Discussion and Fiscal Impact

The attached slides and investment portfolio listing comprise the Treasurer's Investment Report. Together they show the composition of the portfolio; total portfolio yield in comparison to the Local Agency Investment Fund (LAIF), the 1-year Treasury, and the 2-year Treasury; diversification within the government agency securities; and portfolio compliance with the City's Investment Policy.

For quarter ending March 31, 2018, the market value of the City's portfolio total \$136.7 million which is \$6.1 million higher than last quarter. The portfolio's average yield was 1.00% which is a decrease from its 1.06% yield of the previous quarter ending December 31, 2017. The average length to maturity increased from 0.81 to 0.89 years. The LAIF yield increased to 1.42% from last quarter's yield of 1.24%.

LAIF's balance was \$30.7 million which is in compliance with the City Investment Policy and state code. LAIF's same- or next-day liquidity insures that the City is able to pay its obligations for the next six months and also provides strong liquidity in the short, intermediate, and long-term horizons. Market values on individual securities in the investment portfolio are provided by Wells Fargo Bank Institutional Trust Services using valuations from Interactive Data Pricing and Reference Data, Inc.
