- b. That the design and improvements of the proposed subdivision are consistent with the General Plan.

The off-site improvements are consistent with the City's General Plan policies related to pedestrian and bicycle safety etc. by improving the street frontage, and minimizing curb-cuts.

The subject property is physically suitable in size and shape in conformance to development standards and is appropriately configured to accommodate a multi-unit mixed-used development.

- e. That the design of the subdivision or the proposed improvements are not likely to cause substantial environmental damage nor substantially and avoidably injure fish and wildlife or their habitat.

The proposed subdivision design and improvements are not likely to cause serious public health problems nor substantially injure fish and wildlife or their habitat because the property is a developed site and located in an urbanized area where residential land use is allowed.

The proposed development is designed to meet development standards and applicable codes and regulations. Any potential environmental impacts associated with the project are to be mitigated as part of the project approval. Therefore, the design of the subdivision and necessary improvements are not likely to cause serious public health concerns.

- g. That the design of the subdivision and its associated improvements will not conflict with easements acquired by the public at large for access through or use of property within the proposed subdivision.
