- We have received the Community Grant Funding applications for the year and have begun reviewing them. Eleven applications were received this year, and all applicants attended our March commission meeting to give a brief report on their organizations and projects and for the commission to ask questions about the applications. In April we will make our recommendations on funding to the City Council.
- We reviewed the Memorial Park Specific Plan design and the Parks & Recreation System Master Plan (PRSMMP) Mitigated Negative Declaration (MND) and agreed to recommend that the City Council approve them.

## **PLANNING COMMISSION**

- The newly elected Chair is David Fung and Vice Chair is Seema Lindskog. There were no new commissioners appointed this year, with Commissioners Scharf, Madhhipatla and Mistry continuing their service.
- The Planning Commission recently reviewed extensions of previously approved development agreements for two hotel developments. These projects, one located on Wolfe Road adjacent to Apple Park, and the other on North De Anza boulevard, were originally approved with General Plan Amendments in 2019 and are approaching expiration in the next year. As presented, there were no major changes to the approved projects, except for incentives to encourage construction of the hotels on a faster timeline. The hotel operations would generate millions in Transient Occupancy Tax annually for the City. The Commission recommended that the City Council approve these extensions with a change to require the hotels to consider amending the agreement to allow the City to implement bird safe and dark sky requirements.
- We anticipate reviewing the revised Housing Element soon. The Housing Element is a required Chapter of the City's General Plan, which is required to be updated on an eight-year cycle by state law. This document is the principal document which sets housing policy for the City and identifies housing needs, resources, and sites for housing development to accommodate the City's fair share of housing needs. The state has informed the City that it needs to accommodate (zone for) 4,588 units that are anticipated to be constructed by 2031.

The State further requires that 100% of vehicle purchases be zero-emissions vehicles starting in 2027.
