

CITY OF CUPERTINO
10300 Torre Avenue
Cupertino, California 95014

DRAFT RESOLUTION

OF THE FINE ARTS COMMISSION OF THE CITY OF CUPERTINO
APPROVING THE PROPOSED ART AT THE APPLE PARK VISITOR
CENTER LOCATED AT 10600 N. TANTAU AVENUE

SECTION I: PROJECT DESCRIPTION

Application No.: Public Art (ASA-2022-001)
Applicant: David Kang (Apple, Inc.)
Location: 10600 N. Tantau Avenue (APN: 316-06-062)

SECTION II: FINDINGS

WHEREAS, the Fine Arts Commission of the City of Cupertino received an application for an Architectural and Site Approval to consider public art at the Apple Park Visitor Center; and

WHEREAS, artwork in private developments is required per Cupertino Municipal Code 19.148; and

WHEREAS, the necessary public notices have been given as required by the Procedural Ordinance of the City of Cupertino, and the Fine Arts Commission has held at least one public meeting with regard to the application; and

WHEREAS, pursuant to the provisions of the California Environmental Quality Act of 1970 (Public Resources Code section 21000 et seq.) ("CEQA"), together with the State CEQA Guidelines (California Code of Regulations, Title 14, Section 15000 et seq.) (hereinafter, "CEQA Guidelines"), the City staff has independently studied the proposed Project and has determined that the Project is exempt from environmental review pursuant to the categorical exemption in CEQA Guidelines section 15303 (New Construction or Conversion of Small Structures) and/or Section 15304 (Minor Alterations to Land); and

WHEREAS, the applicant has met the burden of proof required to support said application; and

WHEREAS, pursuant to Cupertino Municipal Code Section 19.148.060 Design Criteria and Artist Qualifications and Section 19.148.060 Architectural and Site Approval, the Fine Arts Commission finds as follows with regard to this application:

1. The artwork is of a nature specified in Section 19.148.030.

Section 19.148.030 (A) identifies sculpture as a permitted artwork.

2. The artwork requirement is to be satisfied with one significant piece of artwork, except that the requirement may be met with several works of art when specifically found by the Fine Arts Commission to fulfill the intent of this chapter. The artwork shall be an integral part of the landscaping and/or architecture of the buildings.

The artwork consists of one primary sculpture located along the front property line along N. Tantau Avenue. The location of the artwork at the front property line in an open area makes the artwork an integral component of the landscaping and site.

3. The artwork shall be easily visible from the public street and be located in an area specifically designated on the project site plan. Appropriate locations include, but are not limited to, entryways to the property, greenbelts, and building exteriors. The artwork must be in permanent view to motorists and pedestrians. Artwork located at the entrance to a development should make a major statement and be visible from the main parking lot, if any. When located in proximity to major traffic thoroughfares, the artwork should be at a motorist's scale and oriented toward the view corridor of the motorist.

The artwork would be visible to both motorists and pedestrians who travel by the site because the artwork shall be located in an area along the street frontage of N. Tantau Avenue, a public street.

4. The composition of the artwork shall be of permanent materials requiring a low level of maintenance. Materials used shall be durable and resistant to graffiti and the effects of weather.

The materials are permanent materials requiring a low level of maintenance due to robust solid-cast glass. The textured glass surface allows for a degree of water staining and dust to be imperceptible. Glass posts withstand weather and minor physical impact. The concealed LED lighting is integrated below grade, with the control units located indoors in a nearby service building with cabling below ground. The lights have an approximate 20-year durability. A preliminary care and maintenance plan was approved under DIR-2021-022 and will be provided as part of the building permit submittal.

5. The nature and style of the artwork shall be considered in the context of other artwork in the surrounding area in order to encourage a wide range of art styles and materials,

and to create a balanced and interesting aesthetic appearance. The developer is encouraged to give preference to artists living or working in the San Francisco Bay area, and to avoid using artists whose work is already displayed as public art within the City of Cupertino boundaries.

The artwork meets the minimum requirements because the proposal adds to the wide range of styles and materials currently represented in Cupertino's catalog of public art. Although the artist is not local to the San Francisco Bay Area, she draws from her experience as an international artist based out of the United Kingdom and has not been previously commissioned for other works in Cupertino or the Bay Area and therefore adds to the diversity of artists.

