PARKS AND RECREATION COMMISSION STAFF REPORT

Meeting: February 1, 2018

Subject

International Cricket Ground – Feasibility Study

Recommended Action

Receive the feasibility study prepared by Callander Associates, Landscape Architects.

Description

The purpose of this study are as follows:

1. Identify the required playing area, supporting facilities, spectator seating and accessibility to support an International Cricket facility
2. Identify from the City's inventory of parks and schools the most suitable site(s), if any, and
3. Identify existing uses that would be displaced at the potential site(s) if an International Cricket Ground were to be built

Discussion

While the sport of cricket has been increasing in popularity in the U.S. and in the San Francisco Bay Area, there is currently no dedicated field for play in Cupertino to meet the requirements for adult international play. Library Field is only able to meet the needs of youth players. A feasibility study to evaluate possible locations for an international scale field provides base information for a potential future improvement project.

Sustainability Impact

This feasibility study does not have any sustainability impact.

Fiscal Impact

Funds for this feasibility study are allocated in the FY18 Capital Improvement Program.
