Mohammad Kamrul Islam 10033 Hillcrest Road Cupertino, California 94014

RE: Phase I Environmental Site Assessment Report 10033 Hillcrest Road, Cupertino, California 94014 ACC Project Number: 10260-001.00

Dear Mr. Islam,

ACC has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 10033 Hillcrest Road, Cupertino, California (Subject Property). This Phase I ESA was requested by Mohammad Kamrul Islam (Client). The purpose of this Phase I ESA was to assess the Subject Property for Recognized Environmental Conditions as defined by the ASTM E1527-21 Standard.

This Phase I ESA has not identified evidence of Recognized Environmental Conditions, as discussed in the Executive Summary and the report narrative.

Thank you for choosing ACC to perform this Phase I ESA. If you have any questions regarding this report please contact (707) 481-0795 or kbunting@accenv.com.

Sincerely,

Kimberly Bunting Project Manager

Phase I Environmental Site Assessment

EXECUTIVE SUMMARY

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 10033 Hillcrest Road, Cupertino, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

The Subject Property consists of one parcel of land totaling approximately 0.64-acre and located on the western side of Hillcrest Road between Crescent Road and Cupertino Road in the city of Cupertino, California. The Subject Property is currently developed with a one-story residential dwelling with detached garage and associated landscaping.

The earliest record reviewed during this assessment was an 1897 historical topographic map depicting the Subject Property as undeveloped land. The Subject Property remained in this configuration until approximately 1902.

By 1939, the Subject Property appeared developed as agricultural orchards.

By 1948, the Subject Property is developed with the current one-story residential dwelling with remnants of agricultural orchards observed until approximately 1963. A garage was constructed to the west of the dwelling during this time period. The Subject Property has remained in this configuration to the present.

Historical Subject Property occupants include: private residences (1968 to 2020).

No significant data gaps were identified while conducting this Phase I ESA.

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

The assessment has revealed evidence of a potential Business Environmental Risk (BER) at the Subject Property:

<u>BER</u>: Based on the historical site use as agricultural from at least 1939 to 1948 with remnants of orchards observed until approximately 1963, there is a potential that pesticides were historically utilized at the Subject Property.

According to City of Cupertino Community Development Department, projects that are on sites which are known to have current or former orchards or other irrigated agricultural activities that were active in 1950 or later are assumed to contain RECs associated with organic pesticides and are required to prepare a Focused Phase I ESA that addresses only RECs other than those associated with organic pesticides. No additional RECs or other unacceptable or potentially unacceptable health risks have been identified during this Phase I ESA. ACC recommends proceeding with City of Cupertino's requirement that the project applicant shall proceed with preparation of a Focused Phase II ESA that addresses only the potential hazards associated with organic pesticides. ACC recommends sampling for the presence of pesticides and metals typically associated with historical agricultural practices.

<u>Non-Scope Considerations</u>: Based on the age of the buildings, ACC recommends an asbestoscontaining building materials (ACBM) survey and a lead-based paint (LBP) survey if building materials are to be demolished or disturbed.

Common ACBMs include flooring and associated adhesive; baseboard and baseboard adhesive; carpet adhesive; leveling compound; drywall, joint and/or texturing compounds; ceiling tiles; roofing felts; roof patching compounds; and mechanical/boiler system insulation. Federal regulations require that potential ACBMs be sampled and analyzed for the presence of asbestos prior to any renovation or demolition activities that disturb such materials (40 CFR Part 61).

The Subject Property buildings may have been constructed prior to 1978 and should be assumed to contain lead-based paint (LBP) based on current regulations. A lead-based paint survey performed by a state-certified Lead Inspector is recommended if painted surfaces are to be disturbed.

1.0 INTRODUCTION

On behalf of Mohammad Kamrul Islam (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I Environmental Site Assessment (ESA) of the property identified as 10033 Hillcrest Road, Cupertino, California (Subject Property).

1.1 Purpose

The purpose of this Phase I ESA was to assess the Subject Property for recognized environmental conditions (RECs), which are defined by the ASTM E1527-21 Standard as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

1.2 Scope of Services

ACC conducted the following:

- A search of regulatory records and files for the Subject Property, neighboring properties, and nearby sites of environmental concern to assess whether any adverse environmental conditions have impacted, or has the potential to impact the Subject Property.
- A review of historical sources including historical aerial photographs, historical topographic maps, historic city directories and historical fire insurance maps.
- A review of physical setting sources including the USGS 7.5 minute topographic maps, as well as geology, hydrogeology, and soil maps of the Subject Property and vicinity, as deemed appropriate.
- A review of the current title report for the Subject Property (if provided by the Client), and copies of all previous environmental site investigations performed at the property (if applicable and available).
- A site reconnaissance to visually assess the potential for RECs in connection with the Subject Property.
- Interviews of regulatory agencies and available persons familiar with the Subject Property.

1.3 Limitations

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce uncertainty regarding the potential for RECs in connection with the Subject Property within reasonable limitations of time and cost. There is a point at which the cost of information obtained or the time frame required to gather

it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions.

Conducting a Phase I ESA alone does not provide a landowner with CERCLA liability protection. Landowners who want to qualify as bona fide prospective purchasers or contiguous property owner must comply with all of the statutory requirements identified in CERCLA Section 107(r) and 107(q). Continuing obligations must be satisfied to maintain liability protection under CERCLA for innocent landowners, bona fide prospective purchasers, and contiguous property owners. Continuing obligations start on the date that a landowner acquires title to a property. The landowner must: 1) comply with land use restrictions and institutional controls; 2) take "reasonable" steps with respect to hazardous substances releases; 3) provide full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; 4) comply with information requests and administrative subpoenas; and 5) provide all legally required notices.

