polychlorinated Biphenyls (PCBs)

EMG identified utility-owned electrical transformer equipment at the Project. This equipment appeared to be in good condition with no evidence of leaks. The transformers are designated as the property of PG&E and are not classified with regards to their PCB content. The utility is the financially responsible party for maintenance of this equipment. No further action or investigation is recommended regarding the transformer equipment.

The Project contains hydraulic elevator equipment. No indication of leakage was observed in the area of this equipment. This equipment should be periodically inspected for leakage. If leakage is identified, the unit should be repaired, and any fluid or fluid-soaked waste disposed of in accordance with applicable federal, state, and local regulations. No further action or investigation is recommended regarding this equipment.

Asbestos-Containing Materials (ACM)

Suspect non-friable ACM in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics identified as part of the assessment were not sampled. These materials are in good condition and can be maintained in place if an Operations and Maintenance (O&M) Program is developed and implemented. A properly designed O&M Program is sufficient to maintain the Project in accordance with current regulatory standards.

Radon Gas

Review of the USEPA's Radon Map indicated that the Project is located in Zone 2, areas with a predicted average indoor radon screening level between 2 and 4 pCi/L (picoCuries per liter of air). In addition, based on the type of construction, the presence of commercial HVAC systems, and the non-residential use of the Project, there is reduced potential for the build-up of radon gas at the Project. No further action or investigation is recommended with regard to radon gas levels at the Project.

Lead-Based Paint (LBP)

Considering the date of construction (1973, 1981 and 1985), there is a potential that the paint at the Project is lead-based. However, the painted surfaces were observed to be in generally good condition, the Project is not a residential use, and there is no regulatory requirement to sample suspected lead-based painted surfaces at this time. Therefore, no samples were collected and no further action or investigation is recommended regarding suspected LBP at the Project.

Lead in Drinking Water

Based on information from the water utility company, the water at the Project is not expected to contain elevated levels of lead.

Storage Tanks / Pipelines

No evidence of underground storage tanks or pipelines was identified. However, one aboveground storage tank (AST) is located at the Project. Review of available information indicates that the AST is used for storage of diesel fuel. There was no visual indication of releases from the AST. The AST appears to be operated in accordance with current regulatory requirements and does not represent a recognized environmental condition, historical recognized environmental condition, or a controlled recognized environmental condition associated with the Project. No further action or investigation is recommended regarding the AST.

Surface Areas

No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Project.

Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Project.

Mold

EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. EMG did not note obvious visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Project. No further action or investigation is recommended regarding mold at the Project.

Regulatory Review

Based on review of the regulatory database report, the Project is listed on the HAZNET and ENF databases; however, none of these listings are of significant environmental concern. No further action or investigation is recommended regarding these regulatory database listings.

Based on review of the regulatory database report, none of the off-site facilities represent a recognized environmental condition associated with the Project. No further action or investigation is recommended regarding the off-site regulatory review.

Adjacent Properties

EMG identified no current adjacent property uses that represent a recognized environmental condition associated with the Project. No further action or investigation is recommended regarding the adjacent properties.

2.2 Recommendations

The development and implementation of an Asbestos O&M Program. Costs indicated are for O&M Program Document development only. Comprehensive survey costs, if required, will be identified as a result of O&M Program implementation.

- **Associated cost estimate:** $495

3 SURVEY APPROACH/PURPOSE

EMG conducted a Phase I Environmental Site Assessment of the Project that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives.

The user informed EMG that the reason for the assessment is for financing purposes.

On-site activities and/or interviews were conducted by Ms. Kimberly Belka, EMG Project Manager, with:

- Ms. Lesli Wang, On-site Point of Contact (POC) and Assistant Property Manager
- Mr. Arthur Gallo, Maintenance Supervisor

A Key Site Manager Questionnaire was completed by the Point of Contact. Information obtained from the Questionnaire has been used in the preparation of this report.

Areas accessed included:

- Tenant unit #'s 20863-480, 20863-560, 20863-300, 20863-100, 20863-275, 20883-150, 20883-200, 20813-150, 20823-300, 20823-200 and 20923-400
- Representative portions of interior areas
- Representative portions of exterior areas
- The roofs
- The Project boundaries
- Above drop ceilings in 20863-275 and 20883-200

Specific areas to which access was limited include the following:

- Commonly inaccessible areas, such as pipe chases, above ceilings, under floors, and behind walls
- Building 20833 due to tenant security

Based upon visual observations, review of regulatory information, and discussions with the Point of Contact, the inability to access these areas is not considered a significant data gap.

Weather conditions at the time of the Project assessment were clear, with temperatures in the high 60s (F) and light winds.

EMG reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project that could have an adverse impact on the Project. In an attempt to determine whether historical uses of the Project and the surrounding area have had an environmental impact on the Project, EMG interviewed individuals knowledgeable about the Project and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analyses of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report), as they existed at the Project. The Scope of Work included an evaluation of:

- The Project history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Project, as identified through review of reasonably ascertainable standard historical sources.

- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic data.

- Current Project conditions (as applicable), including compliance with appropriate regulations, as they pertain to the presence or absence of: facility storage tanks, drums, containers (above or below ground), etc., transformers and other electrical equipment which utilize fluid which may potentially contain PCBs,

the use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes.

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify sites that would have the potential to impact the environmental integrity of the Project. The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search that focuses on both the Project and neighboring sites that might impact the Project. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard Practice E 1527-13. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

In addition, at the Client's request, the assessment included a screening approach for the potential existence of:

- The physical characteristics of the Project, as identified through review of reasonably ascertainable wetlands, soils, geology, and groundwater data.

- Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Project. In addition, EMG interviewed Project personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. EMG notes that this assessment does not constitute a comprehensive mold survey of the Project, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Project on the assessment date.

- Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior). These materials are considered suspect, until tested and proven otherwise. Friable materials are those that can be easily crumbled or pulverized by hand pressure.

  This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but it is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

  The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Plac*e (the "Green Book"). Therefore, all materials listed in the Green Book that were installed prior to 1981 are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect, regardless of installation date (these materials continue to be manufactured and installed in the United States).

- Radon gas propensity, through the review of the USEPA's Map of Radon Zones for all properties.

- Lead-based paint for all properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.

- Lead in water, based on information provided by the municipal water provider.

3.1 Data Gaps

Data gaps in information exist and are addressed in the appropriate sections of this report. However, because the data gaps were not determined to be material in identifying Recognized Environmental Conditions (RECs), they are not considered by ASTM standards to be *significant* and, therefore, are not individually addressed in this section.

4 USER PROVIDED INFORMATION

This Section documents whether the user reported to EMG information pursuant to the responsibilities described in Section 6 of the ASTM Standard E 1527-13.

EMG submitted a User Questionnaire to the user to assist the user and EMG in gathering information from the user that may be material to identifying RECs. A copy of the User Questionnaire is appended (Appendix D).

Litigation

Question: *Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Administrative Proceedings

Question: *Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Notices From Governmental Entities

Question: *Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Environmental Cleanup Liens

Question: *Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Activity and Use Limitations

Question: *Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls, that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Specialized Knowledge

Question: *As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or of an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Relationship of Purchase Price

Question: *Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Commonly Known Information

Question: *Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:*

- *Do you know the past uses of the property?*
- *Do you know of specific chemicals that are present, or once were present, at the property?*
- *Do you know of spills or other chemical releases that have taken place at the property?*
- *Do you know of any environmental cleanups that have taken place at the property?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Obvious Indicators of Contamination

Question: *As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?*

Response: The user did not provide a response to this question. The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

Environmental Lien and AUL Review

The user did not engage EMG to review title and judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Project. Furthermore, these documents were not provided to EMG for review. The lack of or inability to obtain this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

5 PROJECT LOCATION/DESCRIPTION

The Project is located at 20813-20883 Stevens Creek Boulevard in Cupertino, Santa Clara County, California 95014. The Project lands consist of approximately 6.35 acres.

5.1 Project Description

The Project is currently a commercial office facility and contains 27 units. The Project was constructed between 1973 and 1985 in several phases. Project improvements consist of five structures, landscaping, and surface-level parking/drive areas.

The Project is serviced by public water and sanitary sewer systems. The Project is supplied with water from the California Water Service Company. Hot water is generated by electric and natural gas-fired water heaters.

HVAC systems observed consisted of the following:

- Heat and air-conditioning are supplied to the Project from electric and natural gas-fired rooftop packaged units. Conditioned air is distributed via thermostatically controlled, ducted supply and return systems.

5.2 Miscellaneous Systems

- **Emergency Generator** - One natural-gas fired emergency generator is located at the Project. Based on the type of fuel, the presence of this equipment is not anticipated to impact the environmental integrity of the Project negatively.

- **Sump Pump** - Six sump pumps are located at the Project. The presence of this equipment is not anticipated to impact the environmental integrity of the Project negatively.

5.3 Environmental Setting

5.3.1 Topography

Review of the Cupertino, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1995, indicated the following:

- The Project has an average elevation of approximately 260 feet above mean sea level. Elevations do not vary significantly across the Project lands. The Project slopes gently in a southwesterly direction.

- Slope in the general area of the Project is to the northeast. The nearest surface water feature, Calabazas Creek, is located approximately 6,650 feet southeast of the Project.

A copy of the topographic map is included in Appendix C.

5.3.2 Wetlands

Review of National Wetlands Inventory (NWI) data, provided by the United States Fish and Wildlife Service, indicated the following:

- No wetland areas are indicated at the Project or adjacent properties.

A copy of the wetland map is included in Appendix C.

5.3.3 Soils/Geology

Review of the Natural Resources Conservation Service (NRCS) Web Soil Survey data indicated the following:

- The Project is located in an area comprised of one soil type known as Flaskan. The Flaskan soil series is considered to be a well drained, sandy loam textured soil with a depth of at least 59 inches.

Review of the Geologic Map of California, published by the USGS and dated 1974, indicated the following:

- The Project is located within an area consisting of Cenozoic continental deposits.

5.3.4 Groundwater Hydrology

Review of the Water Resources Data Report for California, published by the California Department of Water Resources and dated 2014, indicated the following:

- The Project is located within the Santa Clara groundwater basin with estimated groundwater levels between 80 and 130 feet below ground surface (bgs).

Shallow groundwater flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Project is anticipated to be toward the northeast.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5.3.5 Floodplain

Review of the Flood Insurance Rate Map (Community/Panel No. 06085C0208H), published by the Federal Emergency Management Agency (FEMA) and dated May 18, 2009, indicated the following:

- The Project is located in Zone X (shaded), defined as an area between the limits of the 100-year and 500-year flood.

6 HISTORICAL REVIEW

Review of online information from the Santa Clara County Assessor Office website indicated that the Project is shown as Assessor Parcel Numbers 326-32-050/052/053.

A copy of the tax map is included in Appendix C.

6.1 Chain of Title

EMG reviewed readily available ownership records at the Santa Clara County Assessor Office website.

Review of available records did not identify any previous environmentally suspect ownership associated with the Project.

Ownership information is listed in the table below:

Ownership Information	
Owner	**Year Purchased**
Frank & Sally LaHaye	Prior to 1983
Stevens Creek Office Center Associates LP	1983

6.2 Prior Use Interviews

EMG met with Ms. Lesli Wang, On-site Point of Contact (POC) and Assistant Property Manager, who was cooperative and provided information that appeared to be accurate, based upon our subsequent site observations. It is EMG's opinion that the POC was knowledgeable about the Project and about questions EMG posed during the interview process. According to the POC, the Project was developed in 1973, 1981 and 1985 into the current use. The POC was unaware of any prior uses of the Project. The POC has been associated with the Project for approximately one and a half years.

6.3 Local and/or State Government Agency Record Review/Interviews

The following information was identified at the City of Cupertino Building Department:

- Records dating back to the 1990s are maintained by this department. Records prior to the 1990s have been archived and are not available for review.
- Original permits were not available; however, information obtained from the Santa Clara County Assessor indicated that the present buildings at the Project were built in 1973, 1981 and 1985. General building permits for the Project were on file, but they did not reveal any information or condition that could impact the environmental integrity of the Project.
- No permits for previous uses were found in the file for the Project address.
- No environmentally significant information was identified.

The following information was identified at the City of Cupertino Planning Department:

- Review of the available zoning records indicates that the Project is currently zoned P(GC, RES) for Planned Development (General Commercial, Residential) use.

- No environmentally significant information was identified.

The following information was identified at the Santa Clara County Environmental Health Department:

- No environmentally significant information was identified.

6.4 Historical Maps

Historical Sanborn Maps:

Historical Sanborn maps are detailed scale drawings that show the location and use of buildings and structures that occupied a given area. EMG contacted Environmental Data Resources (EDR) in an attempt to determine if there were any historical Sanborn maps in the EDR Historic Map Collection. However, there was no historical Sanborn map coverage for the Project in the EDR Historical Sanborn Map Collection for the period covering the years 1867 to present. As a general rule, the absence of historical Sanborn maps for a given area tends to support evidence that the area was not significantly developed.

Historical Topographic Maps:

Historical topographic maps show the location of buildings and structures that occupied a given area, as well as other physical features. EMG reviewed historical topographic maps as available online from the USGS. EMG's historical topographic map search results are discussed below. It should be noted that many historic topographic maps do not include ground cover designations. Therefore, if site features are not shown on the Project and/or surrounding properties, these areas are generally described as undeveloped land.

Review of the 1953, 1961 and 1965 historical topographic maps indicated the following:

- **Project:** The Project is shown as developed with one residential structure and farmland. Vehicular access is available from the south.

- **Off-site:** The area north of the Project is shown as farmland. The area east of the Project is shown as residential and farmland. The area south of the Project is shown as farmland. The area west of the Project is shown as residential, farmland and is shaded to represent a high-density developed area, and the exact improvements are not shown.

The 1969 historical topographic map differs from the previous historical maps in that:

- **Project:** The Project is shown as developed with one residence.

- **Off-site:** The area north of the Project is shown as undeveloped land. The area east of the Project is shown as undeveloped land and commercial development. The area south of the Project is shown as shaded to represent a high-density developed area, and the exact improvements are not shown.. The area west of the Project is shown as undeveloped land and are shaded to represent a high-density developed area, and the exact improvements are not shown.

The 1975 and 1980 historical topographic maps differ from the previous historical map in that:

- **Project:** The Project is shown as developed with one residence. Vehicular access is available from the north and south.

- **Off-site:** The area north of the Project is shown as commercial development and shaded to represent a high-density developed area, and the exact improvements are not shown. The area south of the Project is shown as commercial development. The area west of the Project is shown as commercial development, undeveloped land and shaded to represent a high-density developed area, and the exact improvements are not shown.

The 1996 historical topographic map differs from the previous historical maps in that:

- **Project:** The Project is shown as shaded to represent a high-density developed area, and the exact site improvements are not shown.

- **Off-site:** The area north of the Project is shown as shaded to represent a high-density developed area, and the exact improvements are not shown. . The area east of the Project is shown as shaded to represent a high-density developed area, and the exact improvements are not shown. The area west of the Project is shown as shaded to represent a high-density developed area, and the exact improvements are not shown.

Copies of representative historical topographic maps are included in Appendix C.

6.5 City Directories

City directories have tenant listings by address and are researched at approximately five-year intervals, as available. EMG reviewed historical city directories at the City of Cupertino library.

Project Listings:

This review revealed the following listings associated with the Project:

- **Prior to 1931** - City directories were not available.

- **1931, 1935, 1940, 1945, 1954, 1959, 1964, 1969, 1973, 1976** - The current Project addresses are not listed.

- **1980, 1985, 1990, 1995, 2000, 2005, 2010, 2013** - The current Project addresses are listed as numerous commercial tenants, none of which appear to be of environmental significance.

Copies of the City Directories were not available due to copyright restrictions and/or library policy.

6.6 Aerial Photography

EMG contacted EDR in an attempt to determine if there were any historical aerial photographs available for the area of the Project. EMG's historical aerial search results are discussed below.

Review of the 1939 and 1948 historical aerial photographs indicated the following:

- **Project:** The Project is shown as agricultural land and developed with a residence and farm structure. Vehicular access is available from the south.

- **Off-site:** The area north of the Project is shown as agricultural land. The area east of the Project is shown as residential and agricultural land. The area south of the Project is shown as agricultural land. The area west of the Project is shown as commercial development and agricultural land.

The 1956 historical aerial photograph differs from the previous aerial photographs in that:

- **Off-site:** The area west of the Project is shown as commercial and residential development and agricultural land.

The 1968 historical aerial photograph differs from the previous aerial photograph in that:

- **Project:** The Project is shown as agricultural land and developed with a residence and farm structure. Vehicular access is available from the north and south.

- **Off-site:** The area north of the Project is shown as undeveloped land. The area east of the Project is shown as undeveloped land and commercial development. The area south of the Project is shown as commercial development. The area west of the Project is shown as commercial and residential development and undeveloped land.

The 1974 historical aerial photograph differs from the previous aerial photograph in that:

- **Project:** The Project is shown as developed with two commercial buildings.

- **Off-site:** The area north of the Project is shown as residential and commercial development. The area east of the Project is shown as commercial development. The area west of the Project is shown as residential and commercial development.

The 1980 historical aerial photograph differs from the previous aerial photograph in that:

- **Project:** The Project is shown as developed with three commercial buildings.

The 1991, 1998, 2005, 2006, 2009, 2010 and 2012 historical aerial photographs differ from the previous aerial photograph in that:

- **Project:** The Project is shown as developed with the current five office buildings.

Copies of representative historical aerial photographs are included in Appendix C.

6.7 Previous Investigations

EMG was not provided with any previously conducted environmental assessment reports for the Project.

6.8 Plans and Specifications

Limited as-built-site plans, drawings, and specifications were reviewed at the Project. Documents reviewed included limited architectural plans for some of the buildings. Review of these documents did not identify any unusual or unique systems/equipment installations.

6.9 Historical Summary

EMG was not able to obtain standard historical sources that document the Project history in five year intervals. This data failure represents a data gap; however, this data gap is not considered a *significant* data gap, and therefore, it is not addressed in Section 3.1.

Based upon historical review, the previous Project use includes agricultural use and residential use prior to the development of the current Project improvements in 1973, 1981 and 1985. The Project has been occupied by various commercial since the construction of the current improvements; however, based on review of available information, no environmentally significant activities were identified with the historical tenants.

7 PROJECT RECONNAISSANCE

7.1 Operational Activities/Noteworthy Tenants

The Project is currently a commercial office building facility. Typical tenants include a software providers, security specialist, a wireless company and an investment company. A complete tenant rent roll is provided in Appendix F. No noteworthy tenants occupy the Project and no environmentally significant operations are conducted at the Project.

Considering the operations assessed at the Project, no environmental permits, registrations, or notifications appear to be required.

7.2 Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The following hazardous materials and petroleum products were identified:

- Routine janitorial and maintenance supplies are present in retail-sized containers and stored in designated areas. These materials are used for Project maintenance and upkeep.

- Diesel fuel is used by the emergency generator and stored in one approximately 150-gallon aboveground storage tank located beneath the equipment. Refer to Section 7.9 for further discussion of the storage tank. The emergency generator is not currently in use; however, the POC indicated that there may still be diesel fuel in the AST. Additionally, the POC indicated that the Project was planning to return the emergency generator into operational use.

The hazardous materials and petroleum products discussed above were observed in designated storage areas and appeared to be properly stored.

No evidence of spills or staining was observed. In addition, the surfaces appeared intact, and no cracks were observed in the areas of product storage/usage.

7.3 Waste Generation, Treatment, Storage and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. The following wastes were identified:

- Municipal trash is stored in dumpsters and disposed of by a contracted waste hauler.

- Domestic sewage is disposed of to the municipal sanitary sewer system.

No evidence of spills or staining was observed in the area of waste generation or pre-disposal storage.

Review of information available at the Project indicated that the waste disposal operations appear to be appropriate.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the dumpsters. No hazardous, regulated, or medical wastes were noted in the dumpsters.

7.4 Polychlorinated Biphenyls (PCBs)

The Project is supplied with underground secondary electrical service from four pad-mounted and two vaulted electrical transformers. The transformers are designated as the property of the the public utility (Pacific Gas and Electric). Based on the apparent age, the equipment is not likely to contain PCBs. The unit should be periodically inspected for leakage. If leakage is visible, the Project owner/manager should contact the public utility, which will remediate the situation. Should the unit have to be replaced, the utility is responsible, provided the cause is equipment failure, not customer misuse. No leakage of the transformer was observed at the time of the assessment.

