Criteria Rating System

Preference	Enough space for plots & storage shed	Ability to run water to site for irrigation	Separate from McClellan; will not disrupt neighbors or current users	Safe location for users arriving and leaving park	Site that drains quickly	Lighting to maximize hours of garden use	Low cost to acquire site and develop garden	Users able to carry items to plots; visitors off street	Site is level, no tree roots, & shade from sun
4	Site can hold at least 20 plots & shed	Site has water hook-ups	New section of City - no disturbance to neighbors or current users	Users feel safe in all hours of garden use	No drainage problems are anticipated	Site has existing lighting	Existing City property	Vehicles off street & near plots	Site meets all three conditions listed above
3	15 to 20 plots & shed	Site has water hook-up nearby	Same section of City - no disturbance to neighbors or users	Users only feel safe in daylight hours	Drainage only an issue in the winter	Site has some existing lights	Low cost to acquire site	All vehicles off street but some walking to plots required	Site meets two of the three conditions listed above
2	Less than 15 plots or no shed	Getting water to site will be expensive	Different part of City - disturbs neighbors & current users	Users only feel safe in daytime with others	Drainage will be slow year round	Adding lights is possible	Significant cost to acquire site	Some vehicles off street but some distance from plots	Site meets one of the three conditions listed above
1	Maximum of 10 plots & no shed	Getting water to site is not practical	Same neighborhood and disturbs neighbors & current users	Users do not feel safe visiting site	Drainage will be a constant problem	Adding lights is not practical	Cost will be prohibitive	No vehicles can park off street	Site meets none of the three conditions listed above
