Subject: Regnart Creek Trail Proposal

Cupertino City Council
Cupertino City Hall
10300 Torre Ave
Cupertino, CA 95014

Dear Esteemed City Council Members,

As a resident of Cupertino for more than 30 years, I am writing to you today to voice my concerns about the proposed Regnart Creek Trail. While I understand and agree with the intent to find safe routes for young bikers and walkers to get to school, I don't agree with the bicycle commission that the creek trail is a safe route.

When all the options were evaluated, the first criteria, was not safety, it was "off street". None of the on streets alternatives were evaluated to determine a safe route. The creek is a drainage ditch with steep cement sides and fast current when water is in the creek. It would be a hazardous place to allow our children to access.

Traffic volume on cross streets during school commute hours, the time when children would be trying to get across those streets, has not been evaluated by the bicycle commission. No numbers of expected traffic, either on the trail or on the streets have been presented. This is a major element to consider in determining the type of crossing and the effect it would have on riders or automobile traffic. City Council should have the facts in order to make data driven decisions.

Additionally, we are told, the trail would be closed when there is fast moving water, and before dawn or after dusk, which means it would not be usable for school commutes or library visits, several months of the year. No alternative has been proposed for those times. Improving city streets for bicycling kids is not being considered by the commission, but would be necessary even with this off street trail route. We need a safe alternative to the proposed creek trail.

I'm also concerned that no environmental report has been completed. The creek is home for many animal species. Opening it to public access will mean the loss of their habitat. It takes only a cursory look at what is the "improved" trail between East Estates Drive and the Creekside Park to see the damage to a wildlife refuge.

These are a few of my many concerns. I would be happy to discuss more issues with this plan if any Council members would like to have that conversation. Please email me or call the number below to schedule a time at your convenience.

Thank you for your thoughtful consideration of this project.

Sincerely yours,

Margaret (Peggi) Jewett

Subject: Bike Pedestrian Trail From a CYCLIST Perspective

Council Members,

I am a resident in the neighborhood of the proposed path and an avid cyclist and bike commuter. My husband and two daughters bike as well.

I commute on bicycle through Cupertino/Sunnyvale several days a week, and also in San Francisco. My experience has taught me what works for bike safety and what does not. Visibility is the safest cheapest and best course of action in creating and maintaining bike lanes. The more visible the cyclist is on the road to the drivers the safer the cyclist is. Thus, I think the best use of resources for bike safety is continuing to create bike lanes and paint them GREEN. I have the least problems with cars cutting me off and swerving towards me when I have a brightly painted green bike lane. When this is not an option the white bike path marker in the lane is second best.

There are three main reasons the proposed path is unsafe as planned:

1. It is not wide enough to safely accommodate both bikes, runners, dog walkers, and strollers. There is simply not enough room. Although a path would be nice squeezing it in where there is not adequate room is not the answer. **UPDATE:** I was made aware at the meeting on April 24 that there will not be an 8 ft. chain link fence but instead there will only be a 42" split rail fence for some (very few) sections of the trail. I want to be clear this makes for a very unsafe trail for cyclists because there is no room for error. If a child or dog runs in front of a cyclist they have no where to go, and if a bike hits a 42" fence the bike will stop and the biker will continue with the momentum and flip over the fence. In this case likely landing at the bottom of an 8-10 ft drop. I have included pictures I took at an existing trail with a split rail fence that is the approximate height of the proposed fence. I have included a measuring tape in the picture and my personal road bike against the fence to demonstrate the size comparison.

2. The path crossing at Blaney Rd. is particularly unsafe because of impact on the current bike lane that is used by many cyclists. The current bike lane on Blaney Rd. will be squeezed out to accommodate the path crossing much like the barricades/barriers that were put on Portal just north of Stevens Creek in Cupertino. These types of bump outs for paths push cyclist commuters like myself into the traffic lane with little warning to the vehicles traveling in the lane. These types of bump outs are unsafe and will deter cyclists from commuting on Blaney which in the past has been a safe bike route. It will push more cyclists to DeAnza and Miller/Wolfe Rd. **UPDATE** as of meeting on April 24: I did speak with John C. the trail designer(?unsure of his last name or title) and was told that the bump out would not take away the bike lane, but instead that the bike lane would remain a 5 ft. bike lane on both sides of the 11 ft. lanes for vehicles. I am unsure if there is actually space for this. I have been told that the roadway from curb to curb was measured at 39 ft. and 11in. if you take away the 11 ft. each for vehicle lanes and 5 ft. each for bike lanes that only leaves 7 ft. and 11 in for the bump outs which means they would have to be just under 4 ft each. I do not know if the plans specify the size of the bump outs. AGAIN I am concerned about the existing bike lane and the ALREADY APPROVED Class 4 bike lane that will go in on Blaney Rd. and there being adequate room for existing bike