Three hydraulic lift elevators are located at the Project. PCB-containing hydraulic fluid has not been manufactured since 1977. Therefore, based on the dates of installations/upgrades, PCB-containing hydraulic fluid is not likely to be found in the elevator operating systems. No visual indication of leakage was observed in the areas of the elevator operating equipment. The hydraulic elevator units at the Project should be inspected periodically for leakage. If leakage is identified, the unit should be repaired, and any fluid or fluid-soaked waste should be disposed of in accordance with applicable federal, state, and local regulations.

7.5 Asbestos-Containing Materials (ACM)

Limited as-built-site plans, drawings, and specifications were reviewed at the Project. Documents reviewed included limited architectural plans for some of the buildings. Review of these documents did not identify building material specifications requiring the use of ACM. However, this does not preclude or prevent the potential use of ACM.

Suspect non-friable ACM, in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics, were identified. These materials were observed to be in good condition.

Based on the Scope of Work, no samples were collected.

7.6 Radon Gas

Review of the USEPA's Radon Map for Santa Clara County, California indicated that the Project is located in Zone 2, areas with a predicted average indoor radon screening level between 2 and 4 pCi/L (picoCuries per liter of air).

Based on the Scope of Work, radon sampling was not performed as a part of this assessment.

In addition, based on the type of construction, the presence of commercial HVAC systems, and the commercial use of the buildings, there is reduced potential for the build-up of radon gas in the buildings at the Project.

7.7 Lead-Based Paint (LBP)

Considering the date of construction (1973, 1981 and 1985), there is a potential that the paint at the Project is lead-based. The painted surfaces were observed to be in generally good condition, with no chipping, peeling, or cracking paint observed. Furthermore, the Project is not a residential use and there is no regulatory requirement to sample suspected lead-based painted surfaces at this time. Therefore, no samples were collected.

7.8 Lead in Drinking Water

Based on review of the local water utility's most recent Water Quality Report, the water supplied to the Project is within federal, state, and local drinking water quality standards.

7.9 Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Project.

The Project contains the aboveground storage tank (AST) listed in the table below.

Current California regulations do not require registration of this type of tank. Ms. Wang was unaware of any releases from the AST. The AST appeared to be in good condition, with no evidence of releases such as staining. The AST is associated with an onsite emergency generator. The emergency generator is not currently in use; however, the POC indicated that the Project was planning to return the emergency generator into operational use.

The remaining manways and surface caps observed at the Project were for site services (i.e., domestic water, storm water, and sanitary sewer system).

Review of currently installed mechanical equipment identified the use of alternate fuel sources (i.e., electric, natural gas), thereby eliminating the need for additional on-site fuel storage at the Project.

Based on the review of the state list of registered USTs, no USTs are registered for the Project.

Interviews with persons knowledgeable of the Project did not identify evidence of historic storage tanks (above or below ground) at the Project.

Visual observations did not identify surface markings indicating the existence of subsurface product pipelines at the Project.

7.10 Surface Areas

Observations during EMG's assessment identified that the Project lands are graded to provide slope and swale to direct storm water away from the on-site buildings. Surface water flows in a southwesterly direction.

Visual observation of the Project and adjacent properties did not identify evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Project.

Visual observations did not identify evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Project.

Visual observations did not identify surface water features, including lagoons, ponds, or other bodies of water at the Project.

Minor oil discharges were observed on the parking areas; however, the discharges are incidental in nature, and corrective action is neither practical nor warranted.

Storm water from the roof areas is directed to the ground surface via downspouts. Storm water from drive and parking surfaces is directed to surface drains via sheet flow. Storm water from vegetated surface areas generally infiltrates into the subsurface.

7.11 Mold

EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. EMG did not note obvious visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Project.

This assessment does not constitute a comprehensive mold survey of the Project. In addition, this activity was not designed to discover all areas which may be affected by mold growth on the Project. Rather, it is intended to give the Client an indication if significant (based on observed areas) mold growth is present at the Project. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems and behind enclosed walls and ceilings, may be present at the Project. The reported observations and conclusions are based solely on interviews with Project personnel and on conditions as observed in readily accessible interior areas of the Project on the assessment date.

8 INTERVIEWS

8.1 Key Site Manager

A Key Site Manager Questionnaire was completed as a part of this assessment, which is included in Appendix D. The Questionnaire was completed by the Key Site Manager, Ms. Lesli Wang. Information obtained from the Questionnaire has been used in the preparation of this report. The Key Site Manager is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws, or possible liability related to hazardous substances or petroleum products.

8.2 Owner

EMG submitted an Owner Questionnaire to the user in an effort to identify the owner of the Project who could be interviewed to provide information regarding proceedings involving the Project. A completed Owner Questionnaire was not returned to EMG.

The lack of, or inability to obtain, this information represents a data gap. However, based on the findings of this report, the absence of this information is not considered a *significant* data gap.

8.3 User

EMG submitted a User Questionnaire in an effort to obtain information regarding proceedings involving the Project. Refer to Section 4, for discussion of the User Questionnaire.

8.4 Occupants

EMG interviewed Ms. Lesli Wang, the Property Manager and tenant representative, who was cooperative and provided information that appeared to be accurate, based upon our subsequent site observations. It is EMG's opinion that Ms. Wang was knowledgeable about the Project and about the questions EMG posed during the interview process. Ms. Wang indicated that she has been associated with the Project for approximately one and a half years.

8.5 Past Owners, Operators, and Occupants

No past owners, operators, or occupants of the Project, who likely would have material information regarding the potential for contamination at the Project, were identified.

8.6 Owners or Occupants of Adjacent or Nearby Properties

The Project was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

8.7 Interviews with Others

The following individuals were interviewed as part of this assessment:

EMG interviewed Mr. Arthur Gallo, the Maintenance Supervisor, who was cooperative and provided information that appeared to be accurate based upon our subsequent site observations. It is EMG's opinion that Mr. Gallo was knowledgeable about the Project, and the questions EMG posed during the interview process. Mr. Gallo indicated that he has been associated with the Project for approximately eighteen years.

Name and Title	Organization	Phone Number
Ms. Lesli Wang, Property Manager	Stevens Creek Office Center	408.855.9801

9 REGULATORY DATABASE REVIEW

EMG obtained a regulatory database report from Environmental Data Resources, Inc. (EDR) in an effort to determine if the Project is a listed regulatory site and whether there are any mappable regulatory database sites. The regulatory database search was run in accordance with the Scope of Work for this assessment. EMG attempted to field-verify the locations of the EDR-identified regulatory sites, as well as confirm distances and locations relative to the Project using available mapping software. Therefore, the distances and/or directions noted in this section may not match the EDR Report. In addition, EMG reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. A copy of the regulatory database report is included in Appendix H.

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, EMG concludes that the Project is a listed site. Details regarding any listings for the Project are discussed after the table below.

The search for sites listed on regulatory databases in the area surrounding the Project identified various sites within the specified search radii. Details regarding any adjacent and nearby off-site properties of environmental significance are discussed after the table below.

The following are some of the databases which were reviewed for this assessment. See the appended regulatory database report for a complete listing of databases reviewed for this assessment:

ASTM Standard Federal Databases

- **NPL -** The National Priority List (NPL) is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program.
- **Proposed NPL -** A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.
- **NPL LIENS -** Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability.
- **Delisted NPL -** In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.
- **CERCLIS -** The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) contains sites that are either proposed to or on the National Priorities List (NPL) and sites that are in the screening and assessment phase for possible inclusion on the NPL.
- **CERCLIS-NFRAP -** CERCLIS No Further Remedial Action Planned (NFRAP) sites are sites that the EPA has determined that no further steps will be taken to list the sites on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
- **CORRACTS -** Corrective Action Report (CORRACTS) identifies hazardous waste handlers with RCRA corrective action activity.
- **RCRA-TSDF -** Resource Conservation and Recovery Act (RCRA) - Transporters, Storage and Disposal (TSDF) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA.

- **RCRA-LQG -** The RCRA - Large Quantity Generators (LQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

- **RCRA-SQG -** The RCRA - Small Quantity Generators (SQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month.

- **RCRA-CESQG -** The RCRA - Conditionally Exempt Small Quantity Generators (CESQG) database includes information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Conditionally exempt small quantity generators generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

- **US ENG CONTROLS -** A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- **US INST CONTROL -** A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- **ERNS -** The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances.

State Databases

- **SWF -** The Solid Waste Facilities (SWF) database contains an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps.

- **LUST -** Leaking underground storage tank (LUST) records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

- **UST -** Registered Underground Storage Tank (UST) facilities.

- **AST -** Registered Aboveground Storage Tank (AST) facilities.

- **State BROWNFIELDS -** This database contains information on Brownfield sites.

- **State Voluntary Cleanup Sites -** This database contains a listing of sites which are in the State voluntary cleanup program.

- **STATE ENG CONTROLS -** A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- **STATE INST CONTROL -** A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- **INDIAN UST -** The Indian UST database contains information about underground storage tanks on Indian land.

- **INDIAN LUST -** The Indian LUST database contains information about leaking underground storage tanks on Indian land.

- **INDIAN VCP-** The Indian VCP database contains information about voluntary cleanup priority sites on Indian land.

- **SHWS -** The State of California does not maintain a SHWS database; therefore, the search distance for the CERCLIS database was extended to cover the appropriate distance that the SHWS database would have been searched.

- **ENVIROSTOR** - The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

- **SLIC** - The California Spill, Leak, Investigation, and Cleanup (SLIC) database is maintained by the individual California Regional California Water Quality Control Boards (RWQCB) to track sites where releases have been reported outside of the Leaking Underground Storage Tank program. These sites typically include miscellaneous releases, not necessarily related to underground storage tanks.

- **RESPONSE** - State Response Sites are confirmed release sites where the DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

- **VCP** - The Voluntary Cleanup Program (VCP) database contains low threat level properties with either confirmed or unconfirmed releases, and where the project proponents have requested that the DTSC oversee investigation and/or cleanup activities and also have agreed to provide coverage for DTSC's costs.

- **HIST CAL-SITES** - The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR.

9.1 Project Regulatory Database Discussion

Regulatory database listings for the Project are discussed below.

Stevens Creek Office Center
20833 and 20823 Stevens Creek Boulevard
Database(s) Listed On: HAZNET

The HAZNET database indicates that the Project generated a waste that was disposed of in a landfill or surface impoundment that will be closed as a landfill. The POC was unaware as to what this waste was, but it appears likely that the waste was some type of asbestos waste associated with an onsite tenant improvement. Based on the information discussed above, the on-site listings for the Project do not represent a recognized environmental condition in connection with the Project.

CDS #2-3CS
20833 Stevens Creek Boulevard #104
Database(s) Listed On: ENF

The ENF database indicates that this former Project tenant was late submitting annual waste discharge reports in 2007 and 2012. This tenant is no longer located at the Project and the POC indicated that she did not know of any waste discharge requirements for the Project. It appears likely that this former tenant had offices located at the Project, but the waste discharges associated with the required report submittals occurred at an off-site location. Based on the information discussed above, the on-site listing for the Project does not represent a recognized environmental condition in connection with the Project.

Apneon Inc.
20813 Stevens Creek Boulevard #100
Database(s) Listed On: HAZNET

The HAZNET database indicates that this former tenant generated waste oil in 2008. This tenant is no longer located at the Project and there are no violations associated with the waste disposal. Based on the information discussed above, the on-site listing for the Project does not represent a recognized environmental condition in connection with the Project.

9.2 Off-Site Regulatory Database Discussion

Adjacent and nearby off-site listed properties of environmental significance are discussed below.

Anderson Chevrolet of Cupertino/Key Chevrolet/Worthington Chevrolet
20955 Stevens Creek Boulevard
Distance: Adjacent
Direction: West
Database(s) Listed On: LUST, UST, ENVIROSTOR, Historic UST, Historic Cortese, RCRA-Generator

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the northeast, which is parallel to the Project. Information in the LUST database indicates that a waste oil release was reported in 1998. The media impacted was reported to be soil only. The LUST database indicates a "case closed" status as of July 30, 1998. The regulatory agency awards a "case closed" status only when contamination, if any, has been investigated and/or remediated in accordance with the regulatory standards accepted at the time closure was granted. Information in the Historic UST database there were two historic USTs at this site which were closed in 1998. The UST database indicates there was one waste oil tank at this site. Information obtained from the California Department of Toxic Substances Control ENVIROSTOR website indicates that during closure the former Chevrolet facility, several hydraulic lifts were removed. Soils in the vicinity of the lifts were contaminated with petroleum hydrocarbons and approximately 560 cubic yards of impacted soils were removed in 2006. The RCRA-Generator database is a listing of facilities that are required to register for tracking purposes due to the amount of hazardous waste generated and are not necessarily sites with reported contamination incidents. According to the RCRA-Generator database, the facility is a small quantity generator of hazardous wastes. The database indicates that there are no violations associated with the RCRA-Generator listing. Additionally, EMG observed that this address is currently occupied by a Whole Foods Market. Based on the "case closed" regulatory status, lack of any reported impact to groundwater, and estimated direction of groundwater flow, this site does not represent a recognized environmental condition, historical recognized environmental condition, or a controlled recognized environmental condition associated with the Project.

Conoco Phillips
20755 Stevens Creek Boulevard
Distance: Approximately 450 feet
Direction: East
Database(s) Listed On: LUST

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project, and the estimated groundwater flow in the area of the site is to the northeast, which is parallel to the Project. Information obtained from the State Water Resources Control Board website indicates that a gasoline release was reported in 2006. The media impacted was reported to be groundwater. The State Water Resources Control Board website indicates a "case closed" status as of December 1, 2006. The regulatory agency awards a "case closed" status only when contamination, if any, has been investigated and/or remediated in accordance with the regulatory standards accepted at the time closure was granted. Based on the "case closed" regulatory status, estimated direction of groundwater flow, and distance, this site does not represent a recognized environmental condition, historical recognized environmental condition, or a controlled recognized environmental condition associated with the Project.

The initial search distances employed for this assessment were defined by ASTM E 1527-13. However, due to the number of sites identified in the initial determination, only those sites determined by EMG to have the potential to have impacted the Project are discussed above. This determination was based on, but not limited to, such factors such as topographic gradient in relation to the Project, estimated groundwater flow direction at each site, distance between the listed site and the Project, and/or the type of site or materials involved. Based on

these factors, the remaining off-site listed properties do not represent a recognized environmental condition associated with the Project.

10 ADJACENT PROPERTIES

The general vicinity of the Project consists of residential and commercial land uses. The following adjacent properties were identified:

- The Project is bordered to the north by Alves Drive. Farther north are a residential area and the YMCA (20803 Alves Drive).
- The Project is bordered to the south by Stevens Creek Boulevard. Farther south are Pizza Hut (20770 Stevens Creek Boulevard), Staples (20830 Stevens Creek Boulevard), Fontana's Restaurant (20840 Stevens Creek Boulevard), and Union Church of Cupertino (20900 Stevens Creek Boulevard).
- The Project is bordered to the east by Panera Bread/Peet's Coffee and Tea (20807 Stevens Creek Boulevard), two vacant buildings (20803 Stevens Creek Boulevard and 10083-10095 Saich Way), and Happy Days Child Development Center (10115 Saich Way).
- The Project is bordered to the west by Whole Foods Market (20955 Stevens Creek Boulevard) and a residential area.

The adjacent property to the west was identified on the LUST, UST, ENVIROSTOR, Historic UST, Historic Cortese, RCRA-Generator databases. More information regarding this site is included in the Regulatory Review discussion (Section 9.2). Based on observations and available regulatory information, the adjacent property uses do not represent a recognized environmental condition associated with the Project.

Asbestos · Mold · Lead Based Paint

February 3, 2017

Gidel & Kocal Construction Co.
574 Division St.
Campbell, CA 95008

RE: 20863 Stevens Creek Blvd, 1st Floor, Cupertino, CA 95014

To Whom It May Concern:

:

Synergy Enterprises, Inc. has performed the following asbestos abatement at the above mentioned address:

1. Properly isolate and contain 1st floor
2. Place area under HEPA filtered negative pressure differential
3. Remove mold contaminated drywall from 1 wall in bathroom
4. Clean visible mold from exposed studs with an anti-microbial biocide
5. HEPA vacuum area
6. Properly dispose of waste

If you have any questions, please feel free to call our office.

Sincerely,

Sal Vaccaro
President
Synergy Enterprises, Inc.

1. EXECUTIVE SUMMARY & CERTIFICATION

EMG has completed an Asbestos Operations and Maintenance (O&M) Program report for the Stevens Creek Office Center, which is located at 20813-20883 Stevens Creek Boulevard in Cupertino, California. EMG previously performed an Environmental Site Assessment at the property (EMG Project No. 109568.14R-001.135). In the prior report, EMG stated that:

- The Project, originally constructed between 1973 and 1985, is currently a commercial office facility. Prior to the current use, the Project was developed for agricultural and residential use. Properties in the general vicinity of the Project include commercial and residential land uses.

This O&M Plan is based on the following recommendation found in that report:

- Suspect non-friable ACM in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics identified as part of the assessment were not sampled. These materials are in good condition and can be maintained in place if an Operations and Maintenance (O&M) Program is developed and implemented. A properly designed O&M Program is sufficient to maintain the Project in accordance with current regulatory standards.

The O&M Program report, which was prepared at the Client's request, utilizes methods and procedures consistent with good commercial or customary practice designed to conform to acceptable industry standards and applicable federal, state, and local regulations. Furthermore, the O&M Program preparer, listed below, is professionally trained, experienced, and qualified in accordance with industry standards to complete this O&M Program report.

The independent conclusions represent EMG's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative have been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed and the information available at the time of the assignment.

Prepared by EMG:

Ronald V. Melchior
Alliance Partner Network Manager
EMG

2. INTRODUCTION

This General Operations and Maintenance (O&M) Program established by EMG is for a property known as the Stevens Creek Office Center, which contains asbestos-containing materials (ACMs) or Presumed/Assumed asbestos-containing materials (PACM[1]). This O&M Program covers ACMs/PACMs that are in good condition and are non-friable, and/or of the type defined as miscellaneous by the Environmental Protection Agency (EPA)[2].

The purpose of this Program is to minimize the risk of exposure to building occupants by maintaining existing ACMs/PACMs in good condition. Existing friable asbestos hazard conditions must be addressed by remediation procedures that are beyond the scope of this O&M Program. Such remediation activities should be conducted by licensed asbestos contractors (See Section 4.4).

Part of the O&M Plan includes the appointment of an Asbestos Program Manager (APM). The position of the APM is frequently held by the building engineer, superintendent, facilities manager, or safety and health director. Regardless of who holds the position of APM, the EPA strongly recommends that the APM be properly qualified through training and experience (refer to Section 4.1).

Nonetheless, the Asbestos Program Manager (APM) should ensure that activities of asbestos contractors follow applicable regulatory requirements and guidelines (as briefly discussed in Section 5).

This O&M Program has been designed to minimize the potential release of asbestos fibers during general work activities, scheduled maintenance and renovation of the building. This Program is designed utilizing the EPA's Document, *Managing Asbestos in Place; A Building Owner's Guide to Operations and Maintenance Programs For Asbestos-Containing Materials* and the National Institute of Building Sciences (NIBS) *Guidance Manual: Asbestos Operations and Maintenance Work Practices*.

Abbreviations and acronyms that are used in this O&M Program are defined in Appendix I-Glossary, located at end of this document.

This Program encompasses Class III and Class IV Asbestos Work (based on OSHA asbestos work classifications found in 29 CFR 1926.1101). In addition to the following *Class IV Asbestos Work* definition, further differentiation between acceptable and unacceptable O&M activities is provided in Section 8.0 (O&M Work Practices). Class III and Class IV Asbestos Work are defined as follows:

- **Class III Asbestos Work:** Repair and maintenance operations, where ACM is likely to be disturbed. This disturbance includes cutting away small amounts of ACM, no greater than the amount that can be contained in one standard sized glovebag or waste bag in order to access a building component. In no event shall the amount of ACM so disturbed exceed that which can be contained in one glove bag or waste bag, which shall not exceed 60 inches in length and width.

