PARKS AND RECREATION COMMISSION STAFF REPORT

Meeting: June 7, 2018

Subject

Inclusive Playground Feasibility Study

Recommended Action

Receive the feasibility study prepared by Verde Design, and provide direction.

Background

The city has retained Verde Design to conduct a study to determine the feasibility of creating an inclusive play area in Cupertino. There is currently no all-inclusive play area in the city. The purpose of this portion of study is to identify sites that are suitable for locating an inclusive play area, conduct a preliminary evaluation of the potential sites, and to determine site(s) that warrant further consideration for inclusive play.

Discussion

The attached study presents the results of the feasibility analysis to date. The findings will be presented for feedback by the public and the Parks and Recreation Commission. For locations that are deemed suitable for further evaluation, the consultant team will develop sample conceptual plans and draft cost estimates which will be brought to the Commission for consideration.

Sustainability Impact

This feasibility study does not have any sustainability impact.

Fiscal Impact

Funds for this feasibility study are allocated in the FY18 Capital Improvement Program.