The site reconnaissance was limited to a visual observation of the Subject Property. ACC shall not be responsible for areas covered by parked vehicles, overgrown vegetation, and/or other obstacles (heavy furniture, trash bins, miscellaneous stored items, etc.) preventing access or visual observation at the time of the site reconnaissance. Per the ASTM E1527-21 Standard it is not necessary to look under floors, above ceilings or behind walls.

As is the case with any investigation of limited scope, site conditions may vary from those observed and witnessed on the date of the site reconnaissance. The possibility of the discovery of the presence of hazardous substances that are not anticipated and/or were neither witnessed nor identified on the date of the site reconnaissance cannot be completely eliminated. ACC cannot offer any form of warranty and/or guarantee that the Subject Property does not contain hazardous substances and/or conditions per the results of performing this Phase I ESA. Because regulatory criteria change over time, potential concentrations of contaminants presently considered not significant may in the future fall under more stringent regulatory standards that require remediation.

Based on the ASTM E2600-22 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the minimum search distance for potential vapor intrusion by a release of petroleum products is 528 feet (1/10 mile) and the minimum search distance for potential vapor intrusion by other chemicals is 1,760 feet (1/3 mile).

1.4 Project-Specific Limitations and/or Deviations

This assessment did not include any testing or sampling of materials, including soil, water, soil vapor, air or building materials. No limiting conditions or deviations were encountered during this assessment.

1.5 Significant Assumptions

No significant assumptions were made during this Phase I ESA. ACC assumes that verbal and written information provided to ACC during this Phase I ESA process, and included in this report, is factual.

1.6 User Reliance

This report may be relied upon by Mohammad Kamrul Islam (User) and the City of Cupertino. Reliance upon this report by additional parties is unauthorized unless expressed written consent is obtained from the Client and ACC.

2.0 SITE DESCRIPTION

The Subject Property consists of one parcel of land located on the western side of Hillcrest Road between Crescent Road and Cupertino Road in Cupertino, California (Figures 1 and 2). The total area of the Subject Property is approximately 0.64 acres per the Santa Clara County Assessor. The following addresses have been found to be associated with the Subject Property: 10033 Hillcrest Road.

The Subject Property, Assessor Parcel Number (APN) 326-16-014, is accessible from Hillcrest Road to the east. The Subject Property is currently developed with a one-story residential dwelling with detached garage and associated landscaping. The Subject Property is currently occupied by private residences. The surrounding area is developed for residential use.

Electricity and gas are provided by PG&E. Water service is provided by San Jose Water Company and sewer service is provided by Cupertino Sanitary District.

3.0 USER PROVIDED INFORMATION AND INTERVIEWS

ACC provided Mohammad Kamrul Islam, Subject Property Owner, a User questionnaire which requests information as described in ASTM E1527-21 Section 6. The environmental questionnaire was completed by Mohammad Islam and dated February 10, 2024. A copy of the user questionnaire is included in Appendix A.

The User is completing the Phase I ESA as a City of Cupertino application requirement for the proposed sub-division of the Subject Property into two residential lots.

3.1 Interviews

3.1.1 Interview with Owner, Key Site Manager or Representative/Operator

Mr. Islam revealed they have been associated with the Subject Property for approximately six months.

Mr. Islam does not know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the Subject property.

Mr. Islam does not know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the Subject property.

Mr. Islam does not know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Mr. Islam was unaware of additional environmental concerns associated with the Subject Property.

3.1.2 Interviews with Occupants

Mr. Islam revealed that occupants do not stay permanently at the Subject Property. Interviews with the occupants were not conducted at this time.

3.1.3 Interviews with Local Government Officials

See Section 4.5.

3.1.4 Interviews with Others

Interviews with Others were not conducted at this time.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information or actual knowledge with regard to environmental liens or AULs in connection with the Subject Property.

3.2.1 Title Report

A Title Report was not provided to ACC.

3.3 Specialized Knowledge

No specialized knowledge indicative of RECs in connection with the Subject Property was provided by the User.

3.4 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information available to ACC has been

incorporated into this report.

3.5 Valuation Reduction for Environmental Issues

The User currently owns the Subject Property.

3.6 Owner and Key Site Property Manager Information

The current owner of the Subject Property is Mohammad Kamrul Islam.

3.7 Previous Environmental Reports

No previous environmental reports were provided by the User.

4.0 RECORDS REVIEW

ACC contracted Environmental Data Resources, Inc. (EDR) to research available environmental records and historical data for the Subject Property based on the ASTM E1527-21 Standard. A complete list of searched records and databases, as well as search distances, is attached as Appendix B. The search distances provided by EDR are in accordance with the ASTM E1527-21 Standard and AAI guidelines.

The database search by EDR revealed one mapped site within a one-eighth mile radius of the Subject Property. The Subject Property and nearby properties of potential concern are discussed below.

4.1 Summary of EDR Records for Subject Property

The Subject Property was not listed on any environmental databases.