This Program does not include all the necessary information to complete Class III Asbestos Work (as defined by OSHA in 29 CFR 1926.1101). Class III work requires detailed description of work practices and additional information regarding worker protection. All necessary additional information for completing Class III Asbestos Work can be obtained through the training programs that must be completed by Class III workers.

[1] Presumed asbestos-containing material means thermal system insulation and surfacing material found in buildings constructed no later than 1980.
[2] According to the EPA, a miscellaneous ACM is a material that is not sprayed-on or troweled-on surfacing material, and is not used as thermal insulation. Miscellaneous materials could include floor tile and ceiling tile.

- **Class IV Asbestos Work:** Maintenance and custodial construction activities during which employees contact, but do not disturb, ACM or PACM. A "disturbance" of ACM/PACM refers to any activity that disrupts the matrix of ACM or PACM, crumbles or pulverizes ACM or PACM, or generates visible debris or dust from ACM or PACM. Class IV Asbestos Work also involves activities to clean up dust, waste and debris resulting from Class I, II, and III activities. However, Class I and II activities are categories for asbestos removal work that are performed by licensed abatement contractors; and therefore go beyond the scope of an O&M Program.

3. O&M PROGRAM IMPLEMENTATION OVERVIEW

This O&M Program is established with the intent of managing ACMs/PACMs as follows:

- Abate any existing asbestos hazards utilizing a licensed asbestos removal contractor.
- ACMs/PACMs in fair to good condition will be maintained in-place in their existing condition.
- Establish procedures to minimize and/or avoid ACM/PACM disturbance.
- Contract asbestos removal activities prior to any maintenance/repair, renovation, or other activities that may cause an asbestos disturbance. [In-house asbestos abatement capabilities can be established. However, this is not within the scope of this O&M Program report. Guidance for in-house asbestos work can be obtained upon O&M worker training or can be provided by EMG as a supplement to this O&M report.]

Listed below is a checklist of the programs and/or procedures that should be implemented as part of this O&M Program. These programs/procedures include immediate and on-going activities for proper management of ACMs and PACMs at the Project. Upon implementation of the O&M Program, the APM should be able to check off each of the activities listed within the **O&M Implementation Checklist**. Within the **O&M Implementation Checklist**, references are made to report section(s) that provide further description.

3.1. O&M IMPLEMENTATION CHECKLIST

The APM should check that each of the activities/programs listed below has been completed or is implemented on an on-going basis.

___ **APM Training** – Minimum two day EPA Accredited O&M training (Section 7.1).

___ **Worker Training** (Section 7.1).

___ **Visual Reinspection of Project** by the APM after completion of O&M training (Section 7.2).

___ **Initial Clean-Up**, **Abatement**, and/or **Testing** of known or potential friable asbestos hazards (Section 7.3).

___ Maintenance and **Custodial Personnel (if applicable)** – Awareness Training (2-Hour).

___ **Maintenance Personnel (if applicable)** – O&M Worker Training (2-day), if workers conduct work that could potentially disturb ACM in quantities less than three square feet or three linear feet.

___ **Employee**, **Tenant** (if applicable), and **Contractor Notifications** (Section 7.4).

___ Asbestos **Labeling** (Section 7.5), *if necessary*.

___ **Signage** (Section 7.6), *if necessary*.

___ **Periodic Surveillance** procedures (Section 7.7).

___ **Record Keeping** procedures (Section 7.8).

___ **Work Control/Permit System** (Section 9.0).

3.2. STATEMENT OF INTENT

It is Management's policy that deteriorated asbestos can be prevented at the Stevens Creek Office Center by diligent upkeep of the structure. As part of this commitment, Management will use this Asbestos O&M Plan as a guidance document to help maintain the Property in good repair.

4. RESPONSIBILITIES

4.1. ASBESTOS PROGRAM MANAGER

Designation: The position of Asbestos Program Manager (APM), as appointed by the Property Management, is to be held by:

_____.

Qualifications: The APM should be properly qualified, through training and experience. The APM should also be trained in aspects of asbestos handling appropriate for the nature of work, to include procedures for setting up glove bags and mini-enclosures, practices for reducing asbestos exposures, use of wet methods, the contents of applicable OSHA, EPA and state regulations, and the identification of asbestos. Completion of an EPA approved Operations and Maintenance course is required. EMG recommends that the APM acquire EPA accreditation under the Asbestos Hazard Emergency Response Act (AHERA) or state certification as a Building Inspector/Management Planner and/or Abatement Supervisor.

Duties: Act as the Competent Person for all class IV asbestos work in the building. As such, the APM's duties include health and safety inspections of custodial operations where ACM may be encountered. These inspections should be made at intervals sufficient to assess whether conditions in the work area have changed, and at any reasonable time at employee request.

Perform regular visual inspections of the ACM/PACM, documenting material condition, assessing the material's hazard potential and scheduling appropriate response actions.

Ensure that workers are properly trained in proper asbestos O&M techniques. In addition, he or she will properly notify and oversee the custodial and maintenance staffs, tenants, contractors, and outside service vendors with regard to all asbestos-related activities.

The APM will only employ qualified and licensed asbestos abatement contractors (See also Section 4.4) for abatement projects, independent of the asbestos consultant and the licensed laboratory.

The APM will affirm that any contractors/consultants that are engaged follow appropriate worker protection including respiratory protection, protective clothing, and hygiene facilities, and utilize environmentally protective practices including designation of regulated areas, use of safe housekeeping procedures, and posting of necessary signage.

The APM will confirm that all appropriate regulatory agency notification and personnel notifications have been completed. More detailed understanding of appropriate contractor work practices can be obtained in the various sections of this O&M report, and will also be obtained upon APM training.

The APM will ensure proper disposal of all ACM waste generated and that the recordkeeping requirements of this Program are met and maintain the Program files.

The APM will notify those whose activities may disturb ACM/PACM.

4.2. MAINTENANCE AND CUSTODIAL STAFF

Qualifications: All maintenance and custodial staff should have annual asbestos awareness training at a minimum. A two-hour initial training course and two-hour annual refresher course will meet this requirement.

Duties: Conduct ACM surveillance on a continuous basis as part of regular duties. Any damaged ACM/PACM should be reported to the APM immediately and documented in the Program files.

Assist the APM as necessary.

4.3. ASBESTOS CONSULTANT

Designation: EMG has developed the Program.

Duties: As part of an annual update (separately proposed), EMG can review the success of Program implementation as part of a reinspection and update. As part of this update, EMG will notify the Client of any changes in regulations that may affect the Program.

In general, an asbestos consultant can (1) design large abatement projects, (2) observe the work of abatement contractors, (3) inform applicable employees of the presence of ACM prior to the abatement work being performed, (4) conduct air monitoring before, during, and after abatement projects, as appropriate, and (5) prepare and submit final abatement project reports.

Preparation of a specification or detailed scope of work will be necessary for major asbestos abatement activities. The specification shall be site-specific and detailed for a particular project or operation. Specifications will be required for all major work by abatement contractors, except for routine operations conducted under the guidance of the designated environmental consultant.

4.4. ASBESTOS REMOVAL CONTRACTOR

Duties: Any contractor hired to perform activities at the facility within or beyond the extent of the Program shall follow the standards and procedures of the Program as well as applicable laws and regulations.

Asbestos Abatement Contractors should be fully licensed and are responsible for all asbestos clean up, repair and abatement in accordance with all federal, state and local regulations. Abatement and disposal of ACM will be conducted in accordance with applicable laws and regulations and within generally accepted standards of the asbestos abatement industry.

5. ASBESTOS REGULATIONS

The asbestos regulations listed in this section shall be considered part of this Program. In the case of conflict between federal and state regulations, the more stringent regulations apply.

5.1. OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

29 CFR 1910.1001	Occupational Exposure to Asbestos; General Industry
29 CFR 1926.1101	Occupational Exposure to Asbestos; Construction Industry
29 CFR 1910.134	Use of Respirators

5.2. ENVIRONMENTAL PROTECTION AGENCY

40 CFR 61, Subpart M	National Emission Standard for Hazardous Air Pollutants (NESHAP); Asbestos Regulations
40 CFR 763, Appendix C to Subpart E	Asbestos School Hazard Abatement Reauthorization Act (ASHARA)/ Asbestos Model Accreditation Plan

5.3. STATE OF CALIFORNIA ASBESTOS REGULATIONS

22 CCR§25910	Prohibiting or regulating the use of asbestos
California Codes: California Business and Professional Code§7180-7189.7	Certification of Asbestos Consultant
Cal. Codes: Cali. Business and Professional Codes§7058.5-7058.8	Accreditation Requirements
California Labor Code § 6501	Registration Requirements
Title 8 California Code of Regulations (CCR) § 5208 and 1529	Exposure Regulations and Construction Safety Orders
8 CCR, Chapter 4§1529	Regulates Asbestos exposure in all construction work. Cal. Codes: Public Resources Code §44820 Disposal Requirements
8 CCR§341.15	Certification of Asbestos Consultants and Site Surveillance

CAL OSHA Standard	Technicians (Certification is required for individuals who contract to provide health and safety services for asbestos-related work, projects involving more than 100ft^2 of asbestos-containing construction material meaning having a asbestos fiber content of more than 0.1%.) Friable materials are defined as those which can be crumbled or reduced to powder by hand pressure.
Cal. Codes: California Business and Professional Code§7028.1	Making it a misdemeanor for any contractor to perform or engage in asbestos-related work without certification pursuant to Section 7058.5.
22 § 25915 et seq	Asbestos Notification Requirements
Cal. Codes: Education Code § 49410	Asbestos Material in Schools

6. ASBESTOS-CONTAINING MATERIALS AT STEVENS CREEK OFFICE CENTER

The list of ACMs is based on information contained in the following report:

- Phase I Environmental Site Assessment (ESA) prepared by EMG and dated June 27, 2014 (EMG Project No. 109568.14R-001.135). According to the ESA:

  Suspect non-friable ACM, in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics, were identified. These materials were observed to be in good condition.

  Based on the Scope of Work, no samples were collected.

The above listed results are not a comprehensive asbestos survey and should not be relied upon as such.

Additional ACMs and/or presumed ACMs may be located at the Project in areas not accessed by the inspector or because of limited sampling and analysis conducted as part of the screening. Therefore, additional inspection is recommended of any areas that may undergo renovation or demolition. Furthermore, initial or additional sampling may be necessary prior to disturbance of specific suspect/presumed ACMs.

Asbestos-containing materials have been presumed (PACM), or have been identified (ACM) at the Project by laboratory analysis of bulk samples. If ACM has been identified, the documentation should be utilized as part of this O&M Plan.

The basis for "assumed" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place* (the "Green Book"), and from the OSHA Asbestos in Construction Standard (29 CFR 1926.1101). Therefore, all materials listed in the Green Book that were installed prior to 1989 are considered suspect with the exception of resilient flooring and associated mastics, asbestos-cement board (Transite), and some roofing materials. These materials are considered suspect regardless of installation date because they have not been banned by the USEPA.

Prior to conducting any maintenance work which may disturb any suspect ACMs (including, but not necessarily limited to those listed in the following three report subsections), the APM should determine whether any known or suspect ACM(s) will be potentially disturbed. The APM should review O&M Program records to determine whether all materials that may be disturbed have been adequately sampled and analyzed for asbestos content. If suspect ACM(s) will be potentially disturbed, the APM should arrange for sampling and analyses of the suspect ACM(s) prior to commencement of work. In lieu of sampling and analyses, suspect ACMs can be assumed to be and treated as asbestos-containing.

Determining whether any suspect ACMs will be disturbed by maintenance work, renovation, or demolition may be accomplished through review of previous inspection and sampling records (if available). However, if insufficient data is available, inspection and possibly sampling must be conducted by a properly trained and/or licensed APM, properly trained/licensed O&M personnel, or a properly certified and/or licensed asbestos consultant.

Sampling and analysis of suspect ACM materials should be done prior to repairs, renovation, or demolition activities that may cause a disturbance. Until sampled, these materials should be maintained in-place in good condition as part of the Operations and Maintenance Program. If these materials are damaged, they should be treated as friable materials.

Any identified asbestos-containing materials (in quantities greater than three square or linear feet) that are damaged should be repaired or removed by a licensed asbestos contractor in accordance with all applicable federal, state, and local regulations. Repair or removal should be supervised by an independent, third party industrial hygiene firm.

Generally, other types of ACMs/PACMs at the Project may include, but are not necessarily limited to the following:

- Vinyl flooring materials and associated mastics
- Roofing materials
- Wallboard – joint compound
- Spackling compounds
- Other mastics (i.e. carpet or ceiling tile)
- Caulking / Putties
- Cement Wallboard
- Sprayed-on or troweled –on acoustical
- Textured paints / coating
- Stucco
- Cement Siding
- Fireproofing
- Fire doors
- Fire blankets
- Fire curtains
- Chalkboards
- Vinyl Wall Coverings
- Ceiling tiles and Lay-in panels
- Decorative plaster
- Blown-in insulation
- Pipe insulation
- Pipe fitting insulation
- Duct or flue insulation
- Insulation seam sealants
- Heating and electrical ducts
- Flexible duct work connectors,
- Duct work taping cloth,
- Duct work mastic
- Boiler or tank insulation or insulation
- Electrical cloth
- Electrical panel partitions
- High temperature gaskets
- Cooling tower panels or other cement (Transite) panels/materials
- Elevator brake shoes and equipment panels
- Window glazing.

It is EMG's opinion that Resilient Flooring materials, Mastics, asphalt roofing products, joint compound, and Transite materials installed at any time, as well as the remaining listed materials installed prior to 1989 should be considered suspect ACMs. Therefore, any such material applications located at the Project should be assumed to contain asbestos, (unless sampled and proven otherwise) and should be maintained in good condition, in accordance with this O&M Program.

Sampling and analysis of suspect/presumed ACM materials should be done prior to repairs, renovation, or demolition activities that may cause a disturbance.

7. O&M PROGRAM IMPLEMENTATION

7.1. WORKER TRAINING

The Owner shall, at no cost to the employees, institute a training program for the following employees:

- Employees who perform repair and maintenance operations where ACM/PACM is likely to be disturbed (Class III asbestos work).
- Employees who perform maintenance, custodial, or housekeeping activities during which employees contact, but do not disturb, ACM or PACM and activities to clean up dust, waste, and debris resulting from Class I, II, and III activities (Class IV asbestos work).

Training shall be provided prior to or at the time of initial assignment, and at least annually thereafter (for Class III work).

Any maintenance staff that may be expected to perform Class III and IV work shall receive training equivalent to the 16-hour Operations and Maintenance course developed by EPA for maintenance and custodial workers who conduct activities that will result in the disturbance of ACM/PACM. (Work Practices, worker protection and other guidelines necessary for completion of Class III work are not contained within this O&M Program and must be obtained upon training.) The training course shall include "hands-on" training in the use of respiratory protection and work practices. A 16-hour training course is required under most circumstances to meet this requirement. If duties are limited to activities such as changing of gaskets, a course of lesser duration may be sufficient. An annual refresher course of four hours is also required.

Although only a 16-hour course is required for employees conducting Class III, EMG recommends that the acquisition of EPA accreditation under the Asbestos Hazard Emergency Response Act (AHERA) or state certification as an Asbestos Worker.

Training for maintenance, custodial, or housekeeping staff (performing Class IV work) shall consist of training equivalent in curriculum and training method to the awareness training course developed by EPA for maintenance and custodial workers who work in buildings containing ACM. The course shall include available information concerning the locations of ACM and instruction in recognition of damage, deterioration, and delamination of ACM. A two-hour initial training course and two-hour annual refresher course will meet this requirement.

OSHA asbestos regulations require that the Employer inform all employees of the availability of self-help smoking cessation program material. Upon employee request, the employer shall distribute such material, consisting of NIH Publication No. 89-1647, or equivalent self-help material, which is approved or published by a public health organization.

7.2. VISUAL REINSPECTION

A visual reinspection of the Project should be conducted by the APM or by properly trained O&M personnel immediately upon completion of APM training. One purpose of the reinspection is to identify all ACM, PACM, or hazardous conditions that may have been overlooked upon previous inspection (Oversights may have occurred due to lack of training or understanding). The reinspection should be conducted utilizing the **ACM Inspection Form** that is included in Appendix D.

Another purpose of the reinspection is to determine the need for **Notifications**, **Labeling**, and **Signage**. Based on the locations and conditions of ACMs and PACMs present at the Project, these activities may be recommended or required (see Sections 7.4, 7.5, and 7.6).

All records of inspection, notifications, etc. should be maintained within the permanent O&M Program files.

7.3. INITIAL CLEAN-UP / ABATEMENT / TESTING

The APM shall immediately address any damaged ACM/PACM conditions identified during any initial inspections or reinspections. Actions taken by the APM may be self-directed or based on consultation with EMG or other consulting personnel. Appropriate response actions may be as simple as restricting access to affected areas of the Project to properly trained and/or protected personnel. Response actions may also include abatement (repair, removal, enclosure, etc.) of damaged material or hazardous conditions. Sampling of damaged materials may also be necessary prior to determination of appropriate response actions.

Damaged ACM/PACM conditions or any other evidence of an asbestos fiber release will be recorded on an Asbestos Fiber Release Episode Report Form (Appendix G). The form will be completed upon remediation of the condition.

All records of sampling, analysis, and abatement actions should be maintained within the permanent O&M Program files.

7.4. NOTIFICATION

BUILDING PERSONNEL NOTIFICATION

It is important to undertake an honest and open approach to the Asbestos notification procedure. People who are informed of the presence, location and condition of ACM/PACM in a building where they work, who understand that the mere presence of Asbestos is not necessarily hazardous to them, and who accept that Asbestos can often be managed effectively in place, can be very helpful to the owner or APM in eliminating or reducing hysteria on the part of other less informed building occupants.

This section is intended to comply with the Hazard Communication requirements of the OSHA Asbestos in Construction Standard (29 CFR 1926.1101(k)). Persons who use, occupy, or are affected by an area where ACM work will occur should be notified prior to the start of the work. OSHA regulations include mandatory notification of certain personnel prior to the performance of work regulated by OSHA. The APM shall notify the following persons of the presence, location and quantity of ACM at the work sites in their building and facilities:

- Prospective employers applying or bidding for work whose employees reasonably can be expected to work in or adjacent to areas containing ACM/PACM.
- Employees of the owner who will work in or adjacent to areas containing ACM/PACM (Maintenance and Custodial personnel).
- On multi-employer worksites, all employers of employees who will be performing work within or adjacent to areas containing ACM/PACM.
- Employers of employees (commercial tenants) who will occupy areas containing ACM/PACM.

Notification either shall be in writing, or shall consist of a personal communication between the APM and the person to whom notification must be given or their authorized representative. In either case, record of the notification shall be included in the O&M Program files.

Regardless of the format, the following information should be included with the notifications (also see the Example Notification Letter in Appendix E):

- ACM/PACM has been identified in the building and is located in areas where the material could be disturbed.
- The location and condition of the ACM/PACM, and the response that is appropriate for that condition.

- Asbestos only presents a health hazard when fibers become airborne and are inhaled. The mere presence of Asbestos within a building does not represent a health hazard.
- Do not disturb the ACM/PACM.
- Report any evidence of disturbance or damage of ACM/PACM to the APM.
- Report any dust or debris that might come from the ACM or PACM, any change in the condition of the ACM/PACM, or any improper action (relative to ACM/PACM) of building personnel to the APM.
- Cleaning and maintenance personnel are taking special precautions during their work to properly clean up any asbestos debris and to guard against disturbing ACM/PACM.
- All ACM/PACM is inspected periodically and additional measures will be taken if needed to protect the health of building occupants.

Personnel should be given information about

- The specific work to be performed,
- The work schedule, precautions being taken,
- What will be visible during the work, and
- Posted warning sign

Section 4 of the EPA Green Book includes information on occupant, tenant and worker notification of the presence of ACM that might be helpful to the APM.

If O&M work occurs frequently, and notification is needed, a general notice to affected personnel might be more convenient than notifying these personnel each time work occurs.

FEDERAL, STATE AND LOCAL NOTIFICATIONS

The APM, his designee, or abatement contractor should file all notices required by federal, state and local regulations prior to the start of any O&M activities that are governed by these regulations.