6. Artwork shall be identified by an appropriate plaque or monument measuring not less than eight inches by eight inches. The plaque shall be made of a durable, permanent material and shall be placed near the artwork, and shall list the date of installation, title and artist, and medium.

The artwork is identified by three plaques on elevated stainless steel clad cylinder podiums, one at each entry pathway. The plaques measure approximately 12" in diameter and are made from steel with a powder coating matte finish.

7. The proposed artwork shall meet the criteria for review as set forth in the City of Cupertino Public Art Program Guidelines for Selection of Public Art, as originally adopted by the City Council Resolution No. 05-040, or as later amended.

The art program meets the criteria stated within City of Cupertino Public Art Program Guidelines for Selection of Public Art, which are incorporated into the findings stated above in Sections II 1-5 and/or incorporated into the conditions of approval in Section III of this resolution.

8. The proposal, at the proposed location, will not be detrimental or injurious to property or improvements in the vicinity, and will not be detrimental to the public health, safety, general welfare, or convenience:

The proposal proposes public artwork at an existing visitor center. The proposal will activate the space by featuring accessible pedestrian pathways to and through the artwork and improve the useability of the site. No modifications are proposed for the existing buildings or remainder of the site. Further, the project will replant trees and reinstall native landscaping affected by construction in their original locations around the artwork. Therefore, the proposed artwork will not be detrimental or injurious to property or improvements in the vicinity, and will not be detrimental to the public health, safety, general welfare, or convenience.

9. The proposal is consistent with the purposes of Chapter 19.168, the General Plan, any specific plan, zoning ordinances, applicable planned development permit, conditional use permits, variances, subdivision maps or other entitlements to use which regulate the subject property including, but not limited to, adherence to the following specific criteria:

- a) Abrupt changes in building scale should be avoided. A gradual transition related to height and bulk should be achieved between new and existing buildings.

The project scope does not include an increase in floor area or modifications to any of the buildings onsite. The artwork is proposed in an area onsite where there are currently no structures; however, the public artwork is by its nature intended to attract visitors and pedestrians to the site and encourage activation of space. Additionally, the design maintains a human scale and is relative to the surrounding olive trees within the grove.

- b) In order to preserve design harmony between new and existing buildings and in order to preserve and enhance property values, the materials, textures and colors of new building should harmonize with adjacent development by being consistent or compatible with design and color schemes with the future character of the neighborhoods and purposes of the zone in which they are situated. The location, height and materials of walls, fencing, hedges and screen planting should harmonize with adjacent development. Unsightly storage areas, utility installations and unsightly elements of parking lots should be concealed. The planting of ground cover or various types of pavements should be used to prevent dust and erosion, and the unnecessary destruction of existing healthy trees should be avoided. Lighting for development should be adequate to meet safety requirements as specified by the engineering and building departments and provide shielding to prevent spill-over light to adjoining property owners.

The proposed artwork is designed to be harmonious with the surrounding landscape and is compatible with the welcome center as well as other buildings within Apple Park due to its emphasis on glass design and construction. The proposed glass-cast cylinders and pedestrian pathways harmonize with the surrounding landscape and provide new ways to experience the site. Existing olive trees outside the construction area will be preserved, and those that are located within the path of construction will be removed, preserved, and replanted upon completion in their original locations. Existing landscaping disturbed by construction will also be replanted like for like. Lighting for the artwork are low-voltage LEDs and will be diffused through the cast-glass cylinders. Lighting standards have been conditioned to prevent intrusive effects on adjacent properties.

- c) The number, location, color, size, height, lighting and landscaping of outdoor advertising signs and structures have been designed to minimize traffic hazard, positively affect the general appearance of the neighborhood and harmonize with adjacent development.

The artwork is identified by a total of three plaques at pathway entrances as required by CMC Section 19.148.060. They are made of durable, permanent materials and are integrated into the artwork design and overall site.

- d) With respect to new projects within existing residential neighborhoods, new development should be designed to protect residents from noise, traffic, light and visually intrusive effects by use of buffering, setbacks, landscaping, walls and other appropriate design measures.