commuters. This trail is not worth disrupting an already well used bike commute path that is safely keeping cyclists off DeAnza and Miller/Wolfe.

3. The path crossing at Estates Dr. is unsafe because there is no visibility for the vehicles approaching the crossing to see oncoming cyclists because of the nature of the residential areas, houses are in the way. This area is already congested at school open/close times due to the high number of students that commute through Creekside park. Adding another route that is not visible will cause even more confusion for drivers which leads to an unsafe area for cyclists to travel. I know specifically about this area because this is where my house is. I have witnessed near misses in this area on the narrow path between cyclists and pedestrians and on the road at Vicksburg between cyclists and vehicles. This path will put three four-way intersections in less than 100 foot of each other, hence the confusion. If you have not seen this area **I invite you to come and observe traffic flow during the 7:30-8:00am time frame.**

For these three main reasons the proposed path is unsafe and should not be pushed forward without further inquiry into bike safety for current commuters. **UPDATE:** I am speaking specifically to Alternate 1. I believe alternate 4 and 5 provide safe modes of travel for bikes and pedestrians. And I would like to specifically address concerns I heard at the April 24 meeting. There was one resident that stated when biking on Lamar Drive he was almost hit by a car from a cross street. First, there are no "cross" street each of the streets off Lamar from Blaney to Estates only come from the south. Second, other than the first street east of Blaney NONE of the streets have yield or stop signs because there is so LITTLE TRAFFIC on these residential streets. If this is used as a bike commute path yield and/or stop signs should be put in at the intersections of each of the south side streets. Also there is no need to turn a residential street into a Class 4 bike lane as suggested by (I believe one of the bike commissioners) another speaker.

IF this path is going to be created then it needs to be done in a way that is safe for those already commuting and those that will use the path and the current proposal does not adequately address safety concerns.

Thank you for taking the time to hear my concerns.

Please feel free to call or email me with any further questions.

Subject: Capital Improvement Projects - questions

Honorable Mayor Scharf, Honorable Vice Mayor Chao and Councilmen:

With an earlier start time, I may not make it from work in time for oral comments. In reading the Capital Improvement Program material, I had several questions that I hope staff can answer to provide additional context to help prioritize the many projects listed. I hope you will find these questions helpful.

1. Citywide Building Condition Assessment. Seismic Condition. I am trying to understand the current condition of City Hall and the extent of the safety improvements that are needed. If a seismic study was conducted, did the report provide a Probable Maximum Loss (PML) number or Scenario Expected Loss (SEL) figure? PML and SEL are industry standards used to evaluate the engineering integrity of a building by institutional lenders. Are the figures under 20? If so, the building is viewed as safe. If the building is currently unsafe, how extensive are the proposed retrofits? There is a proposal to almost double the size of City Hall, is the thought it is less expensive to scrape and build new versus to retrofit?
2. Elevators: City Hall is two stories and I would guess that 90% of the time people use the stairs. Thus, the elevators are lightly used, extending its useful life. What do the repairs involve? Cab, mechanicals, controller and electronics, power unit, door operator? How old is the elevator? Is it under a maintenance agreement? Most riders will be unable to tell if there is anything new in an elevator, despite having spent a lot of money. Is the cost due to the proposed addition of 20K square feet?
3. Generators: Emergency generators are often lightly used and have a long useful life (30+ years). What is the reason to replace the generator?
4. Library Expansion - The cost of \$ 10MM for 4400 sf comes to \$1,283/sf, 3x the cost of commercial construction. Why is the addition so expensive, especially when it is for additional meeting space?
5. City Hall construction Costs: At \$68MM for 40,000 sf, this comes to \$1,700/sf, again far higher than commercial construction costs. Even allowing for underground parking, the costs seems high.

