

EXHIBIT 3: *Cupertino Station (I-280/Wolfe Road)*

Cupertino Station: A transformative multi-modal transit facility built over I-280.

A terminal for high-capacity fixed guideway transit connecting Cupertino at Wolf Road and I-280. Serving as a transit terminal, public space, bicycle/pedestrian connector, shared-use mobility hub, with automated bicycle parking, lockers, staffed bicycle repair center and carbon capture technology, Cupertino Station would be a state-of-the-art transportation facility.