Federal Notifications

Federal requirements for notification are set forth in the National Emission Standards for Hazardous Air Pollutants (NESHAP) rules and the EPA Worker Protection Rule. For demolition and renovation work, the latest NESHAP revisions are contained in 40 CFR 61.145 (a) and (b). A ten working day federal notification is required for renovation work if the combined amounts of regulated ACM (RACM - see glossary or NESHAP for definition) to be stripped, removed, dislodged, cut, drilled or similarly disturbed is over 260 linear feet (80 linear meters), 160 square feet (15 square meters) or 35 cubic feet (1 cubic meter) for any single project. EPA's NESHAP rules specifically warn that "single projects" cannot be subdivided into smaller projects in an attempt to avoid notification requirements.

Also, if the combined estimated quantities of RACM to be removed or stripped in individual non-scheduled operations during a calendar year (January 1 through December 31) exceeds the amounts listed above, a NESHAP notice must be submitted at least ten working days before the end of the calendar year (e.g. December 15) preceding the year for which notice is being given. A new written notice must be filed with the EPA if the start date for a project is revised (earlier or later) from the date filed in the original or a previous notice. A notice must be updated if the amount of asbestos affected changes by 20 percent or more.

If wetting of RACM during removal would unavoidably damage equipment or present a safety hazard, written approval from the EPA is required for alternative emission control methods (dry removal).

The NESHAP notification requirements for emergency renovation work are set forth in 40 CFR 61.145 (a) and (b). See NESHAP regulations for details on Federal notification requirements. Additional requirements might also be included in state or local regulations.

State and Local Notification Requirements

State and local notification requirements vary greatly. Many states and localities have notification requirements that are more stringent than the federal requirements. State and local requirements concerning permits for any repair or renovation work must be reviewed. State and local requirements must be complied with before work is scheduled and commenced.

7.5. LABELING

In order to inform Maintenance, Custodial, and other personnel of potential asbestos hazards, asbestos labeling and/or signage may be necessary at the Project. If easily damaged ACMs or PACMs are present in maintenance areas of the Project, labels should be affixed directly to the ACMs/PACMs or warning signs should be posted (as discussed in the following section). Easily damaged ACMs/PACMs include thermal system insulation (TSI) materials, surfacing material, or any other friable materials (also see Section 5 for a list of identified friable ACMs/PACMs).

If ACM/PACM labeling is conducted, then labels shall be affixed to all friable ACMs/PACMs within each mechanical or other building area that is not accessible to the public, but is accessible to maintenance, custodial, or contracted personnel.

Labels must also be affixed to all containers containing such products, including waste containers, regardless of signage.

Labels shall be printed in large, bold letters on a contrasting background.

Labels shall bear the following information:

DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD

7.6. SIGNAGE

If signage is conducted at the Project in addition to or in-place of labeling, then warning signs should be posted at the entrance to mechanical rooms/areas in which employees reasonably can be expected to enter and which contain thermal system insulation material, surfacing ACM, or other friable ACM(s) (also see Section 6). This includes each mechanical or other building area that is not accessible to the public, but is accessible to maintenance, custodial, or contracted personnel. The APM shall post signs that identify the ACMs/PACMs which is/are present, its/their location, and appropriate work practices which, if followed, will ensure that ACM/PACM will not be disturbed.

No example of a mechanical room/area sign is provided since they can vary greatly, depending on the types of ACMs present.

The APM should also ensure that warning signs are posted by any asbestos removal contractors conducting work within their building(s). Warning signs that demarcate the regulated area during a response action shall be provided and displayed at each location where a regulated area is established. Signs shall be posted at such a distance from the regulated area that an employee may read the signs and take necessary protective steps before entering the area marked by the signs. These warning signs shall bear the following information:

DANGER:
ASBESTOS
CANCER AND LUNG DISEASE HAZARD
AUTHORIZED PERSONNEL ONLY
RESPIRATORS AND PROTECTION
CLOTHING ARE REQUIRED IN THIS AREA

7.7. PERIODIC SURVEILLANCE

Reinspection of all ACM/PACM in common and employee accessible areas should be conducted by the APM upon implementation of this Program (as discussed in Section 7.2) and at least every six months thereafter. In addition, Maintenance and Custodial Workers should be trained to conduct Asbestos surveillance on a periodic basis as part of their regular duties at the facility. Maintenance and custodial staff can conduct an Asbestos surveillance within common areas, employee areas, as well as other areas while conducting their regular job duties. Any damaged ACM/PACM identified by Maintenance and Custodial personnel shall be brought to the immediate attention of the APM.

Damaged ACM/PACM conditions or any other evidence of a asbestos fiber release will be recorded on an Asbestos Fiber Release Episode Report Form (Appendix G). The form will be completed upon remediation of the condition.

Every six months a member of the building staff or management should survey known ACM/PACM sites in the building and prepare a report indicating change in condition. The **ACM Inspection Form** in Appendix D can be utilized for the Periodic Surveillance.

During the semi-annual periodic surveillance, the APM or designee will personally observe the condition of all ACM/PACM at the facility and schedule the appropriate response action when necessary. If damaged ACM/PACM is identified, the APM will determine if the material can be effectively maintained in the Operations and Maintenance Program, or if based on the risk of asbestos fiber release, removal, repair, encapsulation or enclosure is warranted. In the event that new damage is noted, a licensed contractor should be engaged to correct the condition. The APM shall schedule repair of damaged material when necessary.

Any removal of ACM/PACM where the primary purpose is removal, as opposed to the cutting away of small amounts of ACM/PACM in order to access a building component, shall be considered asbestos abatement. Asbestos abatement (removal, repair, encapsulation and/or enclosure) at the facility shall be accomplished by a licensed asbestos contractor. In addition, any disturbance of ACM greater than that which can be contained in one standard sized glovebag or waste bag (which does not exceed 60 inches in length and width) shall be performed by a licensed asbestos contractor.

If the reinspection discovers no change in ACM/PACM conditions and all materials are in good condition, then this too should be included in the report. This report should then become part of the building's permanent O&M Program file, which must be kept for a minimum of 30 years.

It would be prudent for the APM to have the Project reinspected every three years by a licensed asbestos inspector[3]. The inspector will prepare a report on the ACM/PACM conditions and recommended response actions (if any). If remedial action is needed, then a licensed asbestos abatement contractor should be engaged to make the area(s) safe.

The APM should also consider having the Project inspected by a licensed asbestos inspector whenever building demolition, alteration, renovation, or modification work is planned, or for any work at the Project that will potentially disturb ACM or PACM.

The APM should consider contacting the asbestos consultant prior to initiating asbestos abatement work. Depending on the scope of work, detailed project specifications may be necessary to ensure satisfactory project completion. In addition, the latest EPA Asbestos Model Accreditation Plan requires that an EPA accredited Project Designer design any abatement activities that are beyond the scope of an O&M Plan.

7.8. RECORD KEEPING

RECORD KEEPING REQUIRED BY THIS PROGRAM

All documentation required by this O&M Program shall be stored in permanent files for the life of the facility and must be transferred to successive owners of the facility. Records shall be maintained for all activities involving ACM/PACM and shall include: those records listed below, contractor and other personnel notifications and reports, and all other documentation of Program compliance.

The following records (as applicable) of O&M work should be retained in permanent files:

- ACM Inspection Forms (Appendix D), any reinspection reports, assessment reports, or sampling data
- A copy of the O&M Program (initial Program and all updated versions)
- The Work Practices Used
- Respiratory Protection Program
- Fiber Release Reports
- Job Request Forms for Maintenance Work (Appendix A)
- Maintenance Work Authorization Forms (Appendix B)
- Periodic Surveillance Reports
- Waste Tracking and Disposal (Appendix C)
- Air Monitoring Data
- Qualifications and Performance Records for Outside Contractors performing O&M work
- Verification of Employee Training (Appendix F)
- Data to rebut presumption that materials are asbestos containing. For employers with employees engaged in asbestos-related work[4], federal regulations require that the employer retain:
- Personal Air Sampling/Exposure Monitoring Records
- Historical Data (used to qualify for exemptions from OSHA's initial monitoring requirements)
- Medical Records (for employees subject to a medical surveillance program)
- Employee Training Records
- Fit Test Records (for employees that use respirators)
- Data to rebut presumption that materials are asbestos-containing.

[3] This triennial inspection originally started with a EPA regulation pertaining to schools, but is now considered good practice for any facility.
[4] This applies to Class III work, as well as to Class I and Class II work.

Under the Records Access Standard (29 CFR 1910.20), the Hazard Communication Standard (29 CFR 1910.1200 & 1926.59), and the asbestos in construction standard (29 CFR 1926.1101(n), OSHA requires that employers provide to each employee his or her record of exposure and medical surveillance (if applicable). If necessary, refer to the OSHA Asbestos in Construction Rule (29 CFR 1926.1101), the EPA Worker Protection Rule (40 CFR 763 Subpart G) and/or the Green Book for details on Record keeping requirements. Note that state and local regulations may require that additional information be recorded and retained.

EPA recommends that building owners make available all written elements of the O&M Program to the building's O&M staff, as well as to tenants and building occupants, if applicable. Building owners are also encouraged to consult with their legal counsel concerning appropriate record keeping strategies as a standard part of their O&M programs.

TRAINING RECORDS

In accordance with the OSHA Asbestos in Construction Standard, the employer must maintain training records for one year beyond the last date of employment for each affected employee.

INSPECTION, HAZARD ASSESSMENT AND ABATEMENT RECORDS

Asbestos inspections, hazard assessments, abatement records and any other information concerning the identification, location and quantity of ACM/PACM shall be maintained by the APM for the life of the facility, and must be transferred to successive owners of the facility.

OBJECTIVE DATA

In accordance with the OSHA Asbestos in Construction Standard, objective data relied upon as part of an *Initial Exposure Assessment* or a *Negative Exposure Assessment* (See Appendix I, Glossary) must contain the following listed information. Note: an initial or negative exposure assessment should not be necessary unless Class I, II, or III[5] Asbestos Work is performed.

- The product qualifying for exemption;
- The source of the objective data;
- The testing protocol, results of testing, and/or analysis of the material for the release of asbestos;
- A description of the operation exempted and how the data support the exemption;
- Other data relevant to the operations, materials, processing, or employee exposures covered by the exemption.

Objective data records shall be maintained for the duration of the employer's reliance upon such objective data.

EXPOSURE ASSESSMENT RECORDS

Exposure assessment records must include the following information. Note: an exposure assessment should not be necessary unless Class I, II, or III Asbestos Work is performed.

- The date of measurement;
- The operation involving exposure to asbestos that is being monitored;
- Sampling and analytical methods used and evidence of their accuracy;
- Number, duration, and results of samples taken;
- Type of protective devices worn, if any;
- Name, social security number, and exposure of the employees whose exposures are represented.

Exposure assessment records shall be maintained for at least 30 years.

[5] Class III work has been previously defined in this document. Class I and Class II work is removal of ACM or PACM that is usually performed by accredited abatement contractors.

MEDICAL SURVEILLANCE RECORDS

Medical surveillance records must include the following listed information. Note: Medical Surveillance of employees should not be necessary unless Class I, II, or III Asbestos Work is performed (see reference to footnote (4) on previous page for explanation).

- The name and social security number of the employee;
- A copy of the employee's medical examination results, including the medical history, questionnaire responses, results of any tests, and physician's recommendations;
- Physician's written opinions;
- Any employee medical complaints related to the exposure to asbestos;
- A copy of the information provided to the physician;

Medical surveillance records must be maintained for the duration of employment plus 30 years.

TRANSFER OF RECORDS

In accordance with the OSHA Asbestos in Construction Standard, if the employer ceases to do business and there is no successor employer to receive and retain records for the prescribed period, the employer shall notify the Department of Labor (DOL) at least 90 days prior to disposal and, upon request, transmit the records to the DOL.

8. O&M WORK PRACTICES

8.1. EMERGENCY RESPONSE PROCEDURES

As long as ACM remains in the Project, a fiber release episode could occur if the ACM/PACM is inadvertently disturbed. Building staff will immediately report to the APM the presence of suspect asbestos containing debris on the floor, water or physical damage to the ACM/PACM, or any other evidence of a fiber release. At the same time, an Asbestos Fiber Release Episode Report Form (Appendix G) will be initiated; and subsequently completed upon remediation of the condition.

The APM will conduct the following procedures:

- Evaluate the extent of ACM/PACM damage;
- Barricade contaminated areas against entry by unauthorized personnel;
- Isolate the contaminated area by sealing doors and vents with polyethylene sheeting and duct tape (or equivalent),
- Shut off or isolate the affected air handling system to prevent asbestos migration
- Post a warning sign outside the contaminated area; and
- Contact an Asbestos Consultant.

If extensive damage or delamination of ACM/PACM has occurred (e.g., greater than three square feet or three linear feet) consider total removal of the ACM by a pre-approved abatement contractor in the affected area(s), followed by replacement with a non-asbestos containing material[6].

8.2. AREAS WITH FRIABLE ACM

Friable ACM (for example, sprayed-on fireproofing on the structural element of the Project; and thermal system insulation [TSI] on the pipes, elbows, and/or boiler, and other vessels) will not be disturbed in quantities greater than three square feet or three linear feet by anyone other than the approved licensed abatement contractors. If any material dislodges because of the accidental disturbance or water leak, an Asbestos Consultant will be contacted as soon as possible after the area is secured. The Asbestos Consultant will contact an approved abatement contractor to respond to the emergency.

8.3. AREAS WITH NON-FRIABLE ACM

Non-friable ACM (for example, floor tile, mastic, and cementitious asbestos panels [e.g., Transite]) typically release fibers only when damaged or disturbed. Fiber releases can occur when workers drill, cut, abrade, break, or saw vinyl asbestos floor tile or any other non-friable material. General cleaning and maintenance, however, will not damage the material. USEPA has instituted recommended guidelines that should be followed by the building staff when stripping wax or finish coat from asbestos-containing flooring (see section 8.5).

[6] It would be prudent of the APM to have representative samples of the new material tested for asbestos content prior to installation (refer to section 6 of this document for a list of PACMs).

8.4. COMMON MAINTENANCE ACTIVITIES IMPACTING ACM

Some examples of maintenance activities performed in specific locations, which may impact suspect or confirmed ACM are listed below. This work must be performed by taking the proper care and precautions, so as to not disturb the ACM.

Examples of Maintenance Activities Which May Potentially Impact ACM/PACM

- Maintaining Thermal Pipeline System
- Repairing Leaking Pipe Fittings
- Removal of Overlay Carpeting; Buffing
- Sanding or Grinding Floor Tiles
- Duct Riser Repair or Maintenance
- Accessing Columns or Walls, Repairing Light Fixtures
- Access to Above Suspended Ceilings
- Changing Fluorescent Light Bulbs

As required by applicable Federal, State and/or local laws and regulations, the APM will inform employees about the location and physical condition of ACM/PACM that may be disturbed. In addition, common safety practices have been included in Appendix H at the end of this document.

8.5. GUIDELINES FOR REMOVING A FINISH FROM ASBESTOS CONTAINING FLOORING

1. PROPERLY TRAIN STAFF. Custodial or building staff who strip floors will be trained to operate the machines and pads and use floor care chemicals properly and safely
2. AVOID STRIPPING FLOORS. Stripping of floors will be done as infrequently as possible, perhaps once or twice a year or less, depending on circumstances. The frequency will be carefully considered when floor maintenance schedules or contracts are written or renewed.
3. FOLLOW APPROPRIATE WORK PRACTICES. Custodial or building staff who strip floors will follow appropriate work practices, such as those recommended here, under informed supervision. Directions from floor tile and floor wax product manufacturers on proper maintenance procedures will be consulted.
4. STRIP FLOORS WHILE WET. The floor will be kept adequately wet during the stripping operations. DO NOT perform dry stripping. Prior to machine operation, an emulsion of chemical stripper in water is commonly applied to the floor with a mop to soften the wax or finish coat. Stop stripping when the old surface coat is removed. Over-stripping can damage the floor and may cause the release of asbestos fibers. DO NOT operate a floor machine with an abrasive pad on unwaxed or unfinished floors. After stripping and before application of the new wax, the floor will be thoroughly cleaned while wet.
5. RUN MACHINE AT SLOW SPEED. If the machine used to remove the wax or finish coat has variable speeds, it will be run at slow speed (about 175-190 rpm) during the stripping operations.
6. SELECT THE LEAST ABRASIVE PAD POSSIBLE. USEPA recommends that the machine be equipped with the least abrasive pad possible to strip wax or finish coat from asbestos-containing floors.

NOTE: Improperly removing asbestos-containing floor coverings could result in the release of high levels of asbestos fibers. USEPA *recommends* that you leave asbestos-containing floor covering in place, provided the material is in good condition. However, proper maintenance procedures, such as those previously outlined, should always be followed.

8.6. CLEANING

Cleaning up within specific areas of the Project is one of the primary objectives of the O&M Program. The APM shall retain a licensed asbestos abatement contractor to conduct initial cleaning in areas of the Project where damaged ACM/PACM are present as soon as the O&M Program is in place and before the initiation of any response action.

All cleaning activities are to be recorded and included in the O&M manual.

The licensed asbestos abatement contractor will also conduct subsequent minor repair and routine maintenance.

INITIAL CLEANING

When damaged ACM/PACM is present, the asbestos abatement contractor must HEPA vacuum and, if possible, wet clean all areas in the immediate vicinity. This includes cleaning all surfaces, such as shelves, walls, light fixtures, equipment housing, and exterior of ducts, with damp cloths or a HEPA vacuum.

All mop heads, damp cloths, liquid wastes, debris, filters, or vacuum bags must be disposed as asbestos-contaminated waste.

PERIODIC CLEANING

The determination of when/where periodic cleaning is needed is based on the rate of dust buildup. This determination will be made as part of the periodic inspection. If cleaning is necessary, a pre-qualified licensed asbestos abatement contractor will clean the areas.

The abatement contractor shall remove any debris found near damaged ACM using a HEPA vacuum or wet methods. The contractor shall HEPA vacuum and/or steam clean all carpets in rooms with damaged ACM and wet wipe all surfaces in the area. If steam cleaning is used, the liquid waste generated during the process must be disposed as asbestos-contaminated waste. The contractor must dispose of debris, filters, and/or vacuum bags as asbestos-contaminated waste.

8.7. WORK PRACTICES FOR MAINTENANCE ACTIVITIES

Before conducting any maintenance or repair work that will damage or disturb ACM, the APM shall inspect the area to update and determine appropriate action(s). Whenever the potential for release of asbestos fibers from ACM exists (for example, sanding floor tile, repairing a pipe leak, or installing conduit above a suspended ceiling), an outside asbestos abatement contractor, will perform the work procedures in the aforementioned sections.

Basic O&M procedures to minimize and/or contain asbestos fibers may include wet methods, use of mini-enclosures, use of portable power tools equipped with special local ventilation attachments, and avoidance of certain activities, such as sawing, sanding, and drilling ACM.

NOTE: During O&M procedures, personal air monitoring should be performed. In addition, all asbestos waste (generated during these activities) must be handled in accordance with all local, state, and federal requirements.

Maintenance activities can be divided into three categories with regard to their potential for disturbing ACM:

CONTACT WITH ACM UNLIKELY - IN-HOUSE PERSONNEL

Maintenance activities or repairs that can be performed without contacting or disturbing the ACM/PACM require little more than normal care and good workmanship and can be performed by in-house personnel. These include, but are not limited to:

- Repairing non-ACM insulated pipes or valves without disturbing other ACM/PACM.
- Routine cleaning activities

All surfaces will be isolated to remove any settled fibers in the event that ACM/PACM are disturbed. If more than three square feet or three linear feet are disturbed, then a licensed abatement contractor should be called.

CONTACT WITH ACM NOT LIKELY BUT POSSIBLE

Maintenance activities or repairs that may have the potential to cause accidental disturbance of ACM/PACM require some precautions. This work may be performed by trained maintenance staff only, since it requires information and guidance (for example, additional training and worker protection procedures) beyond the scope of this O&M Program. For this work to be completed, proper precautions must also be instituted to minimize the potential ACM disturbance. For example, special cleaning, possibly area isolation and respiratory protection, may be needed if the chance of disturbance is likely. Activities that fall into this category include, but are not limited to:

- Working on a fixture near thermal system ACM;
- Working on a fixture above suspended ceilings where asbestos-containing sprayed-on fireproofing or troweled-on acoustical material is present;
- Installation of telecommunication or electrical conduits above suspended ceiling; and
- Repairing of a pipe that is not insulated with ACM but will disturb ACM on nearby pipes.