Thank you.

Subject: Study Session FY 2019-2024 Proposed CIP - 4/30/2019

Dear Council Members,

Tomorrow, 4/30/2019, is a critical study session to establish the CIP priorities for Fiscal Years 2019-2024.

In the Staff Report that will be presented at this meeting, the full community survey that ended 4/26/2019 will not be included. I request that you review the updated results prior to making any decisions. I have attached the downloaded .pdf report and the email from opengov.com that provides a link to the survey document as of 4/26/2019 @ 5:04 p.m. (survey closed on 4/26/2019 @ 5:00 pm).

If you refer to page 6 of the summary report, this will show the Individual Registered Responses. Curiously, there is only 1 response prior to 4/22/2019 when this survey was opened to the public (see screenshot below with the survey Post Date: 04/22/2019 5:38 pm). I question the staff report that indicates 58 responses were received to the online Open City Hall survey from 4/12/2019-4/22/2019. Why are these not included in the formal report? You should ask. Could be a problem with opengov.com reporting. Note: The opengov.com report does not include the responses for Question 3: What additional funding options would be supported for the CIP.

Take the Capital Improvement Program Budget Survey

Post Date: 04/22/2019 5:38 pm

Below are screenshots from the 4/26/2019 survey results. The priorities from the community are clear, and different from the staff report. I encourage you to endorse what your constituents want.

Question 1: Library Expansion – 43.9%

You've got 10 dots to 'spend' on the City's facilities. Each dot is worth \$100,000. How would you spend them on these areas?

		%	Count
Building New Facilities		12.3%	125
Remodelling Current Facilities		16.0%	163
Improving Health and Safety of Current Facilities		16.0%	163
Library Expansion		43.9%	448
Other		4.1%	42

Question 2: Top 3 priorities:

Park improvements – 22.6%

Road Improvements – 19.0%

Recreation Facilities improvements – 16.2%

You've got 10 dots to 'spend' on capital improvement projects in the City. Each dot is worth \$100,000. How would you spend them on these areas?

		%	Count
Administration Facilities Improvements (e.g. City Hall, Community Hall)		9.0%	92
Recreation Facilities Improvements (e.g. Quinlan Community Center, Senior Center, Sports Center)		16.2%	165
Road Improvements (e.g. overlays, concrete repairs)		19.0%	194

		%	Count
Bike/Pedestrian Trail Improvements (e.g. separated bike lanes, creek trails)		13.1%	134
Park Improvements (e.g. Memorial Park, Creekside Park, community garden)		22.6%	231
Compliment Grant Funding and/or Donations (e.g. all-inclusive playground, solar electric vehicle chargers)		5.3%	54
Other		7.9%	81

Thanks for keeping city government transparent.

Regards,

Kathy R Chole
Cupertino Resident

Question 1

- Library Expansion (2)
- Other - Crossing guards at major intersections nears schools (1)

Question 2

- Bike/Pedestrian Trail Improvements (e.g. separated bike lanes, creek trails) (1)
- Park Improvements (e.g. Memorial Park, Creekside Park, community garden) (1)
- Compliment Grant Funding and/or Donations (e.g. all-inclusive playground, solar electric vehicle chargers) (1)

Question 3

The above options should be funded only if the budget is not in the deficit. I only support separated bike paths and not further improvements to trails

Name not shown

April 25, 2019, 11:00 AM

Question 1

- Library Expansion (10)

Question 2

- Recreation Facilities Improvements (e.g. Quinlan Community Center, Senior Center, Sports Center) (4)

Capital Improvement Program Survey

How should the City allocate its Capital Improvement Program (CIP) budget?

