Economic Update

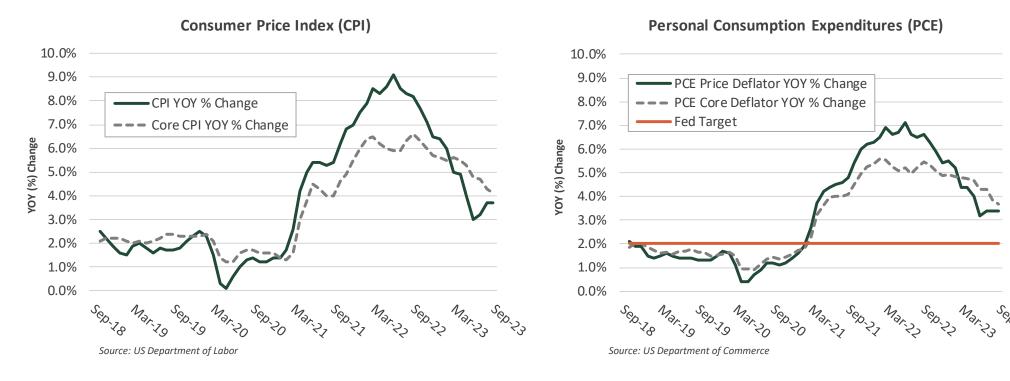

- Recent economic data has shown above trend growth fueled by a rise in consumer spending and a continuing healthy US job market. Inflationary trends are subsiding, but core levels remain well above the Fed's target. Given the cumulative effects of restrictive monetary policy and tighter financial conditions, we believe the economy will gradually soften and the Fed will remain data dependent as they tread cautiously going forward.
- As expected at the November meeting, the Federal Open Market Committee voted unanimously to leave the Federal Funds rate unchanged at a target range of 5.25 5.50%. Market participants interpreted the FOMC statement as somewhat dovish, with the formal statement noting "tighter financial and credit conditions for households and businesses are likely to weigh on economic activity, hiring, and inflation." Federal Reserve Chair Jerome Powell also noted the stance of policy is restrictive, the full effects of the tightening have yet to be felt, and the process of getting inflation to 2% has a long way to go. We believe monetary policy will remain restrictive for longer, but further tightening will not be required for the Federal Reserve to eventually achieve their policy objectives.
- The yield curve inversion narrowed considerably in October. The 2-year Treasury yield increased 4 basis points to 5.09%, the 5-year Treasury yield rose 24 basis points to 4.86%, and the 10-year Treasury yield increased 36 basis points to 4.93%. The inversion between the 2-year Treasury yield and 10-year Treasury yield narrowed to -16 basis points at October month-end versus -48 basis points at September month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was -44 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -54 basis points in October from -88 basis points in September. The shape of the yield curve indicates that the probability of recession persists.

Employment

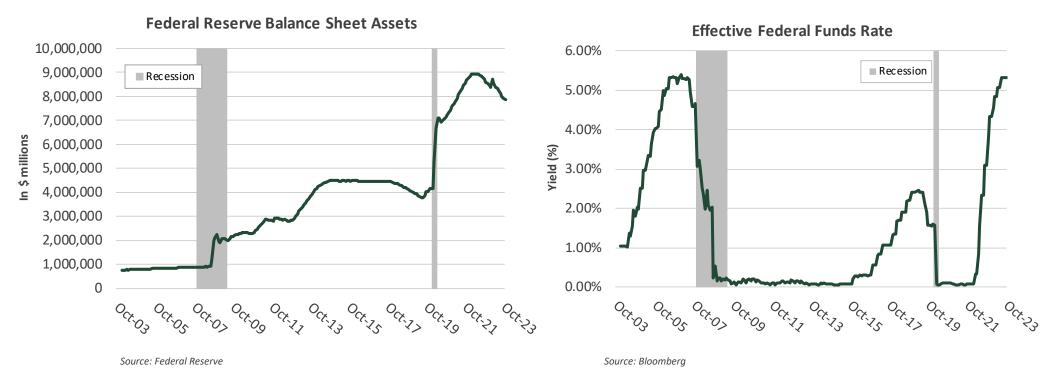

The U.S. economy added 150,000 jobs in October, versus consensus expectations of 180,000, and the last two months were revised downward by 101,000 jobs. The largest gains came from education and health services, while the United Auto Workers strike contributed to the softer results for the month. The trajectory of job creation is moderating, with the three-month moving average payrolls at 204,000 and the six-month moving average at 206,000. The unemployment rate ticked up 0.1% to 3.9%, and the labor participation rate fell slightly to 62.7%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons rose to 7.2% from 7.0% last month. Average hourly earnings declined to 4.1% year-over-year in October from 4.3% in September. Employment remains strong by historical standards, but data are trending toward a less robust labor market outlook.