CONTACT WITH ACM LIKELY OR INTENDED

Maintenance activities or repairs that involve intentional manipulation or disturbance of ACM require special work practices when done on a large scale (greater than three square or linear feet). A licensed abatement contractor must remove ACM before in-house personnel can perform their duties. The asbestos contractor must use personal protective equipment, including respirators and Tyvek suits. In addition, personal air monitoring, and other procedures must be followed when ACM is disturbed under these conditions.

Typical activities include but are not limited to:

- Removing a thermal system insulation to repair a pipe leak or replace a valve; and
- Removal of surfacing ACM to install new conduits or pipe braces.

Prior to performing any maintenance activities that will disturb ACM, the APM shall contact an Asbestos Consultant to provide area air monitoring before, during, and after the ACM disturbance, if necessary.

NOTE: **Under no circumstances will any in-house employee perform this type of abatement work, unless s/he has successfully completed an EPA-approved asbestos worker course, and an asbestos supervisor is present during the project.**

8.8. SPECIAL WORK PRACTICES FOR PLANNED RENOVATION WORK

Future renovations may involve disturbing ACM or PACM and may also uncover building materials that were previously hidden and may contain asbestos. Work, such as moving walls, adding wings, and replacing heating or air-conditioning systems may involve breaking, cutting, or otherwise disturbing ACM.

All parties must be aware of potential ACM disturbance early in the project planning stage to determine appropriate actions. Partial or full removal may be necessary before renovation.

An independent Asbestos Consultant should develop guideline specifications or work plans in accordance with USEPA, OSHA, state, and local regulations, if necessary, for use by the asbestos abatement contractor.

An Asbestos Consultant shall ensure that the asbestos abatement contractor perform all work in compliance with applicable federal, state, and local laws and regulations. The Asbestos Consultant can assist in maintaining records of work, including copies of the specifications and closeout documentation.

9. RECOMMENDED O&M WORK CONTROL/PERMIT SYSTEM

INTRODUCTION

The Work Control/Permit System described in this section is intended to assure communication between the APM, the maintenance staff, and outside contractors who may have been hired to work in the facility. This system is not designed to address all sizes and varieties of jobs that may cause potential asbestos disturbance. The forms and procedures utilized in this section and in this O&M Program may be more burdensome than is necessary for smaller jobs, depending on the types of ACMs or PACMs that are present at the Project.

Determination of which forms and Work Control/Permit System to use will be Project and situation dependant. Guidelines for which forms and procedures to use for typical or emergency work requests should be made by the APM at each Project. Subsequently, these guidelines should be outlined in interoffice correspondence or personnel training documents. Hence, the APM can develop Project specific guidelines for the types of activities that require completion of O&M forms, and guidelines for which forms to use for different materials and situations. Therefore, the guidelines for O&M Program procedures at each Project can be made by the APM, or through consultation with the Asbestos Consultant.

WORK CONTROL/PERMIT SYSTEM

The APM or a designee should review O&M general procedures with all workers who will perform activities in the presence of ACMs. Workers should be notified to consult with the APM or the APM's designee if they have any questions, if any problems occur, if ACM/PACM disturbance may occur, or if it appears to the workers that additional precautions might be necessary to safely perform their duties.

This section describes one suggested method of O&M work tracking and record keeping procedures utilizing the attached and appended checklists, figures, and forms. A checklist (Figure 1) that guides the APM through necessary decisions and use of the appended tracking forms is provided below. A flowchart illustrating the typical decision scenarios and use of the appended forms is shown in Figure 2. The process of controlling, tracking, and record keeping for O&M work in order to minimize improper ACM disturbance can be achieved using forms contained in this O&M Program. Use of the forms contained in this O&M Program is summarized below. The numbered discussions presented below correspond to the numbers presented on the Checklist and the Flowchart.

(1) As part of maintenance and custodial personnel training, O&M personnel are informed of the locations and conditions of ACMs, suspect ACMs, and PACMs. Personnel are also informed of routine custodial activities that can be performed without pre-authorization from the APM. Personnel are trained to recognize ACMs, suspect ACMs, and PACMs and recognize conditions that require review by the APM prior to commencement of work. That is, the APM sets guidelines for all other building personnel regarding work that can be performed without initiating the O&M Work Control/Permit System (completion of a **Job Request Form** initiates the System). The APM also sets guidelines regarding the types of work or materials disturbance that require initiation of the System. Guidelines may be different for each Project, dependant on the variety of ACMs, suspect ACMs, and PACMs as well as conditions present at each Project. Guidelines are set by the APM for each Project.

A **Job Request Form** (Appendix A) should be completed prior to maintenance work or other O&M activities, as the necessity for form completion is determined by the APM and subsequently prescribed by the O&M Program. The **Job Request Form** should be initiated by maintenance or custodial personnel for work that could disturb ACM. If the required work has been performed in the past, it might not be necessary to complete an **APM Checklist** for each O&M activity. Past checklists can be reused for determination of procedures.

(2) Before commencing renovation, remodeling, demolition, repairs, or maintenance activities that may disturb ACM, suspect ACM, or PACM, an inspection for the presence of ACM must transpire. This shall include but not be limited to inspection of this Project's O&M Program to identify previously surveyed areas. The APM should review building inspection information to determine whether or not all suspect materials in the work area have been previously sampled and analyzed for asbestos content. The APM may need to inspect the area in which work will occur to determine the building materials that may be disturbed during the requested work. The APM should initiate an **APM Checklist** (Figure 1) and evaluate the work to be performed based upon the information on a completed **Job Request Form**, available survey and assessment data, and data on past O&M activities (if available). When reviewing data and completing the **APM Checklist**, the following should be determined:

- Whether the job requested is actually an asbestos O&M activity.
- The category(ies) of ACM that might be encountered during the work (friable or non-friable; surfacing ACM, Thermal System Insulation (TSI) ACM, and/or miscellaneous ACM).
- Whether an ACM/PACM disturbance is likely to occur.

All of the above information should be recorded on a **Maintenance Work Authorization Form** (Appendix B). If the APM determines that no ACMs, suspect ACMs, or PACMs are likely to be disturbed during the work described on the **Job Request Form**, the various forms are completed and signed, and the requested job is allowed to proceed.

(3) If the APM determines that ACMs, suspect ACMs, or PACMs will be potentially disturbed during the requested work, then work cannot proceed without further action. If all building materials that will be disturbed have been tested during previous investigations, and it is known which materials are asbestos-containing and which materials are non-asbestos containing, than the work can proceed without further investigation and/or testing. However, the APM should engage a licensed asbestos abatement company to abate (remove, encapsulate, or enclose) the known ACM so that no ACM will be disturbed during the renovation work.

(4) If upon inspection of the work area, a material or area is identified which may be disturbed and has not been represented by previous survey and sampling efforts, then all such suspect ACMs should either be sampled by a licensed asbestos inspector and analyzed in accordance with EPA regulations, or be assumed to contain asbestos and treated accordingly. The APM shall employ the services of an environmental consultant or lab when the need for inspection and sampling services arises. A licensed asbestos inspector should be engaged to inspect the work area and sample any suspect/presumed ACMs that could be disturbed by the work.

(5) The asbestos inspector's findings and sample analytical results will dictate whether asbestos abatement must be conducted prior to the initiation of work. If the inspector's report concludes that all materials to be potentially disturbed are non-asbestos containing, the work described on the **Job Request Form** can proceed without further investigation or asbestos abatement. The APM completes and signs the **Job Request Form, Maintenance Work Authorization Form,** and **APM Checklist.**

(6) If the inspector's report concludes that any of the materials to be potentially disturbed during the work is/are asbestos containing, then the APM should engage a licensed asbestos abatement company to abate (remove, encapsulate, or enclose) the known ACM such that no ACM will be disturbed during the work. The APM should ensure proper licensure of all contractors, verify that all regulatory agency notifications are completed, and notify any building personnel that may be in the area of or disrupted by the asbestos abatement activities.

Depending on the scope of work, detailed project specifications may be necessary to ensure satisfactory project completion. In addition, the EPA Asbestos Model Accreditation Plan requires that an EPA accredited Project Designer design any abatement activities that are beyond the scope of an O&M Plan.

The APM should separately contract licensed asbestos air monitoring personnel to conduct air sampling during the asbestos abatement activities. The air monitoring company and the asbestos abatement company should not be affiliated, so as to avoid any conflicts of interest. Air monitoring is necessary to demonstrate that the work area or any portion of the building was not contaminated by the asbestos abatement work.

(7) The APM or a designee should review work practices with the workers/contractors who will perform the work. Workers/contractors should be notified to consult with the APM or designated person if they have any questions during the work, if any problems occur, or if it appears to the workers that additional precautions might be necessary to safely perform the work.

Copies of all pertinent information should be provided to asbestos abatement contractors, including any asbestos investigation/survey reports or laboratory results, asbestos abatement specifications, regulatory agency notifications, etc. Also, copies of information as listed on the **APM Checklist** and **Maintenance Work Authorization Form** should be provided to the asbestos abatement workers who will perform the asbestos work.

(8) The APM or a designee should review the activities of asbestos abatement and air monitoring contractors during their work in order to protect the interests of the building owners and occupants.

(9) Upon completion of any asbestos work, the APM should ensure that final reports are received from all contractors, including waste manifests which indicate the final destination of all asbestos waste. This information should be attached to the **Waste Tracking Form** (Appendix C). The APM should complete the **Waste Tracking Form**. This form and all investigation, laboratory, asbestos abatement, and air monitoring reports should be placed in the permanent O&M Program file.

(10) Upon completion of asbestos abatement work, the APM or a designee should inspect the work area to ensure that asbestos abatement work is complete and that O&M work can proceed without disturbance of any ACMs, suspect ACMs, or PACMs.

(11) Once the APM or designee has confirmed that no ACMs will be disturbed by the O&M work described on the **Job Request Form**, the O&M work can proceed. All of the activities leading up to initiation of O&M work (the above described steps) should be summarized on the **Maintenance Work Authorization Form**. This form, the **Job Request Form**, and the **APM Checklist** should be completed, signed, dated, and placed in the permanent O&M Program files. Copies of pertinent information, as listed on the **APM Checklist** should be provided to the O&M workers who will perform the actual O&M work.

The forms used in Appendices A, B and C of this O&M Work Practices Manual are reproduced from the EPA Green Book for use or guidance. Users of this O&M manual can use these documents as a basis for developing forms for their O&M Program and work permit process. It is recommended that O&M forms include the basic categories of information that are used on the Green Book forms.

Figure 1: APM Checklist
(For O&M Work Control/Permit System)

____ **(1)** Receive and review **Job Request Form** (Appendix A)

Work to be performed: _____

_____

____ **(2)** Review or request survey data and inspect work area to determine whether ACM, suspect ACM, or PACM will be potentially disturbed by the O&M work. If none will be disturbed, then the O&M work can proceed without further investigation - go to number **(11)** below.

____ **(3)** ACMs, suspect ACMs, or PACMs are present in the work area and may be disturbed by the O&M work.

____ All Suspect ACMs in the work area have been tested for asbestos content, and more than 3 square feet or 3 linear feet of ACMs are present that must be abated (repaired, removed, encapsulated, or enclosed) - go to number **(6)** below.

____ **(4)** Suspect ACMs or PACMs are present that have not been tested for asbestos content.

____ **(4)** Either all suspect ACMs are assumed to be asbestos-containing (PACM), or a licensed asbestos inspector is engaged to survey the work area.

____ **(5)** The survey confirmed that no ACMs would be disturbed by O&M work – go to number **(11)** below.

____ **(5)** PACMs are present, or the survey identified ACMs that may potentially be disturbed by O&M work - go to number **(6)** below.

____ **(6)** Contract an asbestos abatement contractor to abate ACM/PACM prior to initiation of O&M work.

____ **(6)** Schedule work when area is not in use, or developed a plan to isolate area (if necessary).

____ **(6)** Federal, state and local notifications filed (if applicable).

____ **(6)** Notify personnel affected by work.

____ **(6)** Verify currency and get copies of asbestos abatement company's licensure.

____ **(6)** Engage a third party licensed air monitoring technician to monitor asbestos abatement work.

____ **(7)** Provide copies to workers/contractor of:

____ **Maintenance Work Authorization Form**

____ General Procedure(s) or abatement specifications

____ Notifications

____ Schedule of work

____ **(8)** Work practices during asbestos abatement work were acceptable.

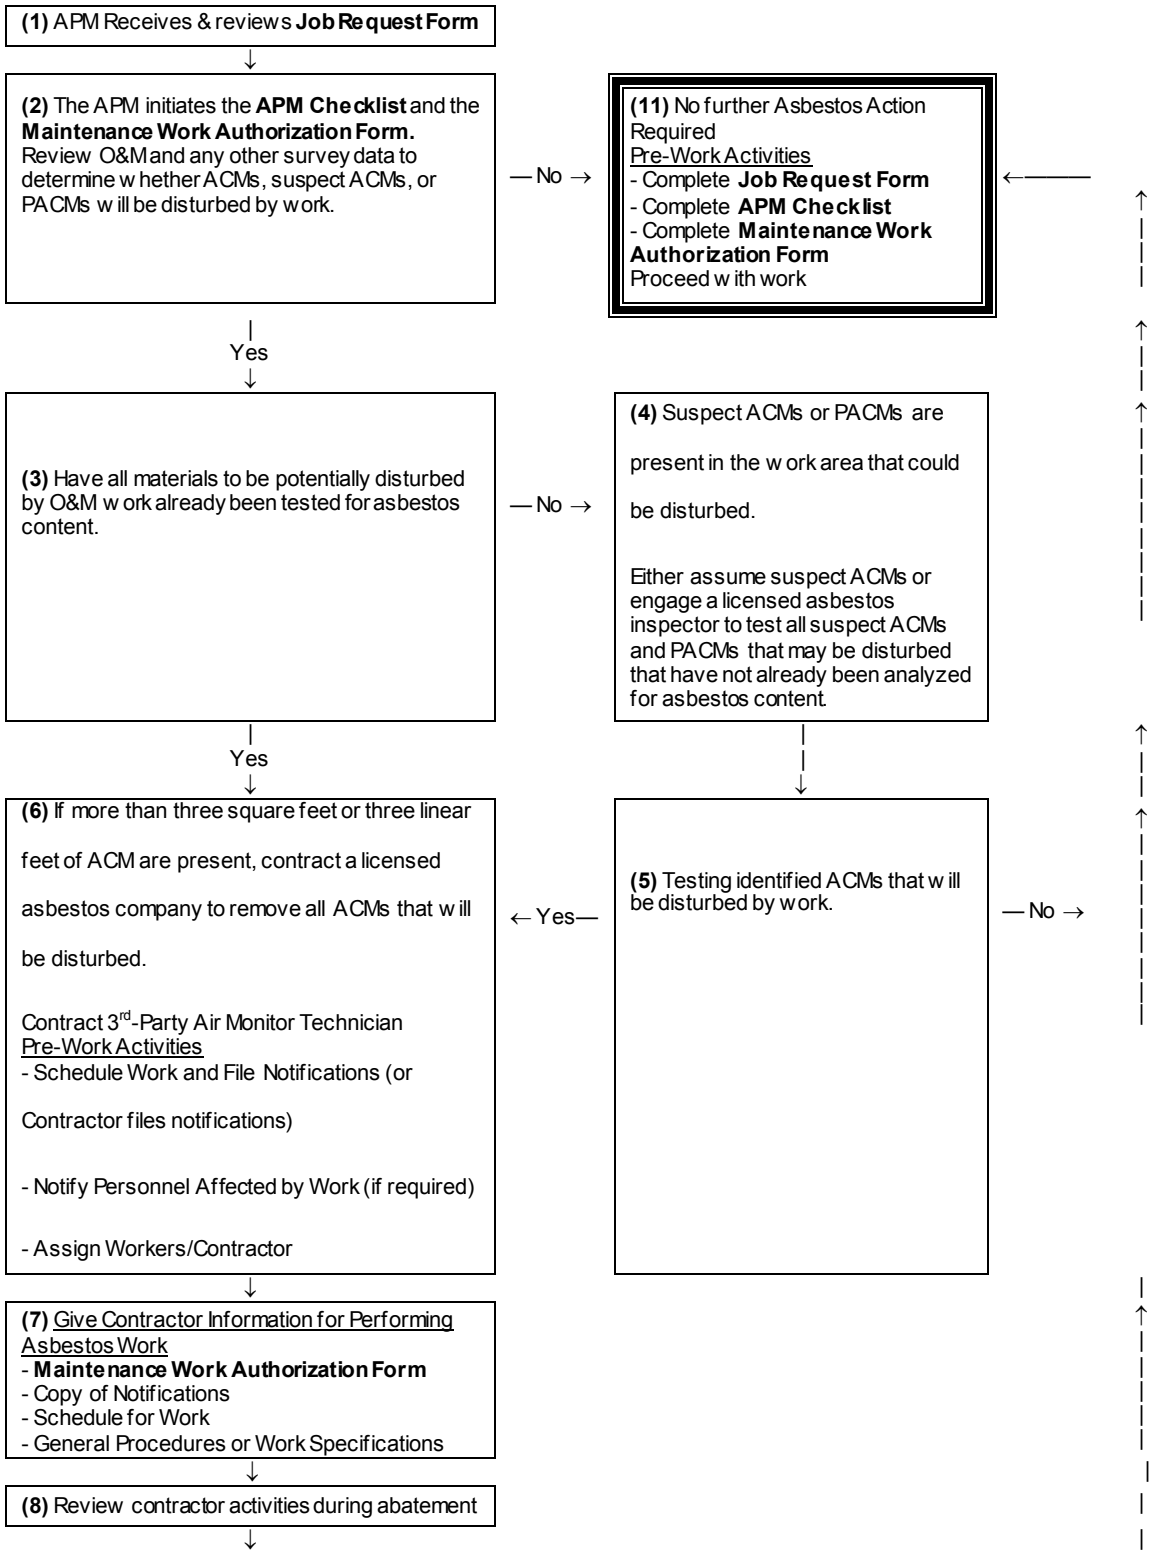
____ **(9)** File all survey, asbestos abatement, and air monitoring records in proper files.

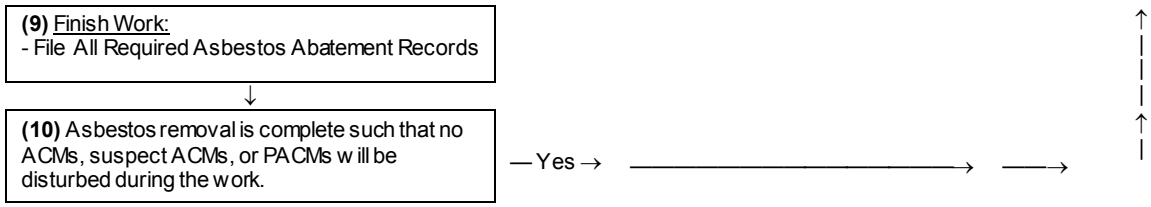
____ **(10)** Reinspection of work area after abatement did not identify any ACMs, suspect ACMs, or PACMs.

____ **(11)** Completed forms filed in permanent O&M file.

Signature: _____ **Date:** _____

Figure 2: Flowchart For O&M Work Control/Permit System





(9) Finish Work:
- File All Required Asbestos Abatement Records
(10) Asbestos removal is complete such that no ACMs, suspect ACMs, or PACMs will be disturbed during the work.
Yes

JOB REQUEST FORM FOR MAINTENANCE WORK

Job Request Form for Maintenance Work

Name: _____ Date: _____

Telephone No. _____ Job Request No. _____

Requested starting date: _____ Anticipated finish date: _____

Address, building, and room number(s) (or description of area) where work is to be performed: _____

_____

_____

_____

_____

Description of work: _____

_____

_____

_____

Description of any ACM that might be affected. If known (include location and type): _____

_____

_____

_____

Name and telephone number of requester: _____

Name and telephone number of supervisor: _____

Submit this application to: _____

(Asbestos Program Manager)

NOTE: A Job Request Form must be submitted for the types of maintenance work that the APM has prescribed. Types of work requiring a Job Request Form are listed by the APM and will vary per Project. A Maintenance Work Authorization Form must then be received before any work can proceed.

_____ Granted (Job Request No. _____)

_____ With conditions*

_____ Denied

*Conditions: _____

_____

APPENDIX: B
MAINTENANCE WORK AUTHORIZATION FORM

Maintenance Work Authorization Form No. _____

AUTHORIZATION

Authorization is given to proceed with the following maintenance work: _____

_____

_____

_____

_____

_____

PRESENCE OF Asbestos-containing material (ACM)

____ ACM is not present in the vicinity of the maintenance work.

____ ACM is present. but its disturbance is not anticipated: however, if conditions change, the APM will re-evaluate the work request prior to proceeding.

____ ACM is present. and may be disturbed.

Procedures if ACMs Are Present

The following work practices shall be employed to avoid disturbing asbestos, or abatement of ACM shall be arranged prior to commencement of maintenance work: _____

_____

_____

Personal Protection if ACMs Are Present

The following equipment/clothes shall be used/worn during the work to protect workers: _____

_____

_____

_____

(manuals on personal protection can be referenced)

Special Practices and/or Equipment Required: _____

_____

_____

Signed: _____ Date: _____

(Asbestos Program Manager)

APPENDIX: C
WASTE TRACKING FORM

Waste Tracking Form

PART 1 - TO BE COMPLETED BY APM OR CONTRACTOR:

Maintenance Work Authorization No. _____

Work Location: Building: _____

Room # or Area: _____

Type of ACM Removed: _____

Quantity of Waste generated: _____ Bags

Other containers: _____

Waste transported to: _____

Transported by: _____

_____

Tracking Form given to: _____

PART 2 - TO BE COMPLETED BY APM

Waste Properly Packaged & Labeled: Yes _____ No _____

EXCEPTIONS: _____

_____

Waste Storage Location: _____

Waste Disposal Location: _____

Waste Shipment Records Received: _____

Date: _____

Signed: _____

ASBESTOS-CONTAINING MATERIALS (ACM) INSPECTION FORM

ACM/PACM INSPECTION TABLE				
Material Description	**Location**	**Approx. Quantity**	**Condition**	**Response Action**
SF = Square Feet **LF = Linear Feet**		*** = Assumed ACM**		

APPENDIX: E
EXAMPLE NOTIFICATION LETTER

ASBESTOS NOTICE TO TENANTS OF:

Project Name: _____

Tenant: _____

In response to an environmental assessment that identified **Asbestos-Containing Materials (ACMs)** and/or **Presumed Asbestos-Containing Materials (PACMs)** at the building(s), we have implemented a written Asbestos Operations and Maintenance (O&M) Program. This O&M Program is designed to maintain all asbestos in the building(s) in good condition and prevent conditions that could cause exposure to tenants and employees. Asbestos only presents a health hazard when fibers become airborne and are inhaled. The mere presence of ACM does not represent a health hazard. All ACM is inspected periodically and additional measures are taken if needed to protect the health of building(s) occupants. Cleaning and maintenance personnel are taking special precautions during their work to properly clean up any asbestos debris and to guard against disturbing ACM.

In accordance with our O&M Program, the building(s) has been inspected for friable (easily crumbled) and non-friable materials which contain asbestos. Friable and non-friable **ACM** and **PACM** that is present in the tenant occupied or common areas of the building include the following:

Material Description	Location
Friable Materials	
Non-Friable Materials	

Tenants should note that the inspection of these materials throughout the building(s) by a trained Asbestos Program Manager (APM) did not identify any imminent tenant exposure conditions. That is, all of the ACMs/PACMs were identified in good condition and are not expected to be disturbed by routine tenant operations. Therefore, the ACM/PACM identified in and around the tenant areas can be maintained in-place through the proper implementation of an O&M Program.

As part of the O&M Program, _____ is taking steps to notify the below listed persons of the presence, location and quantity of ACM at the work sites in the building:

- Prospective employers applying or bidding for work whose employees reasonable can be expected to work in or adjacent to areas containing ACM.
- Employees of the owner who will work in or adjacent to areas containing ACM.
- All employers of employees who will be performing work within or adjacent to areas containing ACM.
- Employers of employees (commercial tenants) who will occupy areas containing ACM.

Also as part of the O&M Program, we ask that all building(s) tenants participate in the following:

- Do not disturb ACM.
- Report any evidence of disturbance or damage of ACM to the APM.
- Report any dust or debris that might come from the ACM/PACM, any change in the condition of the ACM, or any improper action (relative to ACM) of building personnel to the APM.
- Prior to any maintenance activities, contracted maintenance activities, or other activities that may disturb any of the above-described materials or that will penetrate walls, fixed ceilings or suspended ceilings, the APM should be notified for further instruction.

A record of inspection, more detailed descriptions of materials and locations, and a copy of our O&M Program report are available from the APM for the building. The APM and alternate personnel to contact for this building are as follows:

APM: _____ _____
(Name) (Title)

Maintenance Personnel: _____

_____

Day time phone ( ) –

24-Hour Emergency ( ) –

If there are any further questions regarding ACM in the building(s), please feel free to contact the APM. Please sign below and return a copy to the APM for our records.

APPENDIX: H
GENERAL SAFETY CONSIDERATIONS

General Safety Considerations

(This section is reprinted from Appendix D of the EPA's White Book for use by personnel performing O & M activities.)

Ronald L. Stanevich

NIOSH Division of Safety Research

This guide was primarily developed to provide recommendations concerning worker respiratory protection within the asbestos abatement industry. However, employers must not lose sight of the safety hazards their employees are exposed to in performance of their work. Asbestos abatement operations can take place in a variety of industrial, commercial and public settings. Each has unique potential safety hazards that the employer must control. However, nearly all abatement operations have some common safety hazards. With proper job planning and supervision. the employer can control both the health hazards and the safety hazards faced by their workers. The more common safety hazards associated with abatement operations and general recommendations to control them are discussed below. Sources for more specific safety information are listed to supplement and support the applicable OSHA regulatory standards.

I. Elevated Work Surfaces

The nature of asbestos abatement tasks usually requires workers to work from ladders. scaffolds, manlifts, or other elevated surfaces, which creates the potential for fall injuries. Slips and falls from ladders, scaffolds, and other elevated surfaces result in a major portion of the construction industry injuries. Many of these can be prevented by implementing a few control measures:

A. General

(1) Avoid use of makeshift work platforms by providing portable ladders and scaffolds.

(2) Ensure that job-built elevated work surfaces are inspected by a competent person other than the individual who erects it.

(3) Avoid working from elevated surfaces where possible. Consider use of wands for spraying amended water or scrapers with extended handles.

B. Ladders

Eighty percent of ladder-related accidents result from improper use or application.

(1) Workers should face the ladder when climbing up, down, or working from it.

(2) Workers should not carry objects in their hands while ascending or descending ladders. While working from a ladder they should hold on with at least one hand.

(3) Ladders should not be used as a substitute for planks, runways, or walkboards.

(4) Ladders should be maintained in good condition. Defective ladders should be destroyed so that no one uses them by mistake.

(5) Ladders should have safety feet in good condition to keep the ladder from slipping and cutting through polyethylene floor covers.

(6) Ladder rungs/steps should be kept free of contaminates such as amended water and buildup of asbestos waste.

(7) Employees should work no higher than the fourth step/rung from the top of the ladder.

(8) Employees should not attempt to "reach" distant objects from a ladder; other platforms should be used.

(9) Wood or fiberglass ladders should be provided to help control exposure to electrical hazards.

(10) Employees Should not straddle the space between a ladder and another object.

(11) Employees should make a visual inspection of ladders before each shift.

C. Scaffolds

Falls from scaffolds result in about 2,000 injuries per month in the United States. These can be reduced by

(1) providing guardrails around the perimeter of the work surface regardless of scaffold height

(2) securing scaffold decks against slippage

(3) keeping scaffold uprights vertical and pinned together when stacked

(4) ensuring vertical members are braced to keep the scaffold plumb and level

(5) decking the entire top portion of the work surface in lieu of using minimum planking dimensions

(6) extending planks at least 6" (150 mm) over their support and cleating or restraining them from movement

(7) ensuring that manufacturer built-in ladders are in good condition

(8) maintaining mobile scaffold casters in good condition with position locking devices secured when employees are working from the scaffold

(9) keeping mobile scaffolding height less than four times the minimum base dimension and with adequate cross-bracing

(10) never interchanging scaffolding pans from different units

(11) never using defective scaffolding

(12) designating only "Competent" persons to perform scaffolding repairs.

II. Electrical Hazards

Asbestos abatement is often related to renovation or remodeling activities. Normally the equipment, machinery, overhead lighting fixtures. and auxiliary furnishings are removed to facilitate the abatement work. However, it is becoming more common that industrial and commercial buildings remain partially occupied while abatement operations are performed. In either situation. the abatement operator must take positive actions to protect employees from accidentally coming into contact with energized electrical circuits.

A. General

(1) Perform a pre-work walk-through of the abatement area to look for pre-existing electrical hazards involved with the work.

(2) De-energize as many circuits as possible.

(3) Verify that the circuits have been de-energized with a "Field Current Sensing Device" circuit tester. Either lock out/tag out all de-energized circuits to prevent them from accidentally being energized.

(4) Use non-conductive tools such as scrapers and vacuum attachments made of wood, plastic, or rubber.

(5) Provide workers with non-conductive rubber boots and/or gloves when work must be done around energized wiring or equipment.

(6) Prohibit accumulation of puddles of water on the floor. Workers should be trained in the intelligent use of amended water. No water should be used around energized circuits.

B. Permanent Building Circuitry

(1) Ensure that all permanent circuits are provided with a grounding system. This can be determined with a portable ground tester.

(2) Ensure that electrical outlets are tightly sealed and taped to avoid water spray.

(3) Determine what equipment must remain energized during the abatement process.

(4) Insulate or guard energized equipment and Wiring from employee contact and other conductive objects.

(5) Avoid damaging permanent building wiring during the work.

(6) Consider dry removal methods in the vicinity of electrical equipment which must remain energized.

C. Temporary Power

(l) All temporary circuits provided by the abatement operator must be provided with a grounding system and protected by ground fault circuit interrupters.

(2) Avoid stringing temporary wiring across floors

(3) Elevated wiring should not be fastened with staples. nails, or wire.

(4) Use care not to damage the wiring insulation during Installation or abatement work.

D. Electrical Cords and Tools

(1) Provide extension cords which have a ground conductor.

(2) Ensure that cords are not damaged, contain no splices. and that the grounding lug on the male plug is intact.

(3) Position extension cords to eliminate stumbling/tripping hazards and to protect them from damage by moving scaffolds.

(4) Provide electrical tools which are either grounded or of the double-insulated type

(5) Use shatterproof, guarded bulbs and heavy duty wiring for temporary lighting.

(6) Where plugs enter receptacles, ensure that the connection is protected by use of duct tape or by other means.

Chicago, Illinois 60611

III. Housekeeping

Asbestos abatement operations present continuous housekeeping problems. The accumulation of asbestos and other debris on polyethylene-covered floors create employee slipping and tripping hazards. It is essential that accumulation of such debris be bagged and removed from the floor as soon as possible. Even though this activity may initially require more effort. it will make final cleanup easier and the work area safer.

Additional information source:

Supervisors Safety Manual

National Safety Council

444 North Michigan Avenue

Chicago, Illinois 60611

IV. Emergency Planning

The abatement operator should develop emergency procedures for fires or severely injured employees. Since abatement work areas must be sealed off, thereby blocking normal exits. The operator must familiarize the workers with procedures for safe exit in case of fire. Furthermore, the operator should develop plans for obtaining emergency aid in case of severe employee injury. The plans should be compatible with decontamination procedures yet provide for quick medical aid.

APPENDIX: I
GLOSSARY

Glossary

Acoustical Plaster Sound absorbing finishing material mill-formulated for application in areas where a reduction in sound reverberation or noise intensity is desired. These materials usually are applied in a minimum thickness of ½" (13 mm). The finish material is applied over gypsum plaster, plaster brown coat or other base plaster. The surface material is usually friable and has a rough surface appearance.

Acoustic Tile Tile-shaped blocks of sound absorbent material used for ceilings or as wall facing. May be glued to substrate or laid in a rigid grid work.

ACM Asbestos-Containing Material (Asbestos-containing Building Material). Any material containing more than one percent asbestos.

ACBM ACM found in or on the interior of a school or other building.

Adequately Wet Adequately Wet means sufficiently mix or penetrate with liquid to prevent the release of particulates. If visible emissions are observed coming from asbestos-containing material, then that material has not been adequately wetted. However, the absence of visible emissions is not sufficient evidence of being adequately wet.

AHERA Asbestos Hazard Emergency Response Act. This regulation is intended for schools (typically K-12). However, it contains the inspection protocol that accredited asbestos inspectors use in all buildings.

AIA American Institute of Architects

Air Monitoring The process of measuring the fiber content of a specific volume of air.

Amended Water Water to which a surfactant has been added for use in wetting ACM to control asbestos fibers.

APM Asbestos Program Manager

Asbestos Chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos and any of these minerals that has been chemically treated and/or altered.

Asbestos-Containing Waste Material Mill tailings or any waste that contains commercial asbestos and is generated by a source regulated under the NESHAP. This term includes filters from control devices, friable asbestos waste material, and bags or other similar packaging contaminated with commercial asbestos. As applied to demolition and renovation operations, this term also includes regulated asbestos-containing waste and materials contaminated with asbestos including disposable equipment and clothing.

Asbestos debris Pieces of ACBM that can be identified by color, texture, or composition, or means dust, if the dust is determined by an accredited inspector to be ACM.

Asbestos Hazard Emergency Response Act (AHERA) An EPA regulation published in the October 30, 1987 Federal Register covering asbestos-containing materials in schools. AHERA requires local education agencies to identify ACM in their school buildings, develop an asbestos management plan and implement this plan. An O&M program is one permitted response action, where appropriate.

Asbestos O&M Work Cleaning, maintenance, repair or renovation work involving asbestos containing materials where the intent of the activity is not to remove asbestos. The NESHAP requires that the owner or operator of a demolition or renovation activity conduct a thorough inspection of the affected facility or part of the facility where demolition or renovation will occur.

Asbestos Program Manager (APM) A building owner or designated representative who supervises all aspects of the facility asbestos management and control program.

Breathing Zone A hemisphere forward of the shoulders with a radius of approximately 6" to 9" (150-250 mm).

Bridging encapsulant An encapsulant that forms a discrete layer on the surface of an in situ asbestos matrix.

CFR Code of Federal Regulations

Clerk-of-the-works A representative of the architect or owner who oversees construction, handles administrative matters, and ensures that the construction is in accordance with the contract documents.

Competent Person means, in addition to the definition in 29 CFR 1926.32 (f), one who is capable of identifying existing asbestos hazards in the workplace and selecting the appropriate control strategy for asbestos exposure, who has the authority to take prompt corrective measures to eliminate them, as specified in 29 CFR 1926.32(f): in addition, for Class I and Class II work one who is specially trained in a training course which meets the criteria of EPA's Model Accreditation Plan (40 CFR part 763) for supervisor, or its equivalent and, for Class III and Class IV work, who is trained in a manner consistent with EPA requirements for training of local education agency maintenance and custodial staff as set forth at 40 CFR 763.92 (a)(2).

Compliance Instruction (Compliance Directive) Instruction issued by OSHA to establish policies and provide clarification to ensure uniform enforcement of OSHA standards.

Concealed Suspension or Concealed Spline Ceiling System Presents a monolithic ceiling surface, unobstructed by the cross-hatching of exposed grid members. Tiles are typically 12" x 12" (300 x 300 mm) or 12" x 24" (300 x 600 mm) with slots or kerfs cut into the edges of tiles for the purposes of accepting flat or "T" splines to support the tiles.

Confined Space A space that has limited openings for entry and exit, unfavorable natural ventilation and/or a space not designed for continuous worker occupancy. Examples include boilers, furnaces, pits, septic tanks, manholes, silos and utility vaults.

Critical Barrier One or more layers of polyethylene taped in place over openings into a work area. Openings to be covered include doors, windows, diffusers, and any other opening that could allow outside air into a work area.

CSRF Construction Sciences Research Foundation

Decorative Acoustic Finish: Finishing material mill-formulated and spray applied up to about 3/8" (10 mm) thick over gypsum wallboard. Material has a rough surface and is similar in appearance to acoustic plaster but is not designed for sound absorption.

Delamination Separation of one layer from another.

Disposal Bag Properly labeled 6 mil (0.15 mm) thick (or thicker) leak-tight plastic bags used for transporting asbestos waste from work and to disposal site.

Drop Cloth A layer of polyethylene on the floor of a work area to protect the floor below from contamination and to facilitate the clean-up of dust or debris generated during the work.

EJCDC Engineers Joint Contract Documents Committee

EL See Excursion Limit

Encapsulant A material that surrounds or embeds asbestos fibers in an adhesive matrix, to prevent release of fibers.

Enclosure The construction of an air-tight, impermeable, permanent barrier around asbestos-containing material to control the release of asbestos fibers into the air.

EPA U.S. Environmental Protection Agency

Excursion Limit (EL) The OSHA term used to define a maximum airborne concentration of asbestos in fibers per cubic centimeter as averaged over a sampling period of thirty minutes.

Fiber Release Any uncontrolled or unintentional disturbance of ACBM resulting in visible emission.

Fireproofing Material applied to structural elements or systems which provides increased fire resistance, usually serving no structural function. This material is typically applied using spray equipment.

Friable Asbestos (See "Regulated ACM").

Glovebag A polyethylene or polyvinyl chloride bag-like enclosure affixed around an asbestos-containing source (most often, TSI) so that the material may be removed while minimizing release of airborne fibers to the surrounding atmosphere.

HEPA Filter High-Efficiency Particulate Air Filter. Such filters are rated to trap at least 99.97% of all particles 0.3 microns (0.3 mm) in diameter or larger.

HMR Hazardous Material Rules under Dept of Transportation regulations.

Initial Exposure Assessment Prior to the start of any work that may disturb ACM/PACM, the APM shall perform an assessment to determine the airborne concentrations of asbestos to which employees may be exposed. This assessment must be based on air monitoring results obtained from breathing zone air samples that are representative of the 8-hour TWA and 30-minute short term exposures of each employee. In addition, this assessment shall include consideration of all observations, information or calculations which indicated employee exposure to asbestos, including any previous monitoring conducted in the workplace, or of the operations of the employee which indicate the levels of airborne asbestos likely to be encountered on the job.

MAP EPA Interim Final Model Accreditation Plan (MAP) for asbestos abatement worker training (40 CFR Part 763, Subpart E, Appendix C).

Medical Surveillance A periodic comprehensive review of a worker's health status. The required elements of an acceptable medical surveillance program are listed in the Occupational Safety and Health Administration standards for asbestos.

Mini-Enclosure An enclosure constructed of polyethylene sheeting used for small scale, short duration asbestos maintenance or renovation work. Mini-enclosures can be small enough to restrict entry to the asbestos work area to one worker. Appendix G to OSHA regulation 29 CFR 1926.58 discusses mini-enclosures and recommends that a change room be constructed contiguous to the mini-enclosure.

Miscellaneous ACM Interior asbestos-containing building material on structural components, structural members or fixtures, such as floor and ceiling tiles; does not include surfacing material or thermal system insulation.

NEA Negative Exposure Assessment

Negative Exposure Assessment A demonstration by the employer which complies with criteria in paragraph (f)(2)(iii) of 29 CFR 1926.1101, that employee exposure during an operation is expected to be consistently below the PELs.

Negative Pressure System A local exhaust system intended to prevent the escape of contaminated air to the surrounding environment. It utilizes HEPA filtration capable of maintaining a pressure differential with a lower pressure inside the Work Area than in any adjacent area. This system recirculates clean air and/or generates a constant flow of air from adjacent areas into the work area.

Negative Pressure Respirator A respirator in which the air pressure inside the respiratory-inlet covering is positive during exhalation in relation to the air pressure of the outside atmosphere and negative during inhalation in relation to the air pressure of the outside atmosphere.

NESHAP National Emission Standard for Hazardous Air Pollutants - EPA Rules under the Clean Air Act (40 CFR Part 61).

NIOSH The National Institute for Occupational Safety and Health, which was established by the Occupational Safety and Health Act of 1970. Primary functions of NIOSH are to conduct research, issue technical information, and certify respirators.

O&M Operations & Maintenance

Operations & Maintenance (O&M) Program A program of work practices to maintain ACM in good condition, ensure clean up of asbestos fibers previously released, and prevent further release by minimizing and controlling ACM disturbance or damage.

Occupied Area An area where personnel are present and are performing their normal activities intended for the area (such as in a typical office area from 8:00 to 5:00 p.m., Monday through Friday).

OSHA Occupational Health & Safety Administration.

PAPR Powered Air Purifying Respirator.

Penetrating Encapsulant An encapsulant that is absorbed by the in situ asbestos matrix without leaving a discrete surface layer.

PELs Permissible Exposure Limits.

Personal Air Samples An air sample taken with a sampling pump directly attached to the worker with the collecting filter and cassette placed in the worker's breathing zone. These samples are required by the OSHA asbestos standards and the EPA Worker Protection Rule.

PCM Phase Contrast Microscopy

Phase Contrast Microscopy (PCM) A method of analysis using a light microscope, used to find the concentration of airborne fibers. Does not distinguish among asbestos and other fibers. Used by OSHA to find personal exposures, and by EPA to find area levels for AHERA project clearance.

Plenum Any space to convey air in a building or structure. The space above a suspended ceiling is often used as an air plenum. This term is also used in the work practices to refer to spaces above a ceiling not used to convey air.

PLM Polarized Light Microscopy

Polarized Light Microscopy (PLM) A method of analysis using a light microscope to find the chemical or mineral types of samples, including the concentration of asbestos in bulk materials. Used by EPA for AHERA and NESHAP, and by OSHA to see if asbestos is involved in a project.

Project Representative Architect's representative at the project site who assists in the administration of the construction contract.

Protection Factor The ratio of the ambient concentration of an airborne substance to the concentration of the substance inside the respirator at the breathing zone of the wearer. The protection factor is a measure of the degree of protection provided by a respirator to the wearer.

RCRA Resource Conservation and Recovery Act.

RACM Regulated ACM

Regulated ACM (RACM) As defined by NESHAP in the November 20, 1990 Federal Register, **regulated asbestos-containing material (RACM)** means (a) Friable asbestos material, (b) Category I nonfriable ACM that has become friable, (c) Category I nonfriable ACM that will be or has been subjected to sanding, grinding, cutting, or abrading, or (d) Category II nonfriable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material in the course of demolition or renovation operations regulated by this subpart.

(Note: Regulated ACM is an EPA NESHAP concept. OSHA makes no distinction between friable and non-friable asbestos).

"Cutting" means to penetrate with a sharp-edged instrument and includes sawing, but does not include shearing, slicing or punching.

"Grinding" means to reduce powder or small fragments and includes mechanical clipping or drilling.

Friable asbestos material means any material containing more than 1 percent asbestos as determined using the method specified under AHERA (40 CFR Part 763, Sub-part F, Appendix A, section 1, Polarized Light Microscopy) that, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. If the asbestos content is less than 10 percent as determined by a method other than point counting by polarized light microscopy (PLM), verify the asbestos content by point counting using PLM.

Category I nonfriable asbestos-containing material (ACM) means asbestos-containing packings, gaskets, resilient floor covering and asphalt roofing products containing more than 1 percent asbestos as determined using the method specified under AHERA.

Category II nonfriable ACM means any material, excluding Category I nonfriable ACM. containing more than 1 percent asbestos as determined using the methods specified under AHERA, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure.

Remove For Operations and Maintenance work on ACM, "remove" refers to the removal of ACM as needed to perform a maintenance or repair O & M activity.

Removal Encapsulant A penetrating encapsulant specifically designed to minimize fiber release during removal of asbestos-containing materials rather than for in situ encapsulation.

Repair Returning damaged ACBM to an undamaged condition or to an intact state so as to prevent fiber release.

Respirator A device designed to protect the wearer from the inhalation of harmful particulates.

Small-scale, Short-duration Term formerly used by OSHA to describe O&M work activities (in the previous OSHA construction standard). This term has been superseded by the work class definitions in the current OSHA standard.

Surfacing ACM Asbestos-containing material that is sprayed-on, troweled-on or otherwise applied to surfaces, such as acoustical plaster on ceilings and fireproofing materials on structural member, or other materials on surfaces for acoustical, fireproofing, or other purposes.

Survey An asbestos survey is what EPA calls an inspection in the AHERA regulation. It consists of a visual and tactile inspection of a building to identify, quantify and assess the accessibility and condition of the ACM and suspected ACM present.

Suspended "T" Bar Ceiling System A false or dropped ceiling composed of acoustic tiles laid into an inverted metal "T" bar grid frame suspended by wires from building framing members.

Surfactant A chemical wetting agent added to water to improve penetration, thus reducing the quantity of water required for a given operation or area.

TEM Transmission Electron Microscopy

Temporary Barriers One or more layers of 6 mil polyethylene installed to isolate a work area from other portions of a facility.

Thermal System Insulation (TSI) Thermal system insulation - asbestos-containing material applied to pipes, fittings, boilers, breeching, tanks, ducts or other interior structural components to prevent heat loss or gain or water condensation.

Time Weighted Average (TWA) In air sampling, this refers to the average air concentration of contaminants during a particular time period.

TSI Thermal System Insulation

Transmission Electron Microscopy (TEM) A method of analysis using an electron microscope, used to find and analyze the concentration of airborne or bulk asbestos fibers and structures. Distinguishes among asbestos and other materials; can detect smaller asbestos fibers than does PCM. Used by EPA to find area concentrations for large AHERA project clearance.

TSCA Toxic Substances Control Act

TWA Time Weighted Average.

Work Area The area where asbestos-related work or removal operations are performed which is defined and/or isolated to prevent the spread of asbestos dust, fibers or debris, and entry by unauthorized personnel.

Work Practices Procedures designed to be followed to avoid or minimize fiber release during activities affecting ACM.

EMG Project #: 109568.14R - 001.135
Date of Report: June 27, 2014
On Site Date: June 15, 2014

7.5 Asbestos-Containing Materials (ACM)

Suspect non-friable ACM, in the form of roofing materials, vinyl floor tile, wallboard/joint compound, stucco, and various mastics, were identified. These materials were observed to be in good condition.

Based on the Scope of Work, no samples were collected.

ALL APPROPRIATE INQUIRIES USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user*[1] must conduct the following inquires required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

(1.) **Environmental Liens that are filed or recorded against the property**
Did a search for recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law?

(2.) **Activity and use limitations that are placed on the property or that have been filed or recorded against the property**
Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law?

(3.) **Specialized knowledge or experience of the person seeking to qualify for the LLP**
Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

(4.) **Relationship of the purchase price to the fair market value of the property if it were not contaminated**
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present on the *property*?

(5.) **Commonly known or reasonably ascertainable information about the property**
Are you aware of commonly known or reasonably ascertainable information about the *property* that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the *property*? N/A If so, what were they?

(b.) Do you know of specific chemicals that are present or once were present at the *property*? N/A

(c.) Do you know of spills or other chemical releases that have taken place at the *property*? N/A

(d.) Do you know of any environmental cleanups that have taken place at the *property*? N/A

(6.) **The degree of obviousness of the presence of likely presence of contamination on the property, and the ability to detect the contamination y appropriate investigation**
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the *property*?

COMPLETION:

_____

UTILITIES/DISCHARGES

Is the property served, or has the property been served, by a private water well?

___Yes ____ No X Unknown

If yes, is groundwater under the property used as a source of drinking water?

___Yes ____ No ___Unknown

Has the water from the well ever been tested? (If YES, please provide test results)

___Yes ____ No X Unknown

Has the well water been identified as contaminated by any governmental agency?

___Yes X___ No ___Unknown

Are there any groundwater monitoring wells or irrigation wells on the property?

___Yes X___ No ___Unknown

If Yes, how many____ and when were they installed?_____

Does the property discharge waste water, or storm water into a municipal sanitary sewer system? If Yes, does the facility discharge under an NPDES Permit or Waste Discharge Permit?

___Yes X___ No ___Unknown Permit Number/Agency:_____

Are there any current or previous sumps used for waste-water collection/treatment on the property?

___Yes X___ No ___Unknown

Are there any septic systems, dry wells or leach fields on the property?

___Yes X___ No ___Unknown If Yes, Where?:_____

ENVIRONMENTAL COMPLIANCE

Is there knowledge of environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances?

___Yes X___ No ___Unknown

Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?

___Yes X___ No ___Unknown

Has the property or related facilities or operations ever been the subject of enforcement actions by governmental authorities resulting in penalties of any kind?

___Yes X___ No ___Unknown

ENVIRONMENTAL CONDITIONS

Has groundwater or soils on the property ever been tested?

___Yes ____ No X Unknown

If Yes, provide details:

_____

Have any contaminants been identified which exceed standards or guidelines levels?

___Yes ____ No X Unknown

If Yes, provide details:

_____

BUILDING CONDITIONS

What is/are the age of the structure(s)? 33 years.

Have any major renovations been completed and if so, describe type and when completed:

Re-roof project for building 20863 & 20823

Has an asbestos and/or lead-based paint survey been performed on the site structure(s)?

X Yes ____ No ___Unknown

If Yes, was asbestos containing materials identified?

X Yes ____ No

If Yes, was lead-based paint present identified?

___Yes X No

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Inquiry # 7943484.3	Contact: Daniel Wood

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 6EE9-45BF-AE6C

PO # 770709101

Project 20807, 20713-20883 Stevens Cre

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 6EE9-45BF-AE6C

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Langan (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

20807 STEVENS CREEK BLVD
CUPERTINO, CA 95014

COORDINATES

Latitude (North):	37.3238880 - 37° 19' 25.99''
Longitude (West):	122.0384200 - 122° 2' 18.31''

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 15 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 355025
Site Name: Staples the Office Superstore #1478
Violation Date: 04-18-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 07/27/2016. No Uniform Hazardous Waste Manifests were available for review, because the facility does not retain a copy of its manifests, including but not limited to Manifest #008517709FLE (Ship Date: 7/23/2015) which was available for review on Hazardous Waste Tracking System. Ensure that a copy of each TSDF-signed manifest is retained on-site for three years from the date of shipment. NOTE: In addition to manifest retention, ensure that a legible copy of each manifest is submitted to Department of Toxic Substances Control (DTSC). Mail manifest copies to: DTSC Generator Manifests, PO Box 400, Sacramento, CA 95812-0400. [CCR 66262.23(a)(4)]

Citation:	22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description:	Failure to label or mark each individual or container or the designated area of universal waste as required. 1) Waste batteries shall be marked with "Universal Waste-Battery(ies) . 2) Mercury containing equipment shall be marked with "Universal Waste -Mercury-Containing Equipment . 3) Lamps shall be marked with Universal Waste-Lamp(s) . 4)Each electronic devices or the container or the designated area shall be marked with Universal Waste-Electronic Device(s) . 5) Each CRTs or the container or the designated area shall be marked with "Universal Waste-CRT(s) . 6) CRT glass or the designated area shall be marked with Universal Waste-CRT glass .
Violation Notes:	Returned to compliance on 11/30/2017. Observed 3 gaylord boxes on-site holding universal waste computers, phone batteries, printers, and other electronic wastes with no labels. Observed three printers ,one computer console, and three small universal waste-electronic devices in the "daily collection area" that are not labeled.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	355025
Site Name:	Staples the Office Superstore #1478
Violation Date:	10-30-2017
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 11/30/2017. Facility does not currently have any emergency posting on-site that meets the requirements listed below.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	355025
Site Name:	Staples the Office Superstore #1478
Violation Date:	10-30-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 11/30/2017. Waste fluorescent bulbs, caulk, spackle, Swiffer cleaning solution, and other items that are not corrosive acids were observed in the incompletely labeled, corrosive acids tote. A review of the facility’s hazardous waste management packet confirmed that this is not how these items are to be managed and employees are instructed on how to complete a hazardous waste label. Based on the violations observed during this inspection, employees are not adequately trained to ensure proper hazardous waste handling.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW

Violation Description:	Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 11/30/2017. Observed two of the three Gaylord boxes overflowing with universal waste-electronic devices, such as printers, TVs, and tablets. Observed printers balancing at such a steep angle that portions of the printers are overhanging the sides of the boxes. Observed three printers, a computer console, and an assortment of small universal waste-electronic devices in the "daily collection" area of the back room. Two printers, the computer console, and the small devices are stacked on top of each other and are not contained in a manner that will prevent breakage.

STAPLES THE OFFICE SUPERSTORE #1478 (Continued) **S121765140**

Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 07/27/2016. Mr. Woo stated that cleaning products have been damaged during transport (e.g. a lid breaking on a cleaning product rendering it un-saleable), and the products were bagged and managed as hazardous waste, but at the time of inspection, all hazardous waste containers were empty and no manifests have been retained by the facility. A review of the state s Hazardous Waste Tracking System indicated that, with the exception of Manifest #008517709FLE (Ship Date: 7/23/2015 - containing broken light bulbs, consumer electronics, and batteries), no hazardous waste pick-ups are known to have occurred. Provide documentation to the inspector in regards to the hazardous waste determination that was made for the products broken in transport and broken on the retail floor, as well as the manner in which they were disposed. Additionally, provide documentation as to how future hazardous waste determinations will be made for un-saleable products and how the facility will ensure that the [Truncated]

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 11/30/2017. Observed one container marked only as "hazardous waste" and "corrosive acids" accumulating hazardous waste at the time of inspection without any other required markings. Observed a number of wastes in the corrosive acids bin that are not accurately represented by the hazardous property "corrosive acids," including: light bulbs, spackle, caulk, and Swiffer aqueous cleaning solution. Ensure that hazardous wastes are properly identified, segregated, and that container labels accurately reflect container contents.

Violation Source:	CERS,
Site ID:	355025
Site Name:	Staples the Office Superstore #1478
Violation Date:	10-30-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 11/30/2017. Hazardous waste accumulation bins are currently kept on the floor of the back room, stacked on top of each other. Stacking containers in this manner limits access to each container and may cause containers to crack.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW

STAPLES THE OFFICE SUPERSTORE #1478 (Continued) **S121765140**

Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-30-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Unresolved Issues that Require Follow-Up: 1) Facility manager stated that employee training for hazardous waste and universal waste handling is done annually on the computer, but manager could not provide access to these training records at the time of inspection. Within 30 days, provide a copy of the universal waste training record for the store manager to HMCD for review [22CCR 66273.36]. 2) No hazardous waste manifests or universal waste shipping documents were available at the time of inspection. Ms. Andrade stated that the transporter does not provide her with a copy of the bill of lading/shipping document when the universal waste-electronic devices are picked up every other week. Provide a copy of all Uniform Hazardous Waste Manifests and universal waste off-site shipment documents for the past three years to HMCD for review [22CCR 66273.39] 3) DTSC has notified HMCD that Staples has submitted notification regarding universal waste acceptance activities. [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-18-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection with General Manager, Leo Woo. The facility is a retail store that specializes in office supplies, consumer electronics, and cleaning/housekeeping products. Retail products that meet hazardous waste criteria if they were to become wastes that were observed on the retail floor include, but are not limited to detergents, soaps, glass cleaners, bleach, carpet cleaners, plumbing cleaners, and office products. Mr. Woo stated that hazardous waste is generated when products are damaged on the retail store or in-transport. Hazardous waste determinations are based on employee knowledge of the product and a posted hazardous waste containment guide product is found. The facility utilizes a "tote system" for hazardous waste management. Plastic, Strong Pac bags are used to collect all items that require disposal as hazardous waste. Leaking, liquid products are double-bagged. Employees have been instructed to write the name [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Name: WHOLE FOODS MARKET - STEVENS CREEK
Address: 20955 STEVENS CREEK BLVD
City,State,Zip: CUPERTINO, CA 95014
Site ID: 85973
CERS ID: 10476277
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 85973
Site Name: Whole Foods Market - Stevens Creek
Violation Date: 07-17-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Facility was unable to locate TSDF copies of the following manifests: -008436850FLE -008667097FLE -010059046FLE
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Observed the following wastes on site: 1 x 10 gallon container of toxics (empty) 2 x 10 gallon container of state regulated toxics (empty) 1 x 3 gallon container of universal waste batteries Fire extinguishers have had annual maintenance Emergency information is posted on site Spill control is available on site Container areas are inspected weekly Employees have had hazardous waste management training Disposal records were reviewed for 2016 and 2017. EPA ID# CAL000395813 is active
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 10-28-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: ACTIVE EPA ID NUMBER (CAL000395813). THIS WHOLE FOODS LOCATION IS IN THE PROCESS OF SETTING UP A DESIGNATED STORAGE AREA FOR THE HAZARDOUS WASTE GENERATOR PROGRAM. EMPLOYEES WILL BE TRAINED ON THE PROPER MANAGEMENT OF HAZARDOUS WASTE. A HAZARDOUS MATERIALS BUSINESS PLAN (HMBP) HAS BEEN SUBMITTED ELECTRONICALLY VIA THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WEBSITE. OBSERVED ONE CONTAINER OF UNIVERSAL WASTE - USED LAMPS WITH PROPER LABELING.
Eval Division: Santa Clara County Environmental Health

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

TARGET STORE T0323 (Continued) **1001481030**

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violations:

Site ID:	73915
Site Name:	TARGET T0323
Violation Date:	12-13-2023
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted

TARGET T0323 (Continued) **S121791337**

	for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	No TSDF-signed copies of manifests were available for review. Anthony stated that he does have the generator's initial copy in storage containers but was unable to make them available. Additionally, staff were not able to access digital copies of the manifests via the Regulatory Document Archive in Target's computer system (no computer was observed in the receiving area).

Violation Program:	HW
Violation Source:	CERS,
Site ID:	73915
Site Name:	TARGET T0323
Violation Date:	12-27-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/26/2018. Janitorial staff generates small quantities of hazardous waste that per Target's internal policy should be containerized in an ESIM bin (with a proper hazardous waste label) located in the janitorial room. Observed hazardous wasste being in this room being stored in a small cardboard box without any hazardous waste markings.

Violation Source: CERS,

Site ID: 73915
Site Name: TARGET T0323
Violation Date: 12-13-2023
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/13/2023. 1 x 10 gallon tote of "Non-RCRA state toxics" and 1 x 10 gallon tote of "Aerosol/toxic Ignitable" waste were missing an accumulation start date. Anthony immediately wrote the date on each bin. No further action is needed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-13-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine Hazardous Waste Generator Inspection. Completed walk-through with Anthony Digeronimo in receiving. This facility operates as a retail store with various electronics, OTC drugs, and household chemicals. They manage the following hazardous waste streams in 10 gallon tote bins: -Oxidizer IGNITABLE Waste -Universal Waste Batteries -Corrosive Acidic Waste -Corrosive Basic Waste -Aerosol/Toxic Ignitable Waste -Non-RCRA State Toxic waste -Pharmaceutical Toxic Waste (over-the-counter drugs) Waste is sorted through a scanning system whereby items are initially stored in an "ESIM" bin, scanned to determine if it can be donated or if it will be managed as hazardous waste, then sorted into the appropriate bin. Additionally, universal electronic waste is sent to Central Returns Center. Pharmaceutical waste is managed by CVS. Inspection included review of all available hazardous waste disposal receipts from last 3 years. Notes: Emergency spill [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Occupancy ID: 13053
Eval Division: Santa Clara County Fire Department
Eval Program: HMRRP

TARGET T0323 (Continued) **S121791337**

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-27-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility is a retail store. Hazardous waste is generated in the form of damaged, discarded, returned, or other non-saleable merchandise and is stored in an area of the warehouse designated ESIM (environmentally sensitive item management). At time of inspection the following hazardous waste was observed on-site: -State-regulated waste: 1 x small tote bin -Flammable Aerosol/Toxic: 1 x small tote bin -Corrosive Basic: 1 x small tote bin Non-saleable merchandise is collected from guest services and placed in a sort bin(s) in the ESIM area. Each day staff utilizes a "smart sort" system (scanner linked to an external database) to sort hazardous waste by hazard classification. Additionally, all waste items are placed in individual plastic bags to prevent spills. Ink cartridges are managed through a exchange program with Lexmark. A facilities manager performs minor changes-out of fluorescent tubes with all spent tubes [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

DE ANZA SHELL (Continued) **S101594612**

Site Name: DE ANZA SHELL
Violation Date: 01-17-2024
Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: Financial Responsibility reporting discrepancy (needs clarification in CERS).
Violation Division: Santa Clara County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 07-08-2022
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility disclosed on the California Environmental Reporting System (CERS) on 1/20/22 that their EPA ID number is CAR000096818, but according to the hazardous waste tracking system, iit has been inactive since 6/30/19. According to the facility owner Judy Hui, this EPA ID number may not be associated with the current business, and may instead be associated with the gas station during the time it was owned and operated by Shell. This could not be corroborated on the hazardous waste tracking system as the only other EPA ID numbers associated with this address expired in 1999 and 2000. If CAR000096818 is the correct EPA ID number, reactivate it within 30 days. If it is not the correct EPA ID number, and is in fact tied to a past owner and/or operator, apply for a new EPA ID number.

Violation Program: UST
Violation Source: CERS,

Site ID: 24238
Site Name: DE ANZA SHELL
Violation Date: 07-08-2022
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility disclosed on the California Environmental Reporting System (CERS) on 1/20/22 that their EPA ID number is CAR000096818, but according to the hazardous waste tracking system, iit has been inactive since 6/30/19. According to the facility owner Judy Hui, this EPA ID number may not be associated with the current business, and may instead be associated with the gas station during the time it was owned and operated by Shell. This could not be corroborated on the hazardous waste tracking system as the only other EPA ID numbers associated with this address expired in 1999 and 2000. If CAR000096818 is the correct EPA ID number, reactivate it within 30 days. If it is not the correct EPA ID number, and is in fact tied to a past owner and/or operator, apply for a new EPA ID number.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and

APPLE, INC (Continued) **1000279119**

disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 702783
Site Name: APPLE-LAZANEO

APPLE-LAZANEO (Continued) **S121789288**

Violation Date: 06-06-2019
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities, evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: Returned to compliance on 06/20/2019. Contingency plan uploaded to CERS is a boiler plate plan that is not specific enough to be used as a contingency plan for this location. If facility continues to use this boiler plate, at a minimum, ensure that plan refers to the emergency response equipment located on-site. Current plan only refers to emergency response equipment located at the Infinite Loop buildings. Plan does not currently list an address for emergency coordinators.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-06-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection commenced on 6/3/19 and concluded today. Facility is a product realization lab that generates wastes related to 3D printing, machining, and painting. Facility used to generate more RCRA waste (coolant contaminated with lead from machining brass), but significantly reduced their waste by designating all brass and copper cutting to be done on one specific CNC. Currently, facility is generating and average of 130 kg of RCRA waste per month, and approximately 1753 kg per month of all wastes. Facility generates most of this waste from periodic (3-5x/year) clean-outs of coolant containing machines that exceed 1000 kgs per shipment. Facility is a California LQG and RCRA small quantity generator. Inspection included walk-through of the following areas: PR cleanup room and adjoining printing lab (rm 132): Generates wastes related to cleaning 3D printed parts, including waste resins from printers (Eden and connex), waste resins mixed with waste liquid IPA (SLA [Truncated]

Claim Number:	13307
Claim Status:	Active
Site History:	Four 10,000-gallon fuel tanks were removed from the site on May 15, 1998, during a system upgrade. Tested soil samples from around the UST cluster and dispensers documented that some fuel release(s) had

CUPERTINO CLEAN SCENE (Continued) **S101594681**

occurred, but the reported concentrations were relatively low. An initial deep boring (B-1) was advanced on the south side of the UST area (see Figure 2) in July 1998 and found detectable fuel impacts to soils (higher than the initial tests) to a depth of 75 feet. Construction of the site s first groundwater monitoring well (MW-1) in July 1999 involved sampling and testing of even deeper soil (to 100 feet below grade) along with the encountered groundwater. Over the next two years (2000-2001) another deep exploration boring (EB-1) was advanced, two additional groundwater monitoring were installed (MW-2 and MW-3), MW-1 was deepened/reconstructed as MW-1R, and three vadose-zone wells (VW-1 through VW-3) were installed. The soil analyses from these holes only documented noteworthy fuel impacts at MW-3. On-site groundwater monitoring wells MW-4 and MW-5 were installed in May 2004; neither location exhibits significant impacts. After repeated being denied access to the adjoining property to the north, the first off-site well, MW-6, was installed in July 2007 over 200 feet north of the site, at the corner of De Anza Blvd. and Lazaneo Drive. In February, 2008, two additional off-site wells were installed in North De Anza Boulevard on an apparent migration path from the fuel source area through MW-3. Soil and groundwater samples from all three off-site wells showed no apparent impact from fuel-related compounds. Since 2001, groundwater sounding and sample testing have occurred at least twice a year, and usually quarterly. The cumulative data on groundwater level measurements and analyses (through March 2008) are presented in tables in Appendices A and B, respectively. The impacts are a combination of traditional BTEX plus lesser concentrations of oxygenates, mostly TBA. Site remediation activities to date have included removal of shallow soils around the old tanks and dispensers in 1998 and a five-day soil vapor extraction (SVE) test from MW-3 in 2003. Periodic soil vapor extraction began in July 2008. Groundwater elevation has fallen prior to June 2008 and the wells remain dry.

Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

CHEVRON #9-5954 (Continued) **S105512813**

Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	All three spill containers do not contain the minimum 5 gallon capacity. Additionally, the spill container for the Regular Main tank failed integrity testing.
Violation Division:	Santa Clara County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	104966
Site Name:	CHEVRON STATION #95954
Violation Date:	01-19-2022
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 01/19/2022. Premium gasoline fill spill container assembly within containment sump failed initial integrity testing (leaking into tank fill pipe observed). This container was replaced, retested, and passed during this inspection on 1/19/22.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Overfill prevention inspection is overdue. Last conducted on 1/21/2021. Attempt to inspect was made 1/23/2024 without success according to service technician.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES,

DE ANZA COLLEGE (Continued) **1000409520**

RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS Description: Leaking Underground Storage Tank Cleanup Site

Violations:
Site ID: 24234
Site Name: De Anza College
Violation Date: 06-21-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 07/20/2018. Transfer the oily sludge from the bottom of the open treatment filter bin into the closed 16-gallon waste drum.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 24234
Site Name: De Anza College
Violation Date: 03-12-2014
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2014. 1 x 25 gallon orange, empty used coolant container in Hazardous Waste Shed #3 did not have empty date marked on the container. Use the label provided to you to properly mark your drum.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

DE ANZA COLLEGE (Continued) **U001600984**

Violation Notes:	Returned to compliance on 07/20/2018. 1 x 55-gallon Glaze Wash Water drum in the central storage area had an accumulation start date of 12/16/2017. Operator stated that the drum was moved into the storage shed approximately two weeks ago. Add the transfer date to the drum label.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at

DE ANZA COLLEGE (Continued) **U001600984**

a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 07/20/2018. 1 x 55-gallon Glaze Wash Water drum in the central storage area had an accumulation start date of 12/16/2017. Operator stated that the drum was moved into the storage shed approximately two weeks ago. Add the transfer date to the drum label.

Eval Notes: A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. EPA ID number CAD982029837 is "ACTIVE" on the CA State Hazardous Waste Tracking System. Facility is a Non-RCRA large quantity generator with central 90-day storage area located in the plant corporation yard. All other waste accumulation areas at the school are satellite accumulation areas which transfer all hazardous wastes and universal wastes to the central 90-day storage area. All central and satellite accumulation areas are inspected and documented by employees on a weekly basis. The following universal waste and hazardous waste satellite accumulation areas were inspected: Ceramics, Painting, Photography, Kiln Yard & Welding, Sculpture, Woodworking, Mechanic Shop, Microbiology, Med Tech Lab, Manufacturing & Design Technology, Flint Center, Automotive Technology, Biology, and Chemistry. The central 90-day storage [Truncated]

Eval Notes: A walk-through inspection and paperwork review started on Tuesday, June 19th and concluded today. Inspection was conducted with Karen Lauricella. Tiered Permitting information was last electronically submitted on CERS on 6/18/2018. Unit treats hazardous waste that is not a federal hazardous waste, that discharges effluent to a POTW that operates under a NPDES permit, with residual solids managed as a hazardous waste. Facility keeps an treatment log that records the dates, amounts, and type of waste treated. Treatment system written operating instructions log was reviewed. Facility operates under under permit # CU-033B that expires on 12/15/2018 issued by the SJ/SC Water Pollution Control Plant.

Eval Notes: A site inspection occurred on March 3, 2014, paperwork occurred on 3/6/2014, and inspection concluded today. Facility has a NOVACHEM Wastewater Batch Treatment System for floor mop water that has a trace amount of metals created from the occasional steam-cleaning of auto parts. Facility operates an oil water separator using flocculants and demulsifiers and gravity separation of solids from non-hazardous liquids that are discharged to a POTW. Facility is properly permitted under the CESW tier. Business Activities Form, Business Owner/Operator Page, Tiered Permitting Facility form, Tiered Permitting: Unit CESW forms have been electronically submitted in CERS account 10199950 and are proper. The following documents were reviewed and were proper: Written Operating Instructions; Inspection log; Record of dates, amounts, and types of wastes treated; San Jose/ Santa Clara WPCP Self Monitoring Report dated 6/21/2013; SJ/SC WPCP Wastewater Discharge

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110002689500

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System

BERG & BERG LLC (Continued) **1000279123**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Eval Notes: Facility has 1 dry cleaning machine that uses petroleum distillates. Filters are changed and managed as hazardous waste and dry lint is disposed of to the garbage. This machine requires that the water in the still be replaced every time filters are cleaned and all contaminated water is managed as hazardous waste. Facility owner manually activates a program that triggers the machine to empty the internal waste container to an external bin and waste is immediately placed into a closed and labeled container. Spotting table has drain tubes that empty to an open container at the bottom and waste containers on the spotting table and machine were empty and dry at the time of inspection. Ms. Tsai trains her employees on hazardous waste management and maintains records of waste pickups every 6 months. Records were reviewed during the course of inspection. Facility has adequate spill response, annually serviced fire extinguishers, and waste containers are inspected weekly. covered [Truncated]

Quarterly Update:	Four-Phase Systems, Inc., a manufacturer of semi-conductor components and printed circuit boards, was granted a hazardous waste permit in 1982. Motorola acquired Four-Phase that same year, but soon discontinued it's operations and submitted a closure plan on 10/30/1984. Their closure was certified by DHS on 2/2/1987. After the closure, DHS conducted an inspection of the site and found waste that was not completely removed from the site. Cleanup of the site was conducted and closure activities were finally completed. Motorola was certified closed again on 7/30/2001. The site is currently used by Apple Computer.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

CANDESCENT TECHNOLOGIES CORP (Continued) **1000332458**

storers, and disposers of hazardous waste.

Comments: public notice started

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 09/01/2020
Comments: Sampling occurred August 18th and 19th 2020

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Plan
Completed Date: 10/25/2022
Comments: Sub-slab soil vapor and indoor air monitoring plan to assess the site-specific attenuation factor and to ensure that residual contamination from halogenated volatile organic compounds does not present an unacceptable risk to human health.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/23/2022
Comments: Report presents the results of the indoor air, soil vapor, and subslab sampling that took place at the Site in February 2022.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan w/ESD
Completed Date: 10/20/2022
Comments: Explanation of Significant Differences. A land use covenant has been added as a new component of the remedy. The land use covenant restricts the use of the site to commercial/industrial.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/20/2024
Date Data Arrived at EDR: 08/19/2024
Date Made Active in Reports: 10/09/2024
Number of Days to Update: 51

Source: Drug Enforcement Administration
Telephone: 202-307-1000
Last EDR Contact: 02/20/2025
Next Scheduled EDR Contact: 06/02/2025
Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21

Telephone: 916-323-3400
Last EDR Contact: 02/23/2009
Next Scheduled EDR Contact: 05/25/2009
Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 10/21/2024
Date Data Arrived at EDR: 10/22/2024
Date Made Active in Reports: 01/10/2025
Number of Days to Update: 80

Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 01/22/2025
Next Scheduled EDR Contact: 05/05/2025
Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2022
Date Data Arrived at EDR: 03/21/2024
Date Made Active in Reports: 06/12/2024
Number of Days to Update: 83

Last EDR Contact: 12/23/2024
Next Scheduled EDR Contact: 05/12/2025
Data Release Frequency: Varies

CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 01/12/2025
Date Data Arrived at EDR: 01/14/2025
Date Made Active in Reports: 03/28/2025
Number of Days to Update: 73

Source: CalEPA
Telephone: 916-323-2514
Last EDR Contact: 01/14/2025
Next Scheduled EDR Contact: 04/28/2025
Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Date Data Arrived at EDR: 08/30/1995
Date Made Active in Reports: 09/26/1995
Number of Days to Update: 27

Source: State Water Resources Control Board
Telephone: 916-227-4364
Last EDR Contact: 01/26/2009
Next Scheduled EDR Contact: 04/27/2009
Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/20/2024

Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 11/26/2024
Date Data Arrived at EDR: 12/03/2024
Date Made Active in Reports: 12/31/2024
Number of Days to Update: 28

Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 02/19/2025
Next Scheduled EDR Contact: 06/09/2025
Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Data Release Frequency: No Update Planned

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database
US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

USGS TOPOGRAPHIC MAP

Target Property Map:	50005309 CUPERTINO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

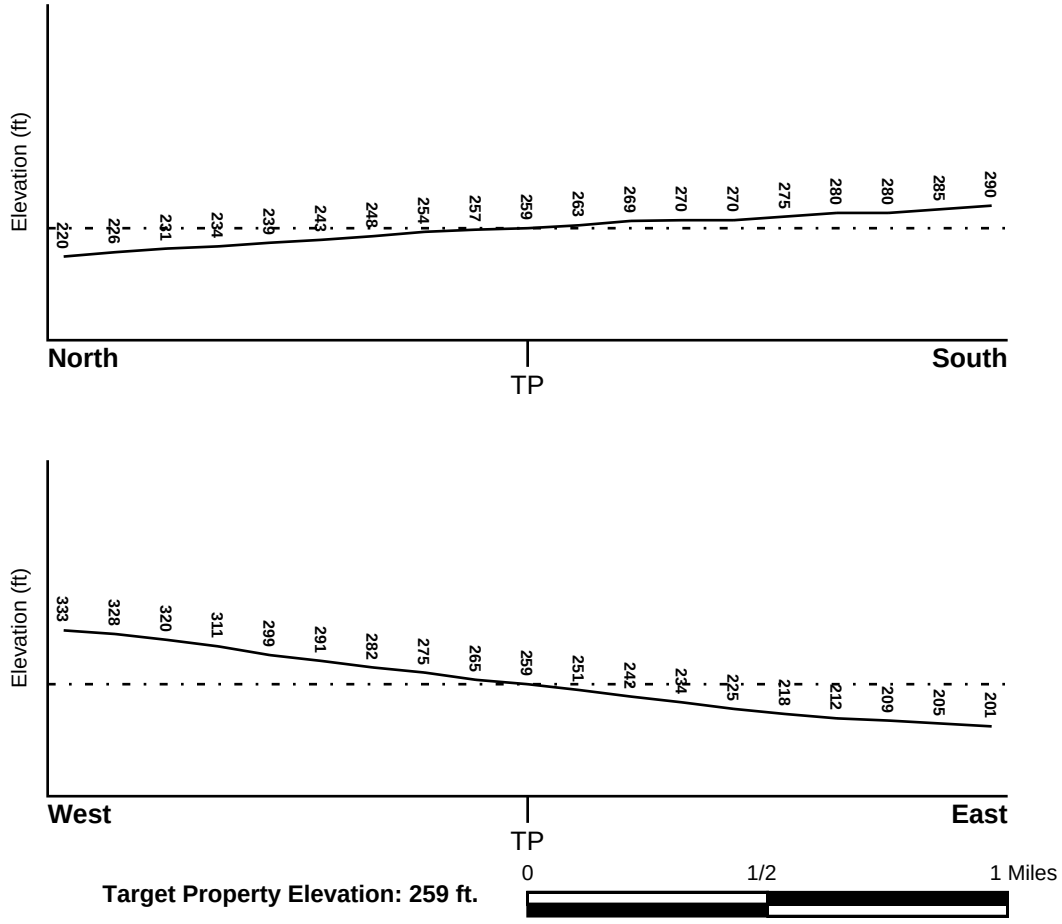
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

APPENDIX G

RESUMES OF ENVIRONMENTAL PROFESSIONALS

DANIEL L. WOOD, PG

PROJECT GEOLOGIST

ENVIRONMENTAL ENGINEERING & PROJECT MANAGEMENT

Mr. Wood performs Phase I and Phase II site assessments and develops and implements site specific soil and groundwater management and remediation plans. Over the past six years at Langan he has refined his knowledge of Bay Area geology, honed his field sampling skillsets, gained experience with construction oversight roles, and built his knowledge base of environmental regulation compliance and the development and implementation of remediation plans, and is beginning to sharpen his project management skill sets. He has experience with sampling of soil, air, and water; data and sample collection from both vapor mitigation and water treatment systems; vapor barrier repair inspection; and NPDES permit compliance and reporting. Specifically, Mr. Wood has been involved in long-term projects covering the characterization and safe excavation of naturally occuring asbestos in South San Francisco, operation and maintenance of vapor mitigation systems in South San Francisco and Santa Clara, data and sample collecton and regulatory compliance for a water treatment systems in Mountain View and Berkeley. Additionally, Mr. Wood has experience in the site assessment and remediation of land and waters impacted by acid mine drainage and coal mining.

SELECTED PROJECTS

- 6815 San Leandro – Contaminant soil sampling and excavation oversight, Oakland, CA
- Hunters Point Block 56 – Environmental Site Characterization, San Francisco CA
- 2225, 2255, and 2285 Martin Avenue – Limited Environmental Site Characterization, Santa Clara CA
- Pointe Grand – Soil and Groundwater Mitigation Plan, South San Francisco CA
- Foundry – Dual Phase Extraction System O&M and Off-site Soil Vapor Investigation, Berkeley CA
- Intuit Bayshore Building – Water Treatment System Sampling, NPDES Compliance, and Reporting, Mountain View, CA
- City Place – Landfill Closed Displacement Test Pile Groundwater Monitoring, Condensate Trap Sampling, Santa Clara, CA
- Gateway of Pacific Phases 1, 2, and 3 - Asbestos Dust Mitigation Plan Implementation and Environmental Oversight, South San Francisco, CA

SELECTED PUBLICATIONS, REPORTS, AND PRESENTATIONS

“Carbide Lime Treatment of Acid Mine Drainage Impacted Soils in the Huff Run Watershed of Northeast Ohio.” GSA Annual Meeting, Seattle, Washington, 2017.

“Origins and Evolution of amphibolite from the glade gap exposures of the Chunky Gal/Buck Creek Mafic-Ultramafic Complex, Western North Carolina.” GSA Annual Meeting, Baltimore, Maryland, 2015.

PETER CUSACK

ASSOCIATE PRINCIPAL

ENVIRONMENTAL ENGINEERING

Mr. Cusack has 33 years of experience managing and implementing hazardous waste characterization and remediation projects. His experience includes pre-acquisition site assessments, site investigations, removal of underground storage tanks, Phase II investigations, soil, soil vapor, and groundwater sampling and remediation, development of soil management plans, aquifer pumping tests, contractor oversight, and field inspection for numerous construction projects and preparation of site closure reports. His work is often done in coordination with our geotechnical practice. He has extensive experience in site investigations and regulatory agency interaction prior to, and during, new construction/development.

SELECTED PROJECTS

- Environmental Site Assessments, Numerous Throughout the Bay Area
- Over 175 Soil, Soil Vapor, and Groundwater Site Investigations Throughout the Bay Area

Academic

- National Center for International Schools, San Francisco, CA
- UCSF Mission Bay Campus, San Francisco, CA
- University of San Francisco, Malloy Hall, San Francisco, CA
- Campus Community Center, Building 21B, Mission Bay, San Francisco, CA
- Hastings College of Law Property, San Francisco, CA
- San Jose Evergreen Community College District, South Campus Development & Automotive Tech Building, San Jose, CA
- Tenderloin Elementary School, San Francisco, CA