- Bike/Pedestrian Trail Improvements (e.g. separated bike lanes, creek trails) (4)
- Park Improvements (e.g. Memorial Park, Creekside Park, community garden) (2)

Question 3

No response

Question 1

- Library Expansion (1)

Question 2

- Bike/Pedestrian Trail Improvements (e.g. separated bike lanes, creek trails) (1)

Question 3

Need more parking spaces for the Cupertino library

Gary Wong

April 25, 2019, 12:28 PM

Question 1

- Remodelling Current Facilities (3)
- Improving Health and Safety of Current Facilities (3)
- Library Expansion (3)
- Other - Improved traffic signage (1)

Question 2

- Administration Facilities Improvements (e.g. City Hall, Community Hall) (2)
- Recreation Facilities Improvements (e.g. Quinlan Community Center, Senior Center, Sports Center) (1)
- Road Improvements (e.g. overlays, concrete repairs) (2)
- Bike/Pedestrian Trail Improvements (e.g. separated bike lanes, creek trails) (1)
- Park Improvements (e.g. Memorial Park, Creekside Park, community garden) (3)
- Other - Improved cellular infrastructure (1)

Question 3

Cash management and priorities can be improved. Project management seems inefficient and can be improved.

Capital Improvement Program Survey

How should the City allocate its Capital Improvement Program (CIP) budget?

No response

Cyrah Caburian

From: Liana Crabtree <lianacrabtree@yahoo.com>
Sent: Tuesday, April 30, 2019 10:54 AM
To: Steven Scharf; Liang-Fang Chao; Darcy Paul; Rod Sinks; Jon Robert Willey
Cc: City Clerk; R Wang; Vikram Saxena; David Fung; Kitty Moore; Alan Takahashi; Anna Weber; Gary Latshaw; Vignesh Swaminathan; Meera Ramanathan; Angela Chen; Cupertino City Manager's Office; City Attorney's Office
Subject: Is it lawful for Council to review the Capital Improvement Program when the Planning Commission has not held a public hearing or made its recommendations?

Honorable Mayor Scharf, Vice Mayor Chao, and Council Members Paul, Sinks, and Willey:

Please include this item as part of the public record for the 4/30/2019 Council meeting, Agenda Item 4 "Review the Proposed FY 2019 -2024 Capital Improvement Program".

It seems the Council continues to work too hard, while the Planning Commission is denied its authority to hold hearings and make land use recommendations.

Why does Council review the Proposed FY 2019 -2024 Capital Improvement Program this evening (Agenda Item 4) when the item has not been presented to the Planning Commission for its consideration? Yet, 3 Planning Commission meetings were cancelled in 2019 for "lack of business".

Please reference item C below in Cupertino Municipal Code 2.32.70 Planning Commission Powers and Functions:

The powers and functions of the City Planning Commission shall be as follows:

- A. Prepare, periodically review, and revise as necessary, the General Plan;
- B. Implement the General Plan through actions including, but not limited to, the administration of specific plans and zoning, subdivisions, and sign ordinances;
- C. Annually review the capital improvement program of the City and the local public works projects of other local agencies for their consistency with the General Plan (pursuant to Sections 65400 et seq. of the California Government Code);**
- D. Endeavor to promote public interest in, comment upon, and understanding of the General Plan, and regulation relating to it;
- E. Consult and advise with public officials and agencies, public utility companies, civic, educational, professional, and other organizations and citizens generally concerning implementation of the General Plan;
- F. Promote the coordination of local plans and programs with the plans and programs of other agencies;
- G. Perform other functions as the City Council provides including conducting studies and preparing plans other than those required or authorized by state law;
- H. Establish as needed a standing subcommittee of the Commission for Design Review. The Planning Commission shall decide appeals of the Design Review Committee for the purposes of conducting design review on projects that properly come before the Design Review Committee for review, and conduct design review of a project as required by Chapters [2.90](#), [19.132](#), [19.134](#) and of the Cupertino Municipal Code.

(Ord. 1844, § 1 (part), 2000; Ord. 1787, § 1 (part), 1998)

I note that the Planning Commission last reviewed the Capital Improvement Program (FY 2018 - 2023) on 5/8/2018 in preparation for a 6/5/2018 Council meeting. I note that the Staff Report for Agenda Item 4 for the 4/30/2019 Council meeting makes no references to recommendations offered by the Planning Commission regarding the Proposed Capital Improvement Program (FY 2019-2024).