This application is not a new development project and the artwork itself maintains sufficient setback along the front setback, approximately 30 feet from the closest point of the sculpture and approximately 147'-7" from the closest residential property.

NOW, THEREFORE, BE IT RESOLVED:

That after careful consideration of the maps, facts, exhibits, testimony, staff's report and presentation, and other evidence submitted in this matter, subject to the conditions which are enumerated in this Resolution beginning on PAGE 4 thereof,

The application for an Architectural and Site Approval, Application no. ASA-2022-001 for Public Artwork is hereby approved and that the subconclusions upon which the findings and conditions specified in this resolution are based and contained in the Public Meeting record concerning Application no. ASA-2022-001 as set forth in the Minutes of the Fine Arts Commission Meeting of May 23, 2022 and are incorporated by reference as though fully set forth herein.

SECTION III: CONDITIONS ADMINISTERED BY THE COMMUNITY DEVELOPMENT DEPARTMENT

1. APPROVED EXHIBITS

Approval is based on the Fine Arts application prepared by Apple, Inc., titled "Project Mirage Fine Arts Commission Submission Compiled Set" consisting of 53 pages, except as may be amended by conditions in this resolution.

2. ACCURACY OF PROJECT PLANS

The applicant/property owner is responsible to verify all pertinent property data including but not limited to property boundary locations, building setbacks, property size, building square footage, any relevant easements and/or

construction records. Any misrepresentation of any property data may invalidate this approval and may require additional review.

3. ANNOTATION OF THE CONDITIONS OF APPROVAL

The conditions of approval set forth shall be incorporated into and annotated on the first page of the building plans.

4. BUILDING AND FIRE CODE

The applicant shall apply for and obtain building permits to allow the construction of the approved project. The applicant shall provide information and plans to allow the Building Official and the Fire Marshall, or their designee, to determine that the proposed plans comply with Building and Fire Codes in effect at the time of application for a building permit.

5. CONSULTATION WITH OTHER DEPARTMENTS

The applicant is responsible to consult with other departments and/or agencies with regard to the proposed project for additional conditions and requirements. Any misrepresentation of any submitted data may invalidate an approval by the Community Development Department.

6. DEMOLITION REQUIREMENTS

All demolished building and site materials shall be recycled to the maximum extent feasible subject to the Building Official. The applicant shall provide evidence that materials were recycled prior to occupancy.

7. DUST CONTROL

The following construction practices shall be implemented during all phases of construction for the proposed project to prevent visible dust emissions from leaving the site:

- a. Water all exposed surfaces areas (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) at least twice daily and more often during windy periods to prevent visible dust from leaving the site; active areas adjacent to windy periods; active areas adjacent to existing land uses shall be kept damp at all times, or shall be treated with non-toxic stabilizers or dust palliatives.
- b. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- c. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- d. All vehicle speeds on unpaved roads shall be limited to 15 mph.

- e. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- f. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- g. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- h. Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

The applicant shall incorporate the City's construction best management practices into the building permit plan set prior to any grading, excavation, foundation or building permit issuance.

8. EXTERIOR BUILDING MATERIALS/TREATMENTS

The final building exterior plan shall closely resemble the details shown on the original approved plans. Final building exterior treatment plan (including but not limited to details on exterior color, materials, architectural treatments, doors, windows, lighting fixtures, and/or embellishments) shall be reviewed and approved by the Director of Community Development prior to issuance of building permits to ensure quality and consistency. Any exterior changes determined to be substantial by the Director of Community Development shall either require a modification to this permit or a new permit based on the extent of the change.

9. ARTWORK IDENTIFICATION

Artwork shall be identified by an appropriate plaque or monument measuring not less than eight inches by eight inches. The plaque shall be made of a durable, permanent material and shall be placed near the artwork, and shall list the date of installation, title and artist, and medium.

10. PERMANENT INSTALLATION

The artwork shall be a permanent, maintained fixed asset of the property, and statements to this fact shall be attached or recorded to the existing CC&R's or

otherwise recorded on the property deed, to advise subsequent property owners of their obligations to maintain the artwork. Artwork may not be removed without replacement with all necessary City Permits or the express written approval from the Fine Arts Commission or body governing such matters in the future.