4.2 Adjacent Properties of Potential Concern

<u>Site Name</u>: Facciola Residence <u>Site Address</u>: 22371 Cupertino Road <u>Gradient Direction</u>: Up/Cross Gradient

<u>Discussion</u>: The southwest adjoining property is listed on the LUST, HIST LUST, SWEEPS UST, and HIST CORTESE databases. According to the online Geotracker database, one 350-gallon gasoline underground storage tank (UST) and associated piping was removed from the site in December 1993. The tank was reported to have some corrosion but no visible holes. Fire district personnel observed that the contamination appeared to have been from over filling the tank reservoir. Soil sampling was conducted immediately after the tank removal directly below the tank and along the sidewalls at depths varying between six and 11 feet below ground surface (ft

bgs). Soil samples below the tank pit detected total petroleum hydrocarbons as gasoline (TPH-g) at a maximum concentration of 750 parts per million (ppm). Over excavation of the tank pit was performed and 54 tons of soil was disposed off site in January 1994. Post-excavation sampling detected Benzene, Toluene, ethylbenzene, and xylenes (BTEX), and TPH-g in sidewall soil samples up to concentrations of 0.036, 3.3, 1.3, 7.7, and 110 milligram per kilogram (mg/kg), respectively. A soil boring was advanced in the location of highest sidewall contamination to approximately 45 ft bgs. Soil samples were collected every 5 feet and did not detect contamination. Correspondence between Santa Clara Valley Water District and the owner in September 1994 stated the site should not have been reported as an unauthorized release and was taken off the LUST database. A No Further Action letter was issued on January 9, 1995. Based on depth to groundwater, and residual contamination remaining only in shallow soils and below current screening levels, these listings are not expected to represent an environmental concern to the Subject Property.

No additional adjacent properties were listed on any environmental databases.

4.3 Nearby Properties of Potential Concern

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the Subject Property.

4.4 California Geologic Energy Management Division

The California Geologic Energy Management Division (CalGEM) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the Subject Property. No oil wells were identified within 500 feet of the Subject Property.

4.5 Additional Environmental Record Sources

In addition, ACC submitted file review request letters, emails and/or phone calls to the following agencies for the Subject Property:

4.5.1. California EPA – Department of Toxic Substance Control (DTSC)

ACC received a response from the DTSC on February 15, 2024. No files were available for the Subject Property. ACC additionally reviewed the online DTSC Envirostor database and found the Subject Property is not listed.

4.5.2. Regional Water Quality Control Board (RWQCB)

ACC received a response from the RWQCB on February 16, 2024. No files were available for the Subject Property. ACC additionally reviewed the online RWQCB Geotracker database and found the Subject Property is not listed.

4.5.3. Santa Clara County Department of Environmental Health (SCCDEH)

A request was sent to SCCDEH on February 9, 2024. ACC did not receive a response from SCCDEH prior to issuing this report.

4.5.4. Bay Area Air Quality Management District (BAAQMD)

ACC received a response from the BAAQMD on February 20, 2024. No files were available for the Subject Property.

4.5.5. Santa Clara County Fire Department (SCCFD)

ACC received a response from SCCFD on [February 13, 2024 No files were available for the Subject Property.

4.5.6. Cupertino Building Department (CBD)

ACC reviewed available records from City of Cupertino online database on February 27, 2023. Files available included:

- A building permit for a new heating unit dated December 15, 1993.
- An application for reroof permit issued to D. Gaubatz dated July 10, 1995.
- A building permit to replace furnace dated January 23, 2006.

4.6 Historical Use Information

Information pertaining to historical uses of the Subject Property, adjoining properties, and surrounding area was obtained from the following sources: aerial photographs, historical topographic maps, historical Sanborn Maps and city directories. These resources were obtained from Environmental Data Resources (EDR).

ACC reviewed historical aerial photographs dated 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1991, 1998, 2006, 2009, 2012, 2016, and 2020. A copy of the Historical Aerial Photographs is provided in Appendix C.

ACC reviewed historical topographic maps dated 1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, 2012, 2015, 2018, and 2021. A copy of the Historical Topographic Maps is provided in Appendix D.

Historical Sanborn Maps (fire insurance maps) are detailed scaled drawings that show the location and use of building structures that have occupied a given area from as early as the late 1800s. These maps can provide information that is unavailable from other sources regarding the development and use of a given property. Historical Sanborn Maps were not available for the Subject Property. Historical Sanborn Maps are provided in Appendix E.

Historical city directories were provided by Cole Information Systems and Haines Company, Inc. Directories were reviewed for available data from the years 1968 to 2020. The Subject Property

address reviewed included 10033 Hillcrest Road. A copy of the Historical City Directories is provided in Appendix F.

4.6.1 Historical Use Information on the Subject Property and Adjacent Properties

Pertinent observations from the historical resources in relation to the Subject Property and the immediately adjacent properties is as follows:

Subject Property

Circa 1897 to 1902	According to historical references reviewed, the Subject Property appears undeveloped.
Circa 1939 to 1947	According to historical references reviewed, the Subject Property appears developed as agricultural orchards.
Circa 1948 to 2020	According to historical references reviewed, the Subject Property is developed with the current one-story residential dwelling with remnants of agricultural orchards observed until approximately 1963. A garage was constructed to the west of the dwelling during this time period. Occupants during this time include: private residences (1968 to 2020).
10073 Hillcrest Road, Adjacent	t Property to the North
Circa 1897 to 1902	According to historical references reviewed, the area to the north of the Subject Property appears undeveloped.
Circa 1939 to 1947	According to historical references reviewed, the area to the north of the Subject Property appears developed as agricultural orchards.
Circa 1948 to 2020	According to historical references reviewed, the area to the north of the Subject Property is developed with the existing residential dwelling. Occupants during this time include: private residences (1968 to 2020).
22333 Cupertino Road and 223	21 Cupertino Road, Adjoining Properties to the South
Circa 1897 to 1902	According to historical references reviewed, the area to the south of the Subject Property appears undeveloped.
Circa 1939 to 1947	According to historical references reviewed, the area to the south of the Subject Property appears developed as agricultural orchards.

Northern California: 7977 Capwell Drive, Suite 100 • Oakland, CA 94621 • (510) 638-8400 • Fax (510) 638-8404 Los Angeles • Vancouver • Longview • Seattle Circa 1948 to 2020 According to historical references reviewed, the area to the south of the Subject Property is developed with the existing two residential dwellings. Historical occupants were not available during this time.

10050 Hillcrest Road and 10030 Hillcrest Road, Adjacent Properties to the East

- Circa 1897 to 1902 According to historical references reviewed, the area to the east of the Subject Property appears undeveloped.
- Circa 1939 to 1947 According to historical references reviewed, the area to the east of the Subject Property appears developed as agricultural orchards.
- Circa 1948 to 2020 According to historical references reviewed, the area to the east of the Subject Property is developed as two residential dwellings. The dwellings appear to be renovated over the years and redeveloped into their existing configuration by 2006. Occupants during this time include: private residences (1968 to 2020).

22399-22445 Cupertino Road, Adjacent Property to the West

Circa 1897 to 1902	According to historical references reviewed, the area to the east of the Subject Property appears undeveloped.
Circa 1939 to 1963	According to historical references reviewed, the area to the east of the Subject Property appears developed as agricultural orchards with associated structures.
Circa 1968 to 2020	According to historical references reviewed, the area to the east of the Subject Property appears developed with the existing retirement community. Historical occupants were not available during this time.

4.7 Historical Summary for Subject Property

The earliest record reviewed during this assessment was an 1897 historical topographic map depicting the Subject Property as undeveloped land. The Subject Property remained in this configuration until at least 1902.

By 1939, the Subject Property appeared developed as agricultural orchards.

By 1948, the Subject Property is developed with the current one-story residential dwelling with remnants of agricultural orchards observed until approximately 1963. A garage was constructed to

the west of the dwelling during this time period. The Subject Property has remained in this configuration to the present.

Historical Subject Property occupants include: private residences (1968 to 2020).

4.8 Historical Summary for Adjacent and Surrounding Properties

Based on historical records reviewed, the adjacent and surrounding area was developed as agricultural land dating back to the late 1930s. The area was developed as mainly agricultural land until the 1960s. Residential development in its existing configuration was developed from the 1940s through the mid 1980s. In 1948, the southwest adjoining property appeared developed with structures associated with nearby orchards (Section 4.2).

No off-site, nearby properties which pose an environmental risk to the Site were identified during the historical review.

4.9 Vapor Intrusion

In accordance with the ASTM E2600 Standard, ACC assessed the Subject Property for a potential vapor encroachment condition (VEC). A vapor encroachment condition is defined by ASTM E 2600 as "the presence or likely presence of chemical(s) of concern (COC) vapors in the vadose zone of the Target Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Target Property."

4.9.1 Site

There is no evidence of a VEC in association with the Subject Property. It is ACC's opinion that a VEC at the Subject Property due to on-site source can be ruled out at this time.

4.9.2 Off-Site

There is no evidence of a VEC in association with the Subject Property. It is ACC's opinion that a VEC at the Subject Property due to off-site source can be ruled out at this time.

4.10 Radon

The Subject Property is located in an area designated as having a moderate potential for indoor radon measurements above the USEPA recommended action level of 4 picocuries per liter of air (pCi/L).

5.0 PHYSICAL SETTINGS

The Subject Property is approximately 383 feet above mean sea level according to the U.S.

Geological Survey (USGS) Cupertino 7.5 Minute Quadrangle topographic map (2021). The topography at the Subject Property gradually slopes to the east. The surrounding topography generally slopes towards the northeast.

Based on the Soils Investigation Report for the southwestern adjoining property located approximately 30 feet southwest of the Subject Property (22371 Cupertino Road) and dated July 5, 1994, soils at the site consist of clayey sands to the maximum depth explored of 45 feet below ground surface (ft bgs).

Groundwater was estimated to be deeper than 45 ft bgs. Based on the topographic gradient, groundwater is estimated to flow to the north/northeast towards the San Francisco Bay. Subsurface conditions are anticipated to be similar at the Subject Property, but may vary.

6.0 SITE RECONNAISSANCE

On February 15, 2024, ACC representative Davis Leach conducted a site reconnaissance at the Subject Property. Several representatives for the Subject Property owner provided site access.

6.2 General Site Setting

The Subject Property is developed with a one-story residential dwelling with associated landscaping and detached garage with a driveway. Entrances to the dwelling are located to the south and west. Access to the Subject Property is located along Hillcrest Road to the east.

6.3 General description of Vicinity, Adjacent Properties and Observed Current/Past Usage

The vicinity of the Subject Property consists of residential properties. The adjacent properties as viewed during the site reconnaissance are as follows:

- North Residential Dwelling (10073 Hillcrest Road)
- South Residential Dwelling (22321 Cupertino Road)
- East Hillcrest Road followed by Residential Dwellings (10050 Hillcrest Road and 10030 Hillcrest Road)
- West Sunnyview Retirement Community Housing (22399-22445 Cupertino Road)

6.4 Summary of Site Visit Observations

The Subject Property is currently occupied by private residences. The driveway is located on the southern portion of the Subject Property and provides access to the dwelling and garage. Associated landscaping is located on the northern and eastern portions of the Subject Property and consists of trees, grasses, and shrubs. Several organic waste piles consisting of yard waste were

located on the northern portion of the Subject Property. A small portable shed was located on the northwest portion of the Subject Property.

Two rusty 55-gallon drums were observed on soil and vegetation on the northwestern portion and appeared to be empty. No spills or stressed vegetation were observed in the general area of the drums.

The interior of the dwelling consisted of several bedrooms, bathrooms, and a kitchen and living room. The majority of the interior was vacant. The interior of the detached garage contained paint buckets, drywall sheets and a workbench with tools.

No visual evidence of environmentally concerning conditions was observed on the Subject Property or adjoining properties during the site reconnaissance.

No evidence of current underground/aboveground storage tanks, significant hazardous materials storage, PCB use, or environmental violations associated with the Subject Property were observed during the site reconnaissance that are considered indicative of RECs. A checklist describing Subject Property observations is attached in Appendix G.

7.0 FINDINGS & OPINIONS

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 10033 Hillcrest Road, Cupertino, California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

No significant data gaps were identified while conducting this Phase I ESA.

This assessment has not revealed evidence of Recognized Environmental Conditions (RECs) at the Subject Property.

The assessment has revealed evidence of a Business Environmental Risk (BER) at the Subject Property:

BER: Based on the historical site use as agricultural from at least 1939 to 1948 with remnants of orchards observed until at least 1963, there is a potential that pesticides were historically utilized at the Subject Property.

According to City of Cupertino Community Development Department, projects that are on sites which are known to have current or former orchards or other irrigated agricultural activities that were active in 1950 or later are assumed to contain RECs associated with organic pesticides and are required to prepare a Focused Phase I ESA that addresses only RECs other than those associated with organic pesticides.

No additional RECs or other unacceptable or potentially unacceptable health risks have been identified during this Phase I ESA. ACC recommends proceeding with City of Cupertino's requirement that the project applicant shall proceed with preparation of a Focused Phase II ESA that addresses only the potential hazards associated with organic pesticides. ACC recommends sampling for the presence of pesticides and metals typically associated with historical agricultural practices.

8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The site reconnaissance and interviews were conducted by ACC's technical staff, who was also responsible for obtaining and reviewing historical use documentation, interpreting data, identifying RECs, HRECs, CRECs, BERs, and preparation of this Phase I ESA Report. All of the activities were performed in conjunction with and under the supervision or responsible charge of, Ms. Kimberly Bunting, the environmental professional assigned to this project.

I certify that I possess sufficient education, training, and relevant experience necessary to conduct the investigative and interpretive activities presented in the paragraph above in accordance with the ASTM E1527-21 Standard and possess the ability to identify issues relevant to RECs in connection with the Subject Property.

Prepared by:

ACC Environmental Consultants, Inc. Davis Leach Environmental Technician

I declare that to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX A

AAI QUESTIONNAIRE

Phase I Environmental Site Assessment User Questionnaire

Please answer the following questions to the extent possible and return via email to kbunting@accenv.com. Please provide a copy of the Title Report.

Name:	Mohammad Islam
Title:	
Phone Number:	408-564-1020
Email Address:	mislam77@gmail.com
Signature:	
Date:	02/10/2024

How long have you been associated with the property:

6 months

Please list all current and known historical address(s) and Assessor Parcel Number(s) for which this Phase I ESA is being performed (attach maps or documentations if available):

Address: 10033 Hillcrest Road, Cupertino, CA-95014 APN/Parcel ID: 32616014

Please list the acreage of the parcel(s), square footage and age(s) of on-site structures:

0.61 acre, Lot Area - GIS: 27,965 ft² , 77 years

Purpose for which Phase I ESA is being performed, if for a real estate transaction, please list type of transaction (sale, purchase, lease, etc.)

Sub-division for Single family homes for primary residents

Please list all parties who will rely on the Phase I ESA:

City of Cupertino

How do you intend to use the property (if you plan to redevelop please discuss development plans and whether on-site soils will be disturbed/excavated):

Primary residents

Please provide the property owner or owner representative, including telephone number and/or email address (the owner will be identified in the Phase I ESA and may be interviewed by ACC as warranted and if available):

Property Owner: Mohammad Kamrul Islam, Phone: 408-564-1020 Email : mislam77@gmail.com Owner Representative: Kyle Chan. Phone: 669-244-3111, kyle@kylechan.com

Please provide the lender, and any lender-specific requirements:

No lender

Please provide a site contact, including telephone number and/or email address for purposed of scheduling the site visit:

Anyone from Owner or representative Property Owner: Mohammad Kamrul Islam, Phone: 408-564-1020 Email : mislam77@gmail.com Owner Representative: Kyle Chan. Phone: 669-244-3111, kyle@kylechan.com

Please list the current tenant(s), site use(s), and years of occupancy:

Currently none stay permanently.

Who provides gas, electric, water, and sewer services:

PG&E, San Jose water

Did a search of recorded land titles identify (or are you aware of) any environmental liens filed or recorded against the property under federal, tribal, state, or local law? If yes, please explain.

Don't know

Did a search of recorded land titles identify (or are you aware of) any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law? If yes, please explain.

No as far as I know

Do you have any specialized knowledge or experience related to the property or nearby properties?

It is R110 Zone.

Does the purchase price being paid for this property (if applicable) reflect fair market value of the property? If you conclude that there is a difference have you considered whether the lower purchase price is because contamination is known or blieved to be present at the property?

Yes. It was not lower price.

Are you aware of commonly known or reasonably ascertainable information about the property that would help the
environmental professional to identify conditions indicative of release or threatened releases, for example:
Do you know the past uses of the property?
Single family home
Do you know of specific chemicals that are present or once were present at the property? If yes, are Safety Data Sheets (SDS) available?
Don't know
Do you know of spills or other chemical releases that have taken place at the property?
No as far as I know
Do you know of any environmental clean ups that have taken place at the property?
No as far as I know
Other?

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Are you aware of any of the following documents prepared for the property:				
	Yes	No	Date(s)	
Environmental Site Assessment		No		
Subsurface Soil/Groundwater Investigation		No		
Environmental Permits		No		
Hazardous Materials/Waste Permits		No		
National Pollution Discharge Elimination System (NPDES) Permits		No		
Underground Injection System Registration Documents/Permits		No		
Community Right to Know Plans		No		
Hazardous Materials Management/Business Plans		No		
Storm Water Pollution Prevention Plans (SWPPP)		No		
Spill Prevention Control & Countermeasure Plans (SPCC)		No		
Risk Assessments		No		
Geotechnical Studies		No		

Are you aware of any of the following items associated with the property?		
	Yes	No
Asbestos-containing materials or lead-based paint located at the Subject Property?		Don't Know
Litigation associated with the Subject Property with regards to violations or environmental law?		N
Are you aware of any Aboveground Storage Tanks (ASTs) or Underground Storage Tanks (USTs) located at the Property? If yes, what are the contents and capacities?		N
Electrical transformers on the Subject Property?		No
Are any of the past or current occupants hazardous waste generators?		No
Are there any pits, ponds, lagoons for waste treatment or disposal on the Subject Property?		Don't know
Are there any wells (irrigation, production, or monitoring)?		No
Are there any sumps, floor drains, or catch basins, oil-water separators, or acid neutralization systems on the Subject Property?		N
Are there any storm drains on the Subject Property?		Don't know
Have there been any significant structural fires at the Subject Property?		Don't know

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

Violation Source: CERS. Evaluation: Eval General Type: **Compliance Evaluation Inspection** Eval Date: 03-25-2014 Violations Found: Yes Eval Type: Routine done by local agency **Eval Notes:** A physical walk-through and paperwork review occurred on this date. Facility has the following hazardous waste containers accumulating waste on-site: 2 X 5 gallon glutaraldehyde containers; 4 x 5 gallon silver fixer containers; 1 x 5 gallon lab staining waste container. EPA ID number CAL000363954 is "active". Manifests for the last 3 years were reviewed. 3 fire extinguishers were properly charged and available for use. Spill control absorbent was available for use. Emergency Procedures were posted. Facility has switched to digital imaging but will generate a smaller amount of silver fixer waste from dental x-rays. Read the "Getting Started on CERS" handout, access your CERS account #10343743, check the hazardous waste generator box as "yes" on the Business Activities form, complete the "Business Owner Operator Information" page, and submit this information electronically on the CERS website in order to document your status as a hazardous waste [Truncated] Eval Division: Santa Clara County Environmental Health Eval Program: HW Eval Source: CERS, Eval General Type: **Compliance Evaluation Inspection** Eval Date: 10-01-2019 Violations Found: Yes Eval Type: Routine done by local agency Facility provides veterinary services including some emergency medical **Eval Notes:** services. State ID is active. Facility uses only digital x-ray imaging. No waste is generated from surface and cage disinfection. Unwanted pharmaceuticals are managed under the medical waste act. Staining waste is collected in a five-gallon container and managed as hazardous waste. Silver nitrate sticks or silver containing shampoos/creams are not used at this facility. Observed emergency response equipment including fire extinguishers and absorbent. One hazardous waste manifest was reviewed. The following minor violation was corrected during this inspection: G023: Container Open: Observed a funnel in the opening of the 5-gallon waste stain container. The funnel was removed and a lid was secured. Dwr Groundwater Subbasin Name: Disadvantaged Community: CA Enviroscreen 3 Score: CA Enviroscreen 4 Score: Military DOD Site: Facility Project Subtype: RWQCB Region: Site History: U001600988

5-10% No Not reported SAN FRANCISCO BAY RWQCB (REGION 2) The subject property occupies approximately 0.66 acre at 10121 North Foothill Boulevard, Cupertino, California. The property functioned as a gasoline service station from 1971 until mid-2011. Site operations have included gasoline and diesel filling stations and an auto repair shop. Three gasoline underground storage tanks (USTs) and a waste oil tank were removed in 1988. A previous fuel leak case associated with a release from these tanks was opened in 1988 (SCVWDID No 07S2W15F01f). A quarterly groundwater monitoring program for that case began in 1989. After repeated rounds of non-detectable concentrations for all chemicals of concern (COCs), the Santa Clara Valley Water District granted closure for commercial land uses on July 29, 1996. The station continued to operate with new fuel tanks and a waste oil tank in different locations than those previously removed. 2012 In December 2012, all the remaining fuel tanks, piping, dispensers, and underground hydraulic hoists were removed under permit from County of Santa Clara Fire Department. During the 2012 UST removals, soil samples collected from beneath USTs and were analyzed for the respective COCs. These COCs included total petroleum hydrocarbons (TPH) in the gasoline, diesel, and motor oil ranges, metals, polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), and semi-volatile organic compounds (SVOCs). With the exception of cadmium (a metal) in the sample collected beneath the waste oil tank, no COCs were detected above their respective residential environmental screening level (ESLs). In a letter dated January 18, 2013, however, the County of Santa Clara Department of Environmental Health (DEH) indicated that based on the sample results, no further action was necessary. 2013 In March, a soil vapor survey and a health risk screening were performed to determine whether COC concentrations are acceptable for residential development. The soil vapor results were compared to available soil vapor screening values for residential land use. Screening levels were the (updated 2009) and San Francisco Regional Water Quality Control Board ESLs. Soil vapor survey locations were selected to target former tank locations at the facility. The survey characterized both chlorinated and aromatic volatile compounds across the property. Three compounds were detected in soil vapor samples at concentrations exceeding their respective residential ESLs: Benzene was detected in SV-4 at a concentration of 80 micrograms per cubic meter (g/m3), which exceeds the ESL (42 g/m3) for benzene; Ethylbenzene was detected in SV-6 at a concentration of 3,100 g/m3, which exceeds the ESL (487 g/m3) for ethylbenzene; and PCE was detected in SV-3 at a concentration of 1,400 g/m3, which exceeds the ESL (210 g/m3) for PCE. Based on this information, the DEH opened a new fuel leak case and requested a site assessment to characterize the nature and extent of contamination. In November 2013, a site investigation for soil, groundwater, and soil vapor was performed to define the extent of COCs in those media. The sample locations targeted historical site features that may have caused environmental impacts. ESL exceedance recorded during past investigations, and potential PCB-impacted areas. The investigation also included a

U001	6009	88
------	------	----

	site-wide pesticide survey. 2014 In April and again in June, additional soil vapor sampling was conducted which reported PCE concentrations exceeding the ESL. A Remedial Action Plan was submitted and approved to perform a remedial excavation in order to remove the source of soil and soil vapor contamination. 2015 A remedial excavation was performed in late January to removed contaminated soil from the site. The approximate depth of the excavation was between 4 and 6.5 feet. A total of 474 tons on soil were removed from beneath the footprint of the former station building and in the area of a former fuel dispenser. The soil was disposed of at Kirby Canyon Landfill in Morgan Hill, California. Both confirmation soil and soil gas sampling provided evidence that the source of the contamination has been adequately removed. The confirmation soil gas samples reported a maximum PCE concentration of 180 g/m3, which is below the ESL.

Eval General Type: Eval Date: Violations Found: Eval Type: Eval Notes:	Compliance Evaluation Inspection 04-10-2019 Yes Routine done by local agency . Today I am on site to follow-up from yesterday, and confirm the Hazardous Waste Generator Permit status. AI Razai, Owner, Cupertino Auto Repair, is on site, allowing facility access, records review, and available to discuss findings and conditions. Facility Review; I have requested to see the sump/clarifier that is under the tank and the drums in the trough, outside at the "Back of Garage" area. See picture - Sump/Clarifier. This request for access to view the structure under the waste storage systems, was also made to Morteza Abdollahi, Property Owner and Operator of CUPERTINO BEACON. Pictures taken of the area under the steel plate seen, at the time of uncovering, showing the existing conditions and conditions after any cleaning, may satisfy this issue. Containers in the Back of Garage were observed with incomplete labels. Most still require a completed label to be applied. See picture - Back of Garage. Some labels were updated yesterday. Eval General Type: Eval Date: Violations Found: Eval Type: Eval Notes:	Other/Unknown 05-06-2019 No Other, not routine, done by local agency I am on site, 22510 Stevens Creek Blvd. to observe any change in condition or review record of the sump observation. Al Razai, Owner, Cupertino Auto Repair, is on site, allowing facility access, and there to discuss findings and conditions. The sump is an older Oil Water Separator with 3 chambers in line outside. A clean-out is located under a steel cap on the outgoing end. The chamber next to the clean-out has solids residue in the bottom and a 4" pipe allowing flow from the bottom portion of the chamber. The inflow pipe is 2/3rds up the wall to the middle chamber. A 4" pipe that is clogged with solids/mud. The middle chamber contained liquid to about 1/3 full, oil on top of soiled water. The chamber gave a slight odor of old degrading oil. The 3rd chamber had the 4" pipe from the garage floor sumps. This chamber was 1/3 full with oil. No water was observed when a large screwdriver was inserted into the oil, approximately 6 inches of oil. The garage floor [Truncated]

0 03/01/1999 04/30/1999 Site Assessment/Site Investigation Pilot Study of Operating UST assess MtBE - SCVWD Other Unknown Replace product piping Not reported 09/12/2022 Santa Clara - Palo Alto (205.50) Santa Clara Valley - Santa Clara (2-009.02) Not reported 6-10% 5-10% No Not reported SAN FRANCISCO BAY RWQCB (REGION 2) Site History: The site is currently an active fueling facility. This case was opened, and soil and groundwater assessment began in 1999, following discovery and reporting of a historical release, likely associated with former piping and/or dispensers. Various historical remediation activities include soil excavation, air sparge, and dual-phase (soil vapor and groundwater) extraction. Soil, groundwater, and soil vapor sampling have been conducted, and site conditions were compared to the low-threat case closure policy (LTCP). Soil vapor samples were collected on site in 2020, adjacent to the residential property to the south, and soil vapor concentrations satisfied the LTCP residential petroleum vapor intrusion to indoor air criteria. All LTCP general and media-specific criteria are currently satisfied. Site Management Requirements: Residual contamination in soil, groundwater, and soil vapor remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are

Al Razai, Owner, Cupertino Auto Repair, is on site, allowing facility access, and there to discuss findings and conditions. The sump is an older Oil Water Separator with 3 chambers in line outside. A clean-out is located under a steel cap on the outgoing end. The chamber next to the clean-out has solids residue in the bottom and a 4" pipe allowing flow from the bottom portion of the chamber. The inflow pipe is 2/3rds up the wall to the middle chamber. A 4" pipe that is clogged with solids/mud. The middle chamber contained liquid to about 1/3 full, oil on top of soiled water. The chamber gave a slight odor of old degrading oil. The 3rd chamber had the 4" pipe from the garage floor sumps. This chamber was 1/3 full with oil. No water was observed when a large screwdriver was inserted into the oil, approximately 6 inches of oil. The garage floor [Truncated] Santa Clara County Environmental Health HW CERS,

Completed Info: Completed Area Name: Completed Sub Area Name: Completed Document Type: Completed Date: Comments:	PROJECT WIDE Not reported Preliminary Endangerment Assessment Report 11/10/2009 Soil samples were collected from within the footprint of a proposed play area and analyzed for organochlorine pesticides and metals because of the possible historical use of a nearby parcel for agricultural use. There were some exceedances of human health risk-based screening levels for lead and toxaphene. In May 2009, expression to 27 while words of a output to address the

TC7565482.2s Page 148

approximately 72 cubic yards of soil was excavated to address the locations where there were exceedances of screeening levels and the

EDR ID Number Database(s) EPA ID Number

BLACKBERRY FARM PLAY AREA (Continued)

excavated soil was disposed at a permitted, off-site Class II landfill. The Soil Removal Completion Report presents the results of soil sampling and documents the soil removal. DTSC issued a no further action letter to the City of Cupertino based on the information presented in the Report and determined that the proposed play area has been made suitable for unrestricted use.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/26/2023 Date Data Arrived at EDR: 01/02/2024 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 22 Source: EPA Telephone: N/A Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023 Date Data Arrived at EDR: 12/20/2023 Date Made Active in Reports: 01/24/2024 Number of Days to Update: 35 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/20/2023 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 04/22/2024 Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 04/22/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 08/15/2023 Date Data Arrived at EDR: 08/30/2023 Date Made Active in Reports: 12/01/2023 Number of Days to Update: 93 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/14/2023 Next Scheduled EDR Contact: 03/25/2024 Data Release Frequency: Semi-Annually

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Source: EPA Telephone: 703-416-0223 Last EDR Contact: 02/01/2024 Next Scheduled EDR Contact: 03/11/2024 Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 09/01/2023 Date Data Arrived at EDR: 09/27/2023 Date Made Active in Reports: 12/21/2023 Number of Days to Update: 85

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 03/03/2023 Date Data Arrived at EDR: 03/03/2023 Date Made Active in Reports: 06/09/2023 Number of Days to Update: 98 Source: Department of Energy Telephone: 202-586-3559 Last EDR Contact: 01/29/2024 Next Scheduled EDR Contact: 05/13/2024 Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental guality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

Date of Government Version: 09/23/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 01/04/2024 Number of Days to Update: 93 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 12/28/2023 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Varies

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 10/02/2023 Date Data Arrived at EDR: 10/04/2023 Date Made Active in Reports: 12/27/2023 Number of Days to Update: 84 Source: Department of Toxic Substances Control Telephone: 916-440-7145 Last EDR Contact: 01/03/2024 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Quarterly

HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 10/26/2023 Date Data Arrived at EDR: 10/27/2023 Date Made Active in Reports: 01/29/2024 Number of Days to Update: 94 Source: Department of Toxic Substances Control Telephone: 916-324-2444 Last EDR Contact: 12/26/2023 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021 Date Data Arrived at EDR: 07/05/2022 Date Made Active in Reports: 09/19/2022 Number of Days to Update: 76 Source: California Environmental Protection Agency Telephone: 916-255-1136 Last EDR Contact: 01/03/2024 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Annually

MINES: Mines Site Location Listing

A listing of mine site locations from the Office of Mine Reclamation.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Date of Government Version: 06/08/2023 Date Data Arrived at EDR: 10/31/2023 Date Made Active in Reports: 01/18/2024 Number of Days to Update: 79 Source: Environmental Protecton Agency Telephone: 202-564-0394 Last EDR Contact: 10/31/2023 Next Scheduled EDR Contact: 02/19/2024 Data Release Frequency: Semi-Annually

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

ISLAM CUPETINO CA 10033 HILLCREST ROAD CUPERTINO, CA 95014

TARGET PROPERTY COORDINATES

Latitude (North):	37.323758 - 37° 19' 25.53''
Longitude (West):	122.065471 - 122° 3' 55.70"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	582799.9
UTM Y (Meters):	4130994.2
Elevation:	383 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005309 CUPERTINO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

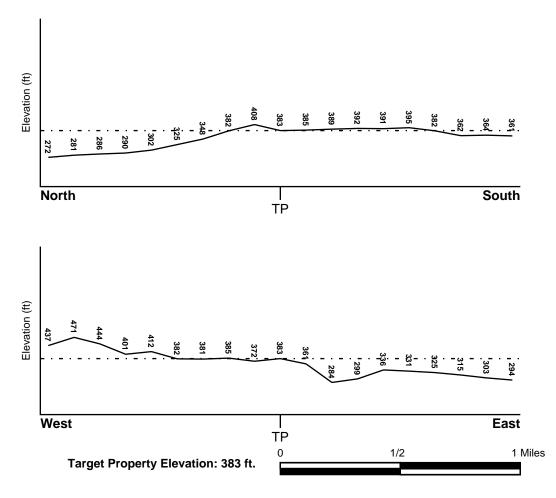

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0204H	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property CUPERTINO	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:	
Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Cenozoic	Category:	Continental Deposits
System:	Tertiary		
Series:	Pliocene

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

a hydric soil.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported
Hydric Status: Soil does not meet the	requirements for
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches

Depth to Bedrock Max: > 10 inches

			Soil Layer	Information			
	Bou	ndary		Classif	ication		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:	gravelly - loam clay
Surficial Soil Types:	gravelly - loam clay
Shallow Soil Types:	clay loam clay
Deeper Soil Types:	unweathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

02/09/24

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

Client Name:

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 2D14-4758-B6F5

PO# NA

Project 10260-001.00

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: 2D14-4758-B6F5

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities.EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk,Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.
