PARKS AND RECREATION COMMISSION STAFF REPORT

Meeting: September 6, 2018

Subject

Initiate design for a multi-modal trail along the old haul road between McClellan Road and Linda Vista Park, east of Deep Cliff Golf Course.

Recommended Action

Provide feedback to the Public Works Department on commencing conceptual design of the project.

Description

The City of Cupertino's General Plan, 2016 Bicycle Transportation Plan and the 2018 Pedestrian Transportation Plan envision an open space linkage from McClellan Road to Linda Vista Park, along the old haul road located along the eastern edge of the Deep Cliff Golf Course. This section would be a continuation of the existing trail that runs through Blackberry Farm and McClellan Ranch, extending the trail south and linking Linda Vista Park.

Discussion

The haul road parcel that runs between McClellan Road and Linda Vista Park was recently acquired by a Cupertino resident who would be willing to dedicate the property to the City for bicycle and pedestrian trail purposes if the City is willing and able to design, fund and approve construction of a trail project by December 31st, 2019. The initial steps in this process would consist of investigatory work and the creation of conceptual plans to verify feasibility, anticipated construction costs and to enable early discussions with adjacent property owners. It is anticipated that upon completion of the conceptual design this spring, a recommendation will be made to include final design and construction in the 2018-19 Capital Improvement Program budget.

Fiscal Impact

Early investigatory work would fall within the Public Works preliminary engineering budget.