11. MAINTENANCE

Materials used shall be durable and resistant to graffiti and the effects of weather.

12. DUPLICATION

To assure that the art work will not be duplicated, the artist shall be asked to warrant that the art work is unique and an edition of one, unless stated to the contrary in the contract and disclosed to the Fine Arts Commission. Multiples shall be considered for selection at the discretion of the Fine Arts Commission.

13. LIGHTING PLAN

Applicant shall provide to staff the proposed lighting plan for the art program. The plan shall include, but is not limited to, lighting specifications such as location, size, type, color, controls, timers, and appropriate illumination levels. The Director of Community Development, or staff designee, shall review and approve the lighting plan.

14. DARK SKY COMPLIANCE

Alternative lighting standards for increased color temperature (no more than 4,000K) are approved pursuant to review and approval by the Fine Arts Commission. Prior to the issuance of Building Permits, the applicant shall provide to staff the lighting plan for the art program to comply with the remaining development standards of Cupertino Municipal Code (CMC) Section 19.102.040 Outdoor Lighting Requirements, including project lighting to be fully extinguished or motion sensor operated after 11:00 p.m., pursuant to CMC Section 19.102(B)(4). In the event changes are proposed from the approved plans, said changes must be reviewed and approved by the Director of Community Development or their designee. The applicant shall provide all documentation required to determine compliance with the Municipal Code.

15. PUBLIC ACCESS TO ARTWORK

The artwork shall remain in permanent view to pedestrians and motorists and remain accessible to both pedestrians in the public right-of-way and to visitors of Apple Park. No fencing or closing off the public artwork is permitted that would

prohibit the visibility and/or access to the artwork as intended by the artist and described in this application.

16. GRADING AND CONSTRUCTION HOURS AND NOISE LIMITS

- a. All grading activities shall be limited to the dry season (April 15 to October 1), unless permitted otherwise by the Director of Public works.
- b. Construction hours and noise limits shall be compliant with all requirements of Chapter 10.48 of the Cupertino Municipal Code.
- c. Grading, street construction, underground utility and demolition hours for work done more than 750 feet away from residential areas shall be limited to Monday through Friday, 7 a.m. to 8 p.m. and Saturday and Sunday, 9 a.m. to 6 p.m. Grading, street construction, demolition or underground utility work within 750 feet of residential areas shall not occur on Saturdays, Sundays, holidays, and during the nighttime period as defined in Section 10.48.053(b) of the Municipal Code.
- d. Construction activities shall be limited to Monday through Friday, 7 a.m. to 8 p.m. and Saturday and Sunday, 9 a.m. to 6 p.m. Construction activities are not allowed on holidays as defined in Chapter 10.48 of the Municipal Code. Nighttime construction is allowed if compliant with nighttime standards of Section 10.48 of the Cupertino Municipal Code.
- e. Rules and regulations pertaining to all construction activities and limitations identified in this permit, along with the name and telephone number of an applicant appointed disturbance coordinator, shall be posted in a prominent location at the entrance to the job site.
- f. The applicant shall be responsible for educating all contractors and subcontractors of said construction restrictions.

The applicant shall comply with the above grading and construction hours and noise limit requirements unless otherwise indicated.

17. LANDSCAPE PROJECT SUBMITTAL

Prior to issuance of building permits, the applicant shall submit a full Landscape Documentation Package, per sections 14.15.050 A, B, C, and D of the Landscape Ordinance, **for projects with landscape area 500 square feet or more** or elect to submit a Prescriptive Compliance Application per sections 14.15.040 A, B, and C **for projects with landscape area between 500 square feet and 2,500 square feet**. The Landscape Documentation Package or Prescriptive Compliance Application shall be reviewed and approved to the satisfaction of the Director of Community Development prior to issuance of building permits, and additional requirements per sections 14.15.040 D, E, F, and G or 14.15.050 E, F, G, H, and I will be required to be reviewed and approved prior to final inspections.

18. LANDSCAPE INSTALLATION REPORT

The project is subject to all provisions delineated in the Landscape Ordinance (CMC, Chapter 14.15). A landscape installation audit shall be conducted by a certified landscape professional after the landscaping and irrigation system have been installed. The findings of the assessment shall be consolidated into a landscape installation report.

