Subject: Public comment on storm drain

Here is the note shared during public hearing of the storm drain fee by a resident, comparing the fees for commercial versus residential:

Comparison between hillside residence versus flat land residence in Rancho.

High slope
Foothills
10 Acre Residence

$$\text{Fee} = \$106$$

$$\text{Fee/Acre} = \$106 / 10 = \$10.6 / \text{Acre}$$

Low Slope Rancho Residence

0.12 Acre Residence

$$\text{Fee} = \$37$$

$$\text{Fee/Acre} = \$37 / 0.12 = \$308 / \text{Acre}$$