Inflation

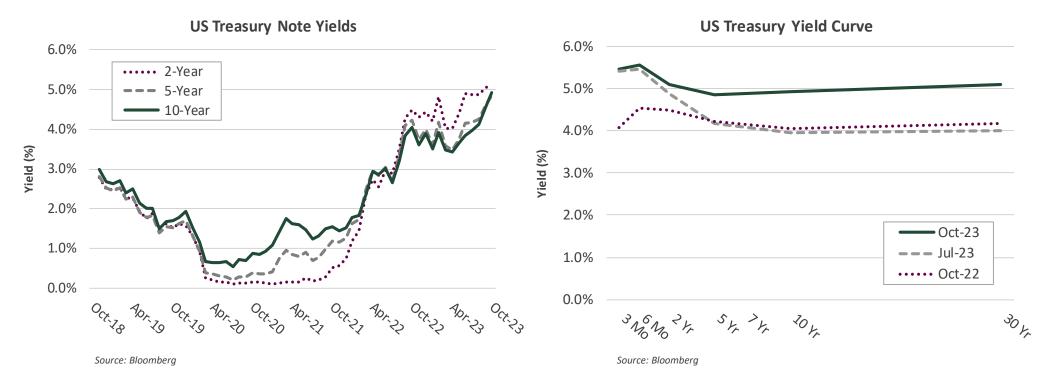

The Consumer Price Index (CPI) increased in September by 0.4% month-over-month and 3.7% year-over-year, slightly higher than expected. Gains in shelter and energy costs accounted for a large part of the monthly increase. The Core CPI, which excludes volatile food and energy components, was up 0.3% month-over-month and 4.1% year-over-year, decelerating from 4.3% last month. The Personal Consumption Expenditures (PCE) index rose 0.4% month-over-month and 3.4% year-over-year in September, unchanged from August. Core PCE, the Federal Reserve's preferred inflation gauge, increased 0.3% month-over-month and decelerated to 3.7% year-over-year in September from a 3.8% increase in August. Personal income and spending remained relatively healthy, but the personal savings rate continued its declining trend to 3.4% in September from 4.0% in August. Inflation remains above the Fed's 2% target.

Federal Reserve

As expected at the November meeting, the Federal Open Market Committee voted unanimously to leave the Federal Funds rate unchanged at a target range of 5.25 - 5.50%. Market participants interpreted the FOMC statement as somewhat dovish, with the formal statement noting "tighter financial and credit conditions for households and businesses are likely to weigh on economic activity, hiring, and inflation." During the press conference concluding the meeting, Federal Reserve Chair Jerome Powell also noted the stance of policy is restrictive, the full effects of the tightening have yet to be felt, and the process of getting inflation to 2% has a long way to go. We believe monetary policy needs to remain restrictive for longer to continue to put downward pressure on inflation; however we do not believe further tightening will be required for the Federal Reserve to eventually achieve their 2% policy objective. Since the Federal Reserve began its Quantitative Tightening campaign in June 2022, securities holdings have declined by over \$1.1 trillion to approximately \$7.9T.

Bond Yields

At the end of October, the 2-year Treasury yield was 60 basis points higher, and the 10-Year Treasury yield was about 88 basis points higher, year-over-year. The inversion between the 2-year Treasury yield and 10-year Treasury yield narrowed to -16 basis points at October month-end versus -48 basis points at September month-end. The average historical spread (since 2003) is about +130 basis points. The inversion between 3-month and 10-year Treasuries narrowed to -54 basis points in October from -88 basis points in September. The shape of the yield curve indicates that the probability of recession persists.

2023 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc ("IDS"), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

Your qualified custodian bank maintains control of all assets reflected in this statement and we urge you to compare this statement to the one you receive from your qualified custodian. Chandler does not have any authority to withdraw or deposit funds from/to the custodian account.