The landscape installation report shall include, but is not limited to: inspection to confirm that the landscaping and irrigation system are installed as specified in the landscape and irrigation design plan, system tune-up, system test with distribution uniformity, reporting overspray or run-off that causes overland flow, and preparation of an irrigation schedule.

The landscape installation report shall include the following statement: "The landscape and irrigation system have been installed as specified in the landscape and irrigation design plan and complies with the criteria of the ordinance and the permit."

19. LANDSCAPE AND IRRIGATION MAINTENANCE

Per the Landscape Ordinance (CMC, Chapter 14.15), a maintenance schedule shall be established and submitted to the Director of Community Development or his/her designee, either with the landscape application package, with the landscape installation report, or any time before the landscape installation report is submitted.

- a. Schedules should take into account water requirements for the plant establishment period and water requirements for established landscapes.
- b. Maintenance shall include, but not be limited to the following: routine inspection; pressure testing, adjustment, and repair of the irrigation system; aerating and de-thatching turf areas; replenishing mulch; fertilizing; pruning; replanting of failed plants; weeding; pest control; and removing obstructions to emission devices.
- c. Failed plants shall be replaced with the same or functionally equivalent plants that may be size-adjusted as appropriate for the stage of growth of the overall installation. Failing plants shall either be replaced or be revived through appropriate adjustments in water, nutrients, pest control or other factors as recommended by a landscaping professional.

20. NESTING BIRDS

Nests of raptors and other birds shall be protected when in active use, as required by the federal Migratory Bird Treaty Act and the California Department of Fish and Game Code.

- a. Construction and tree removal/pruning activities shall be scheduled to avoid the nesting season to the extent feasible. If feasible, tree removal and/or pruning shall be completed before the start of the nesting season to help preclude nesting. The nesting season for most birds and raptors in the San Francisco Bay area extends from February 1 through August 31. Preconstruction surveys (described below) are not required for tree removal or construction activities outside the nesting period.
- b. If construction activities and any required tree removal occur during the nesting season (February 1 and August 31), a qualified ornithologist shall be required to conduct surveys prior to tree removal or construction activities. Preconstruction surveys shall be conducted no more than 14 days prior to the start of tree removal, pruning or construction. Preconstruction surveys shall be repeated at 14-day intervals until construction has been initiated in the area after which surveys can be stopped. During this survey, the ornithologist shall inspect all trees and other possible nesting habitats in and immediately adjacent to the construction areas for nests.
- c. If the survey does not identify any nesting birds that would be affected by construction activities, no further mitigation is required. If an active nest containing viable eggs or young birds is found sufficiently close to work areas to be disturbed by these activities, their locations shall be documented, and protective measures implemented under the direction of the qualified ornithologist until the nests no longer contain eggs or young birds.
- d. Protective measures shall include establishment of clearly delineated exclusion zones (i.e., demarcated by identifiable fencing, such as orange construction fencing or equivalent) around each nest location as determined by the qualified ornithologist, taking into account the species of birds nesting, their tolerance for disturbance and proximity to existing development. In general, exclusion zones shall be a minimum of 300 feet for raptors and 75 feet for passerines and other birds. The active nest within an exclusion zone shall be monitored on a weekly basis throughout the nesting season to identify signs of disturbance and confirm nesting status. The radius of an exclusion zone may be increased by the qualified biologist, if project activities are determined to be adversely affecting the nesting birds. Exclusion zones may be reduced by the qualified biologist only in consultation with California Department of Fish and Wildlife. The protection measures and buffers shall remain in effect until the young have left the nest and are foraging independently or the nest is no longer active.
- e. A final report on nesting birds and raptors, including survey methodology, survey date(s), map of identified active nests (if any), and protection measures (if required), shall be submitted to the Planning Manager, through the building

permit review process, and be completed to the satisfaction of the Community Development Director prior to the start of grading.

21. TREE AND LANDSCAPE MAINTENANCE

The property owner shall be responsible for ensuring that the existing trees and newly planted trees are properly maintained including but not limited to ensuring that there is adequate soil drainage, that the soil is well-aerated, and irrigation systems are thoroughly tested to provide sufficient water to landscaped areas while reducing water waste.

