CITY COUNCIL STAFF REPORT

Meeting: March 21, 2017

Subject

2017 Pavement Maintenance Project – Phase 2, Project No. 2017-110

Recommended Action

Authorize the City Manager to award a contract to Telfer Pavement Technologies, LLC, in the amount of \$490,247.65 and approve a construction contingency of \$50,000, for a total of \$540,247.65.

Discussion

On March 7, 2017, the City received four bids for the 2017 Pavement Maintenance Project – Phase 2. This project provides for various preventative maintenance asphalt treatments on over 20 streets throughout the City. The majority of these streets are in residential areas on streets that are in fair condition. The timely application of a preventative treatment, such as a slurry seal, will improve the pavement condition before it worsens and necessitates a much more expensive pavement treatment. The following is a summary of bids deemed complete:

Bidder	Bid Amount
Engineers Estimate	\$590,000
Telfer Pavement Technologies	\$490,247
American Pavement Systems	\$499,785
VSS International	\$518,217
International Slurry Seal	\$528,088

The engineers estimate for this project was based upon the competitively bid unit costs of a similar project completed in 2015. The favorable bids received this year are likely a result of this project being out to bid early in the construction season.

Sustainability Impact

No sustainability impact.

Fiscal Impact

Award of the project will result in a fiscal impact of up to \$540,247.65. Sufficient funds have been budgeted and are available from account #270-85-821 900-921 (Pavement Maintenance).