Please follow the intent of the Cupertino Municipal Code to require the Planning Commission to review the Capital Improvement Program to support the adoption of a final program that conforms with the law. Postpone Agenda Item 4 "Study Session on the Proposed FY 2019 - 2024 Proposed Capital Improvement Program" until after the item is heard during a regular Planning Commission meeting and after the Planning Commission is given sufficient time to study the proposed Capital Improvement Program to make its recommendations. Please ensure that the Staff report for the "Study Session on the Proposed FY 2019 - 2024 Proposed Capital Improvement" Council agenda item includes the Planning Commission's recommendations. Furthermore, as "Sustainability" is called out as a priority in the Staff Report, maybe the Sustainability Commission could also review the Proposed FY 2019 - 2024 Capital Improvement Program and offer its recommendations prior to the return of this item to Council.

Link to the meeting agenda for the 4/30/2019 City Council meeting:

To: City Council
Subject: My inputs to CIP Study session

Dear Mayor and Council members,

I reviewed the 5-year CIP projects report for Study session today and here is my feedback for your consideration.

1. Library expansion - About 900,000 visits have been made to the library in 2018. The OpenGov survey results show that large percentage of respondents prefer investment in the library. So investing in library expansion would have a wider impact to the community of over 60,000 residents. However, the cost projections of \$10 million for 4400 Sqft of expansion plus 33 additional parking stalls seems to be too high. The city has to explore cost effective ways to expand 4400 Sqft. The library expansion is included in Options A and B. This should also be included in Option C that leaves \$3.15 to be allocated for other projects.

2. City Hall Expansion of \$70 Million seems like a luxurious project for our city when we do not have dollars. This includes raising taxes, going for high debt financing, and depleting all of capital reserves. Also, it takes away money from all essential projects. Going with this option requires lot of community input. Instead, the City should be looking at cost effective alternatives to retrofit the existing building.

The best option for interim city hall is using the Monta Vista Center. This is the lower cost option and this investment also goes towards improving the city facility for the longer term.

3. Cupertino Sports Center Seismic Retrofit and HVAC upgrade: This is one of the best used facilities in Cupertino. The customer base is 2000. The classes it offers has quadrupled since 2004, whereas the HVAC was installed for a customer base of 600. The facility temperature is always too hot or too cold and is very uncomfortable for the users when temperatures soars. Since a higher number of kids and adults use this facility every day, investing in seismic retrofit and HVAC upgrade is a good idea. Seismic upgrade of \$1M is included in all 3 options whereas HVAC upgrade of 500K is not included in any of the options, it is in other projects list.

5. Transportation Projects:

Blackberry farm entrance road improvement projects. The feasibility study was approved to start in FY2019. In the transportation projects report to the Council on April 2nd, the report states that no cost estimate is available for this project. However the CIP projects list shows this as a high priority project in options A and B with a cost of \$5.5M. Is the feasibility study completed? This looks like a large sum of money to be set aside for Blackberry farm related projects that is draining City resources. The public should be provided more information on this line item on why this is a higher priority.

Most of the transportation dollars goes towards bike projects (\$58M out of \$69.6M, as noted below), but the issues are in the major arteries and intersections. So the City should be investing in roadway improvements and major intersections, which is also the preferred option by the OpenGov Survey respondents.

6. Cost Estimates of CIP projects: The cost estimates for CIP projects has had huge escalations from the time it is projected in the budget/master plans to implementation. For example,

Bike Projects: Total Cost for Tier 1, Tier 2, Tier 3 in 2016 Bike Plan - \$18 Million
<https://www.cupertino.org/home/showdocument?id=3479#page=99>

Current Bike Transportation Plan projects costs as presented to council on Apr 2nd, 2019
- Total \$58,329,555

<https://cupertino.legistar.com/View.ashx?M=F&ID=7127004&GUID=9747DCED-83F9-4483-AE83-0ABC2B1E1325>

The cost has escalated from \$18 million to \$58 Million in less than 3 years, which is 322% higher than original estimates. The city should come up with a better way of estimating project costs. If you add up all city wide transportation Projects in the list, the cost is \$69.6 million . Bike projects alone is \$58.3 million which is 83% of total cost which is lopsided when there only 0.7% bike commuters in the City per 2016 Bike plan.

So when the City Council makes projects decisions based on the project estimates, the dollars quoted should be within a reasonable range so the Council can make right decisions in prioritizing projects that benefits the city at large.

Thank You,

Ilango Ganga
Cupertino Resident
