Vice Chair Wo's Comments
We used four old city work plan items to categorize our work plan items.

Operational Efficiency	Public Engagement & Transparency	Public & Private Partnership	Community Livability & Sustainability Infrastructure

I reviewed city new priority and think "**Community Engagement** (ranked the 3rd priority), **Develop Cupertino Marketing Program** (ranked the 6th priority) and **Event Support** (ranked the 12th priority) can replace the three old categories. I re-arranged the items accordingly under three new categories name.

And for operational efficiency, it is no longer showed as priority from city work plan but I think it is very important. City does have items "Commissions and Committees (Mergers? New?)" and "Development Accountability" to have the signs of the importance. I kept it as it is.

That is said, I think the work plan items we've developed earlier still align with new city work plan.

Regarding new items, city plan has below items:

- Develop funding strategy for implementation of major projects identified as priorities in completed master plans

- Councilmember Webpages and Outreach

I assumed the master plans are for the housing projects. If it is not just housing projects, I'd like to know what are the master plans are about and if library funding of projects are included.

And we might want to lobby council members to include library issues in their webpages for better community outreach.
