

DRAFT PRIORITIZATION RESULTS - PROJECT LIST

These prioritization results have not yet undergone complete QA/QC with the City of Cupertino and are intended as draft results to inform discussions.

For Bicycle projects with multiple segments, scores were averaged. Each segment score was scaled to its length within the overall project (e.g., a segment 33% of the length of a project makes up 33% of its total score). They are bracketed top and bottom in the spreadsheet for easier viewing.

Because each project type (bicycle network recommendations, pedestrian sidewalk recommendations, pedestrian intersection recommendations, and transportation technology corridor recommendations) used different criteria, all projects were normalized to a 1-100 scale.

Projects are grouped by type to show which scoring criteria were applied. Shared-use paths were scored using the bicycle criteria in response to repeated community requests to provide an all-ages-and-abilities design and strengthen off-street route options.

Scores have been rounded to the nearest whole number and, as such, may not add up to the final score.

Project Type Legend	
Pedestrian	Bicycle
Shared Use	Technology

Project			Location			Criteria Scoring
