- The Town Center and Torre Avenue intersection should be prioritized for safety improvements, including adding speed bumps or a raised crosswalk, improving visibility by removing obstructing parked cars, enhancing nighttime lighting, and clarifying pedestrian areas.
- Pedestrian walkways to the library should be made safer, excessive signage avoided, and the intersection redesigned to manage U-turns and library drop-off issues. These measures are important due to high pedestrian activity and ongoing accident risks, including for children on rollerblades and skateboards.
