**Subject:** AT&T Application for CU Sports Center

Dear Gian Paolo Martire, Project Manager

Re: AT&T application to locate a personal wireless service facility....at The Cupertino Sports Center located @ 21113 Stevens Creek Blvd.

Our home is in The Commons and within the 500' of the proposed treepole/16 panel antenna and emergency power generator.

My questions: 1.) We use Verizon phones. Will the proximity of the AT&T facility interfere with our service? **Service is not anticipated to be interrupted. The City has a similar cell tower at City Hall (Verizon) and service for other carriers service has not been disturbed. These towers, such as the City Hall tower, are built to be collocate different carriers (mostly two).**

2.) Our landline, computers & tv are with Comcast. Will the AT&T

facility interfere with reception? **It is not anticipated to disrupt Comcast service.**

3.) Why did the city reject the proposed equipment @ Memorial Park several years ago? **In February of 2010, the City approved the replacement of a 60' tall light pole with a 75' tall cell tower. This tower has 6 antennae and also functions with baseball field lights.**

4.) A few years ago a tall crane was windblown down from the Cupertino Westgate Mall. What guarantee would there be for the safety of the AT&T facility? [State law requires we allow neighboring homes to put dish/satellite antenna on their home with the stipulation if it should fall it cannot fall into the nearby neighbor's yard.] **Safety is the City's concern also. The City has a rigorous approval/permitting process that ensures the cell tower installation meets all prevailing building/safety codes for its erection and continued safe placement. The City Hall Tower being the most recent example of tower installation.**

5.) Are you employed by AT&T? **No, I am an Associate Planner in the Community Development Department in Cupertino.**

Thank you for your time in emailing me answers to the above questions I have upon initially hearing of this project.

Sincerely,

Delores Carson, 10062 Senate Way, Cupertino, CA 95014

Thanks, Gian. Those fake trees are always so funny-looking to me. They never look like they fit in the area and this one certainly doesn't as it towers over all the other trees around it and will be an eyesore for those playing tennis on those nearby courts. Have they looked at putting it on the corner of Stevens Creek and Stelling behind the signage for the Cupertino Sports Center. Seems like that would be less obvious and intrusive.

-Ronny.

Sorry, forgot to answer the second part of your question.

The tower is proposed to be located in the landscape area between the tennis courts and Stelling. See below:
