

## Proposed City of Cupertino 2021<sup>0</sup> Legislative Platform

The 2021<sup>0</sup> Legislative Platform is comprised of guiding principles that provide a framework for the City of Cupertino's regional, state, and federal legislative priorities. Adopted annually, the City's Legislative Platform serves as a reference guide for legislative positions and objectives that provides direction for the City Council, the Legislative Review Committee, and staff throughout the year. The Legislative Platform is the foundation of a focused advocacy strategy.

### Guiding Principles

#### **I. Fiscal Responsibility**

The City of Cupertino has a fiduciary responsibility to its residents to ensure assets and resources are properly safeguarded and deployed in a fair, prudent, and efficient manner. As such, the City supports the protection of existing federal, state, and local funding sources and the authorities that provide revenues to the City. Likewise, the City has an interest in the solvency of public entities that provide resources to the City. The City opposes any new mandates that are unfunded or inadequately funded, and supports efforts to eliminate, or provide funding for currently unfunded mandates.

#### **II. Local Control**

The City supports local decision-making authority and opposes preemption of local control. Cities are voluntarily created by the residents of a community to provide local self-government and to make decisions at a local level to best meet the needs of the community. Each community has unique needs and characteristics that are best met by policies set by its local governing body. Efforts to remove the ability to set policy at the local level should be opposed, while promoting legislation that allows flexibility in the City's effort to cost-effectively meet local priorities.

#### **III. Sustainability**

The City of Cupertino is a leader in embracing sustainability efforts in response to current and anticipated environmental challenges. The City continuously looks for innovative strategies to reduce its carbon footprint and adapt to the impacts of climate change. The City supports environmentally friendly legislation and urban sustainability consistent with our Climate Action Plan (CAP). As such, the City supports environmentally friendly legislation and urban sustainability consistent with our CAP goals.

#### **IV. Infrastructure and Mobility**

The City seeks to maintain existing infrastructure and enhance the safety and accessibility of sustainable, alternative mobility options for our residents and businesses. The City can accomplish this by supporting legislation that increases funding for transportation, infrastructure, operations, and maintenance in Cupertino.

The City seeks to upgrade and maintain municipal facilities so that they operate at peak energy and water efficiency. In addition, Cupertino seeks to enhance the provision of carbon-free services, such as electric vehicles and buildings that are free of fossil fuels. Cupertino supports

legislation or rulemaking that enhances the City's ability to procure and implement fuel-switching, on-site renewable energy deployment, and low-carbon or carbon-free critical power backup services.

### V. Healthy, Safe and Resilient Community

One of the City's primary goals is to provide a healthy and safe environment for our residents. The City supports legislation that protects and enhances services to the City's most vulnerable populations, such as the economically disadvantaged, elderly, homeless, and disabled. In addition, the City supports federal and state assistance for local law enforcement, as well as any measures that would help contribute to local public safety and mental well-being, such as support for parks and open spaces. In order to foster a resilient community, the City supports legislation that strengthens local disaster preparedness, emergency planning and response activities, as well as programs that invest in climate adaptation planning and deployment of adaptation strategies.

### VI. Education

The City understands that access to quality education is a key factor in maintaining a strong and vibrant community. The City supports state efforts to ensure that California schools have adequate funding to ensure that every child has access to a quality education and all schools have the personnel and materials needed to create an environment where children can succeed.
