# Frequently Asked Questions

1

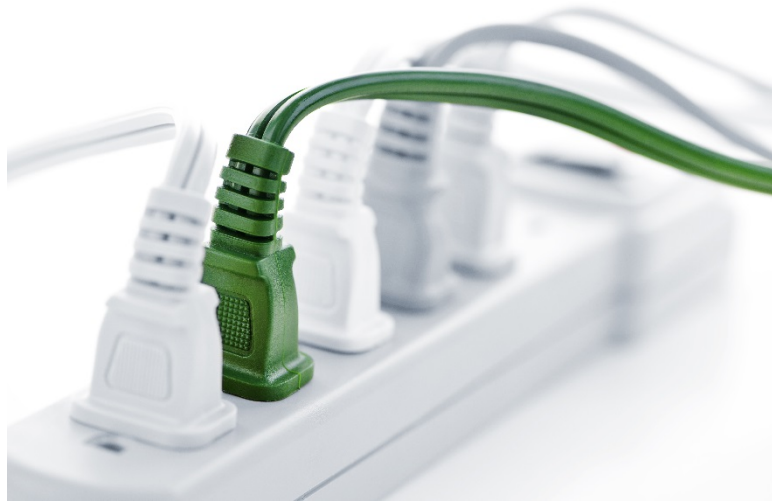

## How will I save?

The majority of Northern CA energy use is NOT related to heating or cooling, but rather electronics, appliances, lights and other systems. Smart Audit detects waste in these categories. Your Energy Coach and automated progress emails help with no- or low-cost actions. Installing smart power strips, adding or optimizing system timers, and replacing inefficient devices are common first steps.

2

## How am I eligible for a Smart Audit?

All PG&E or Community Choice customers who have owned or rented their home or condo for over 12 months and do not have solar are eligible for this no cost service.

3

## What happens with my smart meter data?

HEA will use your smart meter data only in order to analyze your home energy use, will not use or disclose any of your information for other purpose, and will protect the confidentiality of your account and information.