22. TREE PROTECTION

As part of the demolition or building permit drawings, a tree protection plan shall be prepared by a certified arborist for the trees to be retained. In addition, the following measures shall be added to the protection plan:

- For trees to be retained, chain link fencing and other root protection shall be installed around the dripline of the tree prior to any project site work.
- No parking or vehicle traffic shall be allowed under root zones, unless using buffers approved by the Project Arborist.
- No trenching within the critical root zone area is allowed. If trenching is needed in the vicinity of trees to be retained, the City's consulting arborist shall be consulted before any trenching or root cutting beneath the dripline of the tree.
- Wood chip mulch shall be evenly spread inside the tree projection fence to a four-inch depth.
- Tree protection conditions shall be posted on the tree protection barriers.
- Retained trees shall be watered to maintain them in good health.
- A covenant on the property shall be recorded that identifies all the protected trees, prior to final occupancy.

The tree protection measures shall be inspected and approved by the certified arborist prior to issuance of building permits. The City's consulting arborist shall inspect the trees to be retained and shall provide reviews prior to issuance of demolition, grading or building permits. A report ascertaining the good health of the trees mentioned above shall be provided prior to issuance of final occupancy.

23. INDEMNIFICATION

As part of the application, to the fullest extent permitted by law, the applicant shall agree to indemnify, defend with the attorneys of the City's choice, and hold harmless the City, its City Council, and its officers, employees, and agents (collectively, the "indemnified parties") from and against any liability, claim, action, cause of action, suit, damages, judgment, lien, levy, or proceeding

(collectively referred to as “proceeding”) brought by a third party against one or more of the indemnified parties or one or more of the indemnified parties and the applicant related to any Ordinance, Resolution, or action approving the project, the related entitlements, environmental review documents, finding or determinations, or any other permit or approval authorized for the project. The indemnification shall include but not be limited to damages, fees, and costs awarded against the City, if any, and cost of suit, attorneys’ fees, and other costs, liabilities, and expenses incurred in connection with such proceeding whether incurred by the Applicant, the City, or the parties initiating or bringing such proceeding.

The applicant shall agree to (without limitation) reimburse the City its actual attorneys’ fees and costs incurred in defense of the litigation. Such attorneys’ fees and costs shall include amounts paid to the City’s outside counsel and shall include City Attorney time and overhead costs and other City staff overhead costs and any costs directly related to the litigation reasonably incurred by City. The applicant shall likewise agree to indemnify, defend, and hold harmless the indemnified parties from and against any damages, attorneys’ fees, or costs awards, including attorneys’ fees awarded under Code of Civil Procedure section 1021.5, assessed or awarded against the indemnified parties. The Applicant shall cooperate with the City to enter a Reimbursement Agreement to govern any such reimbursement.

The Applicant shall agree to (without limitation) reimburse the City for all costs incurred in additional investigation or study of, or for supplementing, redrafting, revising, or amending, any document (such as an Environmental Impact Report, negative declaration, specific plan, or general plan amendment) if made necessary by proceedings challenging the project approvals and related environmental review, if the applicant desires to continue to pursue the project.

The Applicant shall agree that the City shall have no liability to the Applicant for business interruption, punitive, speculative, or consequential damages.

24. NOTICE OF FEES, DEDICATIONS, RESERVATIONS, OR OTHER EXACTIONS

The Conditions of Project Approval set forth herein may include certain fees, dedication requirements, reservation requirements, and other exactions.

SECTION IV: CONDITIONS ADMINISTERED BY THE PUBLIC WORKS DEPARTMENT

25. C.3 REQUIREMENTS

Project shall stratify C.3 stormwater treatment requirements. At building permit application stage, the following items will need to be addressed:

- a. Provided revised Stormwater Management Plan, including revised stormwater treatment/BMP plan for the entire project site, revised stormwater calculations, engineer's and 3rd party certifications, and revised civil and landscape plans.
- b. Amendment to the Stormwater Facilities Operation, Maintenance and Easement Agreement as required.

PASSED AND ADOPTED this 23rd day of May 2022 at a noticed Public Meeting of the Fine Arts Commission of the City of Cupertino, State of California, by the following vote:
